

ON THE CAMPUS

Athletic Association meets at 2:15
Ney McNeely has recovered from an attack of measles.

Faison Witherington is confined in the infirmary with tonsillitis.

Luke Lamb is in the infirmary.

There will be a stag german to-night in the gym. Admission 25 cents. Come!

R. Thompson Webb made a good talk on "Love" before the Thursday night meeting of the Y. M. C. A.

Rev. John S. Moody, of Hickory, will preach in the Episcopal Church tomorrow.

LOST, STRAYED OR STOLEN—A Cambridge Edition of Shakespere and note book. Finder please return to L. N. Taylor, 23 South.

Mrs. Thompson, of Philadelphia, aunt of Mrs. Palmer Cobb, is visiting Dr. and Mrs. Cobb.

Miss Susie Hill, of New York, who has been the guest of Miss Mary Manning for some weeks, left yesterday for Raleigh, where she will visit friends before returning home.

Mr. H. N. Eaton, has as his guests at Pickard's hotel, his parents, Mr. and Mrs. H. E. Eaton, and sister, Miss Grace Eaton, of Eaton, N. Y. This is their second visit to Chapel Hill.

Seniors! See C. B. Hoke at Mrs. Weedon's or at University Press for engraved visiting cards.

The Societies will be called to order at 7:30 o'clock tonight.

Already are to be seen notices posted to see "Mr. So-and-So" at one of the hotels for summer work. Some of these employment agents have attractive propositions to offer students. And from reports of those who have engaged in such work, there is a big opportunity for one to "make good" during the summer months and live an easy life during the next school term.

If for any reason the suits you have ordered this fall do not fit call and see me. W. H. Boger, of Varsity Tailoring Company. Fits here guaranteed.

Mrs. A. A. Kluttz entertained at her home on Thursday afternoon, the Daughters of the Confederacy. It will be of interest to know that the Chapel Hill chapter is planning to aid in the movement, which is now on foot among many of the chapters of this organization, towards the erection of a suitable memorial on the University campus to those University boys who lost their lives during the Civil War. In connection with this, it was thought quite fitting among the ladies of Edenton, that the University Dramatic Club, while giving its entertainment in that town during the last Christmas holidays under the auspices of the Daughters of the Confederacy should indirectly be the instrument of raising funds for this same memorial.

The Chemical Journal Club met Monday night and carried out the following program. Dr. C. H. Herty spoke on several topics, "The Action of Sodium Benzoate," "A Radium Bank," "The New York Chemical Club," "Cotton Seed Oil Flour Bread," "Paint Legislation," "Saponification of Ethyl

Sulphites." W. F. Maupin, "Deep Sea Soundings." L. E. Stacy, "A Mechanical Stirrer." C. S. Venable, "Artificial Light." C. W. Williard, "A Simple Gas Washing Bottle." Eugene Newell, "Flash, Fire and Explosion Mixtures of Carbon Tetrachloride and Naphtha."

This Week at Chapel

Chapel exercises on Monday and Tuesday were conducted by Bishop Strange. No talk was made on Monday, but on Tuesday Bishop Strange spoke on the three great steps laid down by Christ for the true progress of man,—repent, believe, and be baptized. By repenting, a man comes to see things in their right relations, and makes a great step toward a higher life; by believing, a man learns to trust and obey God; and by being baptized, a man comes in touch with his fellowmen, is cheered by them, and becomes more fit for the things high.

On Wednesday morning Dr. Venable made a talk on good manners in public assemblages. Good manners and decent behavior, he said, are among the great things a student ought to know. The chapel belongs to the students, and they may do as they like with it, but unless they act as gentlemen when they gather there, they will not do so in after life, and will bring reproach both on themselves and the institution from which they came.

On Thursday Prof. Patterson made a very interesting talk upon the football question. The speaker read statistics on the number of deaths that occurred last season, showing that the newspaper accounts were greatly exaggerated. The game is, however, exceedingly dangerous, and unless some radical changes are made in the method of play, it is doomed. The matter of changing these rules is most difficult, since everyone has a different suggestion to offer. The action of the Rules Committee is awaited with great interest, as upon its decision the fate of the game rests.

Dr. Herty made the concluding talk for this week. He gave the students two "pictures" to look at and consider. One of them, the answer of three freshmen to the question, "What courses are you going to take?" The other, the life work of a great American chemist, Dr. Atchison. The answer of the freshmen had been, "We are going to take the easiest courses we can find." In striking contrast to this reply is the life of Dr. Atchison, whose work in clay and carbon compounds has been of such great value to American industries. Daunted by nothing, he has spent his life in overcoming by hard work the difficulties he encountered. Dr. Herty made no comment on the two pictures offered, but, as he said, their point was readily seen and appreciated.

SCHOOL OF MEDICINE

Undergraduate Department. The One Hundred and Forty-fifth Session will begin September, 23, 1910. The course of instruction, extending over four annual sessions of eight and one-half months each, is a carefully graded and eminently practical one, beginning with the fundamental branches with full laboratory exercises, proceeding through a comprehensive system of clinical instruction in which ward and bedside instruction and individual work on the part of the students form a large part, and terminating in the Fourth Year with the assignment of students as clinical clerks in the Hospital. A large proportion (more than 80 per cent.) of the graduating classes secure positions as internes in hospitals. Entrance requirements embrace a minimum of two years of college work, including two languages other than English (French or German must be one of these) and at least one year of study with appropriate laboratory work in Physics, General Biology or Zoology and General and Inorganic Chemistry (including Qualitative Analysis).

For Further information, apply to the

Dean of the School of Medicine, University of Pennsylvania, Philadelphia.
