

THE TAR HEEL

OFFICIAL ORGAN OF THE UNIVERSITY OF NORTH CAROLINA ATHLETIC ASSOCIATION

VOL. 19 UNIVERSITY OF NORTH CAROLINA, CHAPEL HILL, N. C., SATURDAY DECEMBER 10, 1910 NO. 24

SENIORS HOLD CLASS BANQUET

THE LAST BANQUET OF THE CLASS OF 1911 A GREAT SUCCESS

Speeches by Faculty Members and Students Entertain Banqueters between Courses. An Excellent Menu

The last banquet of the class of 1911 was held last night at the University Inn. The class was well represented, there being about ninety men present.

The banquet was opened with a happy speech by the toastmaster, Mr. W. A. Dees.

Professor H. H. Williams, the first representative from the faculty to speak, spoke of the great opportunity offered to young men who are willing to work. It is the age of great individuals and of great enterprises. Prof. Williams paid a tribute to our Pennsylvania debaters.

Mr. Harry Solomon responded to Prof. Williams and discussed the relations which exist between the student body and the faculty of the University.

Prof. M. H. Stacy was introduced as a speaker of whom it had been said that he was a "ten thousand dollar lecturer who was abusing his talent." He spoke of the power of the honor system in University life and in after life, and of the self-help spirit which prevails on the campus.

In response to Prof. Stacy, Mr. J. F. Oliver spoke of the past and present of the class, got off some humor in which the faculty was largely involved, and discussed student government vs. faculty government.

Prof. M. C. S. Noble, with characteristic humor, kept the crowd laughing through the greater part of his speech. He spoke seriously of the aims a college man should have and the work that awaits him in life. He held up the life of service as the ideal for the class.

Mr. W. T. Joyner, responding, told some good jokes, and spoke of the unity and good feeling which has existed this year among the members of the senior class. He also urged that a strong pull be made by the class for graduation in full force.

Prof. E. K. Graham, who was on the program, was unable to be present. Dr. Mims, who was present, as one of the specially invited guests from the faculty, was called on and responded with a fine tribute to the Carolina spirit as manifested on the campus and especially after the defeat at Richmond.

The next and last speaker on the program was Mr. Paul Dickson, of the senior class. Mr. Dickson entered a protest against political deals among the students, saying that the present senior class could put an end to them.

When the program arranged was completed, informal speeches were called for. Dr. Raper spoke briefly, expressing his pleasure at being present. Dr. H. V. Wilson also responded and spoke interestingly of the progress made in the last twenty years in the science departments of the University.

The senior class this year departed from the usual custom and invited eight faculty members instead of four. Two of those invited were not able to attend—Prof. Graham and Prof. Wagstaff.

There were numerous witty and elo-

TO ORGANIZE GREATER UNIVERSITY

Dr. Bernard Speaks of Plan by Which the Alumni Are to Be More Effectively Organized

Dr. W. S. Bernard in his address in chapel Wednesday presented a survey of the efforts being made to organize the alumni upon a stronger basis. The loyalty of the Carolina man is proverbial, and is expressed by the phrase, "Once a University man, always a University man." At this University a plan of organization for the alumni has worked itself out, namely, organization by counties or by towns. There are at present about twenty-five or thirty of these local associations. An effort is being made to organize such a club everywhere where there are two or three alumni together to represent Carolina.

Connected with these local associations are the county clubs in the University. Dr. Bernard characterized the county clubs as the most important organizations in the University life, with the possible exception of the literary societies or the Press Club. Dr. Bernard suggested that the county clubs co-operate with the local alumni associations more closely as a means of rendering more effective service to the University. An organized attempt is being made to unite the different local associations in one general federation, to be developed out of the present more or less informal annual gathering of the alumni at the Alumni Banquet each commencement. Dr. Bernard requested, as a special favor, that a list of the county clubs in the University be compiled for the benefit of the committee promoting this alumni organization.

Mr. Stockton Elected to the Council

It was announced in chapel Thursday morning that Mr. R. G. Stockton had been elected by the student body as the new member of the Student Council. The council now consists of eight members.

Dean Graham to Speak

At the regular Tuesday night meeting of the Y. M. C. A. next week, the students will have the opportunity to hear Dean E. K. Graham. The subject of his address will be announced later.

The University of California now claims to have a greater cow than the 23-quart Josephine of the University of Missouri, in Teke Leon, which gives 49 quarts a day.

quent impromptu speeches after the program was finished.

A spirit of good fellowship prevailed. The speeches were unusually good, and everybody came away happy.

Cheese Wafers
Malaga Grapes Bananas Apples
Salted Peanuts Salted Almonds
Light Bread
Unecda Biscuits
Cigars

SECRETARY E. P. HALL DELIVERS LECTURE

Talks Interestingly of the Qualities of the "Second Mile" Man. Examples of These

Last Tuesday night Sec. E. P. Hall, at the Y. M. C. A. auditorium, made an interesting talk on "The Second Mile". He said that it was only after going the second mile that man reached his true development and became useful and happy in life. Mr. Hall spoke of the necessity of work; the compulsion of circumstances; and gave some qualifications a man must have to go the second mile.

He first spoke of the necessity of work. Every man is face to face with some kind of work, whether he will or not. To live man must work (unless he has been left a rich legacy), and he must face it in one of two ways: either as a mere duty, or as a privilege. If a man faces his work as an opportunity for greater development, then he is on the second mile, and work, instead of being drudgery, becomes glorious.

The compulsion of circumstances finds its illustrations in such lives as those of Bunyan, Helen Keller, and Lincoln. These, pressed down by circumstances, were not content with their condition, and were not willing to be relieved of responsibility, and so, despite unfavorable circumstances, rose to positions of power and influence. They went the second mile. The same principle is found in the invalid, who, shut in from the beauties of nature for life, said to her friend: "At first I thought of how I could make the best of my conditions but now I am thinking how I can make the most of them."

Mr. Hall next spoke of some qualifications necessary for going the second mile. First, a man must count the cost; must think the thing through for himself, and then be willing to pay the price. It took Paul three years, in an Arabian desert, to think through the wonderful experience he met with on the road to Damascus and become willing to announce his new life to the world. Had he not been willing to pay the price he would have never passed the first mile post of Christian experience.

Fearlessness is a second qualification. Have the conviction that you are right and then proceed on your way undaunted by any fear. It's the college student who is not afraid to tackle hard propositions, and deals with the difficult problems of his course, that finds an abiding joy in his work and at graduation finds himself ready for life's battles. If he has gone the second mile in college he will not fall by the wayside in life.

Another qualification is grit, stickability or the never die spirit. It's the man who, when defeated, beaten down and crushed, rises to fight again, that experiences the joys of the second mile.

The last and crowning qualification is love. This must be the motive power. Without love the second mile loses its charm. The man whose life is actuated by love becomes the useful, efficient and happy man.

Pember Captain of Scrubs.

A meeting of the scrub football team was held Thursday night and Mr. H. S. Pember was unanimously elected captain for next year.

DISCUSS CHEMISTRY SUBJECTS

91ST MEETING OF THE CHEMICAL JOURNAL CLUB, DR. HALL PRESIDING

Discussions by Messrs. Hall, Cowles, Knight, Stacy, and Dr. Hall. A Large Number of Members Present

The 91st meeting of the Journal Club in Chemistry met on Monday night, Dec. 5, Dr. Robert A. Hall presiding. The following program was given: The First Synthesis of Alcohol, by Roger B. Hall. This consisted of a report by Mr. Hall of an article in the Journal of the Society of Chemical Industry.

Mr. Cowles described a new form of extraction apparatus, such as is used in organic separations.

Mr. R. F. Knight gave a resume of a new method of the estimation of formic acid.

Mr. Stacey then discussed The By-products of Alcoholic Fermentation, explaining in a clear and interesting way the formation of acetaldehyde as one of these by-products.

Dr. Hall then discussed the Progress in Systematic Qualitative Analysis, as described by Professor Mulliken in the Journal of the American Chemical Society. In this report it was shown that there were many difficulties encountered in the attempt to develop a scheme of qualitative analysis for organic compounds, due in part to the great number of carbon compounds. Dr. Hall also called attention to the preparation of some pure free sulphonic acids that would supply a long-felt need in acidimetry.

Despite the very inclement weather, a large number of members of the club were present at the meeting, which was held in room 4 of chemistry hall. The program was essentially organic in the nature of its reports and discussions, yet was of such a nature as to be interesting to all present.

Mitchell Society Meets Tuesday.

The 191st meeting of the Elisha Mitchell Scientific Society will be held in Chemistry Hall, Tuesday, December 13, at 7:30 p. m. Program:

The Regenerative Power of the Cells in Hydroids—Dr. H. V. Wilson.

The Reform of the Calendar—Prof. A. H. Patterson.

DR. ROBERT A. HALL,
Secretary.

University Men at Library Association Meeting

The sixth annual meeting of the North Carolina Library Association was held in Winston, N. C., on Wednesday and Thursday of this week. Addresses were delivered on Thursday morning by Dr. L. R. Wilson, President of the Association; Dr. Edwin Mims, and Prof. Collier Cobb.

Horner Boys, Take Notice

All Horner Military School boys are requested to meet at the Alumni building Saturday, Dec. 10, at 3 p. m., for a picture to go in the Yackety Yack. It is important that each man be there strictly on time.

Johnny Evers, the fast second baseman of the Chicago Nationals, will coach the baseball squad at Annapolis this spring.
