Number 2

THE UNIVERSITY AND TRINITY SPLIT THE RHODES SCHOLARSHIPS

SPRUILL GETS 1920 SCHOLARSHIP
AND BOLICH, OF TRINITY,
GETS 1921

WERE FOURTEEN APPLICANTS

Corydon P. Spruill, of the class of '20, of the University, and W. Bryan Bolich, of the class of '17, of Trinity, won the Rhodes Scholarships from the State of North Carolina for 1920 and 1921 respectively before the State Committee of Selection, composed of President Chase, chairman, President Brewer, of Meredith College, and Professor Gooch, of William and Mary College, and an ex-Rhodes Scholar, Mr. Stuart, an attorney of Big Stone Gap, Virginia, and also an Ex-Rhodes Scholar was to have been a member of the committee, but as he missed his train Dr. Brewer was asked to serve in his stead.

Two men were appointed from the state at this time because of the loss of scholars during the war. Spruill will go into residence in January, 1921, and Bolich in October of 1921. These scholarships were established by the late Honorable Cecil Rhodes in an effort to bring into closer understanding the peoples of the English-speaking race. In addition to the American scholarships, he has endowed others throughout the English-speaking world.

A scholarship is good for three years' study at Oxford University, England, and has a stipend attached of about fifteen hundred dollars annually.

Spruill has made an enviable all-round record since he has been at the University; and was generally regarded as one of the strongest, and most popular men of the class of 1920. He is a member of the Golden Fleece, the senior honor organization; Sigma Upsilon; Phi Beta Kappa, and Pi Kappa Phi. In his sophomore year he was president of his class, and also won his N. C. in the gym. During his senior year he was manager of varsity basketball, president of the Campus Cabinet, and president of the Pan-Hellenic Council.

Six of the fourteen men that appeared before the State Committee were from the University, four were from Trinity, two from Wake Forest and one each from Davidson College and from Atlantic Christian College.

Then men representing the University were Spruill, Anderson, Ashby, Grant, Everett and Shepard. These men were selected from a field of thirteen applicants who applied for admission to represent the University before the State Committee. The University's representatives were selected by a committee composed of Dean Howe, Dean Greenlaw, and Dr. Henderson.

DR. HAMILTON COMES AS ASSISTANT MUSICAL DIRECTOR

HAS TAUGHT AT ASSIUT COLLEGE, EGYPT, AND AT TEXAS

Mr. Thomas H. Hamilton comes to the University this fall as Assistant Director of Music. Mr. Hamilton will offer private instruction in voice and piano to all students who may desire it. As is usual in such work in universities, the fees for this work are less than those charged by private teachers of equal standing, the University bearing part of the expense. Mr. Hamilton will also be in charge of the Glee Club and orchestra this year.

Mr. Hamilton has his B. A. and M. A. from Monmouth College; he has taught in Assiut College, Egypt, and in Texas State University; he comes to the University of North Carolina direct from his foreign war service. He has studied music with several of the best teachers in Chicago and New York.

It is probable that instruction in violin will also be offered this term. Application for this work should be made to Mr. Weaver, who says that an instructor will be provided if the demand warrants it.

OVER THIRTEEN HUNDRED REGISTERED MONDAY NOON

Registration figures, up to noon Monday, as officially announced by Dr. T. J. Wilson, Registrar, show a total of 1,316 matriculates thus far for this term, and adding to this the 1,797 students who pursued work in the Summer School for college credit the grand, though incomplete, total stands at 1,797 for the 1920-21 session. These returns are, however, incomplete, inasmuch as men are still being registered, and indications are that the final total will go well over 1,350 for students attending this term.

The freshman class with over 400 men already registered promises to be a record-breaker, and is to have, apparently, a vast number over any other class in college.

The great number of new men entering the University this year has created a great shortage as to housing accommodations, and has forced the assigning of from three to four men to each room. Every attempt is being made to meet the situation and as yet no one has been turned away.

GEOLOGICAL SURVEY CONDUCTS EXTENSIVE SUMMER FIELD WORK

DR. JOSEPH HYDE PRATT TO RETURN TO CHAPEL HILL AT ONCE

Dr. Joseph Hyde Pratt, director of the North Carolina Geological and Economic Survey, and professor of economic geology in the University, plans to return to Chapel Hill in the next few days from Washington, D. C., where he has been on special duty with the general staff.

The Geological Survey has had a very active field season during the past summer. Several Carolina students have been on duty with the survey during this period. Mr. Jasper L. Stuckey who received his Master of Science degree in geology last commencement has been investigating the structural materials for the survey. Mr. Stuckey has investigated deposits of gravel, sand, clay and stone, including granite, limestone, sandstone, rhyolite, trap, etc. Thus far he has visited all known deposits of such materials in the eastern part of the state, and is at present working in the neighborhood of Salisbury and Greensboro. After visiting several other localities in the western part of the state he will return to Chapel Hill and prepare a report on his investigations as well as take up some work in the University.

Professor Thorndyke Saville of the Engineering Department of the University has been in charge of the water resources division of the Geological Survey during the summer. He has been assisted by Messrs. S. C. Austin of Richfield, and E. S. Teague of Taylorsville, who were both students at the University last year. This field party has made water-power surveys at Pinetops and Angier, and on the Aarar and Fishers Rivers in Surrey County, the Reddie River in Wilkes County, and on certain sections of the French Broad River near Asheville.

Professor T. F. Hickerson of the Highway Department has been in charge of a field party making a plane-table survey of certain sections in Cherokee and Ashe counties. Three University students, R. E. Boyd, L. J. Phillips and L. W. Fischel, assisted Professor Hickerson. They prepared a map to be included in the bulletin on Iron Ores which the Geological Survey is soon to publish.

The Geological Survey during the summer months sends out field parties as it has this year. Students in the Geological and Engineering departments of the University are offered a chance to get some valuable experience in the field by signing up with one of these field parties.

UNIVERSITY RECIPIENT OF VALUABLE LIBRARY OF KEMP P. BATTLE

COLLECTION INCLUDES VALUABLE DOCUMENTS, ENGRAVINGS AND SCRAPBOOKS

The University Library was the recipient in August of some thirteen hundred books: pamphlets; periodicals, bound and unbound; newspapers; engravings; and a number of scrap-books and newspaper clippings from the library of the late Kemp Plummer Battle, '49, the titles being donated to the Library by the Battle family.

Through the receipt of this gift which, if a money value could be placed upon it would amount to several thousand dollars. The Library has been strengthened in four different fields.

First of all the collection is particularly rich in publications relating to the University itself. It includes early volumes of the Magazine, the most complete file in existence of University Catalogues, some commencement programmes, copies of addresses delivered on University occasions and numerous single publications which Dr. Battle utilized in the preparation of his two-volume History of the University. The second distinctive field covered is that of North Carolina history. Among the more important publications in this division are the documents of the convention of 1861, laws of North Carolina from 1800 to 1815, bound volumes of North Carolina newspapers issued from 1860 to 1865, reports of the various railroads of the state, early reports of the Board of National Improvements, journals of the various constitutional conventions of North Carolina and numerous pamphlets covering incidents in North Carolina history.

The third division relates particularly to the Confederacy and publications centering around it. The most important and rarest of these are two volumes of documents of the Confederate States laws of the Confederate States, military orders of the day, Confederate imprints, and miscellaneous newspapers issued in the South during the period of the war.

The fourth division comprises publications concerning the Episcopal Church in North Carolina and of the Episcopal Church in America during the three decades preceding, from 1817 to 1869 together with, embracing and following the Civil War. It includes a complete bound file of the Journal of the North Carolina Diocese. In addition there are a number of lives of Episcopal bishops, collections of sermons and other

VARSITY BACKFIELD MAN TO COACH FRESHMAN SQUAD

GOOD MATERIAL AMONG FIRST YEAR ASPIRANTS FOR BERTHS

Announcement comes from Dr. Robert B. Lawson, Physical Director, that the Compulsory Freshman Athletic rule will be strictly enforced this year, and already the freshman gymnasium classes have begun work. The class is divided in two sections, composed of a hundred and seventy-four men each, the first section holding its first class Monday, the second section convening for the first time Tuesday. The classes will meet three times a week and will be an hour long each day.

Prospects appear to be unusually good for a strong freshman football team this year, and men will be selected from both gymnasium classes to go out for this team. Dr. Lawson announced that men lacking the muscular build, weight, and experience would not be allowed to go out, but would be required instead to take the gymnasium work. About seventy-five candidates are expected to report for the early workouts, which will take place this week, and this large squad will be cut down to about thirty-five men. "Mel" Parker, an old Carolina football star in the backfield, will

WAKE FOREST WILL BE MET IN OPENING GAME OF SEASON ON EMERSON FIELD SATURDAY

SCHOOL OF COMMERCE ENROLLS THIRTY PER CENT OF THE FRESHMEN

SCHOOL INSTITUTED AT THE
UNIVERSITY ONLY LAST
YEAR

ADMINISTRATIVE BOARD SOON

That business is as much a profession to be trained for as law, medicine, or engineering is demonstrated by the increasing popularity of the School of Commerce which, according to figures recently given out by Dean D. D. Carroll, has registered one hundred and forty men among the upper classmen, and about thirty per cent of the freshman class that has just entered.

Considering that the School of Commerce is a very recent addition to the University, having been organized only last year and is just now entering upon its second year of growth, the results thus far are extremely encouraging. Due to its comparative infancy the department has not been as completely organized as the other departments in the University, and plans are now being made in an extensive way for its future. At an early date an administrative board is to be appointed.

The special lectures by prominent men in this and other state, which were a feature last year, will be continued this year and attempts will be made to bring even a larger number of lecturers than formerly to address the students of this school.

THEATRE MAGAZINE HAS ARTICLE ON PLAYMAKERS

THE ARTICLE WAS WRITTEN BY
HETTLEMAN OF THE
JUNIOR CLASS

The Theatre Magazine for October carries an interesting article on "The Carolina Playmakers," by Phillip Hettleman of the junior class, and manager of the Tar Heel.

The article shows the growth of the Playmakers under the direction of Professor Frederick H. Koch both at North Dakota and at Carolina. Extracts from the plays produced last spring the local playhouse, and again before the summer school students, "The Return of Buck Gavin," and "Peggy" are given in the article in which the simple yet real subject of the plays are brought out, and the simplicity of production is emphasized.

Illustrations taken from "Peggy" and "When Witches Ride" were also produced along with the article.

WHAT'S TO HAPPEN AND WHEN

Thursday—Donnell Van Noppen in chapel.

Friday—Dr. Chase in chapel.

Saturday—Carolina vs. Wake Forest on Emerson Field.

ANNOUNCEMENT

Dr. Lawson, physical director, announces that he wishes the University rule regarding eligibility for the team, be distinctly understood by the freshmen. This rule is that all candidates must first undergo the usual physical examination, and must then have permission from the physical director to go out for the team. This goes not only for football but for all the athletic teams, and Dr. Lawson states that this year the freshman squads would be specially and well-picked, and that the gymnasium classes would play an important part in freshman athletics.

Dean Bradshaw, of students, announces office hours: 10:45 to 11:40 a.m., and from 3:00 to 4:00 p.m. He will also hold conferences with students at his home on Sunday and Tuesday nights.

BAPTISTS ARE SWAMPED BY
GEORGIA TECH TO THE
TUNE OF 44 TO 0

THE BAPTISTS ARE ALL OLD MEN

Jacobi, Pritchard, Morris, Hanby, Harrell, Cochran, Hutchinson, Pharr, Lowe, Tenney, and Spough
Our Probable Line-up

Carolina will open its 1920 football schedule here Saturday of this week, when the Wake Forest eleven will journey over to battle the Blue and White on local territory in the annual opening contest. A large attendance is expected for the opening game, and it is said that a large number of Wake Forest supporters will be over to see their eleven for the first time in action. Wake Forest played her first game Saturday, and though somewhat overwhelmed by a score of 44-0 by the strong Georgia Tech team, they promise a strong fight for Carolina here Saturday.

Coaches Fuller and Hite are hard at work whipping the Carolina machine in shape for the opening game, and some stiff scrimmages are anticipated this week. Practically all the squad witnessed the Davidson-State College game in Raleigh Saturday, and the coaches have been showing the squad the usual weaknesses of early season football, and pointing out how to overcome these defects. Head Coach Fuller has not yet announced the team that will take the field Saturday against Wake Forest, and there are several doubtful positions. It is believed, however, that the team will be picked from the following men. Jacobi, center; Pritchard, Morris, Owens, guards; Hanby, Harrell, tackles; Cochran, Hutchinson, Crayton, ends; Pharr, Lowe, quarters; Tenney, Griffith, halfbacks; and Spough, fullback.

The contest with Wake Forest last year ended with Carolina taking the big end of a 6-0 score, and just as they put up a strong opposition last year, it is believed that Wake Forest will repeat Saturday. Wake Forest, like Carolina, does not possess such a heavy team this year, but reports are that the team is unusually fast, and in Rabenhorst, the Baptists have one star that is exceptionally strong.

DEPARTMENT OF HOME COMFORTS NOW AT HILL

DEPARTMENT OF STATE HIGHWAY COMMISSION GROWS
RAPIDLY UNDER PROFESSOR DAGGETT

Pioneer work in the extension of engineering service to farms and country communities is being carried on by the University Bureau of Extension working through the State Highway Commission. North Carolina is the first state in the Union to provide a special fund by legislative grant for such a purpose and to aid in its promotion the University has organized a new division of its extension work which is called the division of Country Home Comforts and Conveniences. The staff is made up of members of the University's engineering departments. Since last November when the division was organized, assistance has been given directly to about one hundred and fifty persons in rural communities scattered over sixty-six counties.

Electric lights and power are chief among the conveniences that it is hoped to bring to rural communities all throughout the state. North Carolina has many small water power sites, many streams scattered through the state having enough fall to develop from one horsepower to ten horsepower of hydro-electricity. A model installation of this kind is to be made at the University where water wheels, generators and auxiliary apparatus will be shown and explained. Farm lighting sets have been carefully
