

CO-ED BASKET BALL SQUAD PROGRESSES

Team to Play Girls Team of Chapel Hill School and Other Teams in Near Future.

The co-ed basketball squad at work this week has made a fair degree of progress. Although at times, owing to the number of heavy falls and close tackles, the game somewhat resembles football the opinion is that a team will result that will be equal to any that can be put out by any other group of women students in the State.

The team has not been picked yet as the manager feels that some of those who are just being initiated may in time surpass those who are old hands at the game. Among those who have been out this week are Misses Mable Bacon, Addie Bradshaw, Alice Gattis, Mary Yellott, forwards; Misses Aline Hughes, Emily Steel, Nell Pickard, Katherine Cross, Louise Williams, Nina Cooper, guards; and Misses Elizabeth McKie and Ellen Lay, centers. Miss Bradshaw is also being tried out for center but she is so adept at goal shooting that she may be used at forward.

The team has already been challenged by the Chapel Hill high school. It is hoped that this game will come off next week. Lenoir College and the Charlotte Y. M. C. A. team have also challenged the fair athletes to a trial of skill on their home courts.

LETZ QUARTET PLAYS IN CHAPEL HILL SOON

Distinguished Quartet Will Appear in a Concert in Gerrard Hall February 15th.

The Letz Quartet which is one of the two foremost string quartets of the world today will appear in a concert in Gerrard Hall on Tuesday evening, February 15th. This quartet is just entering upon its fourth season and few organizations in their fourth season attain the large number of engagements that the Letz Quartet is to play. Its popularity is second to none, and besides being already engaged for twenty-three concerts in New York city, it has been engaged for concerts in leading cities all over the country. The Quartet also has engagements with many of the leading colleges.

The Quartet is composed of a group of brilliant artists who are Hans Letz, first violin; Sandor Harmati, second violin; Edward Kreiner, viola; and Lajos Shuk, cello. Hans Letz, the founder and leader of the Quartet, was for several years the concert master of the Chicago Symphony Orchestra, and later second violin of the Kneisel Quartet.

The program will not only include the great masterpieces of the classic and romantic schools, but also at least one section of it will consist of modern compositions of the tuneful, catchy sort such as "Molly on the Shore," by Percy Grainger; this is an old Irish dance tune, as jolly and infectious as a piece of music can be. Undoubtedly the most interesting, if not the most important number on the program will be the new quartet in A minor by Fritz Kreisler, the famous violinist.

On Saturday night Elon College defeated Wake Forest by a score of 18 to 15. The game which was played on the Elon floor was fast and interesting, and the outcome remained in doubt all throughout the second half. Elon managed to maintain a one point lead, and it was not until the last minute that the victory was certain. A field goal from the middle of the floor just before the whistle blew definitely decided the game.

A SCIENTIFIC TREAT BY NOTED INVENTOR

Professor Montraville M. Wood to Demonstrate Gyroscope and Ultra-Violet Ray.

Carolina is fortunate enough to have Montraville M. Wood, scientist, inventor, lecturer, present an entertaining demonstration of the gyroscope and ultra-violet ray in Gerrard Hall, February 14, under the auspices of the Y. M. C. A.

Prof. Wood was closely associated with Thomas A. Edison in his early days and in 1899 was appointed district engineer of the Edison Company on the Pacific coast. He is prominently listed in the latest "Who's Who" and is the inventor of many useful electrical devices among which is the two-button switch. He was honored a few years ago by being appointed aerial postmaster of Chicago.

The writer had the pleasure of attending one of Prof. Wood's entertainments in Raleigh some years back, and although he was at the time but a small boy in knee-pants, recalls distinctly the keen enjoyment with which he was thrilled by the weird and beautiful effects of the ultra-violet demonstration and the uncanny feats of the gyroscope. His scientific explanations are couched in popular language which the layman can grasp without difficulty.

One of Prof. Wood's great inventions is the famous "hearing torpedo" about which so much has been said in magazines and newspapers. Although he has received many tempting offers from foreign governments for this deadly weapon, he has steadfastly refused to sell the secret to any nation except the United States.

AT THE PICKWICK

Local lovers of the mystery-detective story who have been thrilled by the exploits of Arsene Lupin, Maurice Le Blanc's master crook creation, will be at the Pickwick Monday night to see David Powell in the "Teeth of the Tiger."

Louise Huff appears at the Pickwick Tuesday night in a new Selznick picture, "The Dangerous Paradise." The central point of interest is Ivis Vanastor, played by Louise Huff. Ivis is a young woman of considerable means who has formed the opinion that only married woman have any real freedom. She tries a startling experiment that develops some startling results.

Alice Lake comes to the Pickwick Wednesday night in the Metro production "Body and Soul." It is a story of life in the Latin Quarter of Paris.

MONTRAVILLE WOOD AND HIS TORPEDO WITH EARS.

Demonstrating his new torpedo with ears, producing handwriting on the wall with a ray of light for a crayon, showing a monorail car in midair and wrestling with a twenty-eight-pound gyroscope running at the rate of 3,000 revolutions a minute, the entertainment presented by Montraville Wood is a series of surprises.

Mr. Wood, scientist and inventor, is the inventor of the two button electric switch and nearly 100 other practical

and familiar devices. It is his gyroscope which made aerial carrying of the mail a possibility.

The torpedo with ears will prove a special interest. Members of the famous Union League club of New York city had Professor Wood as their guest at a recent session. He was presented by Hon. Elihu Root, former secretary of state. It is significant that at the conclusion of the demonstrations more than twenty-five men of national prominence and wealth found themselves standing in order to catch all that was being said and done.

Montraville M. Wood

Known all over the world as one of the leading scientists and inventors.

His demonstrations are both Educational and Entertaining.

This master of the gyroscope will appear in

Gerrard Hall Monday, Feb. 14th

Admission 50 and 75 cents. Tickets at Eubanks
