

### PHI WANTS COUNCIL TO GIVE K. O. TO OLD MAN JOHN BARLEYCORN, ESQ.

Courageous Stude Admits Friendship With Bacchus—Member Wants Publicity Bureau.

#### TO HAVE RIGID ACTION

A proposal to have the Philanthropic Assembly go on record as recommending that the student council take rigid action to prohibit the drinking of liquor, even in its lighter forms, brought forth much comment in the weekly meeting of the Assembly Saturday night.

Victor Young sponsored the motion, after having talked with several members of the Student Council on Friday. In presenting it to the house, he declared that action of some sort was necessary to stop excessive drinking on the campus.

Many illustrations of alleged drunks and damage done by drunken students to University property, were given by other proponents of the bill. Its advocates all cited state and Federal action which make it practically prohibitive for a student to drink and still call himself a law-abiding citizen. It was also maintained that the Student Council has become too lax in dealing with cases of drunkenness, and that it should tighten up. An example of how this action could successfully be taken, was given by an advocate of the bill, who recalled that a certain judge in Minnesota had stamped out drinking in his section by filling the jail of his county and several neighboring counties. Similar rigid action, with "shipping" instead of jail sentences the penalty, were asked.

But one member of the Assembly openly opposed the bill. He based his argument chiefly on the ground that he liked liquor himself, would take a drink if given a chance, and that he believed those favoring the bill were taking a leap in the dark, inasmuch as they themselves, he judged, had never imbibed intoxicants to the extent that they knew what a real drink was.

Many of the members apparently rested on the "fence," pleading for the enforcement of student regulations, such as the ban against drinking, to the extent that these laws could be successfully enforced. Too rigid action, they advised on the other hand, would have the effect of defeating the whole purpose of the student's honor system.

A vote on the measure will probably be taken next week, the bill having been tabled temporarily when further discussion seemed imminent and a vote impossible.

One other bill in relation to the workings of the Student Council was discussed. J. J. Beale introduced a resolution to have the Assembly go on record as favoring the publication of names of all students charged with offenses or breaches of conduct by the student council. Opinion was practically unanimous that the bill was an unwise one, and consequently Mr. Beale withdrew it from discussion.

### BLUE LAWS DESCEND ON PEACEFUL CHAPEL HILL

Conscientious Aldermen Restrict Selling of Soft Drinks and Tobacco on Sunday.

At last the Blue Laws have hit the otherwise peaceful metropolis of Chapel Hill! Never again will the student who craves his Sunday morning smoke be able to stroll down to the cafe and purchase the necessary requirements for that indulgence. Only during a very small portion of the day will that be even a possibility, for at its meeting last Tuesday the board of aldermen of the town of Chapel Hill passed this section in a new ordinance: "Provided that restaurants or other places of business allowed to remain open shall not sell any soft drinks, cigars, cigarettes or tobaccos except between the hours of 9 to 10:45 a. m. and 4 to 5 p. m.

Now is the time for the absent-minded person to take himself in hand. No longer will it be compatible with his personal comfort for him to forget to stock himself with cigarettes on Saturday night. The Lord's Elect, of Chapel Hill, N. C., have seen to it that we must all remember to either buy our week-end supply of tobacco on Saturday night, get up and do it on Sunday morning bright and early, or do without. And they don't care which!

The cafes have made the statement that this action was taken on account of the way the stores which have always had to stay closed on Sunday have been yelling about the unfairness of letting the cafes sell soft drinks and tobaccos while they had to remain closed. The Aldermen got so tired of hearing them squeal that they passed this ordinance to get rid of them. This is the version of the tragedy given out by the parties on the negative in the question of right.

### Careful Finishing that Protects your Negatives

We feel a real responsibility for film left with us for development. Negatives cannot be replaced, and there are often several exposures in each roll that are invaluable to the owner. Careful methods and scientific formulae bring results that justify your entrusting your films to our finishing department.

Of course we are equipped for enlarging—let us show you some samples of our work.

### HOBBO STUDENTS MAKE ATLANTA ON TEN CENTS

J. B. Mast and L. V. Huggins Feel Wanderlust and Hobo to Atlanta During Easter Holidays.

With a rambling notion on their minds and a pair of good soles on the bottoms of their shoes, L. C. Huggins and James B. Mast, respectively, sophomore and junior at the University, set out Monday, April 2, about noon, for a little stroll to Atlanta. They stated that the prospect of a dull holiday on the Hill was not at all to their liking. They wanted adventure—wanted to see some of the world, as only a tramp is able to see it. Now they claim that they saw all they hoped to see, plus some. The trip was much better than they expected.

They made 875 miles in six days and seven hours. Of the 875 miles they walked only 25, and rode the remaining 850 at a total cost of 10 cents, which was spent for car fare from the suburbs into the heart of Atlanta. The boys were able to make good time by catching several long rides. Near Thompson, Georgia, they were picked up by a cotton broker who was a former Trinity College student. This lift was for the final 117 miles into Atlanta. On the return trip a New Yorker picked them up in Athens and carried them to Charlotte.

The first night was spent at the home of a friend in Rockingham. The second was at Columbia, S. C. Here they heard Billy Sunday expound on their evil ways and saw his famous acrobatic stunts. The University of South Carolina was also given the once-over. The third sunset found Messrs. Huggins and Mast pleading with a Georgia farmer to take them in for the night. He turned them down; but as they, tired and hungry, downcast and dirty, slowly made their way out of the farm yard, he called them back and told them that they might occupy the floor of the parlor if it were not too hard. This offer they gladly accepted. Farmer Blanchard possessed two good-looking "Georgia peaches," so the adventurers spent a delightful evening at the Blanchard farm house. Thursday night was spent in an Atlanta hotel.

The return trip was begun at three o'clock Friday. Athens was reached by supper time. A stroll over the campus of the University of Georgia produced a new acquaintance and a place to sleep that night. Saturday they found a New York tourist who was willing to act as chauffeur to Charlotte. From there they made short jumps, hitting Durham Sunday afternoon. Mr. Creel brought them to their starting point, Mr. Strowd's post-office, at 7 o'clock.

#### MED SOCIETY CONVENTION

Dr. W. B. McNider, Kenan professor of pharmacology in the school of medicine, is going to Asheville next week to attend a meeting of the North Carolina Medical Society. At Wednesday's session he will read a paper on "The Pharmacology of Aconite." Aconite is an old drug which recently has been discovered to have new medical usefulness.

## The University of Engineering

Of all the things that go to make the successful engineer, none is more important, nor more in step with the spirit of the profession, than a studious attitude. One man says about another—"he is always willing to learn," "he doesn't think he knows it all"—and he intends to pay a high compliment when he says it.

The great engineers are always at school, always learning, always seeking for more knowledge. They begin with this desire for fuller understanding, and they keep it up to the end.

Any engineering operation, over and above the primary purpose for which it is carried out, is an active and post-graduate class in engineering, also. So that Westinghouse, or any other great business,

is, of its very nature, a University where theory and practice combine to make bigger, broader and more practical engineers.

The courses in this University are not limited to prescribed subjects nor terms—the subjects are almost infinite, and the semesters are endless. Men with the weight of years on their shoulders work and learn side-by-side with those whose day has just dawned.

This post-graduate school fits men for almost anything. Fits them for it, and makes them continually fitter. Out of this continuing fitness have grown the engineering accomplishments on which this institution has grown. It is, perhaps, one of the great educational institutions of its day.

## ACHIEVEMENT & OPPORTUNITY

### Carolina Finishes In Second Place In Triangular Meet

Dale Ranson Wins Mile in Spectacular Duel With Howard of Georgia—Event's Time Good.

(By THE "HAYSHAKER")

Scoring 63 1-2 points Clemson College won the triangular meet at Calhoun Saturday from the University of North Carolina holding a score of 39 1-2 points and Georgia University with a score of 32 points. The Tiger runners took the lead in points after the third race and held it to the end of the meet, piling up point after point by victories in various events.

The score though, really doesn't give a fair indication of what the meet was like. It was a heated struggle and Carolina was right there in the midst of it all. She took first places in the mile, discus throw, javelin throw and the broad jump, and if the Tigers had measured that 440 off a little more correctly—it was thirty yards short of a full forty—Tenche Coxo would have added a first place in this event.

Perhaps the outstanding event for Carolina was the mile. Now students around Chapel Hill have seen Dale run for two years, and he is admitted to be good here, but they haven't seen him run the mile in a sea of real old red clay mud in 4:37. Dale gave 'em hell and his duel with Howard, Georgia captain, for first place was one of the keenest seen at Clemson in years. It is needless to say that he won first place.

Then there's another man who deserves mention. His name is Abernathy. He won two places for Carolina in the meet—first in the discus with 115 feet 8 inches and first in the javelin with 165 feet 10 inches. Big Ab didn't cut much ice around the Hill last year, because he persisted in using every bit of his reserve strength in practice before the meets, but he has now learned the folly of this kind of procedure and it

will pay for the bettors to watch Ab when he hits Crater of State College a week from Saturday. Abernathy and Jack Chandler of Clemson led the scoring with 10 points each.

Chandler sprinted his way to victory in both the 100 and 220 dashes. Dave Sinclair proved a disappointment in these two events. He would have won the 100 but for over-confidence getting a good lead at the start though he didn't have a chance in the 220 with a man who ran it in 22 1-5 seconds. This little speed merchant—Chandler—is living up to the promise he showed in the state high school meet of 1921, when he represented Sumpter High and walked away with scoring honors by taking first in the 100, 220 and 440.

The only real disappointing feature in the whole affair was the low hurdles. Yarborough finished second, and Woodard was prevented from crossing the tape by tripping over a hurdle in mid-field. The time in this event was very good, however, and might be just a little out of Carolina's class. They were made in 25 4-5.

Other high scorers in addition to Chandler and Abernathy were: Wade, Clemson, and Ellis, Georgia, with eight each, Finkles of Clemson, Mabry of Georgia, M. D. Ranson of Carolina, and R. L. Ranson of Carolina who scored six points each and Pepper of Clemson who made five and one-half points.

R. T. Williams and R. W. Brooks are the only unfortunate victims of the infirmity at present. The condition of neither of these men is serious as both have mild cases of tonsillitis. With improvement they will be out in a few days.

### Tell your physics prof. that this cap defies gravity

SHAVING cream caps have an uncanny habit of chumming with gravity. That's why the Williams' Hinged Cap shown here is so remarkable. You can't persuade it to roll down a drain pipe. It refuses to go near the bathroom floor. In brief, it defies all previous laws governing the behavior of shaving cream caps.

Williams' Shaving Cream, in the same way, upsets all traditions about shaving. First of all, it exceeds every known speed limit for softening the beard. You can get your face ready for shaving in less time with Williams' than with any shaving cream you ever used.

In the second place, Williams' has a positive effect for good on the skin. Your face, with the wholesome care which Williams' gives, is kept in better condition and made more comfortable.

Test out these advantages which Williams' offers. Start with Williams' to-morrow and see what a time saver it is and how it helps make shaving more enjoyable.

Notice the hinged cap. You can't lose it—and the tube hangs up!
