

ANNOUNCEMENT

We will make our First Showing in CHAPEL HILL on Thursday and Friday, March 19 and 20 at JACK SPARROW'S

Spring and Summer Wearing Apparel for Young Men

M. V. Moore & Co. Asheville

FRESHMEN TAKE CLOSE CONTEST FROM TRINITY

Carolina Yearlings Outbatted but Trinity's Errors Are Disastrous—Johnson's Work Stands Out.

The Carolina First Year Reserves nosed out the Methodist colts Thursday on Emerson field by a score of 3 to 2, in the second game of the season. The Trinity yearlings collected nine hits to Carolina's four but threw away the game with the aid of five costly miscues and failure to hit at opportune moments.

Johnson at short stood out for Carolina in fielding and at the bat, and was responsible for the first counter when he slashed out a triple in the third frame and was brought in by R. Jones' single. "Nick" Carter, right end on the Trinity varsity football team, and Winters, showed up best for Trinity, the latter connecting safely three times.

The game was marred by an inexcusable three-quarters of an hour delay in starting.

The box score:

Trinity	AB	R	H	PO	A	E
Green, 2b	4	0	1	1	5	2
Winters, ss	4	1	3	1	3	1
Deal, 1b	3	1	2	12	0	0
Davis, lf	4	0	2	3	0	0
Chappell, cf	3	0	0	1	0	0
Carter, A, c	3	0	1	5	0	0
Roan, rf	1	0	0	0	0	0
Carter, F, 3b	4	0	0	1	1	2
Fairey, p	4	0	0	0	4	0
Totals	29	2	9	24	13	5

Carolina	AB	R	H	PO	A	E
Ross, 2b	4	0	1	2	2	0
Cobb, lf	4	0	0	0	0	0
Devin, 1b	3	1	0	13	1	0
Johnson, ss	2	1	0	2	2	0
Jones, N, rf	3	0	0	0	0	0
Hildebrand, cf	3	0	0	2	0	0
Thomas, 3b	3	1	1	1	0	0
Prescott, c	4	0	1	7	1	0
Jones, R, p	3	0	1	0	7	0
Totals	29	3	4	27	13	0

Score by innings: R. H. E.
 Trinity 000 000 020—2 9 5
 Carolina 001 101 00x—3 4 0
 Umpire: Lawson, N. C.; Cox, Yale.

N. C. YEAR BOOK GIVES GREAT AID TO FARMERS

S. H. Hobbs States That Year Book Is Responsible for Farm Loan Commission.

According to a statement by S. H. Hobbs, of the department of rural social science, the 1923 issue of the North Carolina Year Book on Home and Farm Ownership was directly responsible for the creation by the North Carolina General Assembly of the Farm Loan commission. Although this commission is only a few months old it has worked out a plan of action and study which will inevitably not only aid the farmers of this state, but the adjoining states as well. This commission is sending representatives to California, South Dakota, Utah, and Oklahoma to make a thorough study of the conditions there and especially in their applicability to this state. Among other things this commission will present to the State General Assembly the most feasible plan for land settlement in North Carolina.

This commission will co-operate with a similar body appointed by the South Carolina Legislature; each commission will thus be able to profit by one another's findings. These two commissions have scheduled a joint conference for May 11 at which a greater and more complete program will be decided upon.

The commission is composed of Senators D. F. Giles, of McDowell, chairman, and Chas. U. Harris, of Wake; Representatives R. M. Cox of Forsythe, W. H. S. Burgwyn of Northampton, and T. W. Gwynn of Haywood; S. H. Hobbs, of the University of North Carolina, and Dr. Carl C. Taylor, of N. C. State College.

DR. STEINER PRAISES REFORM INSTITUTIONS

During the Easter holidays Dr. J. F. Steiner, head of the University Extension Bureau, W. B. Sanders, of the State Department of Public Welfare, Rev. A. S. Lawrence, and George Lawrence made an inspection of Samarand Manor, the training school for girls located near Pinehurst, and the Stonewall Jackson Training School for boys, located at Concord. All pronounced themselves as very much impressed with the great work which was being done at both institutions. Dr. Steiner, in speaking of the visit, stated, "The way in which the State cares for its delinquent boys and girls is certainly in striking contrast to the manner in which it cares for its adult prisoners in the convict camps and chain gangs."

Prof. Wheeler has returned from Yale where he attended the meeting of the American Chemical Society last week.

J. M. BROWN INAUGURATED PRESIDENT OF PHI SOCIETY

New President Discusses Present Lethargy of Societies, Urging Prompt Action for Renewed Activity.

"What is the matter with the literary societies?" was the question discussed by J. M. Brown in his inaugural address as president of the Phi society. "Besides this, there are two other issues involved," said Mr. Brown. "They are: Are the societies doomed at the University; that is, do they supply a fundamental need? And finally, is there a remedy from the present standing of the societies on the campus?"

In regard to the first question as to what is the matter with the societies, Mr. Brown stated his belief that the present situation was merely a stage in the transition of Carolina from a small college to a great University. "The two societies used to perform so many functions on the campus which have been taken away from them and given either to the official University or to some other organization that the societies have not found their exact duty yet?"

In discussing the second question as to whether the societies fill a fundamental need on the campus, Mr. Brown said: "There are four fields of activity on the campus—religious, physical, social and intellectual. With regard to the first two, the societies have no concern, but in the social field, the societies fill a need which is not supplied by the fraternities and the Y. M. C. A.; and in the intellectual field they take the place of class discussions, of which there are very few."

"As regards a remedy to the present period of lethargy, I believe the fault lies largely with the society members themselves. There is too much deadwood and it should be eliminated. Second, the programs are often not attractive because members neglect to prepare their work properly. All this, however, can be remedied by prompt action, so let us take heart and carry on."

Other officers installed with Mr. Brown were W. J. Coker, Jr., secretary; E. D. Apple, first censor-morum, and E. L. Justus, second censor-morum. Announcement was made that the society proposed to hold a smoker next Saturday night and "Pike" Trotter, chairman of the committee, promised a good time to all who would come.

J. M. Roberts, Jr., of Asheville, and H. A. Breard, of Monroe, La., were initiated into active membership in the society.

Grail to Run Dance Next Friday Night

Changing the day of their customary dances from Saturday to Friday, the Order of the Grail will hold forth in Bynum gymnasium Friday night from 9:00 till 1:00, or later. This is the first Grail dance since the holidays, one, however, having been given the week before they began.

The Grail admits that the last dance was a failure in so far as joy was concerned. As a result of this, they are making a conscientious effort to put the next one across, and an effort is going to be made to "import" some talent from nearby towns. At present it is not known just what orchestra will furnish the music, but, as usual, it will be one of the locals. No promises are going to be made for this dance. The managers are going to try to put this one over, making it the best of the year. If it falls through, there will be nothing to take back. The usual may be departed from in that something (?) may be served in addition to the music.

MICHIGAN UNIVERSITY PROFESSOR PRAISES ENGINEERING SCHOOL

Professor H. E. Higgs, Dean of the Civil Engineering School of the University of Michigan came to Chapel Hill for a few hours last Thursday while on a Southern business trip. Professor Higgs dropped by merely for a short visit and observation of Carolina. He, being at the head of a great school of engineering, was capable in a few moments to recognize the progress which our engineering schools are making, and to appreciate the modern laboratories and courses of instruction which he found here.

Although Professor Higgs has been a recognized authority on engineering, he was unaware of the importance and rank of the University of North Carolina's Engineering Schools. After his visit and the comments which he made it is evident that he willingly accords North Carolina University a high place in the engineering schools of the country.

Dr. R. E. Coker is to be in charge, during the summer, of the Marine Biological Laboratory of the United States Bureau of Fisheries at Woods Hole, Mass.

CO-OP STUDENTS ARE BACK ON HILL AGAIN

Braune Commends General Bearing, Personality and Address of Co-operative Students.

The second section of the co-operative students of the engineering schools came in last Monday from their various jobs out in the state. The first section was already on the job Monday morning ready to take their places just as if no shifting had occurred.

This new system is proving more of a success every day and sufficient time has now elapsed since it was instituted here to note highly favorable results. The work which the men have rendered has in every case been highly satisfactory according, not to fancy or hearsay, but to actual reports of the employers themselves. A considerable improvement in the men is also easily noticeable, not only from mere observation but from actual results in their work. Prof. G. M. Braune, dean of the engineering school and largely responsible for the installation and success of the co-operative system, says: "The general bearing, personality and address of the co-operative students has markedly improved, and their grasp of things is a great deal better."

Progress of this note not only in the caliber of men in Carolina's engineering schools but in the organization and equipment of the schools themselves makes it evident that within a few years with continued progress Carolina's engineering schools will be second to none in the country.

TAR HEEL TRACK MEN MEET TRINITY FRIDAY

Prospects for Overwhelming Victory Are Bright—Carolina Should Win 12 First Places.

Carolina has its second trial of the season on the cinder path with Trinity College Friday afternoon on Hanes field in Durham.

On the face of the evidence, Carolina's track team didn't show up so well down there in South Carolina, and no doubt some are pessimistic about the outcome Friday. It would take the output of several horse-shoe factories to put the Methodists in first place in this little fracas.

Here are the events which Carolina will win first place in, and there are very few of the 14 which are being left out: 100, 220, low and high hurdles, 440, 880, mile, two mile, discus, shot-put, javelin, pole vault. Trinity will win first place in the high jump, and it is possible, but hardly probable, that they might get the same in the broad jump.

Not that this meet is going to be any great walk away, and that impressive time is going to be made in each event; on the contrary, in the case of the latter, the time is liable to be awful slow since Bob Fether is a good enough track general to hold up for State College the following Saturday, while in the case of the former, it would be hard to win anything but first place in the events named.

Bell Visits Chem Labs In The North

Dr. J. M. Bell returned on Wednesday, the eleventh, after passing a week examining the chemical laboratories of the more prominent schools in the North. He was accompanied by Mr. Atwood. During the trip he visited Yale, Cornell, Mass. Institute of Technology, Buffalo and Toronto.

The new chemical laboratory just opened at Yale is probably the best in the United States. It was erected at a cost of two million dollars during a period of two years. This building was financed by the interest on the Sterling bequest of 18 million dollars which was given to Yale a short time ago. The building is on an entirely new plan and represents a radical departure from the conventional plan of laboratories.

"Y" WANTS SIXTY MEN TO ATTEND BLUE RIDGE

The Y. M. C. A. committee will begin Monday to secure the delegation for the Blue Ridge Conference, June 14-24. The minimum delegation this year will be sixty. Some twenty-five or more men have already been signed up. Last week a collection of photos and charts concerning Blue Ridge were displayed in the lobby of the Y. M. C. A. The photos gave some idea of the wonderful scenery at Blue Ridge. The grounds and buildings together with several of last year's delegations from Southern colleges, was shown. There was also displayed a chart in the form of a heart giving data about the work and the facilities.
