OPEN FORUM

Dear Mr. Editor:

At present the Tar Heel seems to be a very popular method by which we may present our opinions to the public.

I have some opinions that I want to make known—or some people may call it a grievance.

Have you ever heard of "The New Introductory French Book," written by Dr. Henry Dexter Learned, of the University of North Carolina? Well, what I want to tell you is that it's not a French book. It's merely a conglomeration of messy nothing, and with all due respect to the author it is not fit to be a French text-book.

This book is at present being used in

the French course. It is entirely inadequate for the use of a beginner in French.

Mr. Editor, we love our University; we almost love our professors. But why make the students the goat by using such a book?

I am not a literary critic. I don't desire to be. Nor am I subject to the terrors of having to study this so-called French book. But I can hear the opinions of others, and I have enough sense, I hope, to realize when something is right or wrong.

I am sincerely hoping that some action will be taken upon this matter.

W. T.

Beacons of the sky

Between Cleveland and Rock Springs, Wyo., along the night route of the air mail service, tall beacons have been placed every twenty-five miles.

This achievement has been made possible by engineers of the Illuminating Engineering Laboratories of the General Electric Company, working with officials of the Post Office Department. A startling achievement now will be a commonplace of life in the new America which you will inherit.

If you are interested to learn more about what electricity is doing, write for Reprint No. AR391 containing a complete set of these advertisements.

Revolving on great steel towers, General Electric searchlights, totaling 1,992,000,000 candle-power, blaze a path of light for the airplane pilot.

What the lighthouse is to the ocean navigator, these beacons are to the conquerors of the air.

Announcing Subscribing Memberships in the Carolina Playmakers

Season 1924-1925

The Playmakers' new theatre building in the center of the campus is expected to be ready for occupation this fall. At any rate, four new productions will be given here by the Carolina Playmakers this season. A delightful program of outside attractions has been arranged and more will be booked here as the demand increases. The Playmaker readings, which received such favorable response last year, will be continued in the new building, and a new high standard of production from the standpoint of scenery, lighting, and stage effects will prevail, due to increased stage facilities.

The beautiful old building has been designed with care to preserve its original lines and at the same time to serve as a model community theatre. Careful attention has been given to provide for the comfort of the audience. The slope of the floor is so arranged as to give every person in the house an unobstructed view of the stage, and comfortable seating will be provided. The opening is set for December 5th.

SUBSCRIBING MEMBERSHIPS

The season opens next Tuesday with RUTH DRAPER in her Original Character Sketches, and our books are now open for subscribing memberships for the coming season. These memberships entitle the holder to one best reserved seat to each of the 4 new productions given by the Playmakers this season and a 10% discount on all outside attractions brought to Chapel Hill under our auspices.

Tickets for all Playmaker performances this year will be \$1.00. (The slight increase made necessary due to increased production costs, scenic effects, etc.) But subscribing memberships including the four performances and the special reduction on other attractions will be only \$2.50. Subscribing members will have the choice of seats and telephone reservations will be taken at the theatre.

These memberships are now on sale at Sutton & Alderman's and students are bringing them to the homes of townspeople. A telephone call to the manager's office, 243-Y, will put you on the list of early subscribers.
