

DEDICATION FOR LAW SCHOOL ON FRIDAY, JAN. 23

Dr. William Reynolds Vance, of Yale University, will deliver Principal Address.

LEGISLATORS ARE COMING

University Classes Will Be Suspended from 11:30 Until 2 P. M. While Dedications Services Are Held.

Plans are nearing completion for the program next Friday at the formal dedication of Manning hall, in which building the University law school is housed. It has already been announced that Dr. William Reynolds Vance, professor in the law school of Yale university, will deliver the principal address of the day. The exercises will be held in Memorial hall at 11:30, and classes will be suspended from 11:30 to 2 in order that the student body may attend. There will be no chapel hour at the regular time, the 11 o'clock classes being moved up to 10:30 in order not to break into that period.

Although the Legislature has not officially announced its intention of attending the ceremonies in a body, it is considered quite likely that it will do so. Even if the whole body does not attend there will be quite a number of legislators present for the dedication exercises.

Besides the main speaker there will be speeches from other well known men. G. W. Cowper, president of the state bar association, will deliver a speech. Dean M. L. Ferson of the law school will make an address. Josephus Daniels and Governor McLean or a representative appointed by him will also make talks. The weather permitting, the actual presentation and acceptance of the new building will take place upon the steps of Manning hall.

Immediately after the exercises the board of trustees and the legislature will be luncheon guests of the University at the new Carolina Inn. An inspection tour of the University buildings and grounds is being planned for the group after the luncheon.

Those in charge of arrangements are especially anxious that the student body turn out for the exercises in Memorial hall and the presentation. In view of the fact that the entire legislature will probably be here in a body it is considered important that student interest be expressed in attendance upon the program.

A NEW SCIENTIFIC SOCIETY ORGANIZED

Patterned Along Lines of the Elisha Mitchell Scientific Society—Seiwell Is President.

Another organization has been added to the already large list of campus groups. This organization is a junior society of science patterned along the lines of the Elisha Mitchell Scientific society. The organizers, while realizing that the Elisha Mitchell society fills a great need in campus activities, were aware that active participation in the presentation of programs is largely limited to the faculty and advanced workers in the various branches of science, while most graduate students and advanced undergraduates are eligible for associate membership only.

The new society has been duly organized and its work has already begun. The active membership consists of graduates and advanced undergraduates from eight departments of science, these being botany, chemistry, geology, mathematics, medicine, physics, psychology and zoology. In order to insure a better organization the members must have completed eight courses of science, four of which must be in the department of their major science. All professors and instructors in the departments named are eligible for honorary membership, but are not permitted to take an active part in the programs.

The society meets twice a month, at which meetings two papers are presented from two of the member departments. These meetings are held the second and fourth Fridays of each month in Davie hall at 7 p. m. H. R. Seiwell is president of the society.

The first paper was presented by H. T. Thompson of the botany department on "Myxomycetes." At their regular semi-monthly meeting last night H. R. Seiwell of the geology department presented a paper on "Glaciation in the Antarctic." Dr. H. V. Wilson talked to the club on "The Attitude of the General Public Toward Research." A number of faculty members and members of the Elisha Mitchell society were present at the meeting last night.

Tickets for glee club concert on sale at Patterson Drug Co.

DECIDE WINNERS OF SCHOLARSHIPS

Maintained By Lawrence S. Holt Loan Fund.

VALUED AT \$125 EACH
J. E. Hawkins Wins Scholarship for Second Time.

The Lawrence S. Holt, Jr., scholarships have been awarded as follows: Senior class, J. E. Hawkins, Raleigh, N. C.; Junior class, H. G. Godwin, Dunn, N. C.; Sophomore class, Geo. E. Wilkinson, Statesville, N. C., and Freshman class, Galen Elliot, Washington, N. C.

It will be remembered that these scholarships are valued at \$125 each and are awarded to one selected member of each academic class. They were established in 1920 by Lawrence S. Holt, Jr., and are maintained by the income from the Holt Loan Fund.

This is the second time Mr. Hawkins has been awarded the Holt scholarship, having received the award in 1922 when a Sophomore. He is an ex-Playmaker and is at present editor of the *Carolina Magazine*. Godwin has taken prominent part in undergraduate activities. Wilkinson is a member of the Tar Heel board, and Elliot was recently elected captain of the freshman track team.

FROSH WILL MAKE BIG VIRGINIA TRIP

To Take Six Game Northern Tour.

DON'T PLAY CAVALIERS
Have Good Prospects for a Winning Team.

The revised schedule for the freshman basketball team has been given out by Coach Shepherd for publication and shows several changes from that published last week, notably that Virginia has been dropped altogether.

The Cavalier frosh were on the schedule for two games, at Charlottesville on February 16 and in the Tin Can on the 27th of that same month. The Virginians refused to play the game here and for this reason were dropped from the itinerary of the northern trip that the Tar Babies will take. This cancels the first engagement of the northern tour but Coach Shepherd and Manager Smith are expecting to arrange a game with either Staunton or Fishburne Military academies to replace it.

The opening bill with Durham high school which was to be played on the 15th has also been canceled and this team will not be met by the Tar Babies this season. The February 3 date which was open has been filled by the Spray Y. M. C. A. team which comes to Chapel Hill. An attempt is also being made to schedule a game with Augusta Military Academy for February 18. If this is completed it will make a six-game tour for the frosh on their trip to Virginia.

Beginning with Staunton or Fishburne on the 16th of February they would play one game a night for six days, meeting Woodberry Forest, Augusta Military Academy, V. P. I., Washington and Lee, and V. M. I. in the order named.

If these doubtful games are scheduled it will give the frosh a 17-game schedule including the best freshman and prep school teams in North Carolina and Virginia. Of these games eight will be played in the Tin Can and the others on the road.

The first game will be played Tuesday with the Wake Forest frosh at Wake Forest. As yet no first team has been picked and probably will not be selected before Monday. Coach Shepherd has several exceptionally tall men on the squad and there is a possibility that a bunch of six-footers will compose the team. One observer of practice said that Newcombe, Vanstony and Crinkley could keep the ball 12 feet off the floor and out of reach of most of their opponents. Besides these men others who are prominent are Morris of Charlotte, Fersell of Woodberry, Delaney and Neal of Reidsville, Skinner of Smithfield, and Makepeace of Sanford.

The schedule follows:
Jan. 20—Wake Forest here.
Jan. 21—Mars Hill here.
Jan. 28—Duke University there.
Jan. 31—Oak Ridge here.
Feb. 3—Spray "Y" here.
Feb. 5—Mt. Pleasant Institute here.
Feb. 10—State at Raleigh.
Feb. 11—Duke University here.
Feb. 16—Staunton or Fishburne there.
Feb. 17—Woodberry Forest there.
Feb. 18—Augusta Military Acad. there.
Feb. 19—V. P. I. at Blacksburg.
Feb. 20—Washington and Lee at Lexington.
Feb. 21—V. M. I. at Lexington.
Feb. 23—Wake Forest here.
March 3—State here.
March 7—Asheville High School here.

Glee club concert Monday night, Memorial hall, 8:30.

DEBATERS PICKED FOR TRIANGULAR

Two New Men Are Selected At Try-Out.

LIVINGSTON AND JONAS
Debates With South Carolina and William and Mary.

Debaters to represent Carolina in the triangle debate with South Carolina and William and Mary, which will probably take place February 9, were selected in an open preliminary held Wednesday night in the Philanthropic Assembly hall. The query was, *Resolved*—That Congress by a two-thirds vote should be empowered to override the judicial veto.

North Carolina's affirmative team, which will debate William and Mary's negative in Chapel Hill, is composed of Theodore B. Livingston, of Asheville, and Ernest L. Justus, of Flat Rock. Carolina's negative, which will debate South Carolina's affirmative in Columbia, is represented by Charles R. Jonas, of Lincolnton, and Malcolm M. Young, of Durham.

Justus and Young are letter men in debating, while this will be the first intercollegiate experience for Livingston and Jonas. Justus was a member of the Carolina team which, with S. F. Jones, unanimously defeated Johns Hopkins last year, while Young has represented Carolina against West Virginia, Washington and Lee, and in the Oxford Union debate with State college. Jonas is a varsity track man, campus "leader" of the Republican party, and a contributor to the University publications. He made a great impression on the student body as a speaker last fall when he introduced Governor Ralph Brewster, of Maine, who spoke here in behalf of President Coolidge. Livingston has won fame in the Carolina Playmakers, and in his freshman year, with Young, was a member of the Carolina freshman team which unanimously won both ends of the statewide freshman triangle debate.

Phi Smoker Will Be Held Tonight

The first smoker of the year for the Philanthropic society will be held tonight in the Carolina Cafeteria at 9 o'clock. This smoker was postponed just before the holidays on account of exams and a conflict in schedules.

The banquet committee in charge of arrangements for the smoker-banquet is preparing an excellent program for the membership. There will be several speakers on the program who will add a good bit to the occasion.

Try-Outs for Studio Production Postponed

Try-outs for parts in the second studio production, announced for January 15, will be held instead on some afternoon during next week. The delay is due to difficulty in securing copies of the lines. The exact date of the try-outs will be announced later.

GLEE CLUB WINDS UP WEEK TRIP TONIGHT—GIVES CONCERT MONDAY

Sixty Men Will Appear in Concert in Memorial Hall Monday Night—Jerome Swinford, New York Baritone, Is Added Attraction—Glee Club Has Received Much Praise This Year.

With a grand concert tonight at the Carolina theater in Pinchurst, which will wind up the brilliant winter trip of the University glee club into eastern North Carolina, the club will return to the Hill and get itself in readiness for the big concert in Memorial hall Monday night. Mr. Jerome Swinford, of New York City, a baritone of national reputation, who has sung many times in the South and is well known in North Carolina, will appear on the program as the guest artist.

The concert will be the first the club has given on the Hill this year, and because of the extreme success which the club has met with this year in foreign territory, it is creating a great deal of interest among the students. The local appearance of Mr. Swinford will mark the first event of this nature in the South. Up to this time no Southern glee club has engaged a New York soloist as its leading feature. Mr. Swinford has been singing with the club this week, and from each city where the club has appeared has come enthusiastic tributes to Mr. Swinford and to the organization as a whole.

Only 24 men made the eastern trip this week, due to the great expense of traveling, but the entire club of 60 men will appear in the concert Monday night.

The men who made the eastern trip are as follows: W. N. Avery, Jr., C. L. Beard, M. C. Berry, J. S. Berwanger, R. H. Cain, P. S. Foster, A. L. Gillikin, R. B. Gladstone, G. Y. Harris, J. Parks Hudson, L. V. Huggins, J. H. John-

FIGHT EXPECTED OVER UNIVERSITY MONEY REQUEST

Over Four Millions Asked by This Institution for Building and Maintenance.

BASED ON BOND BILL

Figures Show Cost of Woman's Building and Tin Can As Being Over \$100,000 Each.

With a legislature and a governor definitely committed to a policy of retrenchment insofar as the finances of the state are concerned, every indication points to a long and hard-fought battle by the University budget committee in its effort to secure the appropriations requested by the University for the next two years.

A tidy little sum of \$4,472,495 is asked by the University for the years 1925-26 and 1926-27. Of this amount \$2,445,000 is to be devoted to buildings and permanent improvements, while \$2,027,495 is to be used for maintenance. Already the Chapel Hill institution has thrown down the gauge of battle and sent out fair warning that it expects to fight for every penny of that sum which it considers due to it by the bond bill of 1921.

In a bill passed during that year, the legislature definitely committed itself to a program looking toward the betterment and expansion of the educational and charitable institutions of this state. The bill called for the expenditure of \$20,000,000 towards his end, based upon the requests of the institution made during that year. The legislature, however, decided not to issue such a huge amount of bonds at one time, but to vote the appropriations biennially.

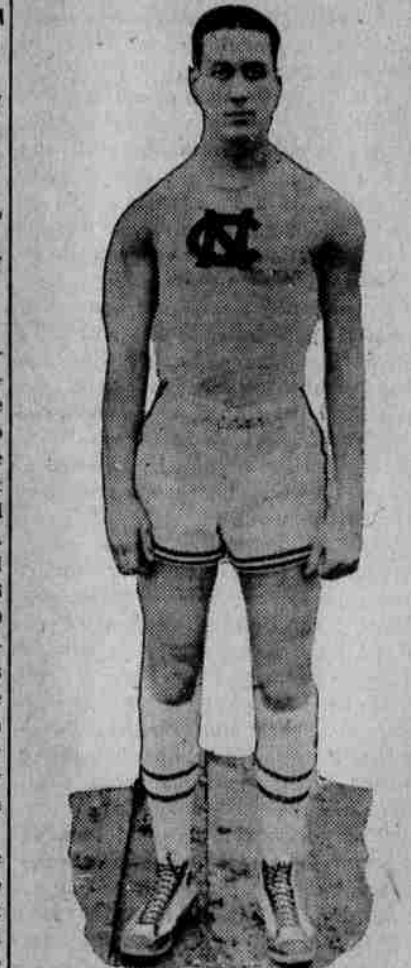

The University then drew up a six-year building program, based upon its original request for \$5,580,000 which had been incorporated in the \$20,000,000 bond bill of 1921. In 1921 a grant of \$1,490,000 (Continued on page four)

Three Men Have Narrow Escape

Three men narrowly escaped death here last Wednesday afternoon. They were working on the brick smokestack at the University power plant when the ginpole used in the stock tower loose and striking the side, broke away four feet of the topmost part of the construction. The three workmen, 100 feet above the ground, clung to the remaining structure and with difficulty managed to work their way around to a ladder leaning against the stack. Had a brick pulled loose while they were struggling to reach the ladder, the men, J. H. Leatherwood (of Asheville), Edward Joy and E. McScott, both of New York, would not now be alive to marvel over their almost miraculous escape from death.

Jerome Swinford, New York baritone, sings with Carolina glee club here Monday night in Memorial hall.

BILL DODDERER

Center on Carolina's Flying Quint. Held down the pivot position on the Southern Championship Team last year.

DURHAM ELKS NO MATCH FOR U. N. C.

First Home Game Is Walk-A-Way, 51-12.

COBB CLOSELY GUARDED

Purser and McDonald Are High Scorers of Game.

The Durham Elks were able to furnish but little opposition for the fast moving Carolina quint in the first game on the home floor last Tuesday and after 40 minutes of play journeyed back over the 12 miles of concrete between Chapel Hill and Durham carrying a 51 to 12 defeat with them.

The Tar Heels jumped into the lead from the very start and swept the Elks off their feet by a brilliant offensive which the visitors were unable to stop. Purser and McDonald led the scoring attack, making eight field goals each. Dodderer consistently outjumped Newton at center and also played a good floor game, as well as shooting five goals. Captain Cobb, who was high scorer in every game last year, was closely guarded, the Elks evidently fearing him most. Once within range of the goal there would be an Elk sticking to him. His work on the floor was largely responsible for many of his teammates' scores. Devin also played a good game.

The outstanding feature of the game was the scintillating speed of the University players. They would take the ball down the floor at a rate of speed that completely dazzled the visitors. Coach McDonald's team appears to be about as fast, if not faster, than the great team of last season, and already the quint is beginning to polish its teamwork to acquire its usual machine-like precision.

The line-up follows:
Elks (12) Carolina (51)
Penny R. F. Cobb
Montgomery L. F. McDonald
Newton C. Dodderer
Heflin R. G. Purser
Mangum L. G. Devin
Referee, Steiner. Halves 20 minutes. Substitutes: Elks—Stallings; Carolina—Poole, Hackney, Sides, Howell.

With the beginning of the new year the Bureau of Community Dramas finding all of its time greatly in demand and with prospects for a most busy period for the rest of the year. Miss Pearl Setzer left Monday for Wendell, where she will stage "What Happened to Jones" with a community group of that place. Miss Setzer has previously staged this play with a group of Masons in Fayetteville with much success.

During the holidays Miss Setzer helped the Hickory Community Players put on a program of three one-act plays. She herself played the part of Mat in her own play, "The Black Rooster", while Bob Pickens, who also starred in the initial performance of the play here, again played his old role.

WILDCATS MEET COBB'S QUINTET ON LOCAL FLOOR

Davidson Team Has Trained With High Hopes of Winning Tonight's Game.

HAVE DEFEATED DUKE

Have No Return Game With Carolina And Will Fight Hard to Take Away a Victory.

Carolina meets what at this early date appears to be one of the strongest teams in the state when Davidson comes here tonight for the second intercollegiate contest of the year for Coach "Monk's" team.

Davidson is always calculated to give the best of teams no small amount of trouble and this season she is said to have a better quint than that of any of the past few years. She has played two games with Duke University, winning both hands. The score of the final game, played on the Wildcat court, was 39 to 22, a margin of 17 points, and it takes a good team to run up that high a score against the Durham outfit.

The Presbyterians are hoping to catch the Tar Heels in a rather weakened condition tonight, as they well know that the loss of two All-Southern men such as "Carl" Carmichael and "Monk" McDonald is bound to be felt. Coming in early season as tonight's contest does, they hope to catch the local team in early season form, as well as to take them in camp before the new players develop into new "Monks" and "Carts."

But according to the *Davidsonian*, the Wildcats' favorite college paper, the Presbyterians willingly admit that Captain Cobb and his team are potential All-Southern champions again this year, and praises the University for its former teams. The paper added that we had gotten into the habit of having our own way on the court in this state during the past several years.

Carolina appears to have perhaps another wonder team, but the games with the Durham Elks were hardly a test compared with what may be expected from Younger's Wildcats, who always fight their hardest against Carolina. The prestige that the Tar Heels have established for themselves in the South makes a victory all the more desirable to the Wildcats. If they win tonight, they will be the first state crew to lick the local team in many a game, and tonight represents their only whack at the Blue and White during the present season. Without doubt tonight's affair will be one of the hardest fought of any on this year's schedule.

SCIENTISTS HOLD 277TH GATHERING

Three Papers Read by University Men.

MEET IN PHILIPS HALL
Cobb, George and Henderson Treat Different Subjects.

Dr. Collier Cobb gave a brief note on "A combustible clay found in Ontario Canada," in which he discussed some recent experiments he had made with a peculiar clay with burning properties. The clay which was found by Dr. Cobb himself, is a light yellow substance about the density of pumice stone. It burns readily although it does not possess the vegetable qualities of any known form of coal. Dr. Cobb stated that the substance was found in very large beds in some districts, and could easily be used for commercial use if its value could be proven. Whether the clay will ever be used for cheap fuel however is still problematical.

Following Professor Cobb, a short paper was presented by Dr. W. O. George, of the Medical school, on "Somatic Chromosomes of the Nopsum." In this Dr. George presented some charts and lantern slides of the opossum chromosome showing that some authorities on the subject had been mistaken regarding the cellular growth of the opossum.

Dr. Archibald Henderson, in a paper entitled "Relativity and Atomic Structure," reviewed some of the work of Bohn and the modification of the Bohn theory by Siegbahn. As was brought out in the subsequent discussion, the probable structure and complexity of certain spectral lines necessitated the introduction of an additional assumption describing the planes of the orbits of electrons. Not only if rotating in spherical or elliptical orbits, but that these orbits rotated around one of their foci.

Miss Margaret Little, of Tuscaloosa, Alabama, has joined the staff of the Bureau of Correspondence, of the University extension division.

Glee club concert Monday night, Memorial hall, 8:30.
