Saturday, February 20, 1926

"Campus walks are becoming a reality," says the State College Technician. So's some of ours. And some day may the Graham Memorial do likewise.

When North Carolina can produce two teams in the same year that are able to lick the Tar Heels, we are about ready to announce that the Old North State has a pretty substantial corner on the Southern basketball market.

With due apologies to one of our professors, we suggest the following as a social item for the Chapel Hill Weekly: "Dr. Branson's wife's cook's husband suffered an accident last week. His nose was nearly bit off by a dawg."

These are hair raising times on the N. C. C. W. campus according to the Carolinian. The paper claims that the girls are forsaking hobbled hair.

Favorite weekly saying of our favorite campus cynic: "City folks always put on airs. In the country we have the General Store but in the city we call the same thing a Drug Store. Baseball gloves have recently become the most featured drug at our favorite soda dispensary."

The Washington Post is no longer appearing in its time-honored rack in the library. Dr. Wilson's subscription must have expired. If the papers are intended for the students, the Post should soon reappear. It was widely read while many of the other papers scarcely ever receive a glance.

SERVANT NOT SLAVE

According to a Washington dispatch, the geat (three cheers) state of North Carolina is slated for another battle over the teaching of evolution. We suppose this to mean, if history still repeats itself, that the University is scheduled to become once again a free-for-all target.

The mania of the present day seems to be a desire for legislative enactment against the teaching of evolution. We have heard repeatedly that this school is the servant of the state, due to its creation by the

legislature, and that therefore the state has the right to say what shall be taught in it. But has the legislature a genuine right to pass a law prescribing what its University shall or shall not teach?

True it is the University of North Carolina, is the creature and servant of the State of North Carolina. But is it its slave? The function of the University is to disseminate knowledge and truth. Who is better suited to determine what should be taught; scholars who have spent their life in investigation and study, or the average citizen of the state who has only a superficial education at the most?

Certainly the University should be allowed to direct its own affair in the field in which it alone is an authority. The University is conscious of its duty, its responsibility and its function. The fulfilling of these is its sole purpose; it has no interest or reason to do otherwise. The stand of this institution has always been one for intellectual freedom for without it the University can never fully serve its purpose. The University was created to serve the state, not to be enslaved by it.

Hardly a single great scientific discovery has ever been made that a great wave of intolerance did not attempt to force down. Had the great scientists of the past abided by the dictates of society, had they been good slaves, they would have never run counter to public opinion and would never have given to the selfsame society their revolutionizing discoveries. They were not slaves of the state; they were true servants.

And so with the University. It is a servant but not a slave.

PRICE MAKES TALK TO ENGINEERING SOCIETY

The weekly meeting of the William Cain Civil Engineering Society, which met last Thursday morning at ten-thirty in room number 319, Phillips Hall, was very interesting and was appreciated by all present. The thirty minute talk was delivered by W. M. Price on "Stadiums". This was the topic as chosen for the meeting preceding this one, but that meeting was given over to Dean Braune so that he might urge the William Cain members to attend the annual meeting of the Civil Engineers which took place here last week.

With this added time Mr. Price was able to handle his topic unusually well. He first explained the different types of stadiums now in use at the various colleges and cities. He showed the importance of such structures and outlined the many ways by which money was acquired with which to build them. In his demonstration, he mentioned the Yale Bowl and many other famous stadiums. Finally the importance of skillful work and the necessity of materials and plans were brought out. In this connection he showed the prices of the different types, their shapes, and capacity.

Judge Robert W. Winston, who has been golfing and otherwise enjoying himself in Camden, South Carolina, this winter, is coming back to Chapel Hill in two or three weeks.

The Lucy Payne circle of the Episcopal Service League will have a supper in the parish house at 6 o'clock Thursday evening, March 4. It is for the purpose of raising funds to carry on the work of the circle.

Calendar

Today
7:00 p.m. Phi and Di Societies, Phi and Di Halls.
8:30 p.m. Boxing Try-outs, Tin Can.
Sunday, February 21
8:30 p.m. University Sermon. Dr. Charles E. Madry, Gerrard Hall.
9:00 p.m. Sigma Upsilon meeting.
Monday, February 22
10:30 a.m. Dr. J. D. DeR. Hamilton speaks in Chapel.
7:30 p.m. North Carolina Club meets, 112 Saunders Hall.
8:30 p.m. Y. M. C. A. Cabinet meets, Y. M. C. A.
9:30 p.m. Fayetteville Club meeting, Y. M. C. A.
Tuesday, February 23
8:30 p.m. Glee Club concert, Playmaker Theatre.
8:30 p.m. Basketball Game. Carolina vs Davidson, Tin Can.
Wednesday, February 24
8:30 p.m. Dramatic Reading, by Arna Henl, Memorial Hall.
Thursday, February 25
7:00 p.m. Deutsche Verein meeting.
8:30 p.m. Bible Discussion, Groups meet.
9:30 p.m. "Black and White," Memorial Hall.

INTRAMURAL SPORTS

Intramural Office, 114 Alumni Building

The best game of the season occurred Monday when Steele beat Carr 23-22. The game was hard fought as the close score indicates. Again Carr participated in a game in which only one foul was made, and again this foul was against one of her men and the point made was the margin by which their opponents gained their victory. The foul was against Grubb and McGowan, of Steele, made it good. At the end of the third quarter Steele led by 11 points. It was at this time that the boys from "Carr Barn" elected to stage a thrilling comeback. In the last eight minutes they gained 10 points on field goals while holding Steele scoreless. This really fell short only one field goal of bringing them victory. The most unexpected thing in the game was Caffey, of Carr, getting the tip-off over Margenhoff, of Steele, although he is 2 or 3 inches shorter than the latter. He is the first man of the year to consistently get the tip-off over the big Steele center. Ellis and Margenhoff played the stellar role for Steele, while Grubb, Clark and Caffey led the fight for Carr. This victory leaves Steele as the undisputed leader of the Dormitory Club, having downed its chief rivals, West and Carr, in the last two weeks.

Wednesday the Kappa Sig's lessened the number of their rivals as leaders of the Fraternity League by one when they beat the Pikas 16 to 10. This leaves only the Beta's and the Kappa Sig's tied for the top, both teams having a standing of 1,000 per cent. This game was fast and snappy, because for both teams it has a strong bearing on the championship of the fraternity club, and the results were not certain until the last few minutes of the game. H. Covington was minus the services of his two brothers in this game, but the whole team went to work and it was due largely to his shooting that the Pikas' lead during the first half. In the second half the Kappa Sig's perked-up and with Royster and Holland leading they came to the fore. Royster was particularly good on his long shots.

The Beta team met the Chi Phi team Wednesday and took another victory into their camp. The Chi Phi's are considered as one of the strong teams of the League and the score of 28 to 20 shows how good the Beta's are. This team follows the example of the varsity and bases its game on good passing, and this was the feature of their game with the Chi Phi's. Lawrence Watt seems to be an answer to their prayer for a good forward, for in this game he shot 10 field goals alone which was as many points as the whole opposing team collected during the entire game. The Chi Phi's did not lose easily, but lead by D. Jonas and Wagoner, they put up a hard fight, and made the Beta's show their best wares.

The ubiquitous co-eds, who now have their names in nearly every activity possible on the campus, now have the chance to make their debut in the sport world. Track calls to the sorority sisters. Up at Ohio State they have an unique race for women, which is known as the "Hook and Eye" race. It is performed at annual Festival and Carnival. A runner carries a strip of goods on which are sewed a half dozen hooks and eyes. A sorority representative hooks them over his arm, and the first runner to reach the starting point with the goods properly hooked is the winner.

But the race is not necessarily limited to sorority sisters, it is proposed to let all women enter for the preliminaries. Each fair co-ed will choose her runner, who will most likely be most fleet of foot rather than fast in other ways. In the final event eight such couples will compete for the All-University "Hook and Eye" championship.

I have a sneaking idea that we are letting the sorority sisters in on this a little early, for the plans are not complete. We investigate, but we refuse to promulgate. Now all good sorority sisters who are naturally given to athletics step forward, and say the word. This is the chance for co-eds to be real "followers of the races." Favorable, sorority sisters?

The Date of the Big Indoor Track Meet has been changed from March 1 to March 8. Nine events will be run off in this meet: standing broad jump, running high jump, 7 yard dash, 880 yard run, 50 yard hurdles, 440 yard run, 8-man shuttle-relay, 12-man shuttle-relay, and the three-legged race. This meet will be followed by an outdoor track meet. Candidates for the varsity and freshmen teams will have the chance for displaying their track ability to the coaches in this meet, and it will also be a great benefit to those training for track because there will be plenty of competition in every event.

Mangum had the honor of winning two tag football games in one day, and Wednesday again had this honor, that of winning two basketball games in one afternoon. The first game, with Smith, was hard fought, Smith leading up to the last few minutes. In the next game with New Dorms Mangum won by a large margin.

Intramural tossers have the following games for Monday afternoon:
3:30 P.M.
New Dorms vs. "G", Court No. 1.
Smith vs. "F", Court No. 3.
Chi Tau vs. Beta, Court No. 4.
4:30 P.M.
West vs. Mangum, Court No. 1.
Zeta Psi vs. Theta Rho, Court No. 2.
East vs. Mainly, Court No. 3.
Theta Phi vs. Phi Kappa Sigma, Court No. 4.

HIGH SCHOOL PLAY TO BE GIVEN IN CONTEST

"The Trysting Place" by Booth Tarkington, which will be presented by the High School Dramatic Club last week will be given in the three cornered State-wide Dramatic Contest for High Schools to-night at Clayton, between Chapel Hill, Clayton and Wilmington.

The students making the trip are: Katherine Walker, Lyda Eubanks, Catherine Clark, Chauncey Royster, Sam Paulson, and George Winston. At the performance in the local high school last week much favorable comment was made of the unusual abilities of the youthful performers. It was the unanimous opinion of the two hundred or more people who witnessed the initial presentation that the play was destined to win the coveted prize of State champions. George Winston is especially good in the play as a bashful, infatuated boy. All of the other performers show unusual dramatic ability and have received very much praise from local theatrical critics. Sam Paulson and Chauncey Royster not only look the ideal part of their characters but display unusual stage ability according to all reports. It is not certain that the chorus of sixteen girls who sang before the play and the clarinet trio and trombone solo will accompany the players or not, but it is certain that if they do much enjoyment would be added to the performance; for in the first presentation the sweet voices of the girls and the musical ability of the performers on the reed and brass instruments was exceedingly pleasing in its tone of admiration for the young students.

The professors of the Civil and Electrical Engineering Schools are now teaching different students in their junior classes from those of a week ago. This condition comes as a result of the change which was recently made by the juniors who are in the cooperative method of engineering. This calls for about half of both the Civil and Electrical Engineers to exchange places with the other half who have been holding positions with various engineering plants. This change occurs at the end of every seven weeks and runs through the junior year and the following summer.

At the Churches

The regular Sunday evening sermons or services in the local churches will be discontinued in order that the members of the various denominations will be able to attend the third University Sermon, which will be held in Memorial Hall at 7:30. The visiting minister, who will deliver the sermon, is Dr. Charles D. Madry, corresponding state secretary for the Baptist State Convention. The feature of the musical part of the services will be provided by the Baptist choir.

BAPTIST
EUGENE OLIVE, Pastor
9:45 A.M.—Sunday School; Dr. A. C. Howell and Mr. B. B. Lane, teachers of the two student's classes.

11:00 A.M.—In place of the regular sermon Mr. Harry Comer, secretary of the University's Y. M. C. A., will be the guest speaker.

6:30 P.M.—B. Y. P. U.
CHRISTIAN
B. J. HOWARD, Pastor
9:45 A.M.—Sunday school.

11:00 A.M.—Services.
6:30 P.M.—Christian Endeavor.
CHAPEL OF THE CROSS
A. S. LAWRENCE, Rector
8:00 A.M.—Holy Communion.
9:45 A.M.—Sunday School.
11:00 A.M.—Sermon.

CATHOLIC
Services on the first and the third Sundays of the months at 8:30 p.m., on the second floor of the Young Men's Christian Association.

LUTHERAN
Student group meets every Sunday night at 7 in the Y. M. C. A.

METHODIST
WALTER PATTEN, Minister
9:45 A.M.—Sunday school; M. R. Traube, teacher of the student's class.
11:00 A.M.—Sermon: The Patriot.
6:45 P.M.—Epworth League, conducted by Mr. Phillips, assistant pastor.

PRESBYTERIAN
W. D. "PARSON" MOSS, Minister
9:45 A.M.—Sunday school.
11:00 A.M.—Worship.
6:45 P.M.—Christian Endeavor.

SCIENCE DEPARTMENT GETS \$5,000 GRANT

General Educational Board of New York Gives Three Year Grant for Advancement of Scientific Work.

The science department of the University has lately received an honor of unusual merit. This honor comes in the form of a grant of \$5,000 a year for a period of three years, to be used for the advancement and furthering of scientific work. This grant was made by the General Educational Board of New York City.

The manner in which this grant was acquired greatly increases the honor bestowed upon the University as being the recipient of it. The General Educational Board sent a representative throughout the South, has purpose being to investigate the conditions of the scientific departments of the more prominent colleges. As a result of his investigations the University of North Carolina was one of the two schools chosen as being worthy of receiving a grant for the furthering of scientific research work. Only two institutions were selected from the entire south.

The two favored institutions were asked to make a formal request to the General Educational Board for funds to finance research work in the pure sciences. The President of the University, with the consent of the board of trustees, went to New York and subsequently wrote a letter of request. The result was the grant of \$5,000 a year for a period of three years. Although a much larger sum was asked for, the University is none the less grateful for the amount granted. Formal announcement of the reception of this grant was made by President Chase during commencement exercises last spring.

The use of this money is open to the entire scientific staff of the University with the exception of the staff of the engineering department. The grant is to be used for research in the pure sciences, while engineering is in the field of applied sciences. No specific means of disposing of the money are listed in the grant. Merely general uses are specified. It is to be used as financial assistance for the following: 1. Equipment for particular projects of research. 2. Research assistants. 3. Literature for research. 4. Traveling expenses for prosecuting special research problems. 5. Publication of research. 6. Other projects not enumerated above. Thus no strings are tied to the use of this money. The fundamentals of the pure sciences are to be investigated with the use of the money but the individual investigators are free to choose their own subjects for investigation.

A faculty committee has been appointed for the supervision of the disposal of the grant. Individual investigators of the University of North Carolina only are to be recipients of this financial aid. The committee appointed consists of the following: W. C. Coker, chairman; Otto Stuhlman, Jr., secretary; J. M. Bell, G. M. Braune, Archibald Henderson, William MacNider, W. F. Prouty.

According to information liberated by Dr. Stuhlman, if worthy results are produced from the use of this money, the scientific department of the University might expect further grants from the same source.

MISS ROCKWELL HAD SUCCESS IN SALISBURY

Spent Two Weeks Successfully Directing Three One-Act Plays—Assisted in Organizing Dramatic Ass'n.

Miss Ethel T. Rockwell, director of the bureau of community drama, recently returned from Salisbury where she has completed a successful two-weeks period of directing three one-act plays, "In Spring a Young Man's Fancy," "Society Notes," and "The Valiant."

The plays were staged successfully, and they were enthusiastically received by an unusually large audience. The leading citizens of the community composed the casts, of which a number were alumni of the University. Among them were Spencer Murphy, William Somers, Will Gardner, Cliffer Pedler, White Linker, and William Hennessey. Miss Rockwell states that the program was one of the best that was ever staged under her direction; the casts for the three plays comprised 25 people.

While in Salisbury Miss Rockwell assisted in the movement to organize those interested in drama into a community theatre group. She reports that the organization is fast being perfected and will aid in arousing interest in drama in Salisbury.

The directors of the western section of the Carolina Dramatic Association, which is under the direction of Miss Rockwell, met at Salisbury during the period that Miss Rockwell directed the plays there. Plans were formulated for the triangle preliminaries, to be held February 19, of the dramatic tournament under the auspices of the association. It is expected that the dramatic tournament for this year will be the most successful in the history of the dramatic association. The finals will be held here March 25.

TEXTILE INVESTIGATION BY INSTITUTE POSSIBLE

Proposed Survey by Federal Women's Bureau May Win Permission for Investigation by Institute of University.

According to an article published last week in the Raleigh News and Observer, cotton mill owners may be forced to go back on their "no investigation allowed" policy shown the University of North Carolina Sociology Department recently, if the request of the organized women of the state made to the Child Welfare Commission last week to have the Federal Women's Bureau make a survey of conditions of working women in North Carolina is granted.

"This survey was requested two years ago," states the article, "and the commissioners voted to make as much of the survey as funds permitted. E. F. Carter, executive officer of the Child Welfare Commission, declared there were no funds available for such a survey, however, and none has been made. Last week representatives of the Federation of the Women's Clubs of North Carolina, the State League of Women Voters, and the Y. W. C. A. appeared before the commission and asked that the Women's Bureau be called in to make the survey."

It will be recalled that while the textile owners were having a convention at Pinehurst during the Christmas holidays, a committee representing the Institute of Social Research of the University of North Carolina went before the convention and made the request that the institute be permitted to make a thorough study of the textile working conditions in the state. They were flatly refused, with a bit of nasty and unbecoming language thrown in. Dr. Howard Odum, head of the Department of Sociology of the University, headed the institute which had been granted \$100,000 by the Rockefeller Foundation to make the investigation. When the cotton mill owners said the emphatic NO, the Institute could proceed no further, and is now waiting for further developments.

However, if the Federal Women's Bureau is permitted to make the investigation, which it is highly probable that it will be, the mill owners cannot block this move. This bureau is a fact-finding agency with a highly trained personnel of workers that exists to render such service to the states free of charge. It is understood that the survey that will be made by this bureau will only touch upon the working and living conditions of women engaged in textile industries.

Just what this survey, which is almost certain of being made, will have to do with the investigation that was asked to be permitted to be carried on by the Institute, under the direction of the University Sociological department, is not known at this time. However, it is hoped that it will lead to the ultimate realization of the plans of the Institute, and that it can make its investigation in harmonious co-operation with the mill owners of the state.

CHAPEL HILL DEFEATS OXFORD BY ONE POINT

The Chapel Hill high school basketball team defeated the hard going rivals for championship honors, Oxford, Wednesday night on the local high Tin Can to the astonishingly close tune of 17-16.

The game was one of the fastest and hardest fought that has ever been witnessed on the court of the local high school boys. The ball was down at one end of the floor and then at the next. Spectators were on edge throughout the four hectic quarters. Warren and Wright for Chapel Hill played a good consistent passing game while Bynum and Wright were the most skillful instruments in dropping the needed points in for the local lads.

The Community Club's music department, of which Mrs. Paul John Weaver is chairman, is organizing a class in Dalcroze Eurhythmics, to be held in the Chapel Hill school gymnasium during the first session of the University's Summer school.

Eurhythmics is exercise in rhythmic muscular motion. The founder of the Dalcroze method, Emile Jaques-Dalcroze, an eminent teacher and composer of music, was for years professor of harmony and composition in the Conservatoire of Geneva and is now director of the Dalcroze Institute there.

Mrs. Weaver expects to get a teacher who was a pupil of Dalcroze's and who taught Eurhythmics in the University of Pennsylvania.

The fee for the course will probably be \$10. Children's classes will be held five times a week; and adults' classes three times a week but with longer periods.

Mrs. Weaver will be glad to answer anybody's inquiries about the plan.

Tickets on Sale For BLACK and WHITE At Patterson's
