Patterson Addresses The Epworth League On Astral Relations

Speaking before the Epworth League of the Methodist church Sunday night, Dr. A. H. Patterson, of the school of applied science, showed the significance of the relation of the heavens to the religions of the world.

Dr. Patterson said that the first men looked to the heavens for their gods, thinking the sun, moon and stars divine and worshipping them. He declared that this was symbolical because very many people are still superstitious about the planets, believing as they do in the importance of a "lucky star" and the right astral season for an undertaking. This amounts to a religion with some people.

Prices on Athletic Tickets

Local faculty members may secure season tickets to all baseball, tennis, and track meets to be held on the home ground this spring for \$5, the Athletic Council announced yesterday. This is an unusually low price for admission to the large number of athletic events that will be held here during the spring quarter and a large number of the professors are expected to take advantage of this bargain offer of the Athletic Council.

Mrs. Cale K. Burgess and children of Raleigh visited her mother, Mrs. I. F. Lee, Sunday.

Large Audience Hears Concert in Memorial Hall

famous "Song of Love" theme was taken in the first measures by the brass and then passed around the various choirs with perfect ease and felicity. The program was concluded with Dvorak's Slavonic Dance, a typical combination of this composer's modern technic and color sense with the inherent background of his national music.

It must be dismissed here in a few words, but recognition should be extended to the musicianship displayed in a program of five such difficult works, for the performance had a marked enthusiasm and intelligence to commend it.
