PARAGRAPHS

BEAT DUKE, TAR HEELS!

Bought your tickets to the Carolina-Virginia game yet?

Seeing as how we are matter of fact and lacking in sentiment, we can't see any reason why we shouldn't disappoint the dukes and duchesses in the game today.

Being strongly in favor of saving time, why couldn't the cross country boys run to Durham today instead of the regular course through the woods about the village? They would be there for the game then.

"Constitution to be Considered after Holidays," headlines the favorite tri-weekly. Remembering the activities of bygone yuletides, we suggest that all consider the constitution during the period of revelry.

Nothing was said about cigarettes, matches or dopes in the bunning decree which the town aldermen passed the first part of the week.

The News and Observer says that the Democrats should lead. A careful survey of the situation leads us to wonder whom are they going to lead?

Under a two-column headline reading "What We Think" the Meredith Twig gives a list of gal chile superlatives. If they want to know "what we think" they should trot the choices out for inspection.

ENTER HIGH POINT, A COLLEGE

Since High Point college, the Methodist Protestant institution of higher learning located in the furniture city, began operation in the early twenties, the institution has been rapidly developing into a real college. The action of the High Point faculty, taken this week in regard to hazing, is another step of great importance in the process.

Hazing in any form in North Carolina institutions has been unlawful for a number of years. However, it is practised in a mild form in almost every institution in the state. Smaller schools are usually the heaviest indulgents. But High Point college is the exception to the rule. This week one of the star football players was notified that he was persona non grata because of his hazing activities. To a small institution that is trying to build an athletic reputation to advertise the school and currie favor among the alumni (this is not a charge against High Point, but is the practice of almost every small institution and is stated without any reflection on any institution that may do so), the Methodist Protestant institution is taking a courageous, dignified and constructive stand. The members of the High Point college faculty are familiar with the qualities that make a college. The mere action against hazing is worthy; the action against the athlete when he is guilty is highly commendable. It is often that an

athlete, because of his quasi-importance and position, "gets by" with violations of such regulations. Some colleges have too frequently condoned infractions by athletes. The TAR HEEL congratulates High Point for its action against hazing and for its courage in upholding the dignity of the institution by seeing that the due process of the regulations of the college is not sidetracked or thwarted even when an athlete is the offender!

Engineers Decide to Give a Dance After Christmas Holidays

Smiley and Maxwell Address Regular Weekly Meeting.

The electrical engineers at their regular weekly meeting in Phillips Hall Thursday evening at 7:15 p. m. decided to defer its annual dance until after the Christmas holidays. There was a difference of opinion, however, as Mr. Hazell stated there would be no more Grail dances before Christmas, and it would be best to hold the dance some time between Thanksgiving and Christmas. But on consideration of the fact that the examinations were not so far off, it was voted to postpone the dance.

T. B. Smiley addressed the Institute on "Sag and Stress Analysis of Transmission Lines." J. M. Maxwell spoke on the "Transformer Locations in Signal Service."

Annual Photographer Here Until Tuesday; Be Back after Xmas

Due to the fact that the rush business of the past week prevented the Yackety Yack photographer from taking all pictures for which he had appointments, he will remain here today, Monday and Tuesday to take all senior, pictures and all dance pictures which he did not have time to take earlier in the week.

Since the photographer will not be back again until after Christmas, all pictures that are to go in the senior dance sections of the Yackety Yack must be taken at once, or they will be left out of the annual. Appointments with the photographer for today, Monday, and Tuesday, can be made at Moulton's studio, over Foister's, and at Sutton and Alderman.

Legal Fraternity Pledges Nine Men

Ruffin chapter of the Phi Alpha Delta legal fraternity announces the pledging of the following men: Odell Sapp, N. B. Gaskill, J. B. Linn, George McDaniel, F. I. Newman, Sam Merritt, A. B. Raymer, Dave Thomas, and Buck Lee.

The following men were initiated: Lawrence Stith, Frank Aycock, Tom Warren, D. M. McComb, L. V. Huggins, and H. D. Burke.

The old members of the chapter are J. C. Rodman, E. G. Thompson, D. K. Moore, L. T. Bledsoe, C. R. Holmes, Ed Gregory, R. W. Martin, D. S. Gardner, J. N. Smith, R. T. Giles.

LACOCK TO ERECT BUILDING FOR SHOP

Will Be at Old Site of Smoke Shop, Now Being Wrecked.

Almost before the students have realized that the Smoke Shop is moved, workmen have started demolishing the building, and before many weeks, an entirely new structure, housing Lacock's Boot Shop, will occupy the location.

"Dean" Paulson, proprietor of the Smoke Shop, has moved his place of business next door into the Sutton building.

W. O. Lacock, owner of the property, and proprietor of Lacock's Shoe store, in telling of his plans for expansion, states that the new location will be one of the best equipped, most attractive shops in the state. The building will be of modern tile and brick construction, and much larger than the quarters that are now in use. The repair department will be continued, with the most up-to-date machinery that can be obtained, and capacity for work will be doubled.

The management intends to carry a much larger and more complete stock, including Nunn-Bush, Crossett and Friendly Five lines of shoes for men. Hosiery will not be neglected, and a stock of women's shoes will probably be added, stated Mr. Lacock.

Mr. Lacock has been in business here for fifteen years, has always handled footwear exclusively, and does not expect to change in that respect. He is now preparing to move his business into the new building, which the contractor has promised to have ready in about a month.

It's all right for a girl to seek a model husband, but while she is at it she should be sure he is a working model.—Louisville Times.

ALUMNI PUBLISH SCIENCE PAPERS

Investigations Embrace Fields of Neurology, Anemia and Obstetrics.

Recently published investigations by Alumni announced by the Department of Zoology show a wide variety of valuable work in diversified fields. Investigation and papers on Neurology, Anemia and Obstetrics are among the subjects reported.

W. R. Earle, M. S. 1924, National Research Fellow in the Medical Science, is the most recent graduate. His paper on "Degeneration in Vitro of Leucocytes and Connective Tissue Cells under the Influence of Light" was published in the Proceedings of the Society for Experimental Biology and Medicine, Vol. XXIV.

G. P. La Roque, a student in 1893-95 is now Associate Professor of Surgery at the Medical College of Virginia. He wrote a paper on "A Biological Consideration of Abdominal Hernia." It was published in International Clinics, Vol. 3, series 33.

Other recent papers by Alumni are:

E. J. Wood, B. S., 1899, eminent physician and investigator in Medical Science, of Wilmington, N. C.: Pernicious Anemia in its Relationship to Sprue. American Journal of the Medical Sciences, Vol. 169.

C. A. Shore, M. S., 1902, Director of North Carolina State Laboratory of Hygiene: The International Rabies Conference. The Health Bulletin of the North Carolina State Board of Health, Vol. 42.

C. M. Byrnes, B. S., 1902, Associate in Clinical Neurology, Johns Hopkins University, and distinguished Neurologist of Baltimore, Md.: A Contribution to the Pathology of Paralysis Agitans, Archives of Neurology and Psychiatry, Vol. 15.

J. B. Murphy, B. S., 1905, Members of Rockefeller Institute for Medical Research: The Lymphocyte in Resistance to Tissue Grafting, Malignant Disease, and Tuberculosis Infection. An experimental study. Monograph 21 of the Rockefeller Institute for Medical Research.

O. W. Hyman, M. A., 1911, Professor of Histology, University of Tennessee Medical College: Studies on the Larvae of Crabs of the Family Xanthidae. Proceedings U. S. National Museum, Vol. 67.

J. W. Harris, M. A., 1912, Associate in Obstetrics, Johns Hopkins Hospital: Description of a new Organism that may be a factor in the Causation of Puerperal Infection. Bull. Johns Hopkins Hospital, Vol. XL.

H. S. Willis, A. B., 1914, Associate in Medicine, Johns Hopkins University: Repeated Reinfections on Allergy and Immunity in Tuberculosis. American Review of Tuberculosis, Vol. XIV.

Rozzelle Comes to Methodist Church

Will Succeed Rev. Patten as Methodist Preacher in Chapel Hill.

Rev. C. E. Rozzelle, who has been in charge of the Myers Park church in Charlotte for the last two years, was appointed pastor of the Chapel Hill Methodist church at the North Carolina Conference in Raleigh last Sunday night. The assignment becomes effective immediately, and the new minister will preach here Sunday morning.

After graduating from Trinity College fifteen years ago, he went to Vanderbilt, and later he received the degree of B.D. from Emory University. Then he spent a short time in Texas.

Rev. Walter Patten leaves here next week for New Bern. In his six years here he not only won the high esteem of the citizens but distinguished himself by the success with which he carried through the campaign for the new church.

LARGE CROWD SEES EDUCATIONAL FILMS

The largest crowd of the season attended the picture at Venable Hall Wednesday night. The show opened with a well filled house of over two hundred present. Members of the Chemistry department faculty who have charge of the pictures were well pleased with the attendance, and expressed their hopes that a still larger crowd would be present for the next picture. University students apparently are taking more interest in these educational pictures.

Three pictures were shown Wednesday night. In "The Story of White Lead" the way of making white lead by the old Dutch process was thoroughly explained. This method was used in Holland many years ago. The second picture demonstrated the use of oxygen, illustrating its application in welding iron, brass, aluminum, and other metals. In addition to this, the third picture showed the application of compressed air in relation to the present day drill, hammer, and cutting machinery.

Prizes to Be Given High School Pupils For Science Essays

Academy Offers Awards for Physics and Chemistry Papers.

Continuing its annual practice, the North Carolina Academy of Science will award a prize for the best essay written by a bona fide high school student on any subject in the field of Physics or Chemistry.

The prize last year was offered for the best essay in the field of Botany; Geology, Physiology or Zoology. The silver loving cup was won by Miss Hilda Cook of the Sunderland School, Concord, N. C. The title of Miss Cook's essay was "My Life History as an Oak Tree."

The North Carolina Academy of Science announces the following regulations for the contest this year: Essays shall be limited to a maximum of 2500 words.

The essay shall be submitted in typewriting on one side of bond paper 8 1/2 x 11 inches.

It is not necessary that a student be registered in the subject in order to compete in this contest.

A title page, carrying the subject, the writer's name, the name of the school, the class to which the writer belongs, and the courses taken in science shall accompany the essay.

Students may receive aid from instructors only in securing materials. The composition shall be wholly that of the competitor, and so certified by the principal of the school.

Essays should be sent to Prof. Bert Cunningham, Duke University, Durham, N. C., not later than April 1,

Put your pipe on P.A.

WHAT you get out of a pipe depends on what you feed it. Millions of contented jimmy-pipers will tell you that Prince Albert commands a pipe to stand and deliver. You suspect you are in for some grand pipe-sessions the minute you get a whiff of P.A.'s aroma.

The first pipe-load confirms your suspicions. What a smoke, Fellows! Remember when you asked for the last dance and she said "You've had it"? P. A. is cool, like that. And sweet as knowing that she didn't really mean it.

Sweet and mellow and mild and long-burning. Put your pipe on P. A. You can hit it up to your heart's content, knowing in advance that P. A. will not bite your tongue or parch your throat. That one quality alone gets P. A. into the best smoke-fraternities. And then think of all its other qualities!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with sponge-moistener top. And always with every bit of bite and parch removed by the Prince Albert process.

PRINCE ALBERT
—no other tobacco is like it!
