

YOUNG TARS TO MEET VIRGINIA THIS AFTERNOON

Tar Babies Have Three Wins Chalked Up; Doped to Make It Four.

Though the varsity will not play this week-end, Carolina students will not lack amusement along football lines, since they will have their second chance to see Coach Belding's freshman team in action. This game should prove quite interesting from more than one point of view. In the first place it will be with the freshmen from the University of Virginia and in a sense will be a preliminary to the big Thanksgiving classic which the varsity teams of the two schools will play next Thursday. Another point of interest is the fact that the Virginians are coached by a North Carolinian, Joe McConnell, former star pivot man for Davidson.

Pre-game dope now favors the Tar Babies to win. Their perfect record of three wins over some of the strongest freshman teams in the section is mighty imposing. Another factor which tends to swing the predictions in Carolina's favor is that the Virginia frosh were defeated by the Maryland freshmen. Last Saturday the Tar Babies decisively trounced the Old Liners. Provided that they do win this game, the Carolina freshmen have an excellent chance to finish the season unbeaten, since State College, the only other opponent, has been defeated by Duke. In the first game of the year Belding's men whipped Duke. Therefore on a basis of comparative scores, the Tar Babies should easily win from State's yearlings.

In helping prepare the varsity for its clash next Thursday, the freshmen have seen quite a bit of scrimmaging this week. Wednesday and Thursday saw them working against the first and second string teams. Yesterday the work tapered off somewhat in order that the squad might be in good shape for this afternoon's struggle. Only one injury was received in last week's game with Maryland. Rip Slusser, former Augusta star, had his leg hurt. This has kept him out of the rougher work this week but he will probably be in shape to start at his halfback position this afternoon. While there is still some doubt as to who will compose the starting lineup, it is quite probable that the same team that began the Maryland game will take the field today. However the following team is likely to start: Morris and Runnels, ends; Buchanan and Alexander, tackles; Hutchinson and Donavant, guards; Gilbreath, center; Branch, quarterback; Slusser and Yost, halves; and McAllister or Estes, fullback.

Since there is no game among the members of the Big Five scheduled for today, officials are expecting the crowd to be quite a bit larger than usual. The game will be played at 2:30 in Kenan Stadium. Admission will be \$1.00.

Twelve Successful In Pharmacy Exams

Twelve men were successful in the examination of the North Carolina Board of Pharmacy held here recently for license to practice pharmacy.

They were, as pharmacists: M. R. Barnhardt, Rockwell; T. L. Brodie, Norlina; J. R. Curtis, Mullins, S. C.; J. S. Ferguson, Raleigh; F. O. Garren, Asheville; I. B. Hall, Jr., (col.), Winston-Salem; G. W. Markham, Greensboro; C. H. Oakley, Roxboro; C. A. King, Jr., High Point; C. J. Wartman, Danville, Va.; and C. B. White, Henderson; as assistant pharmacists: K. B. Branch, Lucama.

Little Speaks for Dental Conventions

Mr. M. G. Little, head of the department of extension teaching of the Extension Division, appeared before the First District Dental Convention at Hickory on Monday to speak in behalf of the post graduate course in Dentistry that the Extension Division is giving, beginning in January.

On Tuesday, Little attended the annual meeting of the North Carolina Real Estate Board gathered at Winston-Salem.

Sigma Phi Epsilon announces the pledging of Doyt Teubner of Westfield, Mass.

North Carolina Club Will Hold Meeting Monday

The North Carolina Club will hold its regular meeting Monday night, November 26, in room 112, Saunders Building. The subject under discussion will be "Transportation and Communication in North Carolina," and a paper on this theme will be presented by Mr. Gould M. Ham-bright. Not only will Mr. Ham-bright trace the development of railroads, highways, automobiles, telephones, and radios in the state but he will discuss the influence which these new modes of transportation and communication are having on rural people and rural institutions.

It is hoped that those who have attended recent meetings of the club will be present Monday night, as well as many who have not been before. These discussions of current conditions and problems of the state are proving to be of great interest to those who participate in them. The meeting will be called promptly at 7:30 and will adjourn within an hour.

Smiley Address the American Institute of Electrical Engineers

T. B. Smiley, of the engineering school, spoke to the local chapter of the American Institute of Electrical Engineers Thursday night on radio television. In the course of his talk Smiley emphasized the importance of the perfect equipment needed for both sending and receiving, the common radio receiving sets, now in vogue, not being adequate to receive television with. Three stations in this country alone are sending television from their plants at the present time.

Dr. A. C. Howell, English, professor, talked on "Parlor Engineering" in which he clearly outlined the importance of every man's being able to speak well before a small or a large group. "In making a good impression, a man enables himself to get ahead in his profession," the professor stated.

Maryland Educators Like Venable Hall

Dr. Samuel B. Schofield, head of the department of chemistry at Western Maryland College, accompanied by the President of the same and another member of the faculty, were in Chapel Hill last week to attend the convention which was sponsored by the Education School. While here they made thorough investigation of Venable Hall in order to get new ideas for the new chemistry building that is soon to be erected on the Western Maryland College's campus.

They were impressed with the ventilation and illumination systems of our building and lauded them very highly.

Dr. J. M. Bell, head of the chemistry department, stated that Venable Hall was the object of investigation by practically every college in the South that was contemplating a new building. He also said that Dr. S. B. Schofield was about the fifteenth person who had looked over Venable for the purpose of getting new ideas on how to build a chemistry building. Venable Hall is the largest and best equipped chemistry building in the South.

MARY D. WRIGHT DEBATERS TO BE DECIDED MONDAY

The chairman of the Di Senate committee on the Mary D. Wright Debate announces that the team to represent the Di in this contest will be chosen Monday night at 7:30 in the Di Hall, New West building. Speeches shall not exceed seven minutes. There will be no rebuttal in this preliminary. Each speaker therefore, will have at his disposal exactly seven minutes.

Royall To Address Board of Directors

Kenneth Royall, of Goldsboro and a graduate of the University in the class of 1914, will address the informal dinner of the Board of Directors of the Carolina Alumni Association which will be at the Carolina Inn Friday evening, December 7.

Carolina Playmakers to Broadcast Over National Hook-up Sunday Night

As a climax of the Playmakers' second annual visit to New York City they will broadcast "Quare Medicine" one of the four bill plays from over the Columbia Broadcasting system Sunday night, between the hours of ten and eleven o'clock.

Yesterday morning Professor Hubert Heffner, Miss Nettina Strobach, Howard Bailey and Lawrence Thompson, who appear in the play, had their voices tested at WABC, one of the chain stations in New York situated in Steinway Hall.

The appearance of the Playmakers before this nation wide hook-up will mark the first attempt of large radio companies to present programs of this nature, the results of which will form a precedent that such organizations will follow in the future. This event is in the nature of a test of "spot features" on the air. It marks the greatest performance in Little Theatre history.

Arrangements for the appearance of the Playmakers before the radio audience of the Columbia company were made by George Denny, director of the Institute of Arts and

Sciences and the Morningside Players of Columbia university at New York. Assisting Mr. Denny is James Francis Cleminger, a graduate of the University of North Carolina, and at present the assistant director of the Morningside Players.

Immediately preceding the time the Playmakers take the air, a famous patron of the theatre or one of the most important men of the New York stage will introduce the actors.

The stations over which local fans may hear the first performance of the Playmakers over a nation wide hook-up are the following:

WABC New York; WOR New York; 2X E New York; WCAU Philadelphia; WFAN Philadelphia; WNAC Boston; WEAN Providence; WFAL Syracuse; WMAX Buffalo; VCAO Baltimore; WJAS Pittsburg; WHK Cleveland; WADC Akron; WAIU Columbus; WGHP Detroit; WMAQ Chicago; WBBM Chicago; WOWO Fort Wayne; KMOX St. Louis; KMBC Kansas City; KOIL Council Bluffs; WSPD Toledo; WICC Bridgeport, and WLBW Oil City, Oklahoma.

Bradshaw Addresses Discussion Group On "How To Study"

At the last meeting of the discussion group Friday on "How to Study," Dean Bradshaw stated the general rules of psychology that deal with concentration and showed how these rules govern effective study. "Life is a rhythm," said Mr. Bradshaw, "and we must learn to use that rhythm effectively in order to succeed."

Mr. Bradshaw went on to say that if he had no interest in a subject and he should arrange his work so that he can accomplish the most with this energy," stated Mr. Bradshaw. "One should concentrate on what he is doing at the time. By efficient self-management one should relax. He should follow the old proverb of work while you work and play while you play."

The next meeting of the group will be held next Tuesday morning at which time the general topic of memory will be discussed. All students who are interested in improving their study are invited to attend these meetings.

Dr. MacNider Attends Conference

Dr. MacNider, connected with the Medical Department of the University, was in Asheville last week where he attended a meeting of the Southern Medical Association. The object of this conference was to discuss the need and importance of medical education.

Entertainment Committee Adds Two More Events to Program

The Entertainment Committee is completing negotiations for the final numbers to be presented on the year's program. At a meeting of the committee the programs of Gina Pinnera, one of the world's greatest sopranos, and Ronny Johanson, internationally known Swedish dancer, were approved by the committee as finishing touches of the year's entertainment program.

By very excellent management the committee has bargained with the representatives of the different stars and personalities that have and are to appear before the University audience so that for the three dollars each Arts and Education student pays for the entire bill is really buying a conservative estimate of at least \$23.50 worth of entertainment.

The committee has had to work blindly this year, not having any evidence of what the students would prefer to guide them in their selection of numbers to make up the year's program. The inclusion of lectures on the list of events was hesitantly made. The members of the committee were very agreeably surprised over the fact that Sherwood Anderson at

High School Football Championship is Hotly Contested Over State

Contesting every inch of the victors' way the schools in the State High School Athletic Association are closing one of the hardest pigskin seasons since the formation of the association.

Last week Hickory proved an easier nut to crack than had been expected, going under to Statesville by a score of 6-0. The highest score of the week was the defeat of Whiteville by a score of 57-0 at the hands of the eleven from Wilmington. Oxford and Durham tied scores for the week and consequently drew for the opportunity of continuing on in the contest, Oxford winning the draw. Concord defeated Lexington by drawing, as did also Greensboro with High Point.

In the Eastern Division four teams still remained yesterday. Both the games were played yesterday afternoon. At Fayetteville, Wilmington met Raeford; at Raleigh, the local team was met by Oxford.

Statesville, the upset for last week's dopesters, battled Concord at Davidson yesterday afternoon. This afternoon Greensboro will meet Winston-Salem at Greensboro. This last event bids fair to become an annual affair.

Dewolf Is Chosen President of Dorm

D. C. Dewolf, Jr., was chosen president of the Manly Dormitory Club at the last meeting of the organization. Councilmen for each floor were also selected by the club. For the first floor George Bourdelot and T. G. Upchurch were chosen. Bill Bobbitt and Alan Marshall are the officers of the second floor.

Student Notice

Admission for students to the Freshman game this afternoon will be by coupon books and pass cards at Gate 2 only. Coupon books and pass cards that have not been returned since the South Carolina game will be returned at the game at Gate 2.

TRIAL BY JURY IS DISCUSSED BY PHI

Resolution Also Passed to Aid In Keeping the Campus Beautiful.

The Phi Society held its regular meeting Tuesday night in New East with Representative Crumpler presiding in the absence of the regular speaker, Crew.

Representative Ray presented the bill, "Resolved that the Phi go on record as favoring a campus beautiful." He pointed out that the practice of walking across the grass, throwing candy wrappers and paper on the lawn, and playing tag football on the grass should be stopped. Members of the Phi were asked to cooperate and to encourage the student body to show respect for the beauty of the campus. Little opposition was furnished, and the resolution passed.

"Resolved, that the jury system of trial should be abolished," was then presented to the society and brought forth a lively discussion. The affirmative maintained that the average type of man selected for jury service is incapable of assimilating facts and rendering an accurate judgment; he is led by emotion rather than facts. The negative declared that the average citizen has a fair education, and as he is selected from the masses, he is in an able position to judge his fellow citizens. The measure was defeated by a large majority. One new member was admitted to the Phi.

San Carlos Grand Opera Company To Come To Greensboro

Many Students and Faculty Members from the Hill Expected to Attend.

According to announcements received here by the University Music Department, the week of January 14-19 has been selected as Grand Opera Week for Greensboro, at which time the San Carlos Opera Company, the world's foremost organization of its kind, will present ten operas. The event will be sponsored by the North Carolina College for Women, and the prices have thereby been reduced to a very popular scale. The program in its entirety follows: Jan. 14 (Eve.) *Aida*; Jan. 15 (Mat.) *Tales of Hoffman*; Jan. 15 (Eve.) *Tosca*; Jan. 16 (Eve.) *Faust*; Jan. 17 (Mat.) *Cavalleria Rusticana* and *Pagliacci*; Jan. 17 (Eve.) *Madame Butterfly*; Jan. 18 (Eve.) *Rigoletto*; Jan. 19 (Mat.) *Hansel and Gretel*; Jan. 19 (Eve.) *Carmen*.

It is expected that a number of the faculty and student body will attend the entire series of performances by this company when it appears in Greensboro, and in view of this fact, blanks are available at the business office of the Music department in Person Hall for the use of those who wish to reserve their seats for these performances immediately. The seating arrangements of the N. C. College Auditorium, in which the operas will be sung, is also mapped out for the inspection of the prospective visitors. Those interested are requested to notify the Music Department here of their intentions as soon as possible in order to insure themselves the best seats for the performances.

Dr. Mary Markley Will Speak Here

Dr. Mary E. Markley, noted woman secretary of the Board of Education of the United Lutheran Church of America will appear before an audience in Gerrard Hall Sunday morning at ten o'clock.

Dr. Markley has visited the campuses of most of the colleges in America during the past few years. She has devoted her life to student work, but will appear here Sunday for the first time.

Every student and faculty member who is interested is cordially invited to attend the meeting, which is being sponsored by the local University Lutheran Student Club.

CALDWELL TELLS DEBATING CLASS TO VERIFY FACTS

Speaker Explained the Methods Which a Historian Uses in Arriving at Conclusions.

"A good historian must be zealous in getting at the truth," declared Dr. Caldwell in an address which he delivered to the Debate Class Thursday night in 201 Murphy. Dr. Caldwell attempted to make the class understand the methods which a historian uses in arriving at conclusions. He explained the behavior of the historical mind in the presence of facts. The speaker emphasized the fact that the historian cannot prophesy, for his field is always the past. He was of the opinion, also, that one must have the ability to discern the relative importance of items in order to be a good historian.

"The first obligation resting upon the historian is to get all of the facts," asserted Dr. Caldwell. He called attention to the fact that the historian must be careful in selecting his material, for many documents are forged. Therefore, he declared, a good historian always tests the genuineness of the authorship of his material and makes certain that the document is in accord with the original. The speaker cited examples of interpolations in ancient documents, in some cases whole paragraphs and even several paragraphs have been inserted.

Dr. Caldwell was of the opinion that the most difficult problem of the historian is that of determining the meaning of ancient documents. He stressed the truth that it is not always safe to go by translation entirely, for changes in the meaning of words often cause a corresponding change in the thought of the translation. The student of history should always study the circumstances under which a given article was written, for persons have often written things under threat. This fact, he declared constitutes a continual menace to the historian.

Dr. Caldwell stressed the much-spoken of contention that historians should treat facts as facts in every case, being sure to guard against assuming a literary style at the expense of the literal truth. "The everpresent task of the historian is that of classifying his material and being objective in his search for what actually happened," asserted the speaker in conclusion.

University Professor Is Co-Author of Map and Geological Report

Aided in Making Geological Report of Pendleton County, W. Va.

Professor W. F. Prouty, of the department of Geology, is co-author of the "Geological Report and Map of Pendleton County, West Virginia," which was published recently by the West Virginia Geological Survey. The area studied and mapped in this report is approximately one thousand square miles, and it includes some of the most attractive mountain scenery to be found anywhere in the Eastern part of the United States. The massive white Medina sandstones cap many of the higher ridges. In places this sandstone rises vertically as a great wall more than two hundred feet in height. In this region also the Paleozoic sediments are many times repeated in outcrop, due to the great amount of earth crustal folding. Some of the larger mountains are great undivided canoe-shaped, arching folds (anticlines), while others are either the resistant axial portions of canoe-shaped trough folds (synclines), or the beveled edges of highly tilted resistant strata, usually sandstone. The valleys are made chiefly by stream action in the softer shales and with limestones.

The rocks exposed in Pendleton county are of sedimentary character, formed chiefly in the ocean during Paleozoic time, and have a thickness of more than seventeen thousand feet. These rocks have abundant shells of sea organisms. The geological report deals with the rocks and their fossils.

The Pendleton County Geological Report is the fourth geological report to be published by the West Virginia Geological Survey in the past four years, in which Dr. Prouty has been a principal contributor.
