

## TRYOUTS TO BE HELD FOR NEW MUSICAL SHOW

To Take Place in Memorial Hall Monday Night; 19 Roles To Be Filled.

The Wigwe and Masque, amateur University dramatic organization, definitely announced its intention of including women in the casting of its current musical show, "Mum's The Word," after having met with the Campus Committee on Dramatic and Musical Plays yesterday morning.

The state newspapers carried stories the first of the week stating the fact that feminine roles in the Wigwe and Masque play would not be filled by impersonators this year, before that organization had decided upon its policy.

This is the second time only in the existence of the club that the female parts will be filled by women. "Whoops M' Dear" included women for the first time.

Tryouts will be staged in Memorial hall promptly at seven-fifteen o'clock Monday night. Nineteen principal roles are to be filled by the casting committee headed by "Pete" Wilson, president and Al Kahn, amateur theatrical impressario. In addition to the principal nineteen parts eight chorus men and eight chorus girls will be chosen.

Every bona-fide student of the University is both eligible and urged to try out for parts in the production. All of the roles are important, but they do not all require ability to sing, several being non-singing parts.

Rehearsals will commence immediately following the final selection of the cast for the production.

Al Kahn will produce "Mum's the Word," Wex Malone compose the musical score, Mary Dirnberger will have charge of scenery, and "Pete" Wilson will be the business manager.

## Unselfish Service Is Reason for Studying Ministry, Says Darst

Says More to Ministry Than Preaching on Sunday and Visiting Sick.

The opportunity for rendering unselfish service was stressed as the reason for taking up the ministry as a life work by Bishop Thomas C. Darst in a chapel talk yesterday morning on "The Ministry as a Life Work." The talk was the first of a series on the different vocations to be given during the spring.

"All down through the ages the objective of rendering services has inspired men to do great things, and to this objective, the Christian ministry, I point you today."

At the stage in life when one is in college he should think about what he is to do in life if he is not thinking of this, he is a funny person. Bishop Darst urged the ministry as a life work because it offers an opportunity to render the greatest amount of unselfish service, and he placed its opportunities above that of the lawyer, engineer and architect.

"If there was nothing to the ministry except preaching on Sunday, and making parish visits, I would not be one wanting this information is asking. The opportunity to render service is the thing that attracts men to the ministry."

The Bureau of Vocational Information has on file information about the ministry as a profession, and anyone wanting this information is asked to call at the office of the Bureau in South building.

## Metzenthin Will Conduct Lutheran Services Sunday

Dr. E. C. Metzenthin will conduct the service for the Lutheran students and their friends on Sunday morning at ten o'clock in Gerrard hall. The topic of his talk will be, "Good Taste in Religion." The importance of aestheticism and the decorum in religious activities will be stressed by Dr. Metzenthin.

## Women Students Plan May Day Pageant

Miss Mela Royall, president of the Women's Association, and Mrs. Marvin Stacy, Dean of Women, are heading a committee investigation to consider the feasibility of a May Day pageant depicting the history of women at the University.

## Now in Geology Library

Pictured above at the left is a copy of the statue of Benjamin Franklin made by R. Tait McKenzie in 1914 and recently exhibited in Raleigh by the North Carolina Art Society. Dr. Collier Cobb purchased the statue for \$1,000 and has just presented it to the University Department of Geology, of which he is head, half the amount being contributed by Mrs. Catharine Pendleton Arrington and the other half being raised by Dr. Cobb from among the alumni.

Pictured at the right is a portrait of Franklin as an old man, which was painted by William Dunlap in New York in 1826. The Philanthropic Literary Society presented this portrait to Dr. Cobb in 1900.

## Philological Club To Be Guest of Erasmus Club, Duke University

Professor Jones to Read Paper on "The Disreputable Century."

The Philological Club of the University will be visiting guests to the Erasmus Club of Duke Monday night, February 4, it was announced here yesterday by N. E. Adams of the Department of Romance Languages.

Professor Howard Mumford Jones of the University English Department is on the program for a paper on "The Disreputable Century," and Professor F. A. G. Cowper, of Duke will present a study, "Goutier d'Arras and Provins."

Mr. Adams says that the joint meeting will, no doubt, tend to stimulate closer contacts between the members of the Romance Language and Literature Departments of the two schools and will bring the two clubs closer together.

"This joint meeting will be held at the Duke Union at eight o'clock," according to Professor J. B. Hubbell, of Duke, who is in charge of the meeting. "Visitors are requested to enter the main gate on Main Street, and drive as far as possible in the Quadrangle, the Union being on the east side."

## Bynum Writes On Chapel Hill Climate

Jefferson Bynum, professor of Geology and Geography in the University, has recently written a pamphlet entitled "The Climate of Chapel Hill." The following account is a brief statement of the facts of the pamphlet:

According to an eminent climatologist of the United States "Chapel Hill is situated in an area of high mental and physical efficiency." The town is located on the eastern portion of the Piedmont Plateau, the elevation above sea level being 500 feet. Periods of uncomfortable weather are infrequent and usually of short duration. January, the coldest month of the year, has a mean temperature of 41.2 degrees Fahrenheit, while the hottest months, July and August, have temperatures of 77 degrees and 72 degrees respectively. The average temperature over a period of the last sixty years has been 58.8 degrees Fahrenheit. The annual precipitation averages between 47 and 50 inches, most of which falls as rain. The relative humidity ranges between 45 and 85 per cent.

## Will Select Men for Debates Monday Night

The executive secretary of the Debate Council announces that teams to represent the University of North Carolina in debates with Marquette University and the University of the South will be selected Monday night, February 4 in 201 Murphey at 7:30. Each contestant for a place on either of the teams will have seven minutes at his disposal.

## M'CORMICK AND VAN HECKE ARE GIVEN HONORS

Dean of Law School Elected Member of Executive Committee While Van Hecke Is Given Presidency of the Order of the Coif.

At the final business meeting of the Association of American Law Schools, Dean McCormick was elected a member of the Executive Committee of the association for 1928. This is the second time within two years that a member of the faculty of the Law school of the University of North Carolina has been thus honored, Dean Leon Green having served in a similar capacity in 1927. The other members of the Executive Committee for the current year are Professor Scott, of Harvard, and Dean Kirkwood, of Stanford. The officers are Professor Horack of Iowa, president, and Dean Harno of Illinois, secretary-treasurer. The Association of American Law Schools is composed of sixty-nine leading schools of the United States and Canada, and is devoted to the improvement of legal education in America. The University of North Carolina Law School became a member in 1920.

At the convention of the legal honorary society of the Order of the Coif, which serves the same purpose in law schools that Phi Beta Kappa does in colleges, Professor Van Hecke, who had served in the capacity of secretary-treasurer for the past three years, was elected president of the (Continued on page four)

## Literary Supplement to Daily Tar Heel Would Appear Twice a Month

Note: This is the third of a series of four articles in explanation of the plans for financing a daily Tar Heel. The plans involving abolition of the Buccaneer and reappointment of the publications fees with utilization of the surplus now in the treasury of the Publications Union have already been explained in separate articles. In the next issue the last plan, simplification of the Yackety Yack, will be taken up. The student body vote on the daily Tar Heel is scheduled for next Thursday.

The Carolina Magazine will lose its present format and appear twice every month in the form of an eight page literary supplement to the daily Tar Heel, if a majority of the student votes go to this plan of financing the daily, and the majority give their approval to establishment of the paper on a daily basis.

Nearly one-half of the present outlay for the Magazine would be saved if it were printed on newsprint by

## Di and Phi Assemblies Will Discuss Daily Tar Heel in Joint Session

Will Also Take up Dr. Booker's plan for Reorganizing Student Government.

The Dialectic Senate and the Philanthropic Assembly will hold a joint meeting Tuesday night at 7:00 in the Phi Hall to discuss the plan of issuing the Tar Heel six times per week. In consideration of the pressing importance of this matter at present officials of both societies are agreed that the Di and Phi should consider the proposition in joint session. Speaker Ray will preside.

In the case that the matter of the proposed daily Tar Heel can be settled in a short time a second resolution will be considered: "Resolved, That the Di and Phi go on record as having favored in joint session the plan offered by J. M. Booker for reorganizing student government at the University of North Carolina."

## Graham Speaks To Graduating Class

Prof. Frank Graham spoke to the mid-term graduating class of Greensboro High school in Greensboro last night. He was the speaker at the fourth mid-year graduation that has been held in Greensboro. The school system is modeled on an eleven and a half year plan so that each year the January class is growing larger; the first had only thirty members while this year's had fifty.

The Board of Trustees met in Hillsboro, N. C. in 1792 to determine a location for the University of North Carolina.

## Geology Department Gets Copy Statue of Franklin

### Rushing Season Will Close Tuesday Night

Period of Silence Will Last until Six O'clock Thursday Morning.

Carl Venters, president of the Inter-fraternity Council, announces the closing of the winter quarter rushing season at mid-night Tuesday, February 5. The period of silence begins immediately following the close of rushing and continues until six o'clock the morning of Thursday, February 7.

All bids that fraternities plan to offer new men during this period must be in the hands of Waddell Gholson, secretary of the Council, at 11 Vance Building not later than midnight of February 5. They must be sealed in envelopes and have the names of the students as well as their address on the front.

The seasonal rushing rules apply only to students who have enrolled in the University for the first time.

Is Presented by Dr. Collier Cobb, Who Raised Funds from Among Alumni, With Mrs. Arrington Contributing Half.

The Department of Geology of the University has just come into possession of a copy of the well known statue of Benjamin Franklin that was made by R. Tait McKenzie in 1914. It is entitled "The Youthful Franklin."

The University's acquisition of the statue was made possible through the efforts of Dr. Collier Cobb, head of the Geology Department. It was purchased at a price of \$1,000. Mrs. Catharine Pendleton Arrington gave half the amount, and the other half was raised by Dr. Cobb from among his alumni friends and former pupils.

The statue is now in place in the library of the Geology building, New East.

McKenzie, the sculptor who did the work, is widely known for his artistic productions, having exhibited in the Salon of Paris, in the Royal Academy in London, and elsewhere.

This reproduction is from the Grand Central Art Galleries, New York. It was recently exhibited at the Sir Walter Hotel in Raleigh by the North Carolina Art Society.

Dr. Cobb easily may be regarded as an authority on Franklin. He has written numerous pieces about the distinguished Quaker. He began to write about him long ago. Way back in 1872 he had an illustrated article on Franklin in the "Home Journal," published in Shelby, and from that article one may learn much about Franklin's interest in newspapers, in paper mills, in furnaces and forges in North Carolina.

It is assured by Dr. Cobb that Franklin was a geologist and soil expert, as well as a noteworthy contributor to our knowledge of geography.

## WILL GIVE PIANO RECITAL SUNDAY

Will Be One of Regular Sunday Recital Series Staged under The Auspices of the University Music Department.

Mrs. Cora Cox Lucas, of Greensboro, will play a piano recital in Memorial hall at four o'clock Sunday afternoon, February 3. This is one of the regular numbers on the Sunday Recital Series arranged by the Music department.

Mrs. Lucas is very prominent in music circles throughout the South. She was for a number of years president of the South Carolina Federation of Music Clubs, following which she served for several years as president of the Southern Division of the Federation, of which she is now an honorary officer. For the last two years she has been living in Greensboro with her son, and has taken a large part in the work of the Federation and of other music interests in North Carolina. In connection with these interests she has played piano recitals in a large number of cities throughout the south, and has always charmed her audiences with her skillful and beautiful playing as well as with her gracious manner.

One of the most interesting things Mrs. Lucas has done in connection with her musical work was with the inmates of the state prison in South Carolina. Here she gave a series of lecture-recitals which so interested the prisoners that they led to the development of a very considerable musical life in the prison. An orchestra was formed and directed by a local musician, and a regular series of concerts were given, extending over a period of several years.

## Library To Change Policy of Issuing Books On Reserve

A change in the policy of the General Library concerning the circulation of reserve books will be effective Thursday, January 31. Beginning with that date reserves may be rechecked only once. This change is designed to prevent the monopolization by individuals of certain references much in demand, especially at examination times.

Re-checking times, as before, will be at 1:30 and 6:30 P. M. A class reference drawn between 1:30 and 6:30 for example, may be re-checked only once—at 6:30, and may not be re-checked for home use after 8:30. It is felt that this will cause no hardship since in the above example the student would have the use of the book from some time before 6:30 to 10:30 P. M.

## Episcopal Church Will Entertain Students at Tea

The Episcopal church will entertain students of the University at an informal "get-together" tea in the Parish House from 4:30 to 5:30 tomorrow afternoon.

The tea, the first of a series, will be managed by Mrs. John H. Anderson assisted by several co-eds.

## Debate Class Listens To Last Talk on Next Subject before Tryouts

Says Municipal Enterprises Cannot Compete With Great Public Utilities.

"Municipal enterprise cannot hope to compete with great public utilities" declared Professor Saville in an address which he made at the weekly meeting of the debate class in 201 Murphey Wednesday night. The speaker presented the hydro-electric water power situation from the engineer's viewpoint. This was the last meeting of the class before the tryouts which have been scheduled for the night of February 4.

Mr. Saville reminded his audience of the difficulty of separating steam power from water power in the matter of the generation of electric current. The speaker asserted that the total horsepower of hydra and steam power in the United States are about equal.

Professor Saville cited the Ontario situation as an example of public control in which government authority is carried to the utmost. He reminded the class that the Ontario Power Company gets the power to generate electric current from Niagara Falls and contended at length that this situation cannot be duplicated anywhere else in the United States due to the fact that there is always a steady flow caused by the Great Lakes.

Mr. Saville advised the class to be prepared to meet all arguments regarding the Ontario situation and the Muscle Shoals project. He emphasized the importance of a knowledge of these two situations.

## Phi Beta Kappa Men To Hold Meeting Tuesday

The active members of the Phi Beta Kappa fraternity will meet in the Parish house of the Episcopal church at seven-fifteen Tuesday night for the first time this year.

The meeting announced by T. J. Wilson, Jr., for Tuesday night is of real importance according to Walter Spearman, president of the organization.

## Pi Beta Phi Pledges Give Dance

The pledges of the Pi Beta Phi sorority entertained the members of the organization at a dance given in Spenser hall last night immediately following the concert of the Flonzaley Quartet.
