Harland Goes North To Give Lectures

J. Penrose Harland, professor of archaeology in the University has gone to deliver a series of lectures in the North under the auspices of the Archaeological Institute of America.

At Johns Hopkins, Lehigh University, and the University of Pennsylvania he is to lecture on "Prehistoric Greece." There are chapters of the Institute in these places.

In New Jersey he will give a lecture on "Archaeological Discoveries." Last year Professor Harland delivered a similar series of lectures at Harvard, Yale and Columbia.

Cramming Justified

"Cramming is justified," declared Dr. Glen R. Pease of the College of the Pacific, after conducting experiments on 408 students over a period of six weeks.

Dr. Pease divided the students into two groups. One was warned to prepare for a test, and asked to record the time spent in cramming. The other group was given the test as a complete surprise.

The result showed that the first group, which had crammed an average of 87 minutes, had a lead of 11.1 over the other group.

Six weeks later the same test was "sprung" on other groups. This group, however, still had a lead of 6.3 points.

Carolina Net Squad Plays Fort Bragg

The first game of the season on the Tar Heel tennis team was played with the Fort Bragg bracketeers at Fort Bragg yesterday afternoon.

The complete schedule calls for 18 dual meets with strong Eastern and Southern teams, topped by participation in the annual State Intercollegiate tournament, to be held on the University courts here April 17-20.

RECORD HOLDERS AT V. P. I.

Two world record holders in the track world are training this spring at V. P. I. and are assisting the Gobblers in preparation for the coming meet with the Carolina Tar Heels on Saturday. These two athletes of world prominence are Harold Osbourne and Morgan Taylor; Osbourne is the holder of the world high jump record at 6ft. 8 1/4 in. and in 1924 was chosen Olympic Decathlete; Taylor clings to his record in the 400 meter hurdles with a time of 52 seconds. He was Olympic champ in this event in 1924 and also placed third in the 1928 games.

MISS VENABLE WEDS WESCOAT

Daughter of Former President of University Marries New Jersey Physician.

Of much interest to a wide circle of friends throughout this and neighboring states will be the announcement of the wedding here Friday afternoon at 3 o'clock of Miss Frances Preston Venable to Dr. George Nelson Arthur Wescoat.

The bride is the pretty and popular daughter of Dr. Francis P. Venable, former president of the University, and Mrs. Venable. Dr. Wescoat comes from a prominent New Jersey family and is a practicing physician in Moorestown, N. J. He is the son of Mr. and Mrs. Wilmer Wescoat, of Collingswood, N. J.

The wedding service was performed in the home of the bride and was witnessed by members of the bride's family and a few close friends. Rev. A. S. Lawrence, rector of the Episcopal Church officiated.

The bride was attended by Miss Elizabeth Branson, of Chapel Hill. Mr. Ray Bancroft, of Collingswood, N. J., was best man. Mrs. Fred B. McCall, of Chapel Hill, played softly on the piano during the ceremony. The bride's dress was of handpainted lace, and the bridesmaid wore green.

Out-of-town guests included Judge and Mrs. Manning and Miss Annie Louise Manning, of Raleigh; Dr. John Manning and Mr. and Mrs. Don L. Sasser, of Durham; Mr. and Mrs. Spenser Van B. Nichols and Mrs. Junius Powell, of New York; Mrs. Howell Peacock, of Philadelphia; Mrs. W. R. Webb, of Bell Buckle, Tenn., and Miss Daisy Cooper, of Oxford.

The bride is a graduate of St. Mary's and of the University and studied at Drexel Institute in Philadelphia. She is a member of Pi Beta Phi fraternity. The bridegroom is an alumnus of Lehigh University and Hahnemann College. He is a member of Alpha Chi Rho and Alpha Sigma (medical) fraternities.

Entertainments in honor of the bride and bridegroom included a luncheon yesterday given by the bride's parents and a dinner yesterday evening given by Dr. and Mrs. C. E. Branson.

Students Who Pass But One Course On Academic Probation

All students, freshmen, sophomores, juniors, and seniors, in the College of Liberal Arts, Schools of Commerce and Education, who received credit for no more than one course during the winter quarter, automatically go on academic probation and must check two courses at mid-term this quarter in order to remain at the University, according to an announcement made yesterday by Deans D. D. Carroll, N. W. Walker, and Addison Hibbard.

WILL BE THRASHED OUT IN JOINT SESSION OF DI-PHI

(Continued from page one)

The second "whereas" is not expected to arouse much argument. Should the adoption of a bi-cameral system modeled on that of our country be resolved upon, the system presented in outline for adoption would then come under fire.

The plan of reorganization is presented in the form of two resolutions in order that it may be possible to reject or accept one phase of the plan independently of the other phase. The first and second resolutions,

moreover, are not necessarily interconnected. For example, if Resolution I is rejected the meeting can then go over to a discussion of Resolution II, in which the arguments are exposed in the preamble as premises after the manner followed in Resolution I. Having the plan presented in the form of two separate resolutions makes it highly possible to reject one part without rejecting the other part.

Tuesday night the Di will be the guest of the Phi due to the fact that Speaker Graham of the North Carolina legislature, a former member of that society, will preside. Rules of parliamentary procedure will be observed throughout the entire meeting.

A copy of this plan of reorganization presented to the undergraduate student body of the University of North Carolina can be found in the issue of the Tar Heel for November 20, 1928. An editorial treating of the plan may be found in the issue of November 22. Another discussion of the proposal appeared in the issue of November 27. Also, the report drawn up by Dungan and Gilreath may be found in the issue of March 30, 1929.

ORIGINAL PLAN OF GOVERNMENT HAS BEEN REVISED

members from the Junior and Senior classes, and a lower chamber consisting of not more than two hundred members from all four classes—both chambers to be elected according to the system of proportionate representation accepted by the Student Body voting as a whole upon recommendation of a Constitutional Committee to be elected by the Student Body as a whole;

3. A Student Court consisting of nine members from the Junior and Senior Classes elected for their lives by the Student Body voting as a whole—this Court to decide upon all cases of discipline brought before it by the students, and to give final interpretations as to the functions of the executive and the legislative branches.

And, furthermore, be it resolved that should the Di Senate and the Phi Assembly resolve upon a reorganization of these bodies that will enable them to function as the upper and the lower chambers of the bi-cameral system outlined above, these two bodies be incorporated in this bi-cameral system as its upper and lower chambers, retaining the names they are now known by.

Resolution II: Whereas, although those present have no desire for any change in the character of the Di Senate and the Phi Assembly that does not meet with the approval of those bodies, they do believe that the organization of Di and Phi into two chambers of a bi-cameral student government would infuse new vigor into these bodies, because so organized they would inevitably employ the energies of their members in debating and deciding the vital questions of student life instead of the hypothetical questions usually presented for their consideration—questions often far removed from their daily experience;

And whereas the extension of the privileges of the floor of the upper chamber, though without the vote, to debating team candidates and students of debate recommended by the Department of Public Speaking would offer a training in actualities to ambitious debaters who do not happen to be elected to either chamber;

Therefore be it resolved that the members of the Di Senate and the Phi Assembly present do go on record as favoring a reorganization of

these bodies, providing such reorganization meet with their approval after due deliberation, and their incorporation in the bi-cameral system of government outlined above as the upper and lower chambers of this system, retaining the names they are now known by.

If you are coming next Tuesday night, cut this out and bring it with you.

VALUABLE BOOK COLLECTION GIVEN TO LIBRARY

library at the formal dedication of the new building on University Day, October 12.

The Hanes Foundation is to comprise materials illustrative of the origin and development of the book, and will contain examples of written and printed records from the beginning of history to the present. Eventually it will include Babylonian tablets, Egyptian papyri, Greek and Roman parchment codexes, and manuscripts and facsimiles of manuscripts of various periods, as well as Chinese and European block books, and printed books of all ages illustrating the development of printing. Distinctive examples of printing by modern presses will also find a place in the collection, as will also the more important critical works and journals dealing with manuscripts, early presses, paper making, book illustration and binding, and other allied subjects.

Many Early Manuscripts Such a collection of materials is regarded as being particularly useful and valuable to the University. It is expected to furnish early source material for research work for graduate students and members of the faculty, and will have an unusual significance for the departments of Ancient History, European History, Greek, Latin, German, the Romance Languages, and English. Inasmuch as many of the early manuscripts and printed books are beautifully executed, the collection will also be of importance to students interested in the fine arts, to members of the

Larus & Brother Co., Richmond, Va. Dear Sirs: Perhaps you would like to know in just a word or so how I am in partners with Edgeworth in a business way.

By profession I am a cartoonist, who you probably know is called upon to create new ideas. While this is ranked as the hardest part of the profession, I have proved it may easily be mastered, if a person will but recline in any easy chair, light a pipe, and live with imaginative persons in the aromatic smoke clouds that will soon fill the room. Edgeworth has given me more ideas than any other brand of tobacco, so I "married" my pipe to it quite a while ago. The result has been wonderful. The more you use Edgeworth, the more you crave it—not as a drug, but as a wholesome pleasure.

Complimenting the standard quality (which means more than the words signify) of Edgeworth, I am a devoted and profound user.

Yours very respectfully, James W. Bright

classes in library administration, and to the University Press.

A splendid beginning in the formation of the Foundation has already been made by the acquisition for the Library of three hundred and sixty-six volumes printed between 1451 and 1499, and known as incunabula, or "cradle books," the term being applied to all books printed immediately after the invention of printing in Germany. These volumes were issued from the famous presses of such early printers as Ratdolt and Jensen of Venice, Koberger of Nuremberg, and Wendelin of Speyer. Altogether the work of 119 printers from 31 cities in Italy, Germany, Switzerland, and France is represented in the collection, the authors and subjects treated being representative of the thought and civilization of the last half of the fifteenth century.

Dr. Hunter's Contribution This portion of the collection was recently acquired from Dr. Aaron Burtis Hunter of Raleigh, for many years president of Saint Augustine's College. Dr. Hunter was a member of the Class of 1876 at Amherst and is a graduate of the Union Theological Seminary of New York City. Upon resigning the presidency of St. Augustine's in 1920, he was called to Florence, Italy, to serve as Episcopalian rector in the American colony there. During his stay in Florence and on trips through Italy and Germany between 1920 and 1927, he acquired an extensive collection of incunabula, manuscripts, 16th and 17th century books and portraits, of which the incunabula formed an important part. The possession of it by the University is cause for congratulation, as few universities in the country have as large a collection.
