By Tom Corpening

"The time to pick the flower is when it's in bloom," asserted Mr. Adolphus Clark, a University janitor for over a quarter of a century. To Mr. Clark, the flower is the small raise asked for by the janitors, and the bloom is the surplus in the State Treasury and the generally prosper-

ous times in other fields of labor. "If the sun is ever going to shine on this University, it is shining now," Clark said. He believes that the janiever visited. **Publisher Sees Two Chapters** And Buys Novel By Houston

By Jessie Gregory

Phillips Russell, Carolina professor of journalism, sent Frank Taylor, the publisher, to Noel Houston, ex-Russell pupil who was writing a book.

Stating that he spent one and a half years finishing his book, Houston came in from working on his vegetable garden and talked about his first novel. The Lotteru.

Acknowledging his admiration for and debt to Phillips Russell, Houston stated that Russell provided invaluable help to writers by guiding them individually and pointing out certain sign posts to them. According to Houston, Russell realizes that the desire to write is an individual thing which no teacher can bring to life and
