

PROGRESS SHOWN IN CIRCULATION CAMPAIGN DRIVE

Daily Tar Heel Managers Pushing Movement to Have Paper Cover Entire Town; Unusual Interest.

Want a Tar Heel—every day including Sunday—all the news and nothing but the news—University and Chapel Hill alike—for next to nothing?

Fall in line, then. They're going fast. Subscriptions just \$1 for three months or \$2 for the rest of the year. And you get two free passes (worth 80 cents) to "Flight," the biggest picture of the year, coming to the Carolina theatre next week. Not a better bargain in town.

Thus would the ballyhoo artist proclaim Chapel Hill's biggest bargain—being offered in the drive on local subscriptions launched by the Daily Tar Heel yesterday.

The first day's results were gratifying enough, according to Business Manager Marion Alexander.

More than a score of Chapel Hillians called at the Daily Tar Heel desk in the lobby of the Carolina theatre to turn in their subscriptions and get their complimentary passes.

Other subscribers were secured by representatives of the paper canvassing the town in systematic order.

The campaign is to be continued all this week and the first part of next.

Persons may turn in their own subscriptions and win the passes or they may secure subscriptions from friends.

All subscriptions, except those taken by Daily Tar Heel representatives canvassing the town, (Continued on last page)

Senior Engineers Attend N. C. Water Works Conference

The entire senior class in civil engineering will attend the Tuesday sessions of the convention and conference of the North Carolina section of the American Water Works association and the North Carolina Sewage Works association to be held in High Point this week, and the graduate students in sanitary engineering will attend all of the meetings.

Two members of the associations from Chapel Hill will present papers at the meeting. Professor Thorndike Saville, of the University faculty, will present a paper on "The Distribution and Variation of Annual Rainfall in North Carolina," and E. W. Constable, a graduate student in chemistry and biology, will present one on "Mosquito Control on Water Supply Reservoirs."

The North Carolina section of the A. W. W. A. and the N. C. Sewage Works association are two of the most active bodies of their kind in the United States. The annual meetings are attended by over five hundred engineers, municipal officials, superintendents of water works and sewage plants, and public health officials.

At the last meeting of the associations there were men present from 15 states, practically every state in the south, east and middle west having its representative. H. G. Baity of the University faculty is secretary of both associations.

Deadline Today For Buccaneer Drawings

Cy Edson, editor of the Carolina Buccaneer, announces that the deadline for the November issue of the publication will be this afternoon at 5 o'clock. This deadline holds for copy and drawings.

STUHLMAN TALKS ABOUT HUMIDITY

Plays a Great Part In Our General Health and Comfort, He Says.

Humidity plays a great part in our general health and comfort, according to Dr. Otto Stuhlman, head of the physics department, and the humidity of a room is a sure index of the comfort in the room. A person coming indoors from wet weather will at once feel a change in a steam heated room. Whereas the air outside is seemingly dripping with moisture, the air inside is usually very dry. This dry air causes the pores to open resulting in colds, catarrh, headaches and other ailments.

Heat from the radiator increases the capacity of the air in the room for water vapor. This apparent greediness for moisture must be satisfied in order that living conditions may be maintained at their best.

A lack of moisture in a room will cause a person to feel colder and need more unnecessary heat to give the effect of warmth. But were a sufficient amount of moisture to be introduced into the room less heat would be needed, and the result would tend to better health and effect a saving on the family coal bill.

Steam up to a temperature of 72 degrees Fahrenheit has a relative humidity as low as 23 percent which is as dry as Death Valley. To remedy this evil vapor must be admitted into the air to raise the humidity to at least 65 percent. This can be done by the evaporation of water at the boiler and can best be introduced by means of a hot air furnace.

The conclusion is obvious in that, by increasing the humidity, a proportional amount of coal is saved; and the whole result is a more economical, more healthful and more comfortable condition. Many economical and hygienic errors have been committed because the average housewife would rather suffer, probably through ignorance of the danger involved, the consequences of a dry atmosphere, than be troubled with devices for evaporating water.

Episcopal Social Rooms Refurnished

The social rooms of the Chapel of the Cross have lately been refurnished and redecored by the ladies of the church. New games, including ping-pong, chess, checkers and cards, and some of the latest magazines have been placed in the rooms.

All students and town people are invited to make use of these rooms at any hour they may desire. The Sunday afternoon teas will continue to be held as in the past.

Presbyterian Social

All young people are cordially invited to the regular "cracker and tea" social at the Presbyterian church at 8 p. m. Friends are invited.

Director of U. S. Marine Band

All statements to the contrary, it is the staunch belief of Capt. Taylor Branson, famous director of the renowned United States Marine Band, that the people of America are inherently musical. According to Capt. Branson, the audiences of Europe are more responsive to the music of the masters because they were "raised on it," so to speak. America is a new country, and its people—up to recent years—had little time for the arts. But it is because they are a new people—experimental

pioneers in thought and deed—not afraid to accept the new because it is new—thinks Capt. Branson, that Americans are becoming so intense in their appreciation of music.

It is also due to the fact, says this famous musician, that music is taught in the public schools, that the local boys' bands are more numerous, and because successive Presidents of the United States have permitted the United States Marine Band to reach the people by tours each year.

Reports Due Nov. 8

Dr. T. J. Wilson, Jr., registrar, announces that all midterm reports must be turned in by Friday, November 8. The list of students failing to check their work will be posted on the following Monday.

Chapel Monday

F. F. Bradshaw, dean of students, announces that chapel seats in Gerrard hall are being mailed out to freshmen and sophomores this week. Chapel will be held in Gerrard, beginning Monday.

Carolina Student Stages Miniature Production Of Old German Masterpiece

Donald Rulfs, Sophomore Of Wilmington, Gives Unique Presentation Of "Faust"; Remarkable Lighting Effects.

(By Milt Wood)

"Faust" in a steamer trunk. That may serve to illustrate how miniature is the production of the great German masterpiece which Donald J. Rulfs, sophomore of Wilmington, N. C., has assembled with his own hands. One can easily picture in the mind the settings for "Faust" on a small scale.

But only by actually seeing Rulfs produce "Faust" in his own unique way can one appreciate the inherent artistry of this University of North Carolina student. Because of his greater interest, the lighting effects for the five acts are miraculous, especially when daylight fades slowly into darkness in the garden scene. But more than this, his stage settings, done to scale and remarkably resembling the full stage, are a revelation. And to top all this, the genius of Rulfs has enabled him to put life on this stage by means of puppets representing and closely modeled after the characters in "Faust."

It was a rare treat to three

University students who were given a private exhibition of "Faust" by Rulfs last evening in his room in Grimes dormitory. The show started on time, too, at exactly 7:15, for Rulfs is not only precise but punctual. The audience of three was seated without delay, the producer took his stand behind a table on which the futuristic stage for "Faust" had been erected, the house lights, both of them, one on either side wall, were darkened, and the "crowd" awaited the curtain. Prior to its rising, however, Rulfs provided the proper atmosphere by playing an overture from "Faust" on his phonograph, also hidden behind scenes.

The curtain rose slowly showing the aged philosopher in a dimly lighted room, pondering over his books. Then Rulfs spoke for "Faust" the words of discontent with his lot as the puppet's arm pounded the book for emphasis. Suddenly, the red clothed figure of Mephistopheles bounds into the room,

Last Opportunity To Get Tickets

Today from 10:00 a. m. to 5 p. m. will be the last opportunity for students to exchange coupons for tickets to the State game, it was announced yesterday by the athletic authorities. No coupons will be exchanged after 5 o'clock this afternoon, nor will coupons be exchanged after today at the Graduate manager's office or the ticket offices Saturday.

All those who reported lost coupon books may secure their tickets at the Book Exchange from 1 to 5 this afternoon.

DI SENATE SETS DATE FOR DANCE

Affair To Be Formal; Other Activities Discussed During Meeting Tuesday Night.

The meeting of the Dialectic Senate Tuesday night in New West building opened with the election of the following five men to membership: Adams, King, Baretty, Dratler, and Hayes.

Senator Simpson, reporting for the committee on the Mary D. Wright Debate, announced the following query: "Resolved, That the Hawley-Smoot tariff bill now pending before the special session of the seventy-first congress should be passed as introduced." The Senator informed the group that the Dialectic Senate would uphold the negative side of the question and that the debate would be in Gerrard hall on the night of December 10.

Reporting for the dance committee, Senator McPherson read a detailed account of the work of the committee embodying the following among other things:

1. Admission cards will be issued to all members of the senate who have settled with the treasurer. An assessment of one dollar will be levied on each member. 2. All graduate and professional members may be admitted upon payment of the assessment. 3. Members may be granted an additional admission card upon payment of a second assessment. 4. The dance will be held in the Di hall on the night of December 6. It will be a formal affair.

After having attended to all pertinent matters of business, the senate proceeded to discuss: "Resolved, That southern textile workers should be organized into competent, recognized, and efficient labor unions."

The vote of the senate on the measure was a deadlock and was decided by President Williams in favor of the affirmative. The measure, therefore, passed by one vote.

Hallowe'en Dance

There will be a Hallowe'en supper dance at the University Cafeteria tonight from six-thirty to eight-thirty. The management of the Cafeteria announces that there will be no cover charges and that everyone is invited.

Directories Delivered

The five hundred copies of the directory which had been ordered came yesterday and were delivered last night. A copy was given to each of those homes and houses which failed to receive one on the first delivery.

LIBRARY 'BLACK LIST' PREVENTS TOO MANY FINES

Penalties Are to Protect Borrower Who Returns Books Promptly; Encourages Returning Books on Time.

The main purpose of the "black list" which the library has installed within the last few weeks is to prevent the accumulation of large fines on the part of students, and to encourage the returning of all books on time, according to library officials.

The library has had a black list before, but it was not effective for it did not check the accumulation of fines. Under the new system all names of delinquent borrowers are visible simultaneously and the amount of fines are easily read by the staff.

Fines are not imposed upon the student for the purpose of making money for the library. The money collected from this source goes into the general fund. The fundamental purpose of fines is to protect the borrower who returns his book on time from the neglectful borrower.

The old ideas of libraries was to keep all the books on the shelves as the library was a great storehouse. The modern library is regarded as an agent employed between the borrower and the books to keep the volumes circulating.

In connection with the old idea of libraries the following incident is brought to mind: at Harvard University a few years ago, a student met the librarian and asked him how the library was getting along. The librarian replied, "all the books are on the shelves except one, and I am going out after that one now."

What's Happening

- 1:15 p. m.—All sophomores desiring to try out for sub-assistant basketball managers should report to L. D. Thompson, Jr., at Emerson field.
- 1:30 p. m.—German club meeting, Gerrard hall.
- 10:00 a. m. to 5:00 p. m.—Last opportunity for students to exchange coupons for tickets to State game.
- 10:30 a. m.—Meeting of all students in the education school who have selected French for major or minor at 23 Peabody building.
- 4:00 p. m.—Varsity basketball practice.
- 5:00 p. m.—Buccaneer deadline for November issue.
- 7:30 p. m.—Lutheran student association will hold Hallowe'en social at the Presbyterian social rooms.
- 7:30 p. m.—Meeting of the graduate school in Smith building.
- 8:30 p. m.—Graduate club open house and dance in Smith building.
- The dramatic recital by Henry Lawrence which was announced to be held in Memorial hall will be held tomorrow night in the auditorium of the Methodist church at 8:30.
- All mid-term reports must be turned in by Friday, November 8. The list of students failing to check their work will be posted the following Monday.
- Chapel seat assignments are being mailed out this week.
