## FORENSIC SQUAD HEARS BRADSHAW ON NEXT DEBATE

President Williams Of Debate  
Council Announces Debate  
With Emory February 6

The session of the debate squad Thursday night in 201 Murphey hall took the form of an open discussion of "Resolved: That modern science tends to destroy theistic faith." Dean F. F. Bradshaw directed the discussion and lectured for a short while, pointing out the main issues in the question. This was the second of a series of lectures which were designed as preliminary preparation for the coming intercollegiate debate with Emory University.

Dean Bradshaw contended that science is inherently, and of its own nature, hostile to faith in God (Carolina has the affirmative side of the question). He advised that the affirmative should build an argument around the fundamental contention that modern science is contrary to the underlying principles of theistic faith. He stated that science rests on mathematics and light, the element of faith being minimized to the extreme. Science deals with the material side of life; theistic faith, with the spiritual. They move in very remote and antagonistic realms. These contentions he cited as the premises of the affirmative side of the controversy.

J. C. Williams, president of the organization, announced that the tryout for the Emory-Carolina debate would take place in 201 Murphey on the night of February 6. The date for the Carolina-George Washington debate tryout was set for February 13. In addition to the announcement that Dr. Swartz, of the department of geology, would deliver the final lecture on the subject of modern science and theistic faith at the next regular weekly meeting, Williams stated that the regular eligibility rules would apply to both the debates. Aside from good scholastic standing, no member of the squad is eligible to try for a place on the team unless he has attended two-thirds of the lectures on the particular question under consideration.

## A Thumbnail Sketch Of Clarence Addison Hibbard

By F. J. M.

Editor's note: This is the fourth of a series of thumbnail sketches of prominent University men.

CLARENCE ADDISON HIBBARD. He never liked the name Clarence and was given nicknames early in life. While at Wisconsin, he was called "Hungry Hib, the Hard Hiker" . . . Hard Hiker because he was in the habit of taking long, long walks alone through the woods. Once he was gone for such a long time that his fraternity brothers started to drag the lake for him. He never did know how to swim. When he took a class of sixty students out on a boat in Japanese waters, the boat capsized and the entire student body swam to shore—with the exception of Addison, who straddled the capsized boat, waiting for help to come.

He snores. Which serves as a key to his habits. He doesn't

## University Employees Rudely Awakened Yesterday By Wreck

Imagine yourself retiring some night in a Pullman berth with everything in its normal order, and then picture yourself awakening suddenly the next morning to find yourself using the ceiling of the car for a bed, and with your clothes, bedding, mattress, and two or three pieces of luggage piled on top of you. Such was the situation two Chapel Hill men, Eddie Thompson and Morris Hill, found themselves in about 8 o'clock yesterday morning. This was the part the two men played in a wreck which occurred yesterday on the Southern railroad between

Greensboro and Durham, caused by a broken rail overturning three passenger cars, while a fourth jumped the tracks and was dragged about 70 feet without turning over.

Investigation revealed that, despite the fact that three cars turned turtle, no one was injured. Outside a little shaking up and a rude awakening from early morning dreams, none of the passengers was the worse for the mishap.

Thompson and Hill are employed by the University Consolidated Service Plants and were returning from Norfolk when the wreck occurred.

## Vacant Houses

Since the recent building of several new fraternity houses at Carolina, a few old ones have been standing unoccupied and open, full of newspapers, old books and furniture.

Last week police discovered that gangs of high school boys and parties of negroes were using them as club houses, building fires in the fireplaces with chairs, picture frames and various articles of temporarily abandoned furniture. Games of chance provided amusement for the uninvited guests.

A survey by the police and fire departments revealed that many houses, private residences as well, were abandoned and unlocked, and in two cases, because of combustible material lying about, constituted fire menaces.

Owners have been warned to either lock or nail shut all the doors and windows.

## Professors Attend Engineer Meeting

G. M. Braune, dean of the school of engineering, and Thorndike Saville, professor of hydraulic and sanitary engineering, attended the annual meeting of the North Carolina engineers held in Raleigh yesterday. The meeting was under the auspices of the North Carolina Society of Engineers and the American Society of Civil Engineers.

wear shoes in his home . . . slippers. And he doesn't care to have a jacket on. Clothes have never taken much of his time; and until a year ago, grey and black were the predominant colors of his life but recently friends and family have taken him in hand and bedecked him with gayer raiment. When he's home he writes, which is his chief avocation. At present he is busy with a book that will comment upon the southern short story. For this work, it was necessary for the venerable dean to read more than 80 volumes of short stories and between 100 and 200 single stories. His idea of a swell holiday would be one in which he would be given every convenience to write. He does not like idle conversations nor gatherings that consist of nothing but prattle. Louis Graves' smokers are just what he cares to attend—

(Continued on last page)

## Fraternity Notice

According to an announcement by John Bullock, president of the Inter-fraternity council, the period of silence for the winter quarter begins midnight, Sunday, January 26, and ends with the pledging Tuesday, January 28, at 6 o'clock. All pledges should be made through the office of F. F. Bradshaw, dean of students, in South building.

All other rules for rushing will continue as in the fall quarter.

## HART AND WELLS ADDRESS SOCIETY

Western Electric Company Officials Tell Of Construction Of Lead Covered Cable.

C. D. Hart, superintendent of the Baltimore cable plant of the Western Electric Company, and John Wells, development engineer of the same company, spoke at a recent meeting of the local student branch of the American Institute of Electrical Engineers. In their talks they explained the methods of construction employed in the new building of the company at Point Breeze, Md., and told of the manufacture of lead-covered cable.

With the aid of a model showing the new plant which covers about seven acres, Mr. Hart traced the course of the material through the plant from its arrival in the train shed on one side of the building until its final testing and shipping from the opposite side.

Mr. Hart also showed several slides showing stages in the construction of the Point Breeze plant from the beginning of the removal of the old recreation park that was on the site until the building was complete and being used.

In explaining the problems to be met in the manufacture of cable, Mr. Wells told of the circuits used in telephone conversations, showing the origin of "cross-talk" and other interferences. He then told what steps could be taken to remove these interferences and how the cable was made to remove them.

Mr. Hart also used slides in his talk, and with their aid he explained the operation of the many machines used in making, testing, and shipping the cable.

After the speakers of the evening had finished, a business session of the branch was held. At this time it was voted to have the organization purchase indirect lighting fixtures to be installed in the senior electrical engineering room.

It was announced at this time that the picture for the Yackety Yack of the local branch, which consists of all students of electrical engineering, will be taken Monday afternoon at 1:30 on the steps of Phillips hall.

## Magill Visits Here

O. R. Magill, executive secretary of the Southern Student Conference, was here yesterday afternoon to see Dean Bradshaw on business regarding the Blue Ridge Conference. Dean Bradshaw will be among the leaders who will be at the Blue Ridge conference next summer. Mr. Magill was accompanied here by E. S. King, general secretary of the Y. M. C. A. at State College in Raleigh.

## Buccaneer To Be Delivered Tonight Says Editor Edson

### Staff Meeting

The regular Sunday night meeting of the Tar Heel reportorial staff will be held Sunday evening at 7 o'clock in the Tar Heel office. Five vacancies will be filled from new men reporting and several changes will be made in beats.

All reporters and city editors are expected to attend this meeting unless excused by the editor, Glenn Holder, or the managing editor, Will Yarborough, in advance.

Regular tryouts will be held for all new men attending this meeting.

## ATWOOD SPEAKS TO CAIN SOCIETY

At the regular bi-weekly meeting of the William Cain student chapter of the American Society of Civil Engineers held Thursday evening in Phillips hall, T. C. Atwood, of Atwood and Nash, the University engineers, spoke on the method of approach to actual problems, describing the construction of a twenty-five million dollar destroyer plant at Boston in 1917 which was erected in less than nine months.

G. M. Braune, dean of the school of engineers, spoke briefly on the national convention of the A. S. C. E. held at New York about ten days ago.

In his talk Mr. Atwood described the methods of construction used in erecting this plant which was designed to build a destroyer every week. The erection of the plant was an excellent example of rapid construction, for from the time of authorization of the plant to the time of the beginning of actual construction of a destroyer was about nine months.

The talk was illustrated with slides, which showed the steps in the construction. One remarkable piece of construction was the erection of a four story office building in six days. In the words of one of those who heard the lecture, "In the slides you could almost see the building grow."

## Chief Lloyd Loses First Prisoner In Nine Years' Work

Although Chief of Police L. B. Lloyd has held his present position for a year, and was Orange county sheriff for eight years previously, he had never lost through escape any prisoner he had arrested.

But when the thief yesterday apprehended Bradshaw Massey, colored, for possessing liquor, and invited the negro to enter his car, the culprit tore loose from the officer's grasp and fled.

Chief Lloyd believes, however, that Massey will eventually be recaptured and will do penance for his shortcomings.

## NO ARRESTS MADE FOR USE OF 1929 PLATES

No one has been arrested so far, police report, for driving automobiles with 1929 Carolina plates, although the police have been vigilant since January 15 to apprehend any who had failed to procure them. This record is without parallel here since the early days of auto licensing.

New System Of Delivery Will  
Be Tried By Humorous  
Publication.

## "ALL TALKING NUMBER"

Issue Will Carry Reviews Of  
Shows To Be Shown At Carolina  
Theatre; Also "Who's  
Who At Carolina" Feature  
Added.

Cy Edson, genial editor of the Buccaneer, stated yesterday afternoon, that the January issue of the Buccaneer will positively be out tonight.

This issue, the fourth of the year, according to Editor Edson, will be the "All Talking Number," and will contain, besides the usual puns, jokes and drawings, all advance information on the hot shows that are coming to the Carolina theatre this winter, and an entirely new feature, "Who's Who at Carolina."

Campus rumor has it that this issue will be the wittiest of the year.

A Tar Heel reporter called on Editor Edson to verify the rumor, but the sterling editor only hung his head and blushed.

A new system of delivering the magazines will be attempted this issue. One boy will have charge of deliveries for each dormitory, several boys will take charge of the fraternity and town houses, each boy to take a certain designated district, and each one is responsible for the deliveries in his respective dormitory or district.

## Hollett To Address Lexington Rotarians

A. R. Hollett, coordinator of the cooperative work of the junior year in the school of engineering, will speak before the Lexington Rotary Club next Tuesday. He will describe the plan followed in the cooperative plan and its advantages both to the student and to the employer.

Mr. Hollett will be one of a series of speakers who are taking part in a vocational program to be given at the regular luncheon meeting of the Rotary club. Speakers will represent several different professions, and Mr. Hollett will explain the purpose of the cooperative work during the junior year as well as the plan followed in carrying out the program of having the junior engineers spend half their time in actual work in some industrial firm, and the other half at the University.

## Gastonia Audience To Hear Glee Club

The University Glee Club appeared last night before an audience at the Durham junior high school auditorium. The performance was made possible by the high school music clubs of Durham.

The regular fall tour program was increased by the three glee club contest numbers.

The next appearance of the group away from Chapel Hill will be a concert in Gastonia February 6, the day before the glee club contest at Greenville.

## Sunday Tea At 4:30

Mrs. John Anderson, hostess at the regular Sunday afternoon teas at the Episcopal parish house, has announced the next entertainment for Sunday at 4:30 o'clock.
