

PLAYMAKERS TO APPEAR TONIGHT AT ALBEMARLE

To Be First Performance On Tour Through Three Southern States.

SPARTANBURG TOMORROW

Tonight the Carolina Playmakers appear in Albemarle where they give the first performance on their tour through North Carolina, South Carolina and Georgia. The three one-act plays to be presented are "The No 'Count Boy" by Paul Green, "Job's Kinfolks" by Loretto Carroll Bailey, and "Magnolia's Man" by Gertrude Wilson Coffin.

This is the 27th tour the Playmakers have made. These tours have carried them into many northern, southern, and eastern states and have won them acclaim as one of the leading organizations in the United States in the development of native folk drama. It is in this field that they have done their most popular work, and through this medium that such playwrights as Paul Green have been developed.

"The No 'Count Boy" is a comedy of negro life, based upon the ambitions of a dreamy negro girl who is influenced by a highly imaginative negro minstrel.

The conflict between the older generation, striving to adjust itself to surroundings and make the best of circumstances, and the younger generation, which refuses to face the struggle, and goes off in search of happiness, is the plot of Loretto Bailey's drama of the mill people, "Job's Kinfolks." The author herself plays the role of Kizzie, the grandmother.

"Magnolia's Man" is a comedy of mountain characters. It has to do with the affair of a young woman who seeks a husband on the mail-order plan, and finds that letters and pictures are not a safe guide.

The itinerary for the tour includes Albemarle, N. C.; Spartanburg, S. C.; Greenville, S. C.; Atlanta, Ga.; Columbus, Ga.; Macon, Ga.; Augusta, Ga.; Allendale, S. C.; Wilmington, N. C.; Greenville, N. C., and Rocky Mount, N. C. The Playmakers will return to Chapel Hill on February 26.

House Addresses Sophomore Class

President Larry Johnson presided over the second sophomore class smoker of the collegiate year held last night in Swain Hall. Attendance was small due to a heavy rain which fell for more than an hour previous to the time of the meeting.

The usual refreshments were served at 9 o'clock, after which announcements were made of the sophomore dance of which it was stated that the executive committee of the class has planned for the spring quarter.

R. B. House, executive secretary of the University, spoke upon students' interests asking for a different attitude on the part of students toward professors and booting.

County Club To Meet

There will be a meeting of the Johnston County Club tonight at 9 o'clock in the lobby of the Y. M. C. A. This will be a very important meeting and President Pleasants urges all members to attend.

POLICE TO KILL PROWLING DOGS

War Against Stray Canines Begins Tomorrow By Vote Aldermen.

The board of aldermen has declared war on dogs in Chapel Hill. At its meeting Wednesday night several complaints were read; these set forth that prowling dogs were increasing in number, were frightening children and overturning garbage cans in their search for food.

An ordinance exists which provides no dog may be allowed at large unless muzzled or kept under leash. Beginning Saturday, it was announced by the city manager yesterday police officers will arm themselves with shotguns and kill every dog they encounter, pet or otherwise, licensed or not, if found on the streets.

This drastic measure was made certain yesterday when it was learned that the little daughter of E. V. Kyser was bitten by a savage police dog owned by J. L. Sutton, local druggist. This animal had bitten persons previously, but the Kyser girl was injured so seriously that ten stitches were necessary.

Sutton removed his dog permanently to the country, where it is under observation for possible traces of rabies.

Local dog owners are urged to comply with the request of the board of aldermen, since the enforcement of the ordinance will be immediate and vigorous.

"Hell Week" Under Fire at Penn State

The Collegian, campus paper of Penn State, has been running a questionnaire to find out how the different fraternities stand on the much discussed topic of "Hell Week." So far the total number of chapter executives opposing the practice of rough initiations has reached twenty-seven. Five are still for "Hell Week," while three are uncertain. Replies received number thirty-five with twenty more houses as yet unheard from.

Two of the five latest reveal that informal initiations are held entirely within the fraternity house. In the other three groups, the informal is held outside as well as within the house. Paddling is practiced by four of the five chapters and three send their pledges on errands outside the college campus. Two admit that these errands may cause the pledge to be out all night and lose sleep.

Fred C. Schwerer, president of the intramural council, expressed a belief that local fraternities at Penn State would cooperate with the nationals in doing away with rough and dangerous initiations. He has allied himself with the large group of fraternity men who have voiced opposition to "Hell Week." In his opinion, paddling and foolish errands are worthless as a means of inculcating a pledge with brotherly ideals.

The Collegian is publishing an honor roll of fraternities who have done away entirely with rough initiations. These include Phi Delta Theta, Sigma Chi, Alpha Chi Rho, Delta Chi, Delta Upsilon, Omega Delta Upsilon, Acacia, Phi Kappa Psi, and Tau Kappa Epsilon.

Eight University law students stood the bar examination before the supreme court in 1905.

Playmaker Tryouts

Try outs for two one-act plays will be held this afternoon at 4 o'clock in the Playmakers Theatre. These plays, "Suppressed Desire" and "The Diabolical Circle," are on reserve in the library.

Hobbs Praised For Mississippi Survey

Dr. S. H. Hobbs, Jr., of the rural-social economics department has just completed a social and economic survey of the state of Mississippi. He began the job last September 1, and has had the assistance of several trained investigators here and in that state.

That the people of Mississippi are very much pleased with the Hobbs survey is evidenced in resolutions adopted by the Central State Committee on Development and Progress, the body that employed Dr. Hobbs. The secretary of that committee, Mrs. R. S. Ralston, has just forwarded Dr. E. C. Branson a copy of the resolutions, which read, in part:

"Dr. Hobbs has, in the scant time and with the limited funds allotted, made a social and economic study of the state which is comprehensive, profound and accurate. Throughout the conduct of the survey he has not limited his activities to the exact topic outlined in the committee's agreement, but has added studies of such other problems and situations which in his judgment and experience were necessary to make a complete report. He has given the closest personal supervision to every phase of the survey, accepting only such statements and reports as are based on the most reliable data available.

"Dr. Hobbs is equipped with a keen intellect, a profound knowledge of social, economic and governmental sciences, and a personality which has won for him the confidence and respect of all the people with whom he has come into contact in this state. His intelligent comprehension and grasp of the problems confronting Mississippi has given to his work among us a far more vital significance than that attached to a mere compilation of facts.

"His report, when printed and placed in the hands of all thoughtful and patriotic citizens of this state, gives a basis for a program which, if followed up, will put into effect remedial legislation, governmental reforms, administrative economies and educational progress that will make Mississippi a leader among southern states.

Bagby To Deliver 3 Lectures at Y.M.C.A. Meet In Lexington, Va.

Dr. English Bagby of the psychology department left this morning for Lexington, Va., where he will deliver a series of three lectures before the faculty section of the Y. M. C. A. student-faculty conference of Virginia.

The subject of the three lectures to be given Saturday morning and afternoon and Sunday morning, will be "The Psychology of Undergraduate Religion and Several Types of Minor Emotional Disorders."

If you think this generation has no respect for age you should hear the gags in the new talkie comedies.

WALKER ISSUES PLANS FOR 1930 SUMMER SCHOOL

Announcement Bulletins for Summer Session Have Been Mailed Out Recently.

OPENS THURSDAY, JUNE 12

Preliminary announcements of the University summer school for the session of 1930 have been recently issued in the form of a bulletin, and during the past several days have been mailed from the office of N. W. Walker, director of the summer school.

The bulletin contains a list of courses and all necessary information that prospective students will need pending the publication in April of the complete announcement of the summer school. The complete announcement will contain, along with more detailed descriptions of the courses, a list of instructors and an account of special features to be offered.

The officials of the summer school are Dr. Harry W. Chase, president of the University; N. W. Walker, director, and I. C. Griffin, executive secretary.

The session will open on Thursday, June 12, and will close 12 weeks later, August 29. The session will be divided into two terms of six weeks each. The date for registration is Thursday, June 12.

The summer school will be organized in three general divisions: college, graduate, and elementary education. Under the college division work will be offered in the schools of liberal arts, education, commerce, applied science and public welfare. A teachers' bureau will be maintained for the benefit of teachers desiring a change in position. The preliminary announcement bulletin contains, in addition, accounts of registration and tuition fees, table board, dormitory accommodations, regulations concerning women students, the daily schedule, expenses for each term, and free tuition for teachers.

Indications point to a successful year. Several of the most noted professors in America will offer courses as visiting professors, and efforts toward improvements are being made in every direction. There have been more requests for the summer school bulletins and for room reservations thus far this year than usual. Last year the number of students registered in the summer school was 2,536, and at least as many are expected this year.

Bagby Selected To Speak at Deans of Women Conference

The selection of Dr. English Bagby of the psychology department to deliver a series of lectures before the American Association of Deans of Women, in Atlantic City, N. J., on Wednesday and Thursday, February 19 and 20, was announced today.

The subject of the first address to be delivered Wednesday evening will be, "Emotional Factors in Human Adjustment." The second lecture to be delivered the following morning will be on the subject, "Typical Undergraduate Emotional Problems."

Mrs. Marvin Hendrix Stacy, advisor to women of the university, will represent the local women's department at the convention.

Stock Crash Bettered Real Estate Affairs Says Berge

SHAPLEY TALKS TO RESEARCH SOCIETY

Dr. Harlow Shapley, director of the Harvard College Observatory, delivered the first of the annual Sigma Xi scientific lectures last night in Gerrard Hall on the subject "Order Among Star Clusters and Nebulae" as one of the addresses which he is presenting under the title "Flights From Chaos." The second lecture, "From Electrons to Galaxies," will be given this evening at 8:30 in Gerrard Hall.

In the lecture Dr. Shapley reported on recent studies on star clusters and nebulae which have been made at the Harvard College Observatory, and offered an interpretation of the observations that have been made.

He stated that according to a very new theory known as the super-galaxy hypothesis, our universe is not an extraordinary system but is rather a part of an ordinary system and that instead of being a part of a small galaxy it is part of a super-galaxy which is made up of a series of galaxies and spiral nebulae.

Dr. Shapley explained a new method used in determining the distance to the stars and showed how by this method it is possible to measure the distance to galaxies so far away as 170 million light years.

Dr. Shapley presented his subject in a very clear manner which was understandable to that part of his audience which he classified as "those professors who don't know so much about the subject." Instead of being extremely technical in his explanation he went to the other extreme and used such homely comparisons as likening our universe to a cookie.

This evening Dr. Shapley will speak on "From Electrons to Galaxies" when he will attempt to show how the order that exists between the many stellar bodies extends down to the most minute constituents of ordinary bodies.

Last night after the lecture a smoker was held at the home of Dr. W. C. Coker at which those attending the lecture were given an opportunity to meet the speaker.

ALPHA PSI DELTA HEARS McDUGAL

The Alpha Psi Delta held its regular meeting February 12 in New West building. Dr. MacDougal of Duke University, one of the leading psychologists in the country, delivered a paper on "Modifications in the Nest Behavior of the Wasps." After showing that the behavior is not of the serial unmodifiable character as is the common belief, Dr. MacDougal pointed to this as a clear-cut evidence against the conception of the intelligence described by Lloyd-Morgan.

The second paper of the evening was presented by A. G. Bayroff who discusses the recently published work of G. E. Coghill in "Anatomy and the Problem of Behavior."

Both papers will be discussed at length by the members of the fraternity and many suggestions forwarded as to future experimentation which should be done on each problem in the near future.

National Sales Counselor Speaks At Institute for Real Estate Men.

FIRST OF KIND IN SOUTH

Optimism Predominant Note of Convention Meeting Here Wednesday and Thursday.

Conditions for selling real estate are more favorable as a consequence of the recent stock crash, stated John Berge, sales counselor of the National Association of Real Estate Boards, who addressed the North Carolina Real Estate Institute at its second day's session at the University yesterday.

The institute, the first of its kind in this state, was held under the auspices of the North Carolina Association of Real Estate Boards and the extension division of the University, with the national Association of Real Estate Boards cooperating.

"Wall Street will continue to attract money, but the investing public will turn back to real estate again as one of the tested places to put some of its money," Mr. Berge declared. "The 1930 investor will remember the lesson taught by the recent debacle, and when he starts looking around for diversified investments, he cannot help considering real estate," he said.

Optimism seemed to be the keynote of the institute. Mr. Berge was confident that the real estate business was in for a season of increased activity. "But," he added, "the 1930 investor is going to be more careful to investigate more fully before buying. This tendency should increase sales because of the soundness of real estate investments."

"To the realtor who is 100 per cent sold on his product—who believes in real estate—and who knows what real estate will do for the man who owns it, this new tendency will help to make more sales."

The realtors in attendance were well pleased with the results of the institute, and voted to hold a similar one at the University next winter.

The R. E. Dillard gold cup, awarded to the city having the largest attendance, went to the Wilmington group.

Mr. Ellis, with a host of illustrations, scenes, maps, charts and graphs, spoke on the best method of showing the property to the prospect. The most important thing, he pointed out, was to keep the prospective buyer in a "receptive state of mind." It was not advisable, Mr. Ellis stated, to point out the unattractive features of the plot or building or to name the price until the "psychological moment"—that is, until the prospect showed that he was interested or asked the price of his own accord.

Accounting Course Given In Rocky Mt.

Robert H. Sherrill, associate professor of accounting in the school of commerce, is teaching a weekly class in accounting in Rocky Mount. This course, known here as Commerce 1, is being given in 15 lessons of two hours each. The Rocky Mount Y. M. C. A. is sponsoring the course, which is given as a part of the program of the University extension division.
