

Miniature Golf Course Behind Post Office Nears Completion

Chapel Hill is finally to be blessed with an additional means of entertainment in lieu of the Carolina theatre and card-playing.

G. L. Crowell of Statesville and Messrs. Andrews and Henninger of Chapel Hill are partners in the "Tom Thumb" golf course which is rapidly nearing completion.

The course, which is to be called the "Carolina Midget Golf Course," will be located in a lot behind the postoffice. It will be three times larger than those which are at present in use throughout Florida and California and will include 3000 square feet of playing surface. It will be an 18-hole course and will require about 40 minutes for completion of a round.

H. J. Weeks, engineer for the Okoee Amusement Company of Chattanooga, is surveying and plotting the course. Mr. Weeks is also the patentee of the particular type of green to be used and he claims that it is semi-permanent in nature, will present at all times a uniform playing surface, and will be practically water-proof.

The course will be replete with roughs, bunkers and hazards—even to the extent of a pretty miniature lake that will attract many, many frolicking golf balls—and there will be hills and dales enough to send any golf bug into a rapture. The course will furnish an excellent practicing place for those interested in perfecting their stance and putting ability. From reliable sources comes the information that despite the minute size of the course, any man who makes a hole in one is "pretty darn good."

The "Tom Thumb" courses have taken the country by storm. Since their inception during July of last year they have become so numerous throughout the south that they have almost become a nuisance in some cities. They are exceedingly popular in the winter colonies of Florida and in California. Tulane, Alabama, Rollins, and Southern California are some of the few other colleges that can boast of a course.

The most important feature of the proposition will be the subsequent diversion derived from the course. For night play, which is the time when the courses are generally jammed to the utmost capacity—the course will be lighted by 24 lamps of 150 watts each. There will be ample accommodations for spectators and players alike. It is designed like a standard course, not a factory course, and was plotted by the engineer to fit the landscape. Therefore, there are many improvements to be made. The engineer announced that the course would be open for play for the Saturday after next.

The price per round has not yet been announced, but since the rate in Florida and other places is usually 25 cents, it is probable that this course will charge the same amount.

Infirmiry List

The infirmiry list yesterday decreased to five. They are as follows: George Sheram, confined to bed with pneumonia; C. C. Cornwall, still in with the measles; J. E. Dillard and Cheek Macum with colds; and J. E. Dunn with an infected gland.

Moonshiner Flees

G. A. Hearne, deputy sheriff of Carrboro, found a small still in operation at that place early this week. One negro, in attendance, fled upon the approach of the officer, and no arrests have yet been made.

Senior Exams

The senior comprehensive examination for the winter quarter will be held Saturday morning, March 1st, beginning at 8:30 a. m. in 103 Bingham hall. Those taking the examination will provide themselves with the large size (32-page) quiz book. The student's name is not to be written anywhere on the examination book.

Alabama Scientists Find New Element

Evidence of the presence of Element 87, one of the two absentees of the possible 92 elements, has been discovered recently by Fred Allison and Professor E. J. Murphey of the physics department of Alabama Polytechnic Institute.

The evidence in support of the discovery is based upon a new and highly sensitive method of analysis, magneto-optic method, which has been developed by Dr. Allison and Professor Murphey. By this means elements reveal themselves in chemical compounds by producing minima of polarized light at points on a scale which are characteristic of the atomic mass and valence of the element. The two elements, pollicite and lepidolite, showed under this analysis the chemical equivalent of "ekacacium," this new element.

The discovery, if finally established as conclusive, is a goal attained by the Alabama investigators that has long been sought by the world's leading scientists. Only one element, No. 85, will still have escaped the eyes of science.

A preliminary announcement of the results concerning Element 87 is being published as a note in the forthcoming issue of the Physical Review.

The element has not been separated chemically. Thus far, only a preliminary statement has been made by Dr. Allison and Professor Murphey while their investigations are being continued.

Trustees To Elect President March 4

The Associated Press dispatched a story yesterday from their Raleigh bureau to the effect that the trustees of the University who meet at the state capitol on March 4 will proceed immediately to the task of electing a president to succeed Dr. Chase. The news item also quoted W. Lunsford Long, one of the trustees, as favoring the election of R. D. W. Connor.

Chief Lloyd Scents Booze; Offender Pays \$50 And Costs

When a car driven by Curtis Winston, 25, white, a former employee of Gooch's cafe, drove from Franklin street into an alley, Chief Lloyd's educated nose caught a scent of whiskey. Lloyd accosted Winston just as the latter parked his car, and found two leaking gallon jugs in the tonneau.

Winston was assessed \$50 and costs on each of two counts, driving while intoxicated, and possession of liquor, when he appeared Monday morning before Judge C. P. Hinshaw of the local recorder's court.

Traffic Ordinance Violator Fails To Appear In Court

L. Y. Bridgers, of Durham, failed to appear in Chapel Hill recorder's court last Monday morning to answer a charge of violating a local traffic ordinance. Judge C. P. Hinshaw directed that police officers go to Durham and serve a warrant on the offender.

Bishop Remington To Be Here Tonight

The Right Reverend William P. Remington, Bishop of Eastern Oregon and one of the most popular men in the Episcopal church, will come to Chapel Hill today and will be at the parish house tonight for an informal talk with students. He has visited many of the colleges in his work and is thoroughly familiar with the problems of college life; and his talk should prove highly interesting. All students who would like to meet him and talk with him are cordially invited to be at the parish house tonight at 8 o'clock.

LOCAL GOLFERS HOLD SPRING TOURNAMENTS

The first of the spring series of golf tournaments for members of the Chapel Hill Country Club will be held this weekend, with play beginning at 3 o'clock on both Friday and Saturday afternoons.

Handicaps will be posted at the first tee, and each member is requested to check his name before beginning play. The contestants are to play two complete rounds, including the new seventh hole, and are to turn in their scores for the two rounds before leaving.

This is the first of the regular spring tournaments which have been run for three years. As was done last year prizes will be given for the lowest score in each of the tournaments. These prizes are donated by the merchants of Chapel Hill.

The tournaments are open to all golf members of the Country Club, and every one is urged to compete by playing two rounds and turning in his net score.

PROFESSOR FAILS TO MAKE TRIP TO MOON

Budapest, Feb. 25, (IP)—Because the moving picture company which paid him a large sum for aiding in making a picture of a rocket trip to the moon, stopped its funds when the picture was completed, Professor Franz Oberth, has returned to his native village without completing his projected "moon-shooting rocket."

He expects to complete the venture when he can secure more money, he says.

WATTS OPENS UP RADIO REPAIR ESTABLISHMENT

M. M. Watts, who was for several years University electrician and who has been recently employed by the Greensboro Radio Service company, has opened a radio repair establishment near the post office at Carrboro.

Watts will be equipped eventually for any type of repair, installation and service of radio equipment of all kinds.

lost a decision to Sutphin. This was Ingold's first fight, and he accounted for himself creditably. The next fight was won by Levinson, Carolina, over Lumpkin of Carolina won the 135 pound fight from Scott by a knockout in the third. In the 145-pound division Jackson of Carolina knocked his man out in the second round, while Patterson of Carolina lost a decision to Shrewsbury. The light-heavy bout did not last long, as Landis of Carolina scored his man in 30 seconds. In the heavy-weight division Wilson, Carolina, won from Grenius by a knockout in the last round, after a tough fight.

Ad Warren, former Carolina captain, refereed.

PLAYMAKERS ARE BACK FROM TOUR

cational value of dramatics, and Muriel Wolff and Holmes Bryson entertained with improvised character sketches.

The company played at Wilmington in the historic Academy of Music before a capacity audience. At Columbus, Ga., where they appeared under the auspices of the Three Arts League, they played at the historic Springer Opera House. The performance was followed by a supper party given by members of the league. After the performance at the old Augusta Junior College at Augusta the company was entertained at the famous Blue Moon restaurant. There they met Henry Stillwell Edwards, author of "Aeneas Africanus" and other southern stories. The story-teller-poet entertained them by reciting from his poetry and telling tales of the south.

In Atlanta Professor Koch gave a talk before the Fine Arts Club on "Making an American Folk Drama." The feature of the performance at Spartanburg was the appearance of a hundred or more Converse College girls among the audience. At Rocky Mount, N. C., the company was entertained by the Little Theatre Guild at a bowling party.

In contrast to the northern tour last fall this trip was made without mishap. No busses broke down, and no delay of scenery necessitated performances without equipment. In an interview Professor Koch, director of the organization, stated that the roads were fine everywhere. He added, "We arrived in every town half an hour ahead of schedule."

CHASE GOES TO HEAD BIG PLANT
