

SCHWENNING TO SPEAK TO CIVIL ENGINEERS TODAY

Dean Braune and Professor Saville Also Attend Engineers' Meet In Greensboro.

Professors G. T. Schwenning, Thorndike Saville and Dean Braune are attending the spring meeting of the North Carolina section of the American Society of Civil Engineers, which is being held at Greensboro.

Mr. Schwenning, who is professor of business administration in the school of commerce, will present a paper before the group this morning on the subject "Corporate Finance and the Engineer." The talk by Mr. Schwenning is directly connected to the general topic being discussed at the meeting, Engineering Contracts and Specifications. During the two days of the meeting, papers covering every phase of the subject in which engineers would be interested will be presented.

Mr. Saville, who is professor of hydraulic and sanitary engineering, is secretary-treasurer of the North Carolina section of the Society, and as such is attending the meeting.

Mr. Braune, dean of the school of engineering at the University, attended the meeting held yesterday, but did not remain for those to be held today.

SHIPS DON'T WANT COLLEGIATE BUMS

Men Planning To Work Way Across Atlantic Are In For Hard Time.

Cleveland O., April 17—(IP)—If you have tears prepare to shed them for those ambitious youths who have visions of "bumming their way" across the Atlantic this summer, for if reports are authentic, the high school and college boys planning to work their passage to the other side, when class room doors close again, are going to find themselves out of luck upon approaching the sea employment agencies.

Always considered prizes by youthful adventurers bent on making the horizon their destination, the jobs aboard sea-going ships are so scarce this Spring, according to employment bureau reports, that with white-collared shore workers, too, bidding for their places even experienced seamen are glad to take what they can get.

For that reason the employment men are not handing out jobs to unexperienced men who are just out to see the sights. Not realizing this, students are flooding the shipping and employment offices with applications. Those who can, call at the agencies in person. The others write. Practically all, however, are told that they haven't a chance unless they intend to follow the sea permanently, and then only a slim one.

This one thin hope lies in the possibility that when the great Lakes and river shipping get under way in earnest, the present over-supply of men will be lessened. Public improvement work and farming may also absorb some of the drifters. In either event the boy who aspires to go to sea will have a better chance.

What are these berths aboard ship into which the greenhorn

New Managing Editor

Jack Dungan, elected managing-editor of The Daily Tar Heel by the Publications Union Board will assume his duties with Tuesday's issue.

Dungan has served the Tar Heel in practically every capacity for two years and now ranks second on the editorial staff.

AIRPLANE WILL WAGE WAR UPON LOCAL INSECTS

Aerial Attack Upon Bowling Creek With Paris Green Solution Sponsored by City.

Use of an airplane in dusting a Paris green solution onto swamps and streams near Chapel Hill to abate the mosquito nuisance, is planned by Dr. S. A. Nathan and E. W. Constable, the latter a biochemist of the North Carolina state board of health.

In making the survey of local conditions in June, 1929, Constable found that most of the mosquitoes here were surface feeders in the larvae stage, and experiments have shown that they will be poisoned by Paris green and soapstone dust spread onto the surface of the water in which they live.

Charlie Martindale of Martindale and Fritz, flying from the local airport, have signified a willingness to cooperate at virtually no cost to the city. The experiment has proven successful on a large scale elsewhere in the country.

Plans call for dusting Bowling Creek from a point one mile above the bridge on the old Hillsboro road to a mile below the bridge at the foot of Strowd's hill on the Durham road.

Some swampy areas have been drained, and steps are being taken to cope with flies. The latter, however, breed considerably in leaf mould and will be difficult to fight.

Yale Engineering Students Visitors To Zeppelin Works

Akron, O.—(IP)—Details of the ZRS4, world's largest dirigible airship, under construction for the United States Navy at the Goodyear Zeppelin Corp. hangar at the Akron Municipal Airport, were explained to 80 Yale University engineering students here recently.

As the students, who came here in a special train from Pittsburgh, inspected the 133-foot master ring girder of the new ship, which recently was raised into an upright position in the hangar, Commander Zeno Wicks explained construction details of the aerial dreadnaught, comparing it with the former naval ship, Shenandoah; the present navy ship, Los Angeles, and the German ship, Graf Zeppelin, all of which it eclipses in size and efficiency.

Y OFFICIALS TO BE INDUCTED AT MONDAY MEETING

Ed Hamer And Incoming Cabinet Will Be Inaugurated By "Parson Moss."

The annual inauguration of the newly elected Y officers will be held Monday night in the Y at the time of the usual meetings.

Jimmie Williams, the retiring president, will make a short farewell address which will be followed by a talk by Ed Hamer, the in-coming president. In his talk President-elect Hamer will outline his plans for the coming year. "Parson" Moss, of the local Presbyterian church, will conduct the induction ceremonies. The new officers will take up their positions immediately.

The retiring officers are: Jimmie Williams, president; John A. Lang, vice-president; Joe Eagles, secretary; and Ed Hamer, treasurer. The newly elected officers are: Ed Hamer, president; Sam Gorham, vice-president; Harry Finch, secretary; and F. M. James, treasurer.

All of the cabinets will meet in a joint meeting for the ceremonies, and the presidents of the different cabinets urge that all members be present at the inauguration.

Georgia Tech Gets Guggenheim Fund

Atlanta, Ga., April 18.—(IP)—Three hundred thousand dollars have been given by the Daniel Guggenheim Foundation for the Promotion of Aeronautics, to the Georgia Institute of Technology here for the establishment of an aeronautical engineering school, to be a center for such work in the south.

The gift is the last act of the fund which has given away approximately three million dollars for the promotion of flying in the United States and abroad.

Georgia Tech was picked from 27 southern educational institutions as the most logical place for the aeronautical engineering school.

Some time ago \$350,000 was given by the fund to the California Institute of Technology, which was the largest single donation made by the Guggenheim fund.

Mrs. Lonnie Merritt Dies In Burlington

Jack Merritt, who, when he was a Carolina football star, was known as "Buttin' Ram," is mourning the loss of his mother, Mrs. Lonnie Merritt of Burlington.

But 55 years of age, Mrs. Merritt was stricken with paralysis at two o'clock Wednesday morning, and passed away seven hours later.

Funeral services in Burlington were held Friday afternoon, and interment followed in the Merritt cemetery near Chapel Hill.

House To Speak At Enfield Tomorrow

R. B. House, executive secretary of the University, will speak Sunday at a meeting of the union service of the Sunday schools of Enfield. This meeting is sponsored by the Masons of Halifax county. The subject of his speech will be "Religion as Experience."

HIBBARD PRESENTS CUPS TO ACADEMIC CONTEST WINNERS

Academic contest cups were awarded to the winning high schools last night by the extension division of the University in Gerrard hall at the completion of the debates. The presentation of the cups was made by Dean Addison Hibbard.

The interscholastic track championship cup was awarded Charlotte high school, which won the state title in this sport last year also; Charlotte was also victorious in the relay race event held in yesterday's track meet and was awarded a cup for that victory.

Other awards were made to Greensboro high, French contest winner, Durham high, Latin contest winner; and Albemarle, winner of the Spanish contest.

Some Negroes Are Worthy Of Praise Believes Hinshaw

"You know," said Judge C. P. Hinshaw to the writer as the former was working at his April job of taking tax reports, "this business of being judge of the recorder's court gives a fellow a wrong outlook on the negroes, and it takes something like this to right it again and show him that negroes can be as deserving of praise as some can be blamed."

"What do you mean," Judge?" "Well, sir, here's a man just made out his tax report. Jim! Come over here."

A negro man, appearing to be about 40 years old, stepped nearer the judge. "Yessuh?"

"How old are you?" "Bout seventuh-two, ah reckon, boss."

"How many children have you?"

"Seventeen, suh. Eight boys an' nine girls."

"Any of 'em dead?"

"Yessuh, two's daid, but seventeen's livin'."

"Ever been sick, Jim?"

"Nosuh, 'cep' when' muh ahm huht once."

"Ever been in court?"

"No suh, 'cep' ah's been a witness."

"You work over on the campus. How long you worked there?"

"Oh ah reckons evaday fo' 'bout thuhnt-two yeahs."

"Now," said the judge to me, "there's a man that's a credit to the community. He's got one of the finest little farms you ever saw—here's the tax report of what's on it. Jim used to come in to a store I ran once, on Saturday nights, with all his children, and for some of them he'd buy a nickel's worth of chewing tobacco and for the one's that didn't chew, a nickel's worth of candy. How many of your children chew, Jim?"

"Oh, 'bout half, ah reckon."

"How old do they start chewing?"

"Well, suh, muh littles' boy, he staht chewin' 'bout when he's bawn, ah reckon—de doctah said 'twant' huht—an' 'en he brothah seen de chewin', and he stahted, too. But ah don' chew none."

Dealer Declares Car Sales Are Below Par

Strowd Motor Company, having sold 30 new cars during the first quarter of 1930, is 28 per cent less than normal in business volume, according to Bruce Strowd.

Goldsboro Victorious On Both Sides Of State Debate Query

Extra Meeting Of Tar Heel

All reporters, city-editors and editorial writers are requested to report to the managing-editor of the Daily Tar Heel between the hours of three and five o'clock this afternoon.

ENGINEERS HOLD ELECTION; HEAR TALK BY HOFFER

Anniversary of American Society of Mechanical Engineers Observed.

At the meeting of the University student branch of the American Society of Mechanical Engineers held Thursday evening in Phillips Hall, the following officers were elected to serve during the next school year: R. C. Plummer, rising senior, president; Frederick Knoop, rising junior, vice-president; Allen McLean, rising sophomore, secretary; and R. A. Parsley, rising senior, treasurer.

In addition to the election of officers, the program of the meeting consisted of an illustrated talk by Professor E. G. Hoefler, head of the department of mechanical engineering, on the fiftieth anniversary meeting of the society which was held in Washington recently. Mr. Hoefler, who attended the meetings in Washington, told of the various events at the convention and showed slides of scenes there.

Phonograph reproductions of talks by officers of the national society were presented at this meeting. These talks were especially prepared by the president and secretary of the national organization for presentation to members of the society who were unable to attend the meeting in Washington.

The fiftieth anniversary meeting of the society was held in both New York and Washington. The first two meetings were held in New York. Then the convention adjourned to Hoboken to witness a pageant representing various scenes in the history of the society, which was founded at Stevens Institute, Hoboken, in 1880.

The convention then adjourned for the week-end, and the last of the series of meetings were held in Washington. At the convention a series of abstracts of papers summarizing engineering work in 16 different geographical divisions of the world were presented. These papers not only told of present engineering work but also estimated what would be the progress of engineering work during the next few years.

"MACBETH" TO BE READ HERE SUNDAY

Professor George McKie, of the English and public speaking departments, will give a reading of Shakespeare's tragedy "Macbeth" Sunday night at 8:30 in the Playmakers Theatre.

This is the regular play reading for April, and is the sixth reading given this season under the auspices of the Playmakers. The date was placed as near as possible to the anniversary of Shakespeare's birthday, which comes on April 23.

First Time Since 1926 That One School Has Won On Both Sides.

WIN AYCOCK TROPHY CUP

Goldsboro high's negative team was awarded the Aycock Memorial cup last night as a result of winning the judges' decision in what assumed the aspects of an all-Goldsboro affair, both negative and affirmative teams of this institution surviving the two preliminaries. This makes the first time since 1926 that two teams of the same school have been pitted against each other in the final debate, Winston-Salem high having set the precedent in that year.

The Goldsboro team, which brought the Aycock cup to its school for the first time since the inauguration of the annual debate contest in 1913, was composed of Eleanor Bizzell and Ezra Griffin. Their school-mate opponents were Edward Outlaw and Billy Crow. Individual medals were awarded to each of the four debaters by the University.

A large crowd of high school and University students were in attendance at the final debate last night, which brought to a close another successful annual high school week. Dean Addison Hibbard of the school of liberal arts presided over last night's colorful affair, and E. R.

TWO PROGRAMS SCHEDULED FOR END OF QUARTER

Only Cincinnati Chamber Orchestra May 10, and Lorado Taft May 19, 20, and 21 Remain on Entertainment List.

The Cincinnati chamber orchestra will appear here May 10 under the auspices of the student entertainment committee as the second number on the spring program.

The orchestra, under the direction of Walter Herrmann, is recognized to be one of the best in the country. It has had numerous engagements and has everywhere received the most favorable of press comments.

The committee expects that the program will be well liked since previous programs by chamber orchestras have had large and appreciative audiences here. Last year the famous Flonzaley quartet, which has now disbanded, gave a concert in Memorial hall to one of the most enthusiastic audiences that an entertainment program has ever had here. It is believed by the committee that the Cincinnati chamber orchestra will be equally well received.

In addition to the program scheduled for May 10, the committee has a lecture by Lorado Taft slated for this quarter. Mr. Taft, a sculptor who has received wide acclaim, will give three lectures, May 19, 20 and 21. He is a fluent and easy speaker who never fails to interest his audiences with his instructive and entertaining lectures. For the past several years there has been no speaker in Chapel Hill on the subject of art. Mr. Taft's stay here is therefore looked forward to eagerly by students and Chapel Hillians interested in art.
