

FOREIGN POLITICS FORUM PLANNING GREATER ACTIVITY

A Group Of Leading Diplomats
And Students Of Diplomacy
To Be Invited To Speak.

Meeting in Saunders hall last night the Foreign Politics Forum discussed plans for next year. It was decided that a group of leading diplomats and students of diplomacy will be invited here to speak on the various phases of foreign policy.

The group decided to permit faculty men to join the group as well as students, so that a more varied discussion of this type of work may be had. Professor K. C. Frazer told of several men prominent in the field of international politics who may be secured for a series of lectures, and suggested means of getting them to the University.

Professor E. C. Metzenthin emphasized the importance of studying this subject, and urged the group to bring the most fitted men here for talks. He stated that speakers not definitely connected with the government would be able to give more unbiased discussion than officials of the government and urged the group to consider that fact.

Several of the student members made suggestions as to the means of financing the forum's affairs. It was decided that the club would meet regularly every other week, and at such times as outstanding speakers could be secured.

Bob Graham, president of the forum, appointed an executive committee to map out plans for the coming year.

BRUTON LECTURES UPON RELATIVITY

The final meeting for the year of the mathematics seminar was held yesterday afternoon with Miss Ruth Bruton as speaker. Miss Bruton gave a report upon the subject of "The Lorentz Transformation in Special Relativity."

The meeting yesterday closed a successful year for the seminar. A number of interesting reports have been given by the members of the mathematics department. There have also been addresses by members of other departments, which is particularly gratifying in the fact that other departments of the University are showing interest in the seminars.

Among those who have spoken this year are Dr. Archibald Henderson, G. R. Trott, R. L. Garrett, J. J. Slade, Jr., M. A. Hill, Dr. L. E. Mackie, Dr. Arthur Winsor, Mrs. J. C. Wilson and Miss Margaret Bruton, all connected with the department of mathematics. Professor Horace Williams of the department of philosophy, and Professor A. M. Jordan of the department of education, are men of other departments who have addressed the seminar.

A. I. E. E. ENDS YEAR

The student branch of the American Institute of Electrical Engineers terminated its work of the year with a luncheon at the Carolina Inn yesterday.

Several talks were given by members of the various classes represented. Professor John E. Lear, acting head of the electrical engineering department, gave the principal address.

Senior Talk

Bob House will speak at the meeting of the senior class tonight at 7:15 under the Davie Poplar. This talk will be the fourth of a series of talks that have been given to the class by members of the faculty. At 11:00 tonight all seniors will be admitted to the Carolina theatre free of charge to see the show *Dolores del Rio* in the "Bad One." In order for any member of the class to be admitted, it will be necessary that he wear his regalia.

FOURTH BIRTHDAY PUBLIX - SA ENGER TO BEGIN JUNE 1

Carolina Will Offer Strong Programs For Next Month.

The fourth anniversary of the Publix-Saenger Theatres, of which the Carolina Theatre is a representative, will begin next week and last for a month.

The Publix-Saenger Theatres company was organized four years ago by H. F. Kinsey and R. B. Wilby. At that time, the company consisted of eleven theatres located in Greensboro, Durham, and Fayetteville. It now consists of twenty-eight theatres housed in modern and imposing buildings, in the leading cities of the state, such as Raleigh, Greensboro, and Winston-Salem.

This organization was the first to install talking pictures in North Carolina. In keeping with the policy to give the public the best pictures at the smallest cost, the company has affiliated with the Paramount-Publix-Company which enables it to buy films cheaper than an individual company; this affiliation enables the company to get films sooner than it would otherwise.

The Publix-Saenger organization has its headquarters in Greensboro, with Mr. Kinsey as general manager. The company was fortunate in obtaining the services of M. S. Hill as field manager a year ago. Mr. Hill is now known as one of the biggest showmen in the country, and his personality has won for him many friends in this section as well as over the state.

According to E. Carrington Smith, manager of the local Publix-Saenger Theatre, the company will soon show the greatest line of moving pictures ever presented in any theatre during one month.

Some of the films listed for the anniversary month are: Clara Bow in "True to the Navy," "Journey's End," Buddy Rogers in "Safety in Numbers," Billie Dove in "The Notorious Affair," Richard Barthelmess in "Son of the Gods," Buster Keaton in "Free and Easy," and other of the best films.

It is now said that no boy should be denied the enjoyment of fishing. Spare the rod and spoil the child.

Yackety Yacks Delivered

All who have not received their copies of the Yackety Yack may receive theirs by calling at the Yackety Yack office in the Alumni building between the hours of 10:30 and 12 this morning.

SAVILLE CLOSES TAYLOR SEASON

Speaks To Club On Power Plant Management As Industrial Factor.

Presenting a paper, "Power Plant Management as a Problem of Industrial Management," Thorndike Saville spoke before the University student branch of the Taylor Society Tuesday evening at its last meeting of the year.

In his paper Mr. Saville, who is professor of hydraulic and sanitary engineering at the University and chief engineer of the state department of Conservation and Development, presented an impartial discussion of the merits of the two sources of power for industrial organizations, purchase from a public utility and generation in a private power plant.

Because of the rapid advancement of motorization during recent years and the growth in the use of electricity, electrical power was the only kind considered in the paper.

Professor Saville discussed the relative advantages of the two methods and described conditions under which it would be more economical to use one or the other source.

"The decision on which source of power to resort to is a matter which requires a great amount of careful analysis of many complicated factors by both the industrial manager and the most expert consulting engineers available," stated the speaker.

Many combinations of the two methods are available for use under different conditions, but the most economical combination can be determined only after a complete study of the conditions has been made.

In offering an analysis of the two methods of supplying power, Professor Saville discussed the factors which should be investigated before an organization decides to purchase its power from a public utility. In a like manner he spoke of the three sources of power that can be used in a private power plant of an organization which decides to generate its own power.

In conclusion, Professor Saville stated that the decision on which source of power should be used is one requiring much careful analysis of many complicated factors by men expert in this line of engineering.

The meeting Tuesday evening brought to a close the year's activities for the local branch of the Taylor Society, the international organization for the promotion of scientific management. During the winter and spring quarters a series of outside speakers have presented papers before the group on subjects related to scientific management.

Editor Apologizes

Boston, May 28—Paul Brooks, head of the Harvard Lampoon, which yesterday caricatured Mayor James M. Curley, has apologized in writing to the mayor, and Mr. Curley announced that in view of the extreme youth of the editor he had accepted the apology. Previously the mayor indicated that possibly he might sue the undergraduate publication for libel.

A cartoon had pictured the mayor as standing before a liquor-laden table, addressing an intoxicated audience.

RARE ZOOLOGICAL BOOK FOUND HERE

Miss Alma Holland of Zoology Department Is Responsible For Discovery.

While reading an apparently authentic biographical sketch of Dr. John Edwards Holbrook, a distinguished Charleston naturalist living in the early part of the last century, Miss Alma Holland of the clerical staff of the botany department noted the reference to Holbrook's *North American Herpetology* as a fine monograph well known to zoologists everywhere.

The first edition, said the eminent biographer, writing from the Smithsonian Institution to the National Academy, appeared in three volumes. Following her bent for meticulous care in verification, Miss Holland proceeded to the department of zoology where she found that Holbrook's *North American Herpetology* had been long held as a prized possession. But they handed her four volumes.

There was an obvious conflict between fact and statement. The four volumes were evidently of the first edition, but the fourth volume did not exist, according to what seemed the best bibliographical authority.

The problem was soon solved by correspondence with the Smithsonian Institution, from which source it was learned that the rare fourth volume had been unknown to the generally very reliable author of the biographical sketch at the time of his writing and that there was still no copy of it in the libraries in Washington; there was believed to be one in the library of the Academy of Sciences in Philadelphia.

BRECKENRIDGE TO UNDERTAKE LEGAL RESEARCH WORK

Employed By Interstate Commerce Committee In House Of Representatives.

Professor M. S. Breckenridge of the University of North Carolina School of Law has been employed to undertake extensive legal research on behalf of the Committee on Interstate Commerce of the National House of Representatives.

Professor Breckenridge is a specialist in the law of corporations and has always been particularly interested in the corporate angles of the business of railway transportation. On account of his experience in this field he has been selected by Dr. W. M. W. Splawn, counsel for the Committee and is one of the nationally recognized experts on railway transportation, to assist him in preparing a report upon the subject of railway holding companies.

Those who have been watching developments among railway organizations recently have noticed a marked tendency toward the formation of companies for the purpose of holding stocks in other railway companies. The possibility of indirectly bringing under one control many railway units in this manner is one that has been causing some interest.

Professor Breckenridge will devote the summer to this work establishing his headquarters during that time in Washington.

Hibbard Resigns Post Here To Accept Northwestern Offer; Ninth Man To Leave Carolina

To Head Liberal Arts College;
Holds Same Position Here.

FACULTY HARD HIT

Hibbard Has Gained National Prominence For Literary and Educational Work.

HIS CAREER REVIEWED

It was announced yesterday that Dean Addison Hibbard, of the College of Liberal Arts, was resigning his position in the University to take effect at the end of this quarter. Beginning July 1, he will take the position of Dean of the College of Liberal Arts at Northwestern University. Mr. Hibbard is the fourth full professor to be lost to the English department next year. Twenty-nine professors have left in the last two years, and Mr. Hibbard is the ninth to leave at this time.

Mr. Hibbard received final word of his appointment to the deanship at Northwestern Tuesday afternoon. He will devote his full time to the position next year, and teaching will be optional. What makes the new position so attractive is that Northwestern has a retiring allowance for all professors. The University of North Carolina does not have such a fund and when a professor no longer teaches he is cut off from any further income.

In addition, Northwestern has shown a great desire to make progress in undergraduate instruction. Not only has it the desires, but its extensive resources give it the where-with-all to accomplish its undertakings. It is but recently that a gift of \$8,500,000 was received by the University for improvement in instruction, particularly in the College of Liberal Arts. Large scholarship funds bring students from many sections of the country to Evanston, Illinois, to attend Northwestern. Plans are now underway for building new dormitories and recitation buildings so that the University will be able to accommodate more students and have better facilities for teaching.

Mr. Hibbard's widespread experiences, his literary ability, his excellent work as Dean of the College of Liberal Arts, and his liberal views as an educator have gained for him a national reputation. It is because of this reputation, most of which has been gained in the last four years, that Northwestern picked him to head the most important unit of the University. Born forty-three years ago in a small town in Wisconsin, Mr. Hibbard attended the University of Wisconsin and graduated in 1908 with an A. B. degree. He then went to Japan and spent five years in the Orient. From 1909 to 1914 he was professor of English at the Imperial College of Commerce in Nagasaki, Japan. He returned to the University of Wisconsin in the position of instructor in English in 1916 and 1917, gaining, at the same time, his M. A. degree. For the next two years Mr. Hibbard was assistant professor of English at Miami University. When the war broke out he entered the service in the United States Navy. When the war was over, he came to the University of North Carolina as an

Old Rags

A final drive for woolen materials to be made into rugs for the Y.M.C.A. building will be made this evening. The committee collecting the materials requests that all students having clothes they wish to give are to have them ready when the collectors canvass dormitories and fraternity houses. Material may consist of: sweaters, old woolen blankets, winter suits of at least 50 per cent wool, overcoats, woolen golf hose, and old rugs of reasonably good material.
