

MAGAZINE'S LEAD ARTICLE WILL BE ADVENTURE TALE

Editor Announces New Rule
About Staff Members Not
Contributing.

The fourth regular issue of the *Carolina Magazine* makes its appearance tomorrow morning. Contained in it are the writings of several first-time contributors. In point of format, this number is somewhat different from that of the three preceding ones. One poem and the beginnings of three articles make up the front page.

Evoc, the lead article, is a stirring story appearing under the name of Mary Carr Newby. Jess Slaughter, a former student of the University, makes his bow to the Magazine readers in *Close Communion*, a tale. In *Chloe*, George Martin Fieldman has recorded a typical collegiate experience. Philip Liskin states his own personal views as to the aged conflict between mind and matter in *Mind Over Matter*. Bob Barnett contributes his second work, a play which he has chosen to name *Satan Smiles*. S. S. Rosenblum displays his wares in two articles—information for which was supplied by his own experience.

Poetry for the number was written by James Dawson, Vernon Crook, Stanley Stevens, Evelyn Terry, and Hamp Maxwell. Book reviews by Beatty Rector, Ralph Westernman, Nathan Shadebrush, and Japheth Album, conclude the number.

Editor Williams states that the following ruling will go into effect immediately: staff members failing to contribute to two successive issues will be dropped from the staff.

DE MOLAY ORDER ORGANIZES HERE

Second Meeting Presided Over
By Bill Spradlin Draws
Thirty.

Thirty members of the newly-organized DeMolay order met in their second meeting of the year Thursday night in the lobby of the Y. M. C. A. building. The object of this meeting was to acquaint all of the prospective members with the purpose of the group.

Bill Spradlin, temporary chairman, stated that the Order of DeMolay was not a junior Masonry, as has been generally believed on the campus. "It is," the chairman stated, "the same type of organization as the old and well-established Masonic Order, and is an international organization for young men of the ages from sixteen to twenty-one."

According to reports there are quite a few old members of the organization who have not yet affiliated themselves with the new group, and it is the request of the club that these men renew their membership. Harry Gump, master councilor for the state of North Carolina, and Allen S. O'Neal, state deputy, have both given the new organization their entire support, and highly recommend it to the campus. Membership is not secured chiefly by petition, but it is said that recommendation as well plays a large part in accepting new members.

All who desire further information on the matter are asked to see Harry Gump.

Didn't Know It

Baton Rouge, Louisiana, November 14.—Barefooted as he stood in United States district court here, John Schexnayder, 82 year-old backwoodsman, told Judge Wayne G. Borah yesterday he had been making whiskey for 50 years and had never heard of the prohibition law.

Schexnayder, who speaks only French, pleaded guilty through an interpreter to a charge of manufacturing intoxicating liquors. Judge Borah placed him on probation for five years.

Among other things, the backwoodsman said he had not been told the War Between the States had ended.

MATH JOURNALS PUBLISH PAPERS BY CAROLINIANS

University Professors and Instructors Expound Ideas for
National Departmental Press.

Several interesting and important articles by members of the mathematics staff have appeared recently or will soon appear in national mathematical journals.

The first paper to appear this year was contributed by L. E. Bush, instructor in mathematics at the University, now on leave at the Ohio State University to pursue work leading to a Ph. D. degree. This paper, entitled "On The Expression of An Integer As The Sum of An Arithmetic Series," appeared in the *American Mathematical Monthly* for August. It is concerned with the number of distinct ways in which an integer can be expressed as the sum of an arithmetic series of integers. It is a generalization of a paper which was written earlier by Mason, in which he considered the number of ways in which an integer can be expressed as the sum of consecutive integers.

Dr. E. T. Browne, associate professor of mathematics, contributed an article on "The Separation Property of The Roots of The Secular Equation" to the October issue of the *American Journal of Mathematics*. The secular equation was first used by LaPlace in 1782 in determining the secular inequalities of the planets. It is one of the most important equations in mathematical analysis. In the October issue of the bulletin of the American Mathematical Society, Professor Browne also had a paper entitled "The Characteristic Roots of A Matrix." By a very simple method this paper gives an upper limit to the characteristic roots of the general algebraic matrix—a limit much more restricted than any given heretofore.

In an early issue of the *American Mathematical Monthly* will appear an article on "Vieta's Transformation of The Cubic," written by Doctors Archibald Henderson and A. W. Hobbs, in collaboration. This paper will give a geometric interpretation of Vieta's transformation of the cubic, a transformation by means of which Vieta reduced the solution of all cubics to the solution of one particular type.

Mass Tomorrow

Father John Mahly will say Mass Sunday morning in Gerard hall at 8:30.

BRADSHAW TAKES CHARGE IN CHAPEL

Dean Warns Sophomores To Begin in Selecting Majors and Minors.

At sophomore chapel yesterday morning, Dean F. F. Bradshaw pointed out to the group two problems upon which they will have to make a decision between now and the end of the year.

Dean Bradshaw began his remarks with a warning to the class against procrastination when the two problems were concerned and urged that every sophomore consider these questions immediately.

The first question discussed was the fact that a number of men would find it difficult in arranging to come back to the University because of finances. "The thing to do now, Dean Bradshaw said, "is not to become discouraged, but to talk difficulties over with your respective deans, or with officials who are always more than willing to offer any advice which they may have, and then to come to a decision." He then mentioned that loans and self-help work is always open to those who apply early enough.

The second problem Dean Bradshaw discussed was one every sophomore must face before the end of the year, that of finding a subject which will be his major for graduation.

The speaker advised that a subject in the curriculum arousing the student's keenest interest and enthusiasm should be chosen as a major and an allied subject as a minor. He also advised that the subject should not be chosen because it appeared to be easy, but because it appealed most to the curiosity of the student.

State Forester To Lecture Tomorrow

J. S. Holmes, state forester and member of the committee created by the North Carolina Social Service Conference to study the question of highway beautification, will give a free illustrated lecture on this topic Sunday afternoon at 3:15 o'clock in the Carolina Theatre. This lecture is illustrated with slides, and a motion picture entitled, "What is Happening to American Landscapes." Photographs taken by Mrs. Lawton in her survey last year will also be shown.

Holmes will tell of work done by the state in connection with road beautification, and explain how the community of Chapel Hill may aid in this project. He will stress the two most important improvements to be made, namely, the removal of advertising matter from the roadsides, and the planting of trees. To every one who attends will be given a short questionnaire to be filled out before the finish of the lecture and left with the speaker.

Episcopal Guild Hostesses at Tea

Saint Hilda's Guild of the Episcopal Church will act as hostess for a tea to be given in the parish house Sunday afternoon, November 16, from 4:30 to 6:00 p. m. Miss Alma Holland and Miss Elisabeth Roome will pour tea. The following girls will serve: Jocelyn Whedbee, Lucy Fletcher, Elizabeth Webb, Eleanor Hunt, Josephine Parker, Florence Yancey, Martha Norburn, and Myra Lynch.

UNIVERSITY HEADS CLOSE SESSIONS

Association of Governing Boards Of State Universities Will Meet for Last Time Here This Morning.

With the Carolina Inn as headquarters, the Association of Governing Boards of State Universities and Allied Institutions has been in progress for the past two days under the management of R. M. Grumman, director of the University of North Carolina extension division.

The delegates arrived in Chapel Hill for a one o'clock luncheon at the Inn Thursday, after having inspected Duke University that morning. Their first meeting was at three o'clock Thursday at which time R. B. House, executive secretary of the University, substituted for President Graham in giving the welcome address. The Carolina Playmakers entertained with a guest performance Thursday evening at 8:30.

David E. Ross of Lafayette, Indiana, is president of the association. Regular sessions took place from 9:00 to 2:00 o'clock yesterday and at 4:00 o'clock they were conducted on a tour of inspection of the University of North Carolina plant. A complimentary dinner was given last night at the Inn, with the Board of North Carolina University trustees as honor guests. The last session was at 9:00 this morning. The delegates will probably leave early today.

Besides the various reports, addresses were made on the following subjects: "Has a State University a Greater Responsibility to Its Own State Than to the Nation?"; "Uniformity in Educational Financial Reports"; "The Administration of Fiscal Control of State Universities and Colleges"; "Readjustments in University Finances"; "The Co-ordination of State Educational Institutions"; and "Co-operative Discipline."

ENGINEERS HEAR OF LONGEST SPAN

At the meeting of the William Cain civil engineering society last night at 7:30 o'clock in Phillips hall the members saw the motion picture on "Hydro-Electric Power Production in the New South." This picture showed some of the work that is being done to harness the water power in the south and utilize it in the form of electrical power.

Thomas M. Riddick, Jr., a senior in the engineering school, gave an interesting talk on "The Constructing of the Hart Memorial Bridge." In his talk he described the method of constructing this gigantic structure. The bridge is one and a half miles long spanning the Chowan River near Edenton, N. C. It was built in 1926 by the Sanford and Brook Corporation of Baltimore, Md., at a cost of \$700,000, and is said to be the longest in the state of its particular type. Riddick described it as being constructed of a pre-cast concrete piling substructure and a creosoted timber superstructure.

The meeting was well attended.

Sigma Xi Meeting Tuesday

The botany department will have charge of the meeting of the Sigma Xi next Tuesday night. Dr. W. C. Coker will continue his talk on "Some Early American Naturalists."

Honored

DEAN CHARLES T. MCCORMICK

Dean McCormick, head of the law school, has been taken into honorary membership in the Dialectic Senate. McCormick has been connected with the University for the last five years.

UNIVERSITY WILL MEET CAMBRIDGE DEBATERS HERE

Murrow Completes Arrangements for Clash Here on
December 13.

The debate team from the University of Cambridge, England will engage the Carolina debaters here December 13 on the question, Resolved: That the emergence of women from the home is a regrettable feature of modern life.

This meet was originally scheduled for December 15, but the Britishers found it necessary to sail for home on that date so cancelled the engagement. Whereupon, President Murrow of the N. S. F. A. which manages debate tours for foreign teams, cabled them either to fill their engagement with Carolina or not to come to this country at all. The new date, December 13, was agreed upon after much correspondence via cable and wire between Mr. George McKie, chairman of the debate council, the N. S. F. A., and Cambridge.

Debates with British teams in the past have drawn the largest crowds to attend forensic meets on the Hill. The question this year, according to the debate council, was selected to give the British humor full sway.

Louisiana Student Guilty of Libel

Baton Rouge, Louisiana, November 14.—Kemble K. Kennedy Louisiana State University senior law student, was convicted late Wednesday of criminal libel and circulation of obscene matter, in connection with the publication of the "Whangdoodle," a campus scandal sheet.

Kennedy may receive a maximum sentence of one year imprisonment on each four counts. Sentence was deferred until Thursday at the request of defense council.

The "Whangdoodle," containing references to faculty members, students and university officials, created a stir when it appeared on the L. S. U. campus last spring.

Kennedy is a former president of the L. S. U. student body and at the time of his suspension from the university last year upon being indicted by the grand jury, was president of the law school and president of the senior law class.

SAVILLE HONORED WITH PLACE ON FEDERAL BOARD

Will Study Means of Combating
Erosion of Shores By Waves
and Currents.

The chief Army engineers have appointed Thorndike Saville, professor of Hydraulic Engineering in the University, and chief engineer of the Division of Water Resources and Engineering of the Department of Conservation and Development, as one of the three civilian members of the Federal Beach Erosion Board.

Four of the seven members of this body are army engineers. The civilian members of the board are: General Richard K. King, Massachusetts department of Public Works; Victor Gilinieu, New Jersey Board of Commerce and Navigation; and Professor Saville.

It is felt that Professor Saville's appointment is due to his services to this state in initiating the program for investigation of the physical changes on the coast, and his activity in the American Shore and Beach Preservation Association, of which he is a director.

The board will cooperate with various states in studying means of combating the erosion of the shores of coastal and lake waters by waves and currents.

Four years ago the department of Conservation and Development introduced a program of observations and studies of the changes along the coast of North Carolina. The fact that North Carolina is the first Southern state to meet the need for evaluating the various causes that are active in changing her beaches and inlets has drawn considerable attention to the state. The problems regarding the migration of commercial fish, and navigation, as well as improvements along beaches of the state, will be aided by a more thorough knowledge.

MANY APPLY FOR CONCERT TICKETS

Music Club Decorates New
Building for Initial
Concert.

All tickets to the organ programs for Saturday have already been given out, according to Dr. Harold S. Dyer of the music department. Applications for the Sunday performance that are expected today will take the remaining tickets for that day. No more tickets are now available. All in all, twenty-five hundred applications have been received.

The music club, under the direction of Mrs. F. H. Edmister, its president, has decorated the music building with literally miles of smilax. Lights have been installed in the front of the building, and it presents a very festive appearance.

Large numbers of out of town visitors are expected to attend all of the three performances. Applications from other cities have not been confined to the immediate vicinity of Chapel Hill, but have been received from all over the state. Charlotte and Greensboro are sending especially large numbers. Many prominent persons are expected to attend, and it appears that the University will have a gala celebration.
