Debating Candidates

All students interested in debating and desiring to register for Debating 1 which carries one course credit should attend the regular meeting of the debate squad in Murphey 201 at seven-thirty tonight, or see George McKie before the end of the week. The meeting tonight will be short to avoid conflict with the class meetings to nominate candidates for class officers.

Cosmopolitan Club

A business meeting of the Epsilon Phi Delta cosmopolitan club is to be held tonight in the Y. M. C. A. at nine o'clock.

STATE DRAMATIC TOURNAMENT IS TO BEGIN TODAY

(Continued from first page)

tumes, stage models, posters, and other materials will be placed in the Playmakers scene shop in Person hall. Delegates are invited to visit the exhibit between sessions of the festival.

The Carolina Dramatic Association was formed in 1924, "to promote and encourage dramatic art in the schools and communities of North Carolina, to meet the need for a genuinely constructive recreation, to cooperate in the production of plays, pageants, and festivals of real worth, and to stimulate interest in the writing of the native drama." Membership in the association is open to any dramatic group or individual interested in drama.

Contests in play production, in playwriting, and in other dramatic arts are conducted each year in connection with the annual festival. Groups entering the contest are classified into four sections: city high schools, county high schools, senior colleges and little theatres, and junior colleges and community clubs. Special contests in costume design, make-up, posters, programs, and stage models are also conducted. The club winning the state championship in its classification will be awarded a plaque bearing the signet of the Carolina Dramatic Association. The winners of the special contests will be awarded complete sets of the Carolina Folk-Plays.

Johnson Discusses Control of Malaria

H. A. Johnson, sanitary engineer of the United States Public Health Service, gave a lecture last Tuesday to the seniors in the school of civil engineering. In his lecture the speaker described the extensive malaria control methods used by the public health service and emphasized the large engineering aspects of the subject.

Throughout his address, Johnson used moving picture films to show the methods of malaria control, in which airplanes were shown dusting with paris green to control mosquito breeding in large swampy areas.

Saville Attends Meeting In N. Y.

Professor Thorndike Saville of the engineering school spent two days during the spring recess attending meetings of the United States Beach Erosion Board of which he is a member.

Inspection was made of the shore and inlet protective projects under construction in New Jersey. At a meeting in New York the Board adopted two projects for study in North Carolina, one near Nags Head and another at Fort Fisher. At both points beach erosion has recently become a serious problem.

Variety Of Editorial Praise Is Accorded New Book By S. H. Hobbs

Not only from the newspapers at home but from editors of far away states and from foreign countries there are coming in almost daily bouquets of editorial praise for Dr. S. H. Hobbs' North Carolina: Economic and Social, a volume released recently by the University of North Carolina Press.

The Boston Globe calls the book "an encyclopedia of useful information about the Tar Heel state," and the London Times describes it as a model of social diagnosis, candid and thorough.

Says a review in the New York Times, in part: "Professor Hobbs' book stands out among books dealing with localities because of its author's frankness, his desire to set forth the exact truth, and his determination not to admit into his text rhetorical patches of patriotic outbursts."

The New York Herald says the book "contains an amazing amount of information upon all possible phases of North Carolina."

H. L. Mencken in the American Mercury says: "Dr. Hobbs does not hesitate to write plainly about what he discovers, no matter how unpalatable it may be to idealists. Nor is he shy about offering remedies, some of them of a very drastic nature. The point is that North Carolina is ready and willing to listen to such candor—more, to pay for it. That is probably the main reason why the state is going ahead."

"This volume," says the Boston Transcript, "was written especially for those who make North Carolina their home, yet it is also sure of a country-wide welcome by telling the economic and social story of this famous State with a completeness which has not hitherto been even attempted. Arraying his wealth of facts against a background of information regarding physical resources, Professor Hobbs describes practically every feature of human living and working, from race characteristics to education, from agriculture to industry, and from transportation and communication to government."

Getting nearer home one finds the Gastonia Gazette saying, "Every North Carolinian who is interested in his home State should by all means read Mr. Hobbs' book, and, if possible, keep it for reference from time to time. Its value from this standpoint alone more than matches the price of the book."

"We are agreed," says the Charlotte Observer, "that this book should find its way into public libraries, school libraries, into the hands of teachers, newspaper editors, and all those interested in knowing the facts about this State."

That "the book deserves a place on the shelves of every citizen interested in the State," is the opinion of The Charlotte News. The Raleigh News and Observer declares: "It is a remarkable book, the value of which can hardly be overestimated."

Phi Hears Haywood's Inaugural Address

A large part of the first meeting of the quarter of the Phi Assembly was given over to Speaker Bert Haywood's inaugural address. Speaker Haywood outlined possible means of making the organization more active and alive. He considered emphasis on county consciousness of very great importance. The speaker pointed out the fact that the Assembly, modeled after the state house should carry its likeness to the point of making the county the unit in the body. He intends to appoint county chairmen to promote the interests of the units.

Representative Uzzell introduced a motion to favor the passage of a luxury tax for the benefit of higher education. The bill was passed almost unanimously.

The bill, resolved that a more adequate infirmary should be provided at the University was passed when Speaker Haywood cast the deciding vote in favor of the measure. At the last meeting of the Phi, after the assembly discussed the bill, a tie prevented either passage or rejection when Speaker Haywood withheld his vote until Tuesday night's session.

Supper To Be Given By Sigma Xi Society

The local chapter of the Sigma Xi, national scientific society, will meet for the first time of the spring quarter next Tuesday night, March 31, for a supper at six-thirty o'clock in the Carolina Inn.

The program for this meeting is to be handled by the zoology department, and consists of a report of the department's research for the past several months.

During the business part of the meeting new members of the society will be initiated and next year's officers elected.

Reservations for the supper should be made to Dr. H. D. Crockford, assistant professor of chemistry.

Ramsay Takes Over Chair of Di Senate

The Di Senate held its first meeting of the spring quarter on Tuesday night in its hall in Old West building. The new president, K. C. Ramsay, called the first meeting to order after which he delivered his inaugural address.

President Ramsay, in his speech, favored a program of livelier bills on the calendar for the coming quarter. He asked that the younger senators take a more active part in the discussion of bills at the sessions of the senate. He pointed out that this was the only way that they could derive any benefit from society participation.

President Ramsay appointed Senators Billy McKee and Ed French to serve with McBride Fleming-Jones on the ways and means committee.

ELEVEN HIGH SCHOOLS ENTER SPANISH TRIALS

Eleven schools have entered a total of 203 contestants in the high school Spanish contest, which will be conducted Friday, March 27 by the University extension division. Schools entering contestants are Albemarle, Raleigh, Charlotte, Fayetteville, Gastonia, Hertford, Leaksville, Rocky Mount, Statesville, Wilkesboro, and Winston-Salem. Wilkesboro heads the list with thirty-five entrants, followed by Raleigh and Rocky Mount who have twenty-five each.

Infirmary List Increases

The infirmary list has been increasing for the past week until yesterday the number had reached eighteen. The big majority of the patients are confined because of German measles. The complete list of inmates are: H. R. Baker, J. W. Stallings, Jr., B. B. Gambill, R. M. Dailey, E. A. Cameron, George Little, John Entwistle, A. M. Rhet, James Griffith, R. L. Bernhardt, B. B. Frazer, T. S. Bennett, E. C. McInnis, W. L. Spence, R. Reid, M. H. Dunn, P. R. Brown, and John Holbrook.

THE CAMPUS QUEEN

American girl rushed by the Prince of Wales at Panama City says H. R. H. is "not a bit offish." She was not, however, referring to his horsemanship.

Surts In Sports

(Continued from preceding page)

and void. Right now, scouts are looked upon as poison ivy by the baseball coaches, and it would be for the best interests of the ball player and the club if collegians weren't tampered with until they had finished college.

Here And There.

Over 15,000 persons saw the Brooklyn Robins play at Havana the other day. All the Cubanolas turned out to see the two Havana boys, Luque and Lopez, the Robin battery, play; Uncle Robbie crossed them up and neither saw any service that day. However, twenty thousand turned out the next day . . . After winning the national indoor title, Jean Borotra was very rudely upset by an American youngster, Frank Shields, in the United States-France matches . . . The three best lacrosse teams in the country are huddled together within fifty miles of each other. They are Navy, Maryland, and Johns Hopkins, all in the close vicinity of Baltimore . . . At Maryland the boys carry a lacrosse stick to class, to eat, and even to bed. . . . Next year the wrestling team will carry one of the toughest schedules in intercollegiate wrestling. In addition to the teams that were engaged last year, West Point will be added. The Army always turns out good wrestling teams, and they should be able to make the Tar Heels step . . . Navy intends to schedule two Southern Conference boxing teams for next year. Indications point to the University of Virginia, southern champions, and Carolina.

ENGINEERS HEAR N. P. HAYES TELL OF NEW BUILDING

(Continued from first page)

world, rising 927 feet above the street level. In order to hasten completion the foundation was first made to support a twenty story structure, and while the steel work was under way on this portion, the foundation was enlarged to size necessary for the completed building. There was so much steel required that the contracting company built a special factory for the job.

The films used to illustrate Hayes' lectures were entitled "An Epic in Steel," and were actual views of the building in question.

Students Suspended On Cheating Charges

The executive committee of the University faculty on Tuesday, March 4, 1931, deprived a freshman of all credits earned during the winter quarter for a confessed violation of the honor system in connection with one of his final examinations last quarter. It deprived a sophomore of all credits earned during the winter quarter and suspended him for the spring quarter for a confessed violation of the honor system in one of his final examinations for the last quarter. And it suspended another freshman for the spring quarter for a conviction of a similar offense over his denial.

Big Three Schools Taking Up Rugby

Rugby football will be included in the sports schedule of Yale, Princeton, and Harvard this spring. This trio together with the U. S. Marines of Philadelphia, and the New York Rugby football club, have formed a quintet of playing teams.

Last spring this group, with the exception of Princeton, played nine games, the U. S. Marines and Yale netting the most victories. In addition, Yale played the powerful Montreal club, twice champions of Quebec, to a tie. Princeton decided to take up the sport this year.

Followers of Rugby point out that each one of the fifteen players to a side has a chance to carry the ball, run with it, pass, kick, or tackle. It calls for all-round team play rather than the work of individual stars. It bears very little resemblance to soccer, or the standard American type of football.
