

DELEGATES WILL ATTEND ANNUAL CONGRESS TODAY

Federation Will Consider Plans for Closer Relations Between College Organizations.

The University delegation to the second annual congress of the North Carolina Student Federation, which convenes today at Duke university, met in the Carolina Inn Thursday night, and elected Jack Dungan chairman, and drew up a number of policies which they expect to present at today's gathering.

First among the appeals to be put before the congress is a suggestion that the work of the state student government association be put in closer contact with other state student organizations such as the intercollegiate press, state Y cabinet, and the North Carolina social service council.

Policies Considered

Another policy to be considered is that an attempt be made to get the athletic associations over the state to take up the matter of reciprocal athletic tickets.

The other two measures decided upon are: that the congress take steps to secure closer relations between men and women on the same campus, and that the congress convening today attempt to bring the federation closer to the camps of the state by allowing local student organizations to be represented in the congress, such as the Phi assembly and the Di senate. The local Phi assembly is being represented today by Bert Hayward.

Delegates Attending

Besides the five regular official delegates appointed by the University student council to attend the meeting at Duke, a number of unofficial delegates will be present. These are: William Medford, vice president of the University student union, Frank Hawley, treasurer of the Y, F. M. James, president of the University Y, Miss Gabrielle McColl, newly elected president of the Woman's Association, and Miss Mary W. Yarborough.

THREE DANCES TO CLOSE WEEK-END

The Phi Kappa Sigma fraternity gave their annual formal dance last night in the ballroom of the Carolina Inn with music by Jelly Leftwich and his university club orchestra from Duke. Girls from all over the state were present to add to the success of the affair.

Immediately following the dance, the fraternity was host to its numerous guests at a buffet supper at the Inn, and the merriment lasted into the night.

Also last night, the Woman's association presented its quarterly dance in Spencer hall. This dance marked the last one of the year for the feminine students. Jack Wardlaw and his Carolina Tar Heels furnished the music for the occasion.

Tonight Delta Tau Delta will give its annual formal dance from 9:00 to 12:00 in the Carolina Inn. Jelly Leftwich will play for this affair.

A second dance scheduled for tonight is the last of the series of eight given this year by the Order of the Grail. It will take place in the gym and begins at 9:00. Jack Wardlaw and his orchestra will play.

Professor Writes Book on Marriage

Professor E. R. Groves of the department of sociology has just finished a new book, "Sex and Marriage," which will go to press soon. It will be published by McCauley Publishing Co., of New York City, and will appear in August.

Professor Groves is also having published a new edition of "Personality and Social Adjustment" and a new and larger edition of "Introduction to Sociology." These books are in press at present and will be out shortly. Longmans-Green are the publishers.

INSURANCE FIRM TO OPEN SCHOOL

Connecticut Company Plans Two Week's Institute to Study Insurance Problems.

The Life Insurance Sales Bureau, of Hartford, Connecticut, an organization held by 144 life insurance companies in the United States, Canada, and foreign countries, is making preparations to open an agency building school here in Chapel Hill. This school, which is to run from June 15 through June 26, is the first of its kind to be started in the South. The other schools are Babson Institute, Babson Park, Massachusetts, and Northwestern University, Evanston, Illinois.

This school is sponsored by the extension division and the department of commerce with Morgan F. Vining in charge. All general agents, managers, supervisors, home office agency salesmen, and those whose work is of a supervisory nature, are eligible for the school. The instructors in the school will be members of the bureau staff with H. C. Kenaga, assistant manager, as director of the school and C. F. Davies and S. G. Dickinson as his helpers.

The course that will be offered will cover the chief problems that confront the manager and the general agent, which are recruiting, training, supervision, business management, and conservation of business.

Di and Phi Joint Meeting Postponed

The joint meeting of the Di society and the Phi assembly, which was scheduled to take place Tuesday night in the Phi hall, has been called off due to conflicting dates of the two societies. The regular meetings of both societies will take place separately at the usual time when it will be decided on what date the joint meeting will occur.

The bills to be discussed in the Di hall next week are: Resolved, That the Federal Farm Board's policy of selling wheat in Europe below the market price is not for the best interest of America, and Resolved, That the dissemination of birth control information through the registered clinics, to married persons only, is socially justifiable. The bills on the Phi calendar are: Resolved, That the Phi assembly go on record as favoring that students of the University of North Carolina be given credit toward graduation for athletic attainment. Resolved, That the Phi assembly go on record as favoring a system of education as adopted by the University of Chicago under President Hutchinson.

LIBRARY OBTAINS ORIENTAL BOOKS

Gift of Dr. Jacocks Includes Three Volumes of Palm-Leaf Manufacture.

Three palm leaf books have been presented to the University library by Dr. W. P. Jacocks, field director for the international health division of the Rockefeller foundation at Colombo, Ceylon. Dr. Jacocks, who was recently offered the position of head of the state health department, has previously donated ten other Ceylonese books to the library.

The three books just given to the library contain Indian sacred writings relative to the Buddhist religion. They are written in the Sinhalese language, which makes use of a curious alphabet known as Pali.

The books are about two to three feet in length and two inches in width, with the largest about four inches thick.

Writing on Palm Leaves

East Indian books are written on strips of palm leaves which are strung together on cords between unusual covers. One of the books just acquired has a cover of brass plate with silver filigree inlay. Another is lacquered in red and carries on the outside a series of classical Indian designs, while the inside of the cover is decorated with scenes illustrating the life of Buddha. The third has a very beautiful cover of solid ivory with an inlaid lacquer border.

These books are on display in the main lobby of the University library. In the case containing them is also an exhibit of Greek ostraka purchased in Egypt by Dr. W. E. Caldwell for the Hanes foundation. Ostraka are broken bits of pottery used

New Campus Structural Units Will Be Completed This Year

Work Is Progressing Rapidly on Graham Memorial, Patterson-Morehead Bell Tower, and Carr Building, and Plans for Final Dispositions Are About Complete.

Progress on Graham Memorial building, the Patterson-Morehead bell tower, and Carr building is going forward rapidly. The electric wiring throughout the student union is now finished and all the rooms on the second floor are completely plastered. The rough primary flooring has been nailed down in the rooms of the upper floor. Iron stairways leading to the upper rooms and basement have been set in place, but the railings and stone steps have not yet been added.

Basement Finished

Masons have recently completed laying the limestone blocks which are to constitute the pavement for the floor of the portico. The basement of the building is practically finished except for fixtures and furniture. The floor of the main room of the basement is paved with red tiles, which lend a good deal of color to the otherwise barren room, and the basement corridor has red cement for the flooring.

The interior decorators and men who are to install the electrical fixtures will soon take charge of the edifice and add the last touches.

Memorial Begun in 1924

Work on the Graham Memorial was begun in 1924, but due to lack of money it was not able to be completed until this

TAYLOR SOCIETY HEARS HALLETT

General Manager of Kendell Mills Discusses Scientific Maintenance of Factories.

H. K. Hallett, general manager of Kendell mills, in a talk before the student branch of the Taylor society Thursday night on the subject of "Scientific Plant Maintenance," stated that "maintenance is founded on prevention instead of cure." Mr. Hallett has made a success as general manager of the Kendell Mills because he has always tried to prevent rather than to cure unrest among his employees.

Regular Inspection Planned

The speaker discussed the topic of plant maintenance from the standpoint of machinery, belting, electrical equipment, painting, and fire prevention. In turn, each of these topics were discussed in detail, and the most important feature of a maintenance plan was brought out to be inspection. At regular intervals everything that comes under each of the above mentioned items is inspected and the findings recorded in a permanent file. From an observation of these files systematic repair periods are determined.

When the Kendell chain was taken over, it was bankrupt and in such a dilapidated condition that it seemed almost hopeless, but the scientific method of maintenance was instituted and the organization was built up until now it is one of the most efficient in the South. Even in these bad times, when most mills are running only about half time, these mills that are managed by Mr. Hallett are running full time and a ready market is found for the finished articles.

Sigma Xi Society Will Meet May 26

The last meeting of the N. C. chapter of the Sigma Xi society for this season will take place at the Carolina Inn on Tuesday evening, May 26.

At this time Dr. O. Stuhlman will deliver his retiring presidential address on the subject, "What Lies Beyond the Axioms of the Rational Sciences." New officers will also be inducted at the meeting and there will be an initiation of new members.

Nomination for membership to the Sigma Xi society are now in order. For eligibility to full membership, the nominee must have had published at least one paper in a research journal.

LAST OF ORGAN CONCERTS TO BE GIVEN SUNDAY

Professor Nelson Kennedy to Play Sixth Vesper Series at 4:45.

The sixth and last concert on the vesper series to be given by Professor Nelson O. Kennedy will be presented tomorrow afternoon at 4:45.

Three guest concerts have been presented by prominent musicians of the state: the first by Professor Frederick Stanley Smith, dean of music at Lenoir-Rhyne college, Hickory; the second by Professor George M. Thompson, head of the organ department at N. C. C. W., Greensboro, and the third by Professor Isaac L. Battin, head of the department of music at Meredith college, Raleigh. The organ has been heard in numerous other concerts, the first of which was the performance of "The Messiah" in December, by the Chapel Hill community chorus. Many musicians of note have visited the music building while passing through Chapel Hill, and have expressed their admiration for the organ.

Beginning with the concert on November 23, Professor Kennedy has played concerts on the vesper series during each month except December. It is estimated that exclusive of the three capacity audiences which attended the dedication of the organ by Edward Eigenschen in November, more than 3,000 people have listened to Professor Kennedy's playing since the series opened. The success which has attended this series encourages the department of music to announce that during the next school year, beginning with the first Sunday in October, this series will be continued. It was originally planned to bring eight prominent musicians to the University. For various

CLASSICS PROFESSORS TO SEE GREEK DRAMA

J. M. Saunders, George Howe and G. A. Harrer, professors of the classics department, will journey to Lynchburg, Virginia, today to see the annual Greek drama, presented by the Greek classes of Randolph-Macon college.

The play this year, *Antigone* of Sophocles, will be given in the Outdoor Theatre, and is presented in the original Greek. Randolph-Macon is one of the very few colleges that will produce a Greek drama every year, a custom that was prevalent in all the large colleges a half century ago.

FEE NEEDED FOR MAINTENANCE OF STUDENT CENTER

Student Body Will Voice Opinion on Quarterly \$1 Fee.

At a banquet of the Student Activities committee Thursday night at the Carolina Inn, a definite proposal for student organization and maintenance of the Graham Memorial building as a student activities union was agreed upon. This was the final step in formulating the future of the building. This proposition, which was decided only after a lengthy and heated discussion in which all those present took an active part, is to be presented to the student body of the University for its decision.

Student Union Fee

The vote on the proposal is to be taken before commencement, and all students of the University will vote together. It embodies the levying of a one dollar per quarter student union fee upon each student of the University, which fee is to be collected by the business office and turned over to the committee of administration of the student union. Therefore, the change means that each student will pay twelve dollars for the use of the building during his four years. This three dollar assessment each year on every student would, figuring on an active student body of 2000, amount to at least \$6000 a year. Mr. C. T. Woollen informed the committee that it will take this amount to run the building for a year.

Mr. Woollen justified this amount by saying that the state would not furnish heat, light, or upkeep for the building. These three items themselves will amount to \$3000 all told and the remaining \$3000 is to be used in equipping the building and maintenance. There are plans for placing a cafeteria in the union which of course would necessitate the buying of the essential equipment.

The committee at the banquet seemed heartily in favor of the cafeteria. There was some discussion however of placing a bowling alley in the basement. In addition to these expenses, will be the salary of a professor

SLADE TO JOIN RUTGERS FACULTY

J. J. Slade, instructor in mechanics and descriptive geometry in the engineering department, will leave here to teach in Rutgers university, New Brunswick, New Jersey, starting in the fall.

Dean P. H. Daggett, formerly head of the department of electrical engineering here and at present acting in that capacity at Rutgers, offered the position of instructor in mechanics to Slade.

Slade received his S.B. degree here in 1929 and a year later his M.S. degree. Before coming to Carolina, he received three years of undergraduate instruction at Cornell university and one year at Tulane.

During 1924-1927 he did work in Mexico, and was employed for a time by the government there as an engineer, and later as a contractor for a lumbering company. He will return to Mexico this summer to finish writing a novel that he has been working on for some time.
