#### **Program Today**

The group will meet again at 10:00 o'clock this morning in the lounge room of Graham meof the various committees and afterwards a general meeting of the entire group. Following a formal dinner at the Carolina Inn tonight, the delegates will be entertained at a special performance of the Carolina Playmakers.

He stated that there were few dormitories in proportion to the size of the university, and that about forty per cent of the students live in fraternity or sorority houses. President Chase compared the fraternity houses of the University of Illinois with small-sized hotels. He made the remark that the chapters there had "become great housing and feeding systems."

## LIBRARY EXHIBITS HISTORICAL BOOKS

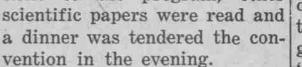

Hanes Collection Contains Early North Carolina Maps, Bindings, Autographs and Incunabula.

Three separate exhibitions of cases containing historical materials of unusual value have been opened on the first floor of the library building.

One displays early North Carolina material, consisting of old maps of the state, the first book printed in the state, broadside catalogue of the University of North Carolina for 1820, and a number of volumes published in or about the state prior to 1800.

The second consists of books and autographs of American Transcendentalists, from the collection of Professor Raymond Adams. There are first editions of R. W. Emerson, A. Bronson Alcott, William E. Channings, H. D. Thorean, James Russell Lowell, and others of the famous Concord group who played such an important part in the history of American literature.

The third exhibition is of incunabula, books printed prior to 1500. The most interesting item in this collection is the Nuremberg Chronicle, one of the first illustrated books. There are also a book of hours and examples of early binding and book deco-

**Engineers** Seek **Knowledge** Far Into The Night Phillips Hall Hardly Ever Sleeps as Students Struggle Over Their Work.

It would appear that freshman mathematics students are not the only members of the University who are obliged to tussle with their subjects far into the night. The seniors in the school of these famous characters is of engineering are doing the same thing, only in a less covert manner. Every night of the

week, including Sunday, people are astonished to see the lower floor of Phillips hall illuminated. They are more surprised to see rows of figures hunched over drawing boards, or text-books, at an hour when the rest of the student body is cozily reflecting upon the joys of collegiana. -

- These eye-opening gentlemen are frequently seniors in the departments of mechanical and electrical engineering. Their work is such that it can be done only in the laboratories. Hence, romantic evenings find them writing engineering reports, preparing the intricacies of tomorrow's lesson, or catching up with

those of today. The building is never locked and it is rumored that the lights are not switched off until the rest of the University slumbers in total ignorance of all these Spartan labors.

People tell of the time when Dean H. G. Baity chanced to meet an engineering senior whistling at the early hour of 11:00 p.m. The student, upon viewing the dean, realized the breach he had committed and
