## Phi Beta Kappa Is Scholastic Goal Of Thousands Of College Students

Local Chapter, Alpha of North Carolina, Grew Out of University Scholastic Society Alpha Theta Phi; Organization Chartered Was Granted in 1904.

As the highest reward for excellent scholarship on the campus, for almost thirty years Phi Beta Kappa has been the scholastic goal of thousands of University students. The local chapter, which is the Alpha Chapter of North Carolina, grew out of the University scholastic society Alpha Theta Phi. In 1904 this organization was granted a charter by Phi Beta Kappa.

Ten years earlier Dr. Herbert Cushing Tolman, professor of Sanskrit and Greek at the University, called together all juniors and seniors who had an average of 2, the grade which corresponds to the present B. They organized into an honorary society, Alpha Theta Phi, the object of which was "to stimulate and increase a desire for sound scholarship." In its routine the society resembled Phi Beta Kappa, for there were few meetings except initiations. The main contribution of Alpha Theta Phi was to furnish a tangible incentive to study.

### Chartered in 1904

Beta chapter of Alpha Theta Phi was established soon afterwards at Vanderbilt University, but several other requests for charters were refused. From its inception the society tried to secure a charter from Phi Beta Kappa, and in the fall of 1904 it was obtained. The University chapter was the second in the south, Vanderbilt having been granted one in 1901.

## LIBRARY MEETING IS ADDRESSED BY GUELDA ELLIOTT

University Commerce Librarian Is Speaker at Conference Of Library Association.

"Because of the great expansion that has taken place in the social sciences during the last half-century, many changes have come about in methods of instruction, and now emphasis is placed on the use of periodical literature rather than books," declared Guelda H. Elliott, commerce librarian of the University, at a meeting of the periodicals section of the American Library Association, held in New Orleans yesterday, as part of the association's fifty-fourth annual conference.

Miss Elliott's subject was "The Use of Business Periodicals in the College Library," and her conclusions were based on data from twenty-one universities and colleges.

"Commerce librarians," she said, "find the satisfactory features of business magazines to be the brevity of the articles, the statistical summaries, the accessibility of the information through indexes, the bibliographical information, increasingly interesting formats, the ready availability of results of research and the authoritative information made available through research."
