

HENDERSON LAUDS ABILITY OF SHAW AS PAMPHLETEER

Playwright's Biographer Gives Lecture Illustrated With Lantern Slides.

Friday night at the library, Dr. Archibald Henderson lectured on George Bernard Shaw, great comic dramatist, wit and man of letters. Dr. Henderson possesses the most exhaustive collection of Shaviana in existence, and has just completed the authorized, definitive biography of Shaw.

The lecture was copiously illustrated with lantern slides of first editions, playbills, personal photographs, pamphlets, and correspondence from Dr. Henderson's most valuable collection. The speaker was introduced briefly by Miss Beust, of the staff of the library school.

Early Fabian Connection
The lecture opened, after a few introductory remarks, with a discussion of the Fabian Society, a Socialist organization with which Shaw was connected early in his career, and whose chief interest lay in attacking the distinction between classes, that is, as Shaw phrased it, the difference between those with large appetites and no dinners, and those with large dinners and no appetites.

It was while Shaw was actively connected with the Fabian Society that he met Walter Crane, also an active member, one of the most celebrated artists of his day and who was later to make the designs for the fly-leaves of many of Shaw's books, and who did the same type of work for the innumerable English periodicals in which Shaw's work appeared.

Political Essays
His essays on the political situation, as published by the Fabian Society, are not what Shaw's reputation, as established later, might lead us to believe. They are neither funny or witty, but comprehensive studies of such questions and institutions

Numerous Local Authors Have Manuscripts Ready For Press

Paul Green's Book Published; Dr. Henderson, Judge Winston, Thomas Wolfe, Phillips Russell, Dr. Ericson, and Dr. Bond Have Writings to Be Printed Soon.

The usual fall publishing splurge is marked this year by an unprecedented number of books written by members of the University faculty or alumni. Virtually all of the noted current writers who bear strong Chapel Hill influences, are issuing works this autumn.

Paul Green has already published his first novel, *The Laughing Pioneer*, which deals with changing social conditions in the new South, a land and atmosphere to which Green brought a literary significance. Of this novel, the *New York Times* remarked that much of the author's excellent dramatic technique had been skillfully applied to his first attempt at fiction. For the last six months Green has been quite active in preparing scenarios for Warner Brothers and Fox Film company.

New Shaw Biography
Having become interested in George Bernard Shaw over a quarter of a century ago, Archibald Henderson, head of the University mathematics depart-

House Begins Week's Assembly Program

The assembly program for this week will include speeches by members of the faculty and student body.

R. B. House will address the freshman and sophomore classes Monday at assembly period. Tuesday Dan Kelly, speaker of the Philanthropic Assembly, and Charles G. Rose, president of the Dialectic Senate, will speak to the incoming students on the activities of the two societies. Wednesday the freshmen meet with their deans. Thursday, English Bagby of the psychology department will talk to the freshmen on methods of study. Friday the sophomores and freshmen will hear Dr. R. D. W. Connor, head of the department of history. Dr. Connor has just returned from an extensive trip to Europe.

SALON ORCHESTRA WILL PLAY OUTDOOR CONCERT

The Carolina Salon Orchestra, under the direction of Thor Johnson, will present a concert in the Forest theatre, Sunday afternoon, October 16. This will be the first time in its history that the open air theatre will have a musical program as its major attraction.

The Carolina Salon Orchestra is composed of about twenty of the University students and was organized last year under the leadership of Johnson. They have given several concerts here in Chapel Hill and in other cities throughout the state and have received considerable recognition.

Taylor Society Meetings Begin After Christmas

Owing to the absence of Dr. D. C. Schwenning, the Taylor Society will conduct no meetings until after Christmas. Schwenning is in Geneva on University leave, where he is collecting material for a book on dismissal wages, as they apply to the different countries. In addition to doing research in the libraries of Geneva, he is also traveling in Germany collecting information on the subject.

HIGH PERCENTAGE OF FRESHMEN ARE CHURCH MEMBERS

Protestants Show Strength With Methodists Leading in Membership.

Methodists lead the denominational representation in the freshman class at the University of North Carolina this year, according to a church census taken by the University Y. M. C. A. during registration.

The report shows that every member of the class indicates some religious preference and that more than eight of every ten freshmen are already members of some church.

Methodists Lead

The Methodists, who are represented by 175 first-year students, are followed by the Baptists with 127, Presbyterians with 100, Episcopalians with 100, Hebrews with thirty, Catholics with twenty-one, Congregationalists with seventeen, Reformed with ten, Unitarian with three, and Christian Science with two.

Among the group are nine sons of ministers and six candidates for the ministry, one of whom plans to be a foreign missionary.

The census from which these facts are obtained is made each year during registration. The church directory cards are immediately sorted by denominations and are put in the hands of the various ministers of the community. This paves the way for the ministers to get acquainted with the new men at the church receptions that are held at the beginning of each year.

RECORDER'S COURT FINES 7 STUDENTS CAUGHT BUMMING

Judge Henshaw Lightens Penalty on Plea of Ignorance of Penalty by Culprits.

Seven Carolina students from the freshman and sophomore classes, charged with soliciting rides while standing in a public highway, were brought before Judge C. P. Henshaw in recorder's court Friday night.

W. D. Lowder, H. W. Thompson, J. T. Darkis, C. C. Wagner, L. W. Wilson, R. Hymer, and J. C. Shell, the accused students, admitted guilt but protested ignorance of the local ordinance concerning "bumming." The ordinance in Chapel Hill, it was stated, does not prohibit soliciting rides from the curb but applies only when the offender is standing in the highway.

Since the guilty students were not familiar with the law, Judge Henshaw suspended judgment upon payment of one-seventh of the costs, \$2.11 by each student.

Another case on the docket for Friday night, in which Jesse King was charged with assault and battery upon John T. Johnson, trial was set for Saturday, October 8.

The case of James Hargraves, colored, charged with possession of intoxicating whiskey, was called, but the defendant failed to appear.

President Frank Graham will be the principal speaker at the N. C. C. W. Founders' Day exercises in Aycock auditorium, October 5.

ROTARY GOVERNOR ADDRESSES LOCAL CLUB ON RELIEF

Governor Phillips Exhorts Chapel Hill Rotarians to Continue Efforts for Poor Relief.

Now as never before Rotary has the opportunity to render worthwhile community service, Charles W. Phillips of Greensboro, Rotary governor for the fifty-seventh district, asserted in an address here this week at the regular meeting of the Chapel Hill Rotary club.

It was Governor Phillips' official visit to the club, and he was greeted by a 100 per cent attendance. He was accompanied by Mrs. Phillips who also was a guest at the meeting.

"There was a time when Rotary was a selfish organization, when men were even known to lose their membership because they refused to patronize a fellow Rotarian, but that day has long been past," Governor Phillips declared.

"Rotary today stands for fellowship and service—recreation through fellowship and community improvement and development through service."

Outlines New Program

Governor Phillips then went to cite numerous instances of how Rotary clubs could render their communities invaluable service. He told of one club that had been holding foodless meetings since July and had been donating to a needy community cause the money that would have gone to pay for these meals.

Rotary's program for this year, he said, "is to hold on to"

DANCE COMMITTEE WILL MAKE PLANS FOR COMING YEAR

New Dance Regulating Body to Meet in Graham Memorial Tonight at 8:00 O'clock.

Rules for this year's dances and the question as to whether freshmen will be allowed to attend the finals will be discussed tomorrow night when members of the University dance committee meet at 8:00 o'clock in Graham Memorial to make plans for the dances of the coming year.

Committee Is Representative

The committee is composed of men who represent several organizations on the campus and who last year were appointed to this committee, which acts in the same capacity as the former German club committee. These men are: Lenoir Wright, Gene Webb, and Charles Woolen, German club; John Manning and Bill McKee, the Grail; Arlindo Cate, senior class; John Leake, junior class; Frank Kenan, sophomore class; George Killinger, graduate school; Irvin Boyle, interfraternity council; Milton Barber, hold-over member.

This dance organization was organized last year to assure the University of a representative group to control social activities. Representatives on the body are three members of the German club, two members of the Grail, a member each from the sophomore, junior and senior classes, a member from the graduate school, a member of the interfraternity council, and a member from the former committee.

'Y' Shortens Meetings Because Of Rushing

The three Y. M. C. A. cabinets will convene Monday night at 7:15 in their second meeting of the year.

The Freshman Friendship Council will have its meeting cut short on account of rushing season, and there will be only a short business meeting.

All first year men who have not yet joined the freshman "Y" group are invited to come to Monday night's gathering and become members of the council.

Sophomore and senior cabinet meetings will also be curtailed on account of fraternity activities.

KOCH OPENS DRAMATIC YEAR TOMORROW NIGHT

Professor F. H. Koch will inaugurate the dramatic activities of the fall quarter tomorrow night with an illustrated lecture, "Our Adventures in Playmaking," in the Playmakers theatre at 7:30 o'clock.

One hundred stereopticon slides will be used to show scenes from Paul Green's early plays, from Thomas Wolfe's first play, from The Forest Theatre productions, and from the Playmaker's tour from Georgia to Massachusetts with the "Show-Bus."

All those interested in dramatics are urged to remain after the lecture and talk to Professor Koch.

GAME ROOM TAKES IN ABOUT \$84 PER WEEK

The pool and ping-pong tables in the game room of Graham Memorial bring in an average of \$12.00 to \$15.00 per day to the management. Of the eleven different games, among which are shuffle-board, cards, checkers, chess, target darts, and pool table billiards, that are available to the student body, only ping-pong and pool have a charge placed on them. When the two bowling alleys are opened, they will probably be placed upon the charge list at about the same rate as pool.

Sedgwick Says So-Called 'Article' Most Acceptable Type Of Writing

Editor of "Atlantic Monthly" Says New Authors Have Every Chance in the World for Their Works to Appear in the Best Publications Because New Authors Sought.

"Aspiring young authors have every chance in the world of having their work appear in the better publications," said Ellery Sedgwick, editor of the *Atlantic Monthly*, in a recent interview with a representative of THE DAILY TAR HEEL. Editors are always eager for new viewpoints and the outlook held by the rising generation, he believes. The intelligent magazine cannot afford to ignore the efforts of men whose reputations are yet to be made.

To Sedgwick the most acceptable type of writing is the so-called "article," as distinguished from the literary essay or fiction. In his opinion, it is most important that the author have a definite social point of view. "Anything which is fresh, stimulating, and controversial has an excellent chance to be published," he stated.

All Fields Open

Although the sociological work interests him more than any other type, he insists that there is no field of literary endeavor closed to rising writers. He in-

GRADUATES FROM EDUCATION SCHOOL IN GREAT DEMAND

Enrollment in School of Education Increases Despite Impending Change to N. C. C. W.

With a total enrollment of 336, the school of education has four more students than were enrolled last fall term. This increase is in the junior and senior classes, the freshman group being exactly the same as that of last year and the sophomore enrollment showing a slight decrease.

There is a larger number of transfer students than last year, both from other schools on the campus and from other colleges and universities. There is, also, a larger number of girls in the enrollment this fall than ever before.

Increase Unexplained

Despite the fact that the plan for the consolidation of the three major state-owned institutions of learning into one greater university contemplates the removal of the elementary division of the school of education here to N. C. C. W., that division numbers more students this year than last. Indeed, several girls in the freshman and sophomore classes have indicated a desire to enter that division.

Last year, in the fall, there were seventeen students in the elementary division, all juniors and seniors. This term, there are twenty-five students—seven of them being freshmen and sophomores from town or nearby territory. As soon as the shorter-term schools close in the spring, this number will be increased by teachers now in service, the total number of candidates probably being destined to reach fifty before the collegiate year comes to a close.

Elementary Division Grows

Since the establishment of the elementary division, in 1927, there have been twenty-eight graduates in this field. In 1929,
