

RELATIONS GROUP WILL BE SELECTED

Committee in Charge of Institute on Human Relations to Be Chosen Tomorrow.

At the regular meeting of the junior-senior Y. M. C. A., cabinets tomorrow night, a committee will be selected which will have charge of the forthcoming Institute on Human Relations.

This Institute meets every four years, and is for the purpose of bettering social life. It also brings many famous speakers from all parts of the country and abroad to Chapel Hill.

This will be the third quadrennial institute that has taken place in Chapel Hill, the tentative date being shortly after the opening of the spring quarter of 1935.

The institute will be conducted by 12 students and six faculty members. The chief work before the Y. M. C. A., cabinet is now to select the most socially minded faculty members and students who will take part in this work.

Organized by Y

The Human Relations Institute was organized by the Y. M. C. A. cabinets, and always had the full cooperation of all of the leading student organizations on the campus. In 1931, the senior class appropriated \$500 to help carry on the work of the institute for that year. The entire budget for that year was over \$2300, which was raised by the generous contributions of the Phelps-Stokes foundation, the Weil Lecture committee, the Y. M. C. A., the senior class, and several contributions of individual alumni.

On this budget of \$2300, the committee brought for 17 days 19 prominent speakers to Chapel Hill, including one from England. The committee this year hopes to obtain some foundation to appropriate the full amount of the budget.

Village Outline

The general outline of Couch's idea of a farm village may be gathered from an article which appeared in the Nashville press after he had spoken there the latter part of the past week. The article reads: "The proposal advanced by Mr. Couch calls for collection of small farmers into settlements of from one to three hundred people for cultivation of the surrounding countryside.

"The villages are to be constructed by some social planning group such as the Tennessee Valley Authority, and equipped with all the conveniences that are now available to inhabitants of cities of more than 3,000 population. The settlement will center about a community building where motion pictures, plays, folk dances, community singings, and other entertainments can be held. It will contain a barber shop, shoe repair shop, stores, and all other such business establishments as are necessary to supply demands of the immediate community.

Give Farmer Independence

"The project is merely the application of social planning of rural life," Couch explained. The purpose is "to eliminate the pressure of our money and industrial economy and to give to the farmer a real independence that he has not known heretofore."

The publisher is intent upon banishing the isolation and dis-
