

Relations Institute Personalities

Sanford Bates

Sanford Bates, director of the bureau of prisons of the United States and man-with-his-hand-in-most-everything-in-Washington, will address the Human Relations Institute Tuesday morning, April 2.

Lawyer, Bostonian, lecturer, legislator, and club member, Bates has had an outstanding career in national affairs. Over 50 years of age, the New Englander has headed many penal institutions and commissions.

Bates became superintendent of federal prisons in 1929 and was appointed director of the bureau of prisons in 1930. In 1932 he was made commissioner of the international prison commission.

London Delegate

Director of the American Unitarian Association, he was the official delegate of the United States to the international prison congress in London in 1925, Prague, 1930, and he acted as vice-president of the congress, 1930-31.

Bates's club connections extend from national bar associations to various social clubs in Washington, Boston and other American cities. Last year the prison caretaker listed memberships in the Boston City Club, Lincoln Club, Roosevelt Club in Boston, the Monday Evening Club, Congressional Country Club in Washington, the Waban Neighborhood Club, and the Al-bemarle Golf Club.

Daughter Of '35 Graduate Inquires About Exercises

In June, 1835, James Hill Hutchens of New Bern was graduated from the University of North Carolina; and in June, 1935, his daughter, Mrs. Fannie V. Randolph of Austin, Texas, may attend the 100th anniversary in Chapel Hill of her father's graduation.

All this, and more, was learned from a letter sent to President Graham by Mrs. Randolph, asking the date of the University commencement this year. The father of Mrs. Randolph moved overland with his family and slaves to Texas in 1849; and Mrs. Randolph, the child of his old age, was born there soon after the Civil War.

This long-ago graduate of the University lived until the age of eighty, and until his death he "spoke Greek and Latin fluently," for, as his daughter says in her letter, "he was beautifully educated." This should be inspiration for Carolina students of today who have difficulty with "amo, amare, . . ." and "alpha, beta, gamma."

Summer School Exhibit

An exhibit of the work done during the summer session at the three divisions of the consolidated University will be shown at the meeting of the North Carolina Education Association March 28, 29, and 30 at Winston-Salem.

Miss Glenn McLeod, secretary of the summer session will be in charge of the exhibit.

OLD-TIME SPIRITUAL SINGERS

The widely-known quartet from Hampton Institute for Negroes, Va., who will offer students tonight a brief relaxation from boning for examinations with rhythmic confessions of that old-time religion.

Particularly this quartet is distinguished because it includes, Mr. Comer says, "the deepest bass in the world."

Infirmiry List

The following students were confined in the infirmiry yesterday: Leighton Dudley, G. W. Matthews, Therman Ennis, Harry McMullan, A. C. Walters, C. C. Bennett, Jack Beverly, and James Montgomery.

Condition Exams

Students who have conditions to be removed by special examinations must make application for these examinations at room 8 South building before taking them.

 June 17: Vermont at Burlington.

Pahlow to Speak

Members of the history and government department faculties will be addressed in 313 Saunders at 7:30 tonight by E. W. Pahlow, a professor in Ohio State University, who is at present on a leave of absence aid is residing in Chapel Hill.

Pahlow is the author of several textbooks of high school history.

The subject of his address will be "The Teaching of History in College."

SCIENCE SOCIETY TONIGHT

The 359th meeting of the Elisha Mitchell Scientific Society will be held tonight at 7:30 o'clock in 206 Phillips hall.

Dr. W. C. Coker of the department of botany will address the society on the subject, "Parasitic Flowering Plants in North Carolina," and Professor T. F. Hickerson of the school of engineering will speak on "Four Solutions of a Railroad Bent Problem."

University Fund Cut

Allotment Slashed \$82,000 by Appropriations Committee.

Raleigh, March 11.—(UP)—The appropriations committee this afternoon voted to lower the University allotment by \$82,000, but still retains the 25 per cent salary increase.

With revenue and supply bills scheduled to reach the floor not later than Wednesday, the General Assembly returned to Raleigh today, resigned to many weeks of grinding labor.

SPRING ENROLLING CLOSES SATURDAY

Underclassmen Who Failed Last Fall Register March 25.

Registration for all students except those freshmen and sophomores who did not pass all their work during the fall quarter will take place this week through Saturday.

Having first obtained permit cards in room eight in the basement of South building, students begin the registration procedure by going to the offices of their deans to have their schedules made out. Juniors and seniors in the liberal arts college must present guide schedules approved by their major heads.

Their schedules made out, registrants go to room eight to obtain class tickets and have their bills made. Bills are payable the first week after the holidays.

Freshmen and sophomores not eligible to register before the holidays and new students will register March 25 in the same manner.

Regular classes begin March 26 at 8:30 a. m.

SOUTH TO FORM PHYSICS SOCIETY

Plans Progressing for Meeting of Southern Physical Society.

Plans are progressing for a meeting of the Southern Physical Society, new organization made up of leading physicists from the 12 southern states.

The initial stages for the organization have been carried on by Charles W. Edwards of Duke University and Dr. A. E. Ruark of Carolina. The meeting will be in Atlanta March 23. Arrangements are being made by the physics departments of Emory University, the Georgia Institute of Technology, and the University of Georgia.

Many physicists of the southern states do not find it convenient to attend meetings of the American Physical Society because of the great distance to the cities in which meetings are customarily held.

WE ASKED LEADERS IN WINTER SPORTS:

"Is this fact important to you?"

"Camels are made from finer, more expensive tobaccos - Turkish and Domestic - than any other popular brand."

(Signed) R. J. REYNOLDS TOBACCO COMPANY

Winston-Salem, North Carolina

FLAVOR! Jack Shea, Olympic Speed Skater: "Camels taste so good that with me Camels get the nod every time. When people mention my being a cigarette smoker, I correct them and say, 'I'm a Camel smoker.'"

ENERGY! "Camel's energizing effect" is a great thing for one who is active," says Paul Thompson, of the world-champion Chicago Black Hawks hockey team. "When tired, there's one thing I want—Camel!"

HEALTHY NERVES! Says Ray Stevens, North American Bob-Sled Champion: "When the last heat has been run, I light a Camel and enjoy it to the full, knowing that Camels never bother my nerves!"

MILDNESS! Betty Chase, expert skater, says: "Camels are so mild and appealing! And smoking Camels steadily never tells on my nerves. To me, it's a very important fact that Camels use finer tobaccos."

VALUE! "I'm just an interested winter sports fan," says Edward Kent. "But I'm with Jack Shea and Ray Stevens when it comes to smoking Camels! I get a lift with a Camel when I'm low and need cheering up, or when I'm tired. And the fact that tobaccos of a choicer quality are used in Camels goes far to explain why Camels are so mild and pleasing, and never jangle my nerves. It means a lot to me that millions more are spent for the tobaccos used in Camels."
