

## WARBASSE URGES PRODUCTION CUT

Former Surgeon Will Speak in Gerrard Hall at 7:30 on Socialized Medicine.

"The trouble with the world today is due to laying emphasis on production and neglecting the consumers," declared Dr. J. B. Warbasse of New York, president of the Co-operative League of the United States and a member of the executive committee of the International Co-operative Alliance and of the Consumers' Board of NRA, in an address at the University last night.

Dr. Warbasse was scheduled to appear on the Human Relations Institute program but was unable to fill his engagement. He will speak in Gerrard hall again tonight at 7:30 o'clock.

**Over Production**  
"Production has been carried to a high point of development in the interest of getting money, wages, and profit," he said. "The neglect of consumers' interests has resulted in an impasse at which the consumer is unable to purchase, a case of one fifth of the population, even the necessities of life.

"To meet the crisis in our economic organization, the government in its various departments is going into business and taking into its own hands more economic functions of society. This tendency towards the socialization of industry is expanding throughout the world and it is not sparing our country," Dr. Warbasse declared.

### Signs of Fascism

"At the same time," he continued, "in many countries fascism is developing and some initial stages are seen in the United States. The collapse of the prevalent economic profit system is seen in the co-operative method of produce and distribution. Co-operation represents expansion into the whose of society of simple and friendly functions once performed within the family where people produced for their own consumption."

### Table Tennis

(Continued from page three)

Kid brother Len exceeded expectations as Len, bringing to bear all his skill, tried in vain to upset his big brother. It was a brilliant battle from start to finish and at several junctures it appeared as though the local boy would make good.

The volleys were excellent as both players brought offensive and defensive shots into play in their mad attempt to settle the family squabble. The scores were 21-12, 20-22, 21-18.

More thrills are in store for the gallery tonight with a novelty doubles match, a school championship between Len Rubin and Doug Cartland, and another trick serve exhibition.

Tonight's table tennis program starting at 8:45 follows:

- Abe Berenbaum vs. Chet Wells.
- Rudy Rubin vs. Len Rubin.
- Berenbaum-Rubin vs. Wells-Bacon.
- Len Rubin vs. Doug Cartland for school championship.
- Berenbaum vs. Bacon.
- Trick serves exhibition and novelty match.

### Frosh Baseball

(Continued from page three)

Frankie Grubb led the Carolina team with four singles in four trips to the plate. Hawkins, Tutor, and Wirtz shared batting honors for the visitors, each collecting two hits. The frosh, although collecting 11 hits, were weak in the pinches, leaving 12 mates stranded on the sacks.

### Alumni Director

Felix A. Grisette, recently elected president of the American Alumni Council, a national organization made up of alumni secretaries, magazine editors, and fund directors.

### FESTIVAL TO HAVE OIL ARTS EXHIBIT

Southern Art Projects to Sponsor Display April 26, 27, 28.

An exhibition of oil paintings by leading contemporary American artists will be on display in the Hill Music hall here April 26, 27, 28, under the auspices of the Southern Art Projects of which President Graham is chairman. The exhibit will be a feature of the Dogwood Festival.

Of especial note in the collection will be a marine painting by Frederick Gadd Waugh, presented to the University of North Carolina by Mrs. Katherine Pendleton Arrington.

The exhibition will be open Friday, April 26, from 10 a. m. until 6 p. m.; Saturday from 10 until 10, and Sunday from 1:30 until 5:30 o'clock.

The paintings were lent by the Macbeth Gallery of New York. The exhibit will include "Tinting the Sail," by George Elmer Browne; "Peonies," by Hattie E. Burdette; "Morning Haze," by John F. Carlson; "Springtime," by Charles H. Davis; "Evening on the Farm," by Charles Warren Eaton; "Morning," by John F. Ensor; "Sunday Morning," by Eugene Higgins; "Winter Afternoon," by Minor S. Jameson.

"Auburn Hair," by Mathilde M. Leisenring; "Park Avenue," by Hayley Lever; "Windmill by Moonlight," by Albert Lucas; "Head of Tosca," by Ivan G. Olinsky; "The New Day," by Roger M. Rittase, and a marine painting by Frederick Gadd Waugh.

### Track

(Continued from page three)

additional "dope" in relation to their own squad, and it would not be surprising to see some changes in tomorrow's lineup.

In the recent practice meet between the varsity and freshmen squads, many of the men showed considerable worth in events other than which they had been competing or practicing.

### CLUB BEGINS REHEARSALS

The Chapel Hill Choral Club recently began its rehearsals for the selection to be rendered at commencement this June. These rehearsals will be held Monday evening of every week.

### Infirmiry List

The following students were confined to the infirmiry yesterday: Robert Van Sleen, O. R. Yeager, W. L. Farthing, Murray Honeycutt, R. A. Miller, Allan Knott, J. F. Blue, A. N. Norman, Emmaline Henderson, Louise Woodard, Lester Kamer, D. T. Taff, W. T. McGowan, and B. V. Fowler.

## Booklet Written By Dean Pierson Shows Work Of Graduate School

Convincing testimony that the University of North Carolina, through its graduate school, is doing for the state just what consulting experts in any great business organization do for private business is offered in the annual report of "Research in Progress," a 130-page booklet in which Graduate School Dean Whatley W. Pierson summarizes projects wholly or partially completed during the year.

The report shows that faculty members and graduate students in more than 20 different departments are devoting a considerable portion of their spare time to digging up and ferreting out facts which have a direct bearing on life in North Carolina—information which has immediate and practical application to the solution to many of the state's everyday problems.

### Results Available

The results of these projects are printed annually in bulletins which are placed in the University Library and thus made available to the public through the extension library.

The booklet shows there are a variety of projects on which research workers are busy collecting facts at Chapel Hill.

In the botany department Drs. W. C. Coker and H. R. Totten have recently brought out a valuable volume describing the trees of the southeastern states. They are at present working on another edition which will cover Tennessee, Kentucky, and West Virginia.

### Chemistry Research

The department of chemistry has a great deal of research under way. Dr. H. D. Crockford is continuing his summer studies on the lead-sulphuric acid storage cell for the United States Naval Research Laboratory. Dr. A. McLaren White is continuing the study of "agitation and mixing."

Dr. J. P. Harland of the department of classics has in preparation a volume on prehistoric excavations.

Of particular significance in the department of economics and commerce is Dr. E. W. Zimmerman's volume on "World Resources and Industries" which won the Mayflower Cup award.

Among numerous important projects in the department of education is a study of recent tendencies and current problems in the curriculum of the American college, with reference especially to North Carolina, by Dr. Edgar W. Knight.

### Hickerson Writes Book

A new method for analyzing the bending stresses in buildings, bridges, bents, culverts, viaducts, and other framed structures is revealed in a recent volume by Professor T. Felix Hickerson of the school of engineering. The book contains numerous illustrative drawings and examples and 69 pages of original tables. Many new technical features are involved in Professor Hickerson's method, which has attracted wide attention.

Although Professor George R. Coffman, head of the English department, is continuing his work in the medieval and early renaissance drama, he is now concentrating attention primarily on the study of literature and the thought of the second half of the 14th century in England. Dr. George C. Taylor has published "Milton's Use of De Barts" (Harvard University Press), and Prof. Arthur P. Hudson is preparing a volume to be called "Humor of the Old Deep South."

Professor William F. Prouty, head of the geology department, has completed studies dealing

with meteor craters and fossil whales of North Carolina and is continuing studies as to the origin of elliptical bays and lake basins in the Carolinas. Professor Gerald McCarthy is continuing a geophysical investigation of the Carolina coastal plain.

### Metzenthin Makes Study

In the department of German Professor E. C. Metzenthin has expanded the scope of his investigations in regard to old Germanic manuscripts, adding the study of the "preparation" by the copyists of their writing material.

Among significant contributions from the history department are volumes to be published soon by Professor W. S. Jenkins on "Pro-Slavery Thought in the Old South," an historical and analytical study of the mind of the slaveholder, and by Professor W. E. Caldwell and L. C. MacKinney on "A Short History of Medieval Europe."

The school of law reports a number of timely studies, such as "Lynching and the Law," by J. H. Chadbourne; "Control of Electric Rates in North Carolina," by F. W. Hanft; "The Judicial System Becomes Complex," by F. B. McCall; "A New Constitution for North Carolina," by Dean M. T. Van Hecke; "The Sales Tax and Transactions in Interstate Commerce," by E. M. Perkins; and "Corporations As Agencies of the Recovery Program," by R. H. Wetach. Professor Albert Coates has in preparation a research project on "The Code of Criminal Procedure," to be published by the American Law Institute.

### School of Library Science

In the library and school of library science, Professor R. B. Downs and Professor Susan Grey Akers have made important studies. Professor Downs' state document center plan has attracted much attention.

Significant among contributions by the mathematics department was a comprehensive article by Dr. Archibald Henderson on the history and achievements of the Elisha Mitchell Scientific Society.

In the school of medicine Dr. W. deB. MacNider, a world authority on Bright's disease, has continued studies on diseases of the kidney and liver.

In the school of pharmacy Professor H. M. Burlage and Professor M. L. Jacobs have made an important survey of the drug industry in North Carolina.

The new head of the physics department, Professor Arthur E. Ruark, reports a large number of important projects completed and under way by members of his staff, including "A Search for Artificial Radioactivity Produced by Cosmic Rays, Gamma Rays, and Beta Rays."

Psychology made several significant contributions, including "Studies in Testimony" under the direction of Department Head J. F. Dashiell.

Contributions by the school of public administration include a study of "The Personnel of Southern Legislatures," by Dean W. C. Jackson; "The History of North Carolina," by Dean Jackson and Professor A. M. Arnett; and a survey by Professor Columbus Andrews of 17 western North Carolina counties.

### Romance Languages

In Romance Languages Professor S. E. Leavitt has published a "Tentative Bibliography of Colombian Literature" (Harvard University Press), and Professor U. T. Holmes has completed the first volume of "The Works of Guillaume du Barts."

The department of rural so-

### Wistful Hero

cial-economics, under the direction of Professor S. H. Hobbs, Jr., through the News Letter and staff members has continued its important studies of North Carolina. Among significant contributions were studies by Professor Hobbs on the cost of government in this state and by Professor P. W. Wager on county government.

### Sociology Department

The Institute for Research in Social Science and the department of sociology, both headed by Dr. Howard W. Odum, probably take first place in the number of research projects completed during the year. They are working on a specific program of state and regional social research, study, and interpretation. Dr. Odum is to bring out soon a new volume dealing with the south's capacity for social and educational development. The work of the Institute has contributed considerably to the University's national reputation for scholarly research.

In the zoology department Professor H. V. Wilson and Professor R. E. Coker are among those who have done considerable research. Professor Wilson has continued his study of sponges and Professor Coker has devoted chief attention to copepods.

Concluding chapters of the booklet list research organizations and publications and faculty publications.

### Senior Jewelry Bids

The senior ring committee will invite seven leading jewelry firms to make bids for the senior jewelry contract, it was decided at yesterday's meeting of the committee.

The committee hopes to secure rings this year at a cheaper rate than last year.

### P. U. BOARD CALLS

Applications for business managerships on each of the four campus publications should be in the hands of Professor J. M. Lear by May 2. Companies submitting bids for engraving, photography, and printing should submit contracts by April 24.

### GOOD FRIDAY SERVICES

Services at the Chapel of the Cross on Good Friday:

- 10:30 a. m.—Morning prayer.
- 12 to 3 p. m.—Three-hour service. Meditations on the Seven Words from the Cross.
- 8 p. m.—Stainer's "Crucifixion" will be sung.
