**POLITICS AND TREATIES**

Since the London disarmament conference, nothing has been said about the "last resort" treaty between Great Britain and United States. This pact was cooked up as a sort of substitute measure when all else failed.

Now comes word from Washington that the Senate has evidently forgotten the treaty. It has not been presented for ratification and it is said that the big boys have no intention of doing so.

As usual, the reason is political. This is election year and the administration is deathly afraid of ratifying treaties under the circumstances.

The treaty, of course, is of and by the administration. It seems that some of the boys in the Senate who are otherwise ultra-New Dealish are subscribers to G. Washington's doctrine about keeping out of European affairs. The New Dealers do not relish a split in their Senatorial ranks during these parlous times.

The result: When the old naval limitations treaty expires in January, there will be nothing to prevent an unlimited ship-building race. Oh Politics, how costly art thy ways!

Marshall's conception of the commerce clause as a limitation upon state powers satisfied his requirements for the national interest.

**Sketch**

Giving an historical sketch of the commerce clause, Mr. Frankfurter traced it in detail through the career of Chief Justice Marshall. "This power, conferred upon Congress by the Supreme Court to regulate commerce with foreign nations and among the several states, touches most intimately the relations of government and economic enterprise."

Mr. Frankfurter will discuss Tanay and Waite in his lectures tonight and tomorrow night to be given in Hill Music hall at 8 o'clock.

Following his opening lecture here last night he was honor guest at a faculty smoker at the Carolina Inn. At 10:30 tomorrow morning he will discuss some topic of general interest at a seminar session.
