Agna Enters Will Present Program Here

Student Entertainment To Feature Mime Thursday

From a repertory of 100 creations Agna Enters, American mime, will present a program of contrasts and variegated content Thursday night when she appears on the student entertainment series.

Agna Enters is not merely a dancer, magician, or a mimic. A mime is all of these. In a recent article in "Esquire" Gilbert Seldes, foreign correspondent and newspaperman, says, "The stage is positively populated with hundreds of her before she is through. In another number she runs through a score of expressions according to the Delsarte method—horror, adoration, repugnance, indignation, pride, etc."

A mime is a person giving a drama in which scenes from life are imitated and generally represented in a ridiculous manner.

Guggenheim Winner

For her work in this field, Agna Enters was awarded in April of 1934 the Guggenheim Fellowship which carried her to Greece to make a more intensive study of the people and of their heritage in the arts.

The Greeks were the first to use this form of drama. The early Greek mime was a sort of popular rhythmical prose, full of slang, dialect, and aphorism.

Bradshaw Addresses Sophomore "Y" Men

Cabinet to Have Social at Swain Hall February 15.

The Sophomore "Y" cabinet last night had as its speaker Dean Francis Bradshaw who spoke on "Education and Human Relations".

"Education," Dean Bradshaw said, "is what society does in preparation for the younger generation's life. The first great educational program in our universe was that of 'imitation.'"

"The Greeks came along and discovered that the human mind was capable of learning for itself, and we received our first university. They had started the idea for a changing society in regard to education, and the present-day set-up has been copied somewhat from them."

After reference to various scripture, Dean Bradshaw found the old educational process somewhat in line with the contemporary one, except that little is being done in the way of individual thinking. "Our present educational system," he said, "does nothing but teach facts. To be educated one must think. That is where our present plan is failing."

It was decided by the cabinet to have their social at Swain hall February 15.
