HIGH COURT APPROVES JUSTICE HUGO BLACK

Washington, Oct. 11.—The Supreme Court today allowed no further questioning on legal technicality, and therefore giving Justice Hugo Black a clear title to his seat on the bench.

Albert Levitt, former federal judge in the Virgin Islands, has expressed intentions of starting other proceedings.

According to Levitt, Black is constitutionally ineligible because he was a member of the senate which voted to increase the "emoluments" of justices by permitting them to retire at full pay after reaching 70 and serving 10 years.

Levitt also denied that the retirement of Justice Van Devanter left a place for a new judge. He stated that Van Devanter is still technically a member of the high tribunal.

Patrick Henry Kelly, Boston attorney opposed to Black, argued that Justice Van Devanter had retired under an act which was unconstitutional because congress has no right to relieve a justice of his duties until he retires.

These motions of Kelly and Levitt were presented to the court on Monday, only a few minutes after Black had taken his seat.

FRANCE MAY ALLOW SHIPMENTS TO SPAIN

London, Oct. 11.—France intimated today the possibility of opening her border to allow volunteers and supplies to reach the Valencia government, in an attempt to break the Anglo-French-Italian deadlock.

This step was regarded as a counter movement to the refusal of Italy to join the Franco-British discussion of withdrawal of Italian volunteers from the Spanish war.

Unless Britain approves, and offers assurance of her backing in any resulting events, it is generally thought that France will not throw open her borders.

Regardless of the small difference between Britain and France, informed sources have it that both believed in non-intervention to prevent the spread of the war outside of Spain.

JAPAN CLOSES DOORS TO ALL LUXURIES

Tokyo, Oct. 11.—The Japanese government passed an emergency law forbidding the importing of nearly 700 foreign made articles.

This ordinance will begin immediately, and thereby making Japan a nation with only very few luxuries of any kind.

Japan feels that this economic movement is necessary in order to cut its annual expense to other nations, and provide more money for its campaign in China. Unofficial estimations

By ADRIAN CHARLES SPIES

Well, in a sort of message to all malcontents, L. T. Burling of the geology department assures them that there is far more hardship than there is glamor. And he should know, having traversed a considerable part of the world in search of geological information.
