pretty much the same position

There Was No 'Sucking in'

There are ambiguities in Kerr Scott's statement in which he charged that the Good Health plan's major motive was to establish a medical school in Chapel Hill and that "all the rest of us were sucked in to serve this end." The commissioner of agriculture tagged the Good Health program as a propaganda machine, stated that the advocated medical college here in Chapel Hill was only a measure to "keep up with the Joneses."

The announcement by Scott was of such a nature that it amazed H. C. Cranford, Executive Director of the Good Health Program, since Scott had previously endorsed the Good Health plan. But Dr. I. G. Greer, president of the association, seems to adequately disprove Scott's claims. A short section of his statement is reprinted below:

"Dr. John A. Ferrell, executive secretary of the N. C. Medical Care Commission, has already spoken for the commission, pointing out the building of the medical school is but one feature of the magnificent Good Health program. The bulk of both State and Federal funds appropriated for the program will be used not for the medical school, but for financing the pital and medical school.

construction of new general hospitals and the expansion of such existing facilities throughout the State. As Dr. Ferrell suggested, I think Mr. Scott should familiarize himself with what is being done with these funds.

"As for the location of the medical school, I would like to emphasize that the Good Health Association has never advocated that it be put in Chapel Hill, or anywhere else. The location was left up to the Medical Care Commission, which relied on the judgment of State, national, and international hospital experts."

We think that Dr. Greer's explanation along with the assurance of a host of other important medical authorities in the state is enough to negate Kerr's claims.

However, until the medical school is established on campus there will be many accusations of this nature. We must remember that at least ten powerful factions tried to bring the medical center to their community. The strongest group at this time is the Moses H. Cone Memorial hospital group in Greensboro that wants to combine the two programs into one mammoth hos-

More People -- More Fraternities

creased from a pre-war maximum of 4,100 to a figure now exceeding 7,000 students. Although enrollment has almost doubled, there are actually fewer social fraternities on the campus now than there were in pre-war times. Thus many of the 25 fraternities here have larger active rosters than ever before in their history. In the spring quarter, six of the 25 had over 100 members and many more approached that figure. In big sprawling fraternities, such as these, there is little chance for the genuine fraternity spirit and real cooperation which they should have. The only relief for this situation is for the larger chapters to take in fewer men, but this would necessitate the dropping of many boys who wish to join a fraternity.

One solution of this problem was voiced by Dean F. H. Weaver, who expressed the opinion that this campus could support more fraternities now than ever before. Dean Weaver said that already two chapters, dormant during the war, have been reactivated here at the university. He said that other national Greek societies had in-

quired about the possibility of opening a chapter

The Faculty Committee on Fraternities, of which Dean Weaver is a member, has voted to consider incoming chapters according to: (1) their national reputation; (2) their financial status; (3) the number and academic status of their prospective members: (4) the assurance of financial aid from their national headquarters; and (5) the prospects of obtaining a house and plans for financing the house.

Dogs Know All About Fashion

There is a collie that you see on Franklin Street every now and then. She has the "new look." This collie has a long brown covering for her body. This cover is somewhat dirty hair which extends we would judge just about half an inch below this dog's knees. If you figure the ratio, you will find that that corresponds to about two inches below the knee for human ladies who sometimes are about five feet four inches tall. All of which proves that Christian Dior, a rather peculiar Parisian contourier, did not originate the "new look." A collie here in Chapel Hill did

But that is of little import. From Seattle to Salisbury and from La Jolla to Lexington the"new look" has caused comment. Mill girls have let out sewed together their slacks legs. Rich dames have purchased garments with hems that look like slips with one strap broken. Some like slips with two staps broken.

We can no longer ignore this important subject-the "new look." It is economic and sexual upheavels the world over. It is, we repeat, causing upheavels the world over.

Paterson said that AVC chapinforce the national effort.

"The community food saving drives will be devoted to the elimination of food wastage by commercial establishments and housewives and will urge less consumption of important grain-using luxury products such as pastries and alcoholic beverages," Paterson said.

"A nation-wide reduction in cake and pastry consumption will have an immediate appreciable effect upon the consumption of grains and sugar-two precious food commodities,' Paterson pointed out.

"Reduced usage of alcoholic beverages would not be so immediately felt at the distiller level but the possible savings of grains used for this luxury item are extremely large," he

"America cannot afford a Marie Antoinette attitude about starving people in other portions of the world," Paterson said. "We cannot escape making our share of effort and sacrifices. Hungry people are suckers for totalitariansim. If we would see democracy thrive we must exert control and common sense," Paterson asserted.
