Sylvester Gives Talk To NCSPI By Richard Creed "I know of no state where the

overall standard of journalism in both the daily and the weekly field is so high as in North Carolina," said Harry Sylvester, novelist and short story writer, to 250 high school students attending last night's session of North Carolina Scholastic Press Institute here.

"Where a people is free, progressive, healthy and politically independent, it is no coincidence that its newspapers are the same," he said. "So by natural progression we have the inevitable relation between journalism and politics," he added.

"It is no longer possible, if it ever were possible, not to take By News Work politics seriously," he said. "For if people like yourselves, if the heads of schools of journalism, if men like Mr. Truman and Mr. Acheson and your own Mr. Daniels in Raleigh do not take politics seriously, then someone else is going to take it seriously for you," he continued.
