Quinto. Galo Paza is the eldest of the seven children of General Leonidas Plaza Gutierrez, twice president of Ecuador, and Dona Avelina Lasso Plaza, a direct descend-

ant of the Conquistador San doval. He was born February 17, 1906, in New York during his father's

year of service as his country's Minister to the United States. Plaza attented high school in Ecuador, the University of Cali-

fornia, the University of Maryland, and the Georgetown School of Foreign Service.

He returned to his homeland in 1933 to take over the eight Plaza haciendas which had been slowly becoming less profitable during his father's seven years in exile. Several years later he was elected to the municipal council of Quinto, becoming president of that body, and a year later was elected mayor of the Ecuadoran Capital. Toward the close of 1938 he was appointed Minister of National Defense and in 1944 he was named as Ecuador's Ambassador to Washington.

Returning to Ecuador in 1946, he occupied himself once again with farming and business interests. His election as president came in 1947 after he had served as Senator from the Pichincha province in which Quinto is located.

Candidate Declares Freedom Real Issue In Coming Election

Charles Kuralt, Daily Tar Heel reporter and columnist, yesterday became the second candidate to declare himself in the race for the newspaper editorship.

Kuralt will oppose Tom Peacock in the campus-wide election this spring. Both are seeking political party nomination.

Kuralt, in nls initial campaign statement, challenged Peacock's views on the role of the editor of the student paper. Peacock, presently serving as sports editor, expressed the opinion that The Daily Tar Heel should reflect the opinion of the student body, and 'should be as conservative as the

Kuralt said that student opinion "must always be represented," but editorials in the paper should "not be mere 'reflections' of things everybody already knows. If the majority agrees, so much the better, but editorial freedom must not be restricted by force of numbers."

"The Daily Tar Heel," Kuralt said, "has not always been free. Its present freedom was obtained "nature and number" of grants. picking from among two fraternity by editors who were not afraid to judge facts rationally, and then to speak out forthrightly in support of their convictions.'

Kuralt, who wrote sports stories for The Charlotte Observer for three years and news and sports for The Charlotte News for one year, had a comment on Peacock's injection of sports into the cam-

Kuralt promised complete coverage and fair editorial treatment of athletics, and called sports "a unifying and important part of life at the University."

"But sports," he continued, "is from 5:30 to 7 o'clock in Lenoir not the issue here. There is little disagreement between Tom Peacock and myself on the subject of sports. What there does seem to be disagreement on is the function of the editorial column-and that is

JERRY REECE Gets New Job

MacIntyre Breathes Sigh Of Relief

Hill Hunting For TV Tower Is No Easy Task ! ings of this type are costly:

By Pat Snook

When the Consolidated University of North Carolina recently announced purchase of land on which to erect a television tower, at least one man behind the scenes could breathe a sigh of personal relief.

For Chief Engineer Alan B. MacIntyre has spent the best part of many months looking for the particular spot in North Carolina where he could erect 72 tons of welded steel to the best engineering advantage, without threatening the air safety of the

The Federal Communications Commission granted the University a construction permit for its non-commercial, educational television station on September 30

-but with a few reservations: the transmitting tower must be located no more than 20 miles from Chapel Hill, it must be at least 190 miles from Greenville, S. C. (where another Channel 4 television station is located), and it must not intrude on he airlines' approaches to airports. Search For Peak

applied, the University was left with an eight-mile triangle of land in which to look for a peak. For television waves will travel only to the horizon-the higher farther they will go.

After these restrictions were up in the air they start from, the

Officials wanted to beam the University's sound and pictures from at least 1,000 feet above

the largest number of North Carolina families with direct television service, Mr. MacIntyre's assignment, therefore, was to find the highest accessible point of land possible - the higher the ground, the shorter the expensive tower would have For a man who was formerly

a research associate working on a Navy project to develop a graphical data analyzer, this might seem a pretty simple assign-There are maps which show

where hills are and how high they are. Except, surprisingly enough, there just simply weren't any contour maps of this particular part of North the ground in order to serve | Carolina. And extensive chart-

Goes Hill-Hunting So Chief Engineer MacIntyre bought an altimeter-the kind

airplane pilots use to determine flying altitude-climbed in his automobile, and went hill-hunting. He drove to what seemed to be a high point of land, took a reading, examined the view around him, picked a seemingly higher point, and headed for that. After many miles and many hours, the highest peak was found, three miles from Pittsboro and halfway between Raleigh and Greensboro. A fine choice, it was agreed.

Then one of those things happened which help to explain why television station organization (See HILL HUNTING, page 4) deal" platform last fall.
