# Drake Takes Fifth In 200-Yard Backstroke

### Tar Heel Just Barely Edged; State's Mattson Cops Crown

#### By BOB COLBERT

OXFORD, Ohio, March 25 .--(Special)-Bob Mattson, ACC champion orthodox breaststroker, tonight became the first ACC or Southern Coference swimmer to ever win a first place at an NCAA championship meet. Mattson, of N. C. State, went the 200-yard distance in 2:26.0, touching out Michigan's "Bumpy" Jones.

The orthodox is a new stroke and since there were no existnig records, Mattson's time becomes an NCAA championship meet record

Tar Heel Charlie Krepp qualified third in the 200-yard backstroke and then was nosed out by Don Brown of Denver for fourth. He was awarded fifth place with a time of 2:13.3. Intercollegiates recorderholder Yoshi Oyakawa, of Ohio State, easily took first with a time of 2:07.7.

Krepp, following Coach Ralph Casey's orders, went all out and

led Oyakawa at the 50, but he faded out, losing stamina in the fast pace and lost yardage in the next 75 yards. at the 175-yard mark he was almost even with Brown for fourth place but Brown, with a strong finish, just barely won.

After seven events, Ohio State has taken a lead over the other schools in team scoring. They have 43 points, Michigan has 28, Yale 27. Carolina has two.

Tomorrow will see trials and breaking time of 2:45.9 set

Raugh Wins; Maultsby

Falls In Afterpiece

finals of the remaining seven events, including the 20-yard butterfly breaststroke and the 300-yard medley relay. Phil Drake, who turned in the fastest time in the country this year, will be out to bring home an NCAA championship for Carolina. The medley relay team of Krepp, Drake and Dick Baker will be trying to take a second championship while bettering their intercollegiate record-

It's no joke!... Civilian volunteer plane spotters are urgently needed to warn against enemy planes that may sneak under our Radar Defenses...

... and they can sneak under! Yes, miraculous as radar is, present sets do not work effectively under 5000 feet. This means that low-flying enemy planes can come in undetected, unless they're spotted by the human eye and ear.

How serious is the threat of an attack, you ask? Here are some cold facts. We know the Reds are equipped to attack right now. They have about 1000 heavy duty, long range bombers stationed at strategic points within bombing radius of any part of the United States. They are capable of destroying 89 top cities in a single blow.

Regardless of whether the Russian leaders are talking sweet

or tough, we cannot ignore this danger as long as the Iron Curtain still exists. That's why our Anti-Aircraft Command and Air Force are operating on a 24 hour schedule. But they alone can't do the job of protecting the country, not even with radar. They need your help, your eyes, your ears to warn them of low-flying enemy planes.

Today there are already 250,000 members of the Ground Observer Corps, young and old alike. But they are not enough. The job is so big, our borders so extensive, that twice as many civilian volunteer plane spotters are needed. Won't you give 2 hours a week to help protect your country, your town, your own family? Sign up today.
