EDITORIAL

As new students come to Carolina for the first time and as the old students return for the second session of summer school, we feel that this is an opportune time to examine the value of the many activities that are broadly grouped under the title of extracurriculars. Most students—new and old alike—take the rather selfish attitude of "What's in it for me?" when they examine the extracurriculars. Of course such students are entirely justified in taking this outlook, for after all the primary purpose for coming to college is to get an education.

However, getting an education does not necessarily mean just going to classes or doing the homework assignments. Becoming educated also entails becoming well rounded and perhaps more important still, learning how to live and work with other people. This is where the extracurriculars come in to supplement the academic side of your education. This is the answer to the question of "What's in it for me?"

Sunday Services In Chapel Hill Churches

- 8:00, 10:00—Catholic Sunday mass. Gerard Hall, on the University campus, west of South Building.
- 9:30—Community Church. Forest Theater on Country Club Road, opposite Cobb Dorm.
- 9:45, 11:00—Presbyterian Church.
- 10:00—Congregation Christian Church.
- 11:00—Baptist, Lutheran and Methodist church services.
- 11:00—Friends Meeting. Grail Room.
- 11:00—Christian Science. Room 2, Carroll Hall.
- 6:00—Westminster Fellowship.
- 6:00—Canterbury Club.
- 6:00—BSU Supper Forum. Baptist Church.
- 6:00—Wesley Foundation Supper Group. Methodist Church.

Second Session Starts With Welcome Party

The Second Session of Summer School started with a party in the Rendezvous room of Graham Memorial on Monday night from 7:30-9:30. There were refreshments and dancing.

The heat was no hindrance to the evening's entertainment after a fan was set up. The party was sponsored by the Summer Activities Council under the co-chairmanship of Woody Sears and Peggy Ward.

A COOL TRIP TO SATURN

On the luxurious, completely air-conditioned inter-planetary space ship the Wanderer, members of the University community have an opportunity to take a quick trip to Saturn and other places of interest in the far reaches of outer-space.

Reclining in their chairs in the air-conditioned main lounge, the passengers listen to soft music from one of the World Network's stations as they await the departure. Ship Commander Capt. Tomas requests fasten-

Community Church Announces Schedule

The Community Church of Chapel Hill has released its schedule for the second summer session.

Morning services will be held each Sunday at 9:30 a.m. in the Forest Theatre. In case of rain, in Hill Hall.

On Sunday, July 24, Dr. Raymond Adams, UNC Professor of English, will speak on the Power of Dullness. The rest of the summer schedule is as follows:

July 31—Dr. J. Neal Hughley, Professor of Economics, North Carolina College.

Aug. 7—Dr. Preston H. Epps, Professor of Greek, UNC.

Aug. 14—Dr. Almonte C. Howell, Professor of English, UNC.

Aug. 21—Dr. Raymond Adams.

On Sunday, July 24, the second program of "Music Under the Stars" will be presented at 8 o'clock in the Forest Theatre. The feature presentation will be a high fidelity recording of Cesar Franck's Symphony in D Minor.

ing of safety-belts for the blast-off. Finally, the Captain gives the order and the control tower operator starts counting off the remaining seconds. "Three . . . two . . . one . . . zero," and the Wanderer is on its way.

The first stop is made on the Moon so that the passengers will get an opportunity to get a look at a typical space station with all its technical apparatus, such as the solar-mercury power generator and the oxygen reclamation units. The next stop is on Titan, one of the major satellites of Saturn, from which the passengers get a chance to see the rings of Saturn and the cold but beautifully austere landscape which is typical at 800 million miles from the sun.

During the entire trip, the passengers are made aware of the things which they are witnessing by the absorbing narration of a trained, well informed guide who points out all the things of general interest.

The Morehead Planetarium is the only one of its kind on a college campus anywhere in the whole country, and according to widely travelled jurist and businessman Judge Alfred Nippert of Cincinnati and Asheville, it is "better than the European planetaria and better than those in Chicago and Los Angeles." These shows are well worth attending, for they are entertaining without a compromise of scientific scruples.

According to Harvey Daniel of Chapel Hill, one of the three narrators for the Planetarium shows, the lectures are flexible enough in their nature as to allow some degree of variety, which prevents them from becoming stereotyped. Therefore, the audience always feels that the lecturer is vitally interested in the subject matter and is not burdened with trite idioms and repetitious monotony in the lecturer's presentation.

The most fascinating part of the show is seldom realized by the audience, for they see without a full realization of just what it is they are seeing. The technical story behind one of the Planetarium's productions is an amazing account of native ingenuity on the part of the staff technicians. The perforated-steel dome of the Planetarium allows the use of sets behind it which gives a three-

Photo Contest Deadline Extended To August 1

A spokesman for the Photo Contest stated today that the deadline would be extended until August 1, in order to give more time for entries to be made.

The contest rules are:

1. All photos must be original.
2. All work (developing, printing, and enlarging) must be done by the entrant.
3. The first-place picture will be awarded \$15, and the second-place picture \$10.

Graham Memorial has a darkroom which can be used and all students are urged to use these facilities.

Entries should be turned into Graham Memorial Office for display.

Library Closed Sundays

Due to the limited budget for student assistants, the Library of the University of North Carolina at Chapel Hill will be closed on Sundays for the rest of the summer months. The regular Sunday schedule will be resumed in the fall.

First Aid Course To Start August 1

The Standard First Aid Course of the American Red Cross will be taught beginning at 7:00 p.m. on Monday, August 1, in Room 309 of Howell Hall. This course will be taught for the official certificate by Mr. Art P. Schlagel, P. O. Box 854, Telephone 9-9298.

The course requires 22 hours of class work and will be taught from 7 to 9 p.m., Monday, Wednesday and Friday beginning August 1 and ending August 25. The course is taught free and the only cost is the textbook available at the Book Ex in Steele Basement at the cost of \$0.62.

Anyone above the age of 15 is invited to join this class.

and the strategic location of a set dimensional effect to the audience, of five speakers gives the stereophonic sound effect. Other than the obvious stage sets, much work goes into the behind-the-scenes activity, especially in the control room, where the engineer must work all the lights, the tape recorder, and several projectors.

Part-time engineer Bill Padgett, a student here, said that the engineer must be capable of moving and thinking quickly so that the various effects are perfectly coordinated. According to Padgett's account of technical end of the productions, A. F. (Tony) Jenzano, the Planetarium manager, must be a veritable genius when it comes to creating unusual effects, using materials already on hand. Several of these "gimmicks" are the stroboscopic radar screen, the nuclear mass spectroscopy, and the revolving chart-graphs, all seen in the ship's cockpit.

All the films and tapes used in the Planetarium shows are made here on the campus by the staff of the Communications Center. The models for the films of the different planets and landscapes were made by Marjorie Beshara and Bill Gully, and all information in the lectures is checked and verified by Dr. Morris Davis of the Physics Department.

It would be an evening well spent to take "A Trip to Saturn" on the good (space) ship the Wanderer. Flights leave nightly at 8:30, Saturdays at 11 a.m. and 3 and 4 p.m., and Sundays at 2, 3, and 4 p.m.

All candidates for graduate degrees for the August commencement should come by the Graduate Office, 202 South Building, and fill out a diploma card.

OVER THE HILL

With Charles Dunn

When one thinks of weather, one thinks of Chapel Hill, and when one has a column to grind out in about ten minutes he thinks of both Chapel Hill and weather. It has been said that if you don't like the weather in Chapel Hill just wait around a couple of hours and it will change.

And such was the case in town the first of the week. One hour it was raining and the next hour the sun was shining . . . just like April showers in July. As one lady in town said "before the rain everything was so dry (lectures?) and hot (classrooms?), but after the rain everything was so fresh and colorful again."

Kapers from Kenan . . . During the first session of summer school, one of the so-called Carolina Gentlemen was dating a summer coed. The coed was just a little worried about her roommate, also a summer coed, who was likewise dating a Carolina Gentleman. First coed decided that she had better find her roommate, and first Gentleman suggested that they would possibly be down in Kenan stadium. So off they went to the stadium and needless to say they didn't find the second coed and her date. Could be that the reason was the second coed and her date didn't have the services of a car. Suggestion: next time try the Arboretum where there are over 500 different kinds of plants.

Kapers continued . . . The fellow looked at the girl in the moonlight. She was beautiful. He took her hand, and put his other arm around her shoulders. He had an irresistible urge to kiss her and he did . . . on the cheek. She sighed and snuggled a little closer in his arms. This was all the encouragement that the lad needed and he leaned over to kiss her on the lips. She moved restlessly, and said, looking into the rear-view mirror, "oh, I bet my hair looks a mess!" Thus ended a beautiful romance.

A certain couple was walking across campus the other day. The prettier one said "and where did you and he go last night after you carried us in?" The fellow didn't answer, and the coed phrased the question another way "Did you all go get a beer last night?" The fellow replied, "no, we are on the wagon." "Really?" the girl questioned, "and where did you all go on the wagon?"

Dean's List Announced At UNC Nursing School

Dean Elizabeth L. Kemble of the University of North Carolina School of Nursing has announced the dean's list for the 1955 spring semester.

A total of 21 students were listed, 15 being from North Carolina and five being out-of-state students.

The North Carolina students and their home towns are Deane Coats and Elizabeth Morris, both of Concord; Mrs. Martha Cline, Chapel Hill; Sara Blaylock, New Bern; Mrs. Geraldine Snyder Laport and Winnie Williams, both of Fayetteville; Mrs. Mary Anderson Leggette and Mrs. Donna Blair Booe, Winston-Salem; Sarah White, Guilford College; Mary Williams, Greensboro; Mrs. Janet Merritt Littlejohn, Chapel Hill; Elizabeth Sumner, Asheboro; Myrtle McAnally, Reidsville; Salls Robeson, Laurinburg; and Sally Wier of Henderson.

Miss Blaylock's grades were perfect, being all A's.

Out-of-state students and their home towns are Ramelle Hylton, Clearwater, Fla.; Sharon Warrington, Bethesda, Md.; Marjorie Staub, Westfield, N. J.; Carolyn Taylor, Martinsville, Va.; and Sara Price of Buckhannon, W. Va.
