

### Music Of All Temperatures Is Now Available At Turnage's

By TOM SPAIN

Within sight of the Duke University Chapel Tower, there is a place where jazz is played and heard each Saturday afternoon from 2 until 4:30. The place, of course, is Turnage's, where cold beer and music of all temperatures is served to students and to anyone else who is interested in either attraction.

Many people have heard or read about Turnage's, but few people around Chapel Hill know how to find it. About ten minutes from Chapel Hill, Turnage's is located on a road between US highway 70 and Erwin Road in Durham. The building itself is of the most rustic nature, with furnishings which meet only the barest requirements. Simple furniture, consisting of long tables and benches meets the demands of the patrons, while heat is provided by a large open fireplace, Turnage's resembles a ski lodge in many ways; only the music makes it different.

It has often been said that the Chapel Hill-Durham area needs a comfortable, beer-serving retreat of some sort, where students may gather to dance to live music. Turnage's comes about as close to this as possible, although some might find the benches a bit hard.

Beer is served at regular prices and there are no waiters seeking tips. If one wishes to drink beer at Turnage's, he must go to the counter and get it. The whole atmosphere of the place is much like that of a large party. The informality of the furnishings, dress and music is most conducive to gaiety.

**SOLO WORK**  
The music is loud and sometimes hot. When it is cool, it tends

to take on a clammy pallor. The main strength of Dick Gable's organization is to be found in the dixieland numbers, which sound fine, even when played in full ensemble. The individual talents and styles of the musicians are varied and therefore do not lend themselves to progressive ensemble play, although the solo work was often very good.

The Gable jazz band boasts an excellent rhythm section. On drums is John Guthman, a Duke student from Vermont who is a most talented and versatile musician. His drumming is clean and straight; his solos imaginative and controlled. Rufus Ratchford, pianist with the group, is equally able. One of the outstanding features of the Turnage music is a guitarist named Harrison Register. He is of the progressive school and would probably fit in with the best.

**INFORMALITY**  
The informality of the jazz at Turnage's must be considered. The line-up varies from week to week, and the group is free to experiment. The regulars, or mainstays of the Gable band, like most musicians are working on the progressive sound, a thing far more difficult to achieve than any other popular form. Most of today's groups grow popular through the medium of recorded music. Their music is planned, rehearsed and rearranged many times before they perform it. This is even becoming true of the so-called free-formists such as Brubeck and some of the JATP groups.

**REFINED NATURE**  
The music of the Modern Jazz Quartet is now of a very refined nature. All this must be taken into consideration when listening to the jazz at Turnage's. Dixieland music is not difficult to perform. Modern jazz is. When a group begins to experiment with a new style or sound, it cannot achieve the best overall effect. The quality to be found in the Turnage jazz comes in the form of the solo. And there's where the fun is. Dick Gable and his group produce some really fine solo jazz.

Interest in college jazz is growing, especially in view of the upcoming concert and Festival. Talent is being produced and revealed throughout the big four area. It is not unlikely that some big people will emerge. Why not investigate Turnage's.

### Covering The University Campus

**SOUND AND FURY**  
Sound and Fury will hold try-outs Sunday, Monday and Tuesday of next week at 7:30 p. m. in Memorial Hall. Anybody wishing to try out has been urged to come.

**WUNC**  
Tonight's schedule for WUNC, University's FM radio, 91.5 megacycles:  
7:00 p. m.—Intermezzo  
7:15—Vistas of Israel  
7:30—Music in the Making  
7:45—Review of the British Weeklies  
8—Hill Hall Concert  
9:30—Our Unfinished Business  
10—The News at Ten  
10:10—Program Preview  
10:15—Evening Masterwork

**BERTRAM COLGRAVE**  
The fifth weekly lecture by Prof. Bertram Colgrave will be given at noon Thursday in 103 Bingham Hall. Colgrave, visiting lecturer from Durham, England, will speak to students, faculty members and others on "The Coming of Christianity to England."

### Mid-Day Lenten Services Will Be Held Here

Mid-day Lenten Services will be held in Gerrard Hall Thursday, Friday and the following Monday and Tuesday, according to Miss Susie Roberts, chairman of the YWCA vespers committee.

Services will begin at 1 p. m. each day. They are being held by the YWCA in co-ordination with the regular WATCH Services sponsored by the Baptist Student Union.

Two missionaries, who will be on campus under the sponsorship of the Ecumenical Group, will participate in the Monday service.

Where do SENIORS go from here?  
RESEARCH! ENGINEERING! PRODUCTION! SALES! ADMINISTRATION!  
How about... OWENS-CORNING FIBERGLAS!  
Let's talk about a career for you with one of America's most dynamic "growth industries"—glass fibers! Owens-Corning Fiberglas, pioneer and leader in the field, is not even as old as you—yet Fiberglas has already established itself as a major commercial material whose importance to our economy grows every year!  
Fiberglas' unique combination of properties is unobtainable in any other known product. Hundreds of millions of dollars worth of Fiberglas materials are now being used each year in thousands of new, different ways for thermal insulation, sound control products, air filters, industrial and decorative fabrics, and plastics reinforcements... and many more uses are on the way!

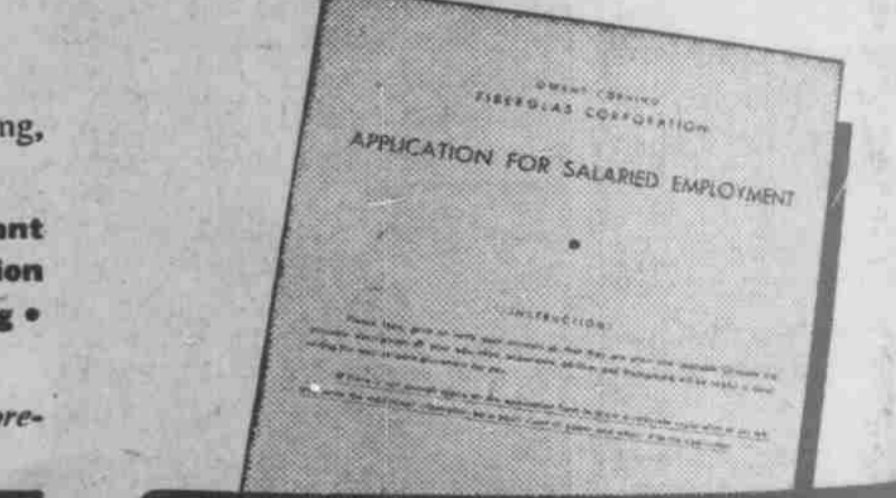

What does this mean to you? It's obvious... the continued growth of Fiberglas demands the constant addition of personnel with outstanding leadership potential. Fiberglas needs men with character, imagination, zest for getting things done... men who enjoy facing and whipping tough problems. Selection will be made from able men with training in mechanical, electrical, industrial, civil, architectural, chemical, ceramic and general engineering... as well as their fellow students in business administration and selling.  
Join us this summer or fall! You'll spend six months to a year in general Fiberglas training. You'll locate in one of our seven plants or 60 offices throughout the United States... work on specific assignments with different departments... familiarize yourself with company background and history... learn processes, products and general methods of Fiberglas operation. Additional instruction programs geared to your individual development will supplement this on-the-job training.  
Within a year, you'll be "on your own," working for Fiberglas in your chosen field... growing with other graduates of years past in an interesting and exciting job with unusual opportunities.  
Fiberglas also is offering stimulating summer project work for undergraduates and faculty members.

Will you be among the next group of Fiberglas trainees? An exciting, challenging job awaits you in one of these fields:  
Research • Product Development • General Engineering • Plant Engineering • Industrial Engineering • Manufacturing • Production Planning • Quality Control • Process Control • Sales • Purchasing • Cost Control • Accounting • Personnel  
See your Placement Officer today—arrange to meet the Fiberglas Representative on campus

**MARCH 22**  
He'll interview for each of the corporate classifications listed above. Learn the impressive benefits of a Fiberglas job!
