BUSHY COOK AND RAMESES

They're A Part Of Carolina

MARY MOORE MASON
"Who's that man down there with the beard, leading that pig goat around on the field," said the sweet young import at one of the football games this year.

"That," said her date patiently, "is Bushy Cook and Rameses, the mascot of the school."

Bushy Cook and Rameses are to be seen at most of the UNC football games and are always noticed and commented on.

For indeed, who could help but notice them and comment on them. However, little is actually known about the tall, wild-bearded farmer and the blue horned ram, the latest in a long succession of blue horned rams at UNC.

When asked a few years ago why he had let his beard grow so long and so wild, Bushy exploded a few popular myths. "I just let it grow for the hell of it," he said. "Back in 1923—that's when Roosevelt came in, wasn't it?—well that's when I started growing it," he said.

According to Bushy, his present job started when he went to a football game in 1946, and a photographer spotted him in the end zone and took a couple of novelty shots. Next day his picture was in the paper, and soon he was asked to take care of Rameses at the games.

One reason why so few people actually know so little about Bushy is that he lives a little off the beaten track in Dept. on a 69-acre farm outside Efland. However, Bushy has not always been a resident of Efland. He was born and raised in Haywood County. For the major part of his life he has worked in textile mills, being known now

as one of the best men in the operation of a loom.

When the war broke out, Bushy took his family of seven to Connecticut, where the pay was better, and they all got jobs up there. After the war they had made a considerable amount of money and decided to move near Efland where Bushy's folks had bought a small farm.

Rameses is not kept at Bushy's farm but at the farm of H. S. Hogan. Bushy has tried to take him to all the games since 1947. In 1954 Bushy went to Woman's College and was quoted as saying, "They all seemed to recognize me. They said that they were coming over for the game, and if Carolina won they were all going to have to give me a kiss. I guess I'll have to leave quick right after the game 'cause that'll be a heap of women a coming out of those stands at the end."

Rameses of the past have had a hard time of it. After the death of Rameses VII, the ram's keeper said "If you ask me what killed

Rameses, I'd say those Duke students worried him to death last fall when they chased him around the pasture all night." According to Frankie Black, head cheerleader, the present ram is Rameses VIII.

One of the most colorful events in Bushy and Rameses' career is one of the Carolina-Notre Dame game, which was held in New York. At this time Bushy loaded Rameses in a trailer painted blue and white, decorated with 27 rebel flags and drove to New York.

During his brief stay he probably created more sensation than the town had ever seen. He is probably the only person in history to make four left turns in the heart of the great metropolis, and when he paraded the ram across Times Square he stopped traffic.

"The police," he said, "were going to put Rameses in the police station but when they saw what the ram meant to the students they were afraid that he might be stolen so they put him in a kennel."

UNC Delegate Elected SSL Speaker Pro Tem

RALEIGH—The State Student Legislative assembly, convening here this weekend, acted with unusual solemnity in debate on bills and resolutions which came before it Thursday and Friday.

Thursday evening Dave Reid a Carolina delegate, was elected speaker pro tem of the senate, one of the most responsible positions at the assembly.

Also Thursday evening Charlie

Dean of the Carolina delegation introduced a bill to provide for repeal of North Carolina obscenity statutes. Joel Fleischman of UNC spoke of present obscenity statutes as an abridgment of free speech.

Fleischman said he does not feel it was the right of any one state "to impose a public morality."

Friday morning Duke Women's College introduced its resolution that all states' laws and constitutional stipulations on prohibition of inter-marriage between the races be repealed.

After considerable debate this resolution was overwhelmingly passed in both the house and senate.

Other resolutions and bills were:

1. A resolution restricting traffic laws in North Carolina, defeated in the House 51-50.

2. A bill by State College to legalize prostitution in North Carolina was defeated.

3. A bill to legalize euthanasia, introduced by N. C. State College at Durham, was defeated.

4. A resolution commending Governor Hodges, sponsored by Catawba College, failed in the Senate but passed overwhelmingly in the House.

Friday evening Joel Fleischman of the UNC delegation presented UNC's major bill, a resolution commending the action of Gov. Orval Faubus in connection with the Little Rock school integration crisis.

Evans said he was investigating the background of the Tarnation to see if there is any legal justification for the legislation.

He said he was going to check with the printshop which the money is owed to determine the nature of the debt and to get an itemized accounting for it.

Evans was unavailable for a statement concerning what action is planned on the bill. He stated that he was "undecided" as to just what action would be taken. He is presently conferring with party officials concerning the proposal.

The bill was introduced in the Student Legislature two weeks ago by Ed Levy, UP. The proposal was passed in last week's legislative meeting, but against Student Party opposition.

If the bill is not signed or vetoed by Nov. 11, it will become law.

"If we want to beat the Russians to the moon, do we want to do so badly enough to spend the millions of dollars that might instead profitably be invested in a half dozen other promising lines of scientific inquiry?" he asked.

Dr. Waterman said that under conditions as we now know them, flights to the two nearest planets, Venus and Mars, would take years rather than hours.

"Thousands or millions of years would be required under present conditions to travel to any of the stars," the scientist declared. "Even if we could travel at the fastest speed known—that of light—186,000 miles per second."

Waterman said Russia's first in the launching of Sputnik was a major disappointment to American scientists, but he cautioned against "A hasty and ill-considered effort to right the situation" that would "turn things upside down."

UNC, Birds Meet In Rival Contest

UP Party Leaders Predict Success

Chairman Says Unit Confident

University Party Chairman Harry Braxton said today his political unit is looking forward to Tuesday's campus-wide elections "with full confidence."

In a pre-election statement issued here, he said UP officials are predicting "broad success" in the vote to fill key judicial, legislative and class posts on the UNC campus.

Election day will get underway at 9 a.m. Tuesday to fill positions on the Men's and Women's Honor Councils, Student Legislature, Student Council, and freshman, sophomore and junior class offices.

In naming candidates for the offices, Braxton said, UP has "applied high standards" in determining whom to nominate for the posts.

"It is my sincere belief that these candidates will most closely reflect your opinions and feelings simply because they have been nominated by a large cross-section of the student body," he added.

Braxton said that as election day approaches, UP "asks the students to closely look at our outstanding slate of candidates for both the class offices and student legislature."

"We can faithfully promise that if our candidates are elected they will work diligently and realistically toward fulfillment of student government needs and will incessantly work to improve student government by reflecting accurately student opinion."

Evans Delays Signing Bill

Student Body President Sonny Evans has delayed signing the bill which will pay off the \$451.06 debt incurred by the Tarnation, former campus humor magazine.

Evans said he was investigating the background of the Tarnation to see if there is any legal justification for the legislation.

He said he was going to check with the printshop which the money is owed to determine the nature of the debt and to get an itemized accounting for it.

Evans was unavailable for a statement concerning what action is planned on the bill. He stated that he was "undecided" as to just what action would be taken. He is presently conferring with party officials concerning the proposal.

The bill was introduced in the Student Legislature two weeks ago by Ed Levy, UP. The proposal was passed in last week's legislative meeting, but against Student Party opposition.

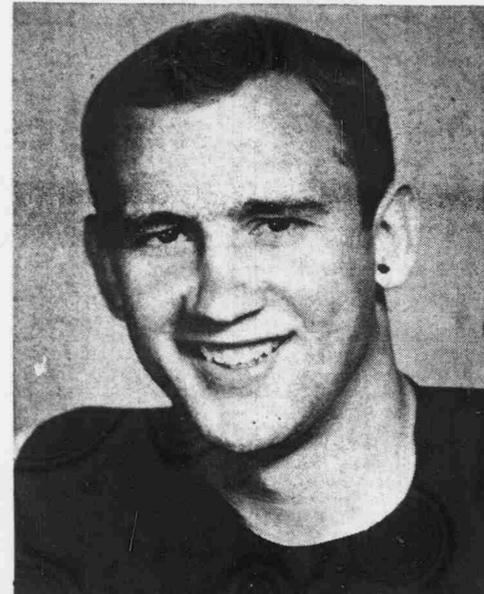

If the bill is not signed or vetoed by Nov. 11, it will become law.

"If we want to beat the Russians to the moon, do we want to do so badly enough to spend the millions of dollars that might instead profitably be invested in a half dozen other promising lines of scientific inquiry?" he asked.

Dr. Waterman said that under conditions as we now know them, flights to the two nearest planets, Venus and Mars, would take years rather than hours.

"Thousands or millions of years would be required under present conditions to travel to any of the stars," the scientist declared. "Even if we could travel at the fastest speed known—that of light—186,000 miles per second."

Waterman said Russia's first in the launching of Sputnik was a major disappointment to American scientists, but he cautioned against "A hasty and ill-considered effort to right the situation" that would "turn things upside down."

NEW POSITION—Carolina's former end Jim Jones will get his first crack of the year at center today against South Carolina. Jones played some at center in 1955. He has been switched due to the injury of Ron Koes and Jim Davis, the Tar Heel's number one and two pivot men.

Tar Heel-S.C. Contest Will Have TV Audience

By BILL KING

A couple of old Southern gridiron rivals will carry their exploits onto the verdant Kenan Stadium turf here this afternoon, and the 2 o'clock kickoff should commence an interesting Atlantic Coast Conference struggle to be viewed by about 25,000 fans plus a large home television audience.

It's the Greater Universities of North and South Carolina in the 33rd renewal of a series which had its inception back in 1903. Since then, the North has built up a tremendous edge of 22-6-4. But last season, the Gamecocks leveled a 14-0 shutout at Jim Tatum's warriors.

Bands To Add Color At Game

Saturday will be a colorful day on the campus of the nation's first state university. In addition to the North Carolina-South Carolina football contest, termed by one newspaper as the "Clash of the Wrecks," the day will mark the 16th anniversary of High School Band Day.

A total of 60 high school marching bands, all in colorful uniforms, will add to the spectacle of the half time show in Kenan Stadium. Imagine yourself sitting in one of the stadium seats with over 4,000 performers in uniforms of various shades of Red, Green, Blue, Yellow, etc., stretched out on the green turf below.

Miss Kathryn Siphers, Director of the Drexel N. C. High School Band, will be the guest conductor. She will lead the massed bands in a program especially arranged by Herbert W. Fred, director of UNC band. Her bands have consistently won superior ratings in state contests.

The program will include: "Pillgrim's Chorus" from "Tannhauser," "Dixie," "God Of Our Fathers," a novelty arrangement of "Working On The Railroad," and the two university alma maters.

The UNC Marching Band will add further color to one of the fall's biggest weekends when they present "A Salute To Carolina Industries" before the game begins. It is an abridged version of the show the band presented at the Maryland game. Be sure to be in your seat by 1:40 p.m.

Suspect Freed In 2 Shootings

GEORGETOWN, Ky., Nov. 8 (AP)—Robert Terry Jr. of Norman, N. C., said today the man being held here was not the motorist he saw shoot a North Carolina highway patrolman to death last Tuesday night.

Terry told police he hitchhiked a ride with the gunman before the man shot Highway Patrolman Wister Lee Reece, 39, near Ellerbe. Terry was brought here today by three North Carolina state police officers to check the identity of a man who gave his name as Kenneth Combs, 24, of Cincinnati.

Meanwhile, police at Bristol, Tenn., were holding a 27-year-old Buffalo, N. Y., man for identification in connection with the slayings. Authorities said the man, being held without charge, was picked up as a hitchhiker. They said the arresting officer noted a resemblance between the man and a description of the killer issued by North Carolina authorities.

Kentucky state police continued a farm-to-farm search for a man who abandoned two cars in Central Kentucky yesterday. One of the cars was abandoned near Stanford, Ky., and another, this one wrecked at Lancaster.

Police believe the driver of these wrecked cars was the same man who killed Reece, and an hour later shot to death another patrolman, J. T. Brown, near Sanford.

Combs was not freed immediately. He was unable to pay a \$25 fine in police court for vagrancy and loitering today. These were the only charges which had been filed against him since his arrest yesterday.

It should be a battle of the avengers as both teams suffered losses last week, and both need a victory today in order to shoot for a winning season. Last week mighty Tennessee smote down the Tar Heels, 35-0 and Maryland edged by South Carolina, 10-6.

The Tar Heels (4-3) hold victories over Clemson, Miami, Navy and Wake Forest and have lost to Maryland, N. C. State and Tennessee. The Gamecocks (3-3) have beaten Wofford, Texas and Furman, while losing to Clemson, Duke and Maryland.

Injuries will take some of the luster off this afternoon's contest, as both teams are below par physically. The Tar Heels will probably miss the services of halfback Don Coker, guard Jack Lineberger and center Ron Koes in addition to several other second unit men. It now appears that backs Jim Schuler and Emil DeCantis will be ready to go.

"The five-bitten Gamecocks are reportedly in only "average" physical condition with a host of "doubtfuls" making a starting lineup hard to predict.

The game will bring together a couple of coaches who should know each other pretty well by this time. Warren Giese, head man at SC now, once played and coached under Tatum at Maryland—This was only three years ago. Tatum would like a little revenge for the South Carolina victory last season and Giese would like to continue his mastery over his old boss.

The oddsmakers call it a toss up. Both teams are capable of busting loose with tremendous offensive power, but nobody wants to venture a guess just who will be on the long end of the count this afternoon.

The Gamecocks are a running ball club, and rightly so because they have a couple of halfbacks named King Dixon and Alex Hawkins who compare favorably with any backfield duo in the country.

The probable starting lineups:

Pos.	USC	UNC
LE	Derrick	Payne
LT	D. Rogers	Pell
LG	Weston	Swearingen
C	L. Rogers	Jones
RG	Addison	Furjanic
RT	Kompara	Blazer
RE	Beall	Turlington
QB	Spears	Cummings
LH	Dixon	Schuler
RH	Hawkins	Goff
FB	Johnson	Gaca

These are the two men the Tar Heels will have to watch closest. Both can do about everything with a football, but their forte is moving the leather along the ground.

South Carolina likes to use the option play, with the two aforementioned halfbacks doing the chunking. The loss of quarterback Bobby Bunch has weakened the quarterback slot, thus Giese makes little use of his other two signal-callers, Stan Spears and W. L. Strickland.

The Tar Heels, offensively, will again be counting on the potent running of such men as Schuler, DeCantis, Daley Goff and fullback Giles Gaca to blend with the capable pitching arm of sophomore quarterback, Jack Cummings. The ever-dangerous Cummings has handled the club admirably since he became the number one QB against Wake Forest two weeks ago.

Cummings, indeed, could make a lot of difference today. He has

Knee Injury Sidelines Joe Quigg For Season

The Carolina basketball team received a tremendous blow yesterday when it was learned that number one center Joe Quigg will be out for the remainder of the season due to a knee injury sustained in an intrasquad scrimmage Thursday night.

Dr. Hedgepeth, head physician at the infirmary, said yesterday that "Quigg will undergo surgery this morning for a fracture of the right tibia which extends into the knee joint. Consequently," Hedgepeth said, "Joe will be forced to miss the basketball season."

Coach Frank McGuire had said

earlier in the day that he was afraid that Quigg's injury was much more serious than at first thought. "They are the things which happen to a team after a big season," McGuire said. "We got lots of good breaks last year, and now we're having some bad ones." McGuire was not available for comment after it had been definitely confirmed that Quigg would miss the season.

The mishap occurred in a scramble for a rebound, as Quigg was knocked back and collided with sophomore Lee Schaffer and fell on the knee.

Trip To Moon Said Possible

SAN ANTONIO, Tex., Nov. 8 (AP)—Dr. Alan T. Waterman, director of the National Science Foundation, today said a trip to the moon is possible—if the American people decide they want to spend tremendous sums of money for such a project.

He took part in a symposium at the Southwest Research Institute's conference on "Science in the Next Decade."

Dr. Waterman said the trip would take 10 hours, and the first trip could be a landing or simply circling the moon and returning.

"If we want to beat the Russians to the moon, do we want to do so badly enough to spend the millions of dollars that might instead profitably be invested in a half dozen other promising lines of scientific inquiry?" he asked.

Dr. Waterman said that under conditions as we now know them, flights to the two nearest planets, Venus and Mars, would take years rather than hours.

"Thousands or millions of years would be required under present conditions to travel to any of the stars," the scientist declared. "Even if we could travel at the fastest speed known—that of light—186,000 miles per second."

Waterman said Russia's first in the launching of Sputnik was a major disappointment to American scientists, but he cautioned against "A hasty and ill-considered effort to right the situation" that would "turn things upside down."

Events Elsewhere In The World

Acceptance

WASHINGTON, Nov. 8—(AP)—The White House reported today an immediate and gratifying acceptance of President Eisenhower's plans for a scientific big push to overtake Russia in satellite and missiles.

And a White House caller, Sen. Bridges (R-NH), supplied a guess at what it will cost: one or two billion dollars a year extra.

Two billions would just about equal what it cost to develop the first atomic bomb back in World War II. It would almost double the amount now being spent on missiles—2 1/4 billion dollars this fiscal year.

But Bridges, even though he is usually counted among the econ-

omy demanders in Congress, predicted Congress will appropriate whatever is needed to get the job done.

Tornadoes

ALEXANDRIA, La., Nov. 8—(AP)—Vicious tornadoes, their oncoming rush cloaked in thunder and rain, suddenly lashed out at four southern states last night and today, leaving 12 dead, more than a hundred injured, hundreds homeless.

The total damages easily will reach several million dollars.

Alexandria, a city of 40,000 in central Louisiana, absorbed most of the fury. Three died in that area. Louisiana recorded four other deaths. Texas had three and Mississippi two.

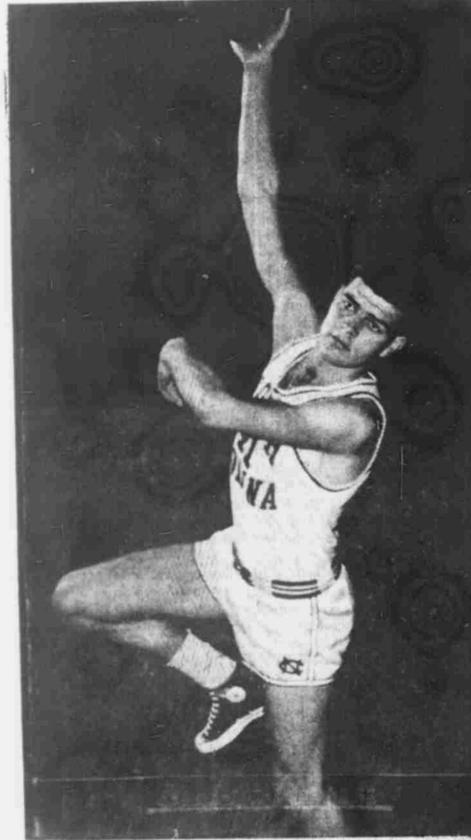

A baby twister also struck Selma, Ala. but no one was injured.

Sputnik Each Month

WASHINGTON, Nov. 8—(AP)—The head of the U. S. satellite program said today "I wouldn't be surprised" if the Russians launch a sputnik each month until the end of 1958.

Dr. John P. Hagen, director of Project Vanguard, also told a news conference he expects an extra push for his own program for the administration's new emphasis on missiles and science.

But he didn't change previous estimates that the United States will first get a test baby moon up next month and a full-fledged satellite in March.

SHARPSHOOTER JOE QUIGG
