Officials Make Plans For New Student Union

The Building Committee of the Graham Memorial Board of Directors submitted their plans for the new student union to Chancellor William Aycock at the Chancellor's Cabinet meeting yesterday morning.

The plan calls for a 150,000 sq. ft. building, which would cost approximately \$2,250,000, the plan set the location of the new union for Emerson Field, possibly to be joined to Lenoir Hall, in order to provide cafeteria facilities.

The building would angle towards Winston Dorm and Woolen Gymnasium.

Included in the new building would be a special office for the President of the Student Body, an office for the Attorney-General and his staff, an office for the executive secretary, and office space for the secretary, treasurer, and other student government officials.

Also there would be two large chambers which would serve for the Student Legislature, the Dialectic Senate, and the Philanthropic Literary Society, as well as an office for the vice-president of the student body.

To meet the need of supplying a place for defendants and witnesses to wait before appearing on trials, the committee recommended specially constructed judicial chambers with ante-rooms.

Also included in the plan is enlarged space for the Daily Tar Heel, The Yackety-Yack, and the Carolina Quarterly.

Included in the building also will be space for the Student Activities Fund office, a chamber for the Order of the Graft, which will serve as a meeting room, an office for the director of the union, as well as for the assistant director, the activities board president, the activities board, an information desk,

and custodians' quarters.

The building, if accepted and financed will house a bowling alley, a billiard room, a book store, a ping pong room, a soda fountain-snack bar, two television lounges, an indeterminate number of quiet lounges for study, a main lounge, music listening and playing rooms, meeting rooms for 10 to 200, a barber shop, a photography dark-room, a post office, and art and crafts shop.

There will also be a 750 seat auditorium, which will house the free film series, the foreign-film series, the Petites Musicales, and the Petites Dramatiques, and a campus night club, which will apply facilities more conducive to dancing than the current Rendezvous Room, according to the committee.

There is also a possibility that here will be a large segment of the building used as a religious center including the Y.M. and Y.W.C.A.

Other organizations such as the Carolina Symposium, Carolina Forum, and Women's Residence, may have office space in the new building.

The plans will be reviewed by the Building Department, before being reviewed by the Administration, assigned a priority, and sent on to the General Assembly in Raleigh for an appropriation sometime next year.

The current building is planned on the basis that there will shortly be 10,000 students at the university, and that the present student union, Graham Memorial, is inadequate to meet the needs of the student body, according to Joel Fleishman, chairman of the Building Committee.

SAYING IT WITH A SONG — Hannah Kirby, Hope Sparger and Oliver Bloomer find themselves in a musical situation during rehearsal of Sound and Fury, the all-student musical production.

SOUND AND FURY FANTASY

'All I Do Is Dream Of You'

By BARRY WINSTON

Boy, what a messed up campus this is! Nothing ever happens right around here.

Just let me tell you what happened to me. Everything went fine Friday, see? I picked up my date

at the bus station when she got in from G'boro at 4:30 Friday afternoon, and then we had a great supper, and then we went to the dance that night.

I even managed to make my last class on Saturday morning. Then, Saturday afternoon, we tripped out to the patio to soak up a brew or two, and listen to some of that live music. So far, fine. And supper at the fraternity house was passable.

But then the trouble began. My date wanted to go to the Woody Herman Concert, and I wanted to stay at the house for the party that night. Finally, after three cries, and an "I'm-going-home-on-the-next-bus" routine, we settled on a satisfying compromise. We'd stay at the party for awhile, then go to the concert at Memorial Hall, and then go back to the house for the rest of the evening.

Nothing very complicated about that, is there? But just listen. We stayed at the house until eight o'clock that night, sitting around, sipping orange drink, and then my date announced to me that it was time to go to the concert.

Well, by that time, I was in that sort of mood where you're ready to

take off walking for New York if somebody suggests it, so I didn't argue the point. I just went upstairs and put on a tie, like a good little boy, and off we went for Memorial Hall.

I thought it was sort of funny, when we got there, because there wasn't another soul around, but I figured we must be a little early, so we went on in and sat down. Got the best seats in the house, too. After about fifteen minutes, and still not the first person had shown up, I was beginning to sweat it, and my date was beginning to look at me like I was a leper.

Fortunately, I had had the foresight to bring along a small supply of that orange drink, and that quieted her down a little. In fact, it quieted her down so much that she started snoring. How about that? An import, and she couldn't even hold a little bit of orange-aid!

Anyhow, there I was, sitting in Memorial Hall, waiting for Woody and his herd to show, and my date flaked out next to me. So then you know what happened? No, Woody didn't show.

But the curtains parted and there were a bunch of college students. College students! Six-fifty I

pay for a miserable ticket to a concert, and what do I get? College students!

I was ready to leave, but I couldn't get my date to wake up, and there was plenty of orange drink

Summer School Weekly Editor Is Announced

Davis Young, rising sophomore from Princeton, New Jersey, today has been appointed editor of the Summer School Weekly.

He has worked as a member of The Daily Tar Heel staff since September as reporter, columnist and his present position of feature editor.

In addition to his Daily Tar Heel work, Young has been active as a member of the Student Legislature, assistant publicity chairman of the Carolina Symposium, the Student Party and the Honor Council Jury. He will be an orientation counselor in the fall.

Young immediately appointed Barry Winston as associate editor.

Modern Venus Contest Will Be Derby Climax

A "Miss Modern Venus" beauty contest will climax events at UNC's 14th annual Sigma Chi Derby scheduled for 2:30 p.m. today at Kenan Stadium. Twenty-three coeds will compete in the contest.

Derby entries will come from the seven social sororities on campus

and from women's residence halls. The Derby will include the "Battle of the Coeds," pie-throwing events, relay races and other unusual competition.

In case of rain the Sigma Chi Derby will be held Thursday at regularly scheduled times, according to Jerry Long, Derby co-chairman.

The afternoon's activities will begin with a 2 p.m. parade in downtown Chapel Hill which will move on to the stadium. No admission will be charged and door prizes will be given.

The first Derby at UNC was staged in 1944 by the Alpha Tau chapter of the Sigma Chi fraternity. Since that first event derbies have attracted as many as 3,000 spectators. Throughout the country Sigma Chi chapters sponsor more than 100 such derbies each year.

Two Iranian Motorcyclists Speak Tonight

Issa and Abdullah Ommidvar, the Iranian motorcyclists, who have traveled 65,000 miles all over the world in an effort to build peace and intercultural understanding will speak tonight in Graham Memorial's Main Lounge in a program entitled "Across the Top of the World."

The program is designed to describe both the purpose of the Iranians' tour, and their experiences in the arctic with both the Alaskan and Northern Canadian Eskimos.

The world travelers will give short talks prior to showing slides on the arctic. This will be followed by a film of the summer life of the Alaskan Eskimo, and the winter life of the Canadian Eskimo. The film will last about one hour.

The two Iranians are also giving an exhibition of Iranian art architecture, weaving, and utensils in Morehead Planetarium. This is only the third time that the Ommidvars have opened the exhibit in the United States.

The exhibit comprises a large part of the 400 pound load that they are carrying around the world. The exhibition will held through tomorrow.

The Ommidvars, from Chapel Hill, will probably head south and visit the South and Central American countries.

On their tour, they have conferred with several heads of state, an exception being President Eisenhower, who was too busy, according to a letter that the two brothers received.

UNC Student In Two Car, \$700 Wreck

A two-car collision on U.S. 15-501 north and N.C. east in Orange County Sunday afternoon caused no injuries but did an estimated \$700 damage to both cars.

According to the Highway Patrol, a 1955 Plymouth, driven by UNC student James Ficklen Arthur, Jr., 20, of Sigma Nu House, was traveling east on N.C. 54 at an estimated speed of 35 m.p.h., made a left turn, and collided with a 1957 Chevrolet traveling on highway 54. At the time of impact the Chevrolet was reportedly going 10 m.p.h.

The driver of the Chevrolet was listed as James Earl Elrod, radio mechanic of Charleston, S. C.

Damage to the Plymouth's bent front fender, grill, and hood was estimated at \$300.

Damage to the Chevrolet's right front door, side, and front seat was estimated at \$400.

IN THE INFIRMARY

Students in the infirmary yesterday included: Miss Elizabeth Gregory, and Thomas Conger, Boyce Davis, Fred Gregory, Rossie Hardison, Frank Inman, William Lytle, Taylor McMillan, Willard Ramsey, Edward Riner and Charles William.

Arsonist Trial Won't Be Held In Current Term

HILLSBORO, N. C. (AP)—Solicitor W. H. Murdock said Monday a young Medical student who admitted setting 10 fires in Chapel Hill in January will not be tried during the current term of Orange Superior Court.

Murdock said 21-year-old Richard Thomas Satterwhite of McCain will remain in the Raleigh Institution for further observation and treatment.

The trial had been set tentatively for the term of Orange Superior Court which opened Monday.

Hospital officials said the youngster, who claims he is beset by uncontrollable urges to start fires, is not yet mentally competent to stand trial on the arson charges.

Satterwhite kept the Chapel Hill Fire Department on edge during his spree which included nine minor blazes. Another, at Swain Hall of the University of North Carolina, resulted in \$60,000 in damage.

Superior Court Judge Leo Carr ordered Satterwhite confined to the state mental hospital on Feb. 3 for 60 days.

Counselors' Meeting

The Women's Orientation counselor Training meeting will be Wednesday night at 8:30 in Hanes Hall. This meeting will take the place of the Thursday night's regularly scheduled meeting.

GM SLATE

The following activities have been scheduled for today at Graham Memorial:

Iranian Students, 7:30-9 p.m., Main Lounge; Student Council, 8:30-11 p.m., Grill Room; University Party, 7-10 p.m., Roland Parker Lounge I and II; Orientation Council, 4:30-6 p.m., Grill Room; Honor Council Commission, 2-4 p.m., Woodhouse Conference Room; University Club, 7:30-9 p.m., Grill Room; Legislative Finance Committee, 4-6 p.m., Woodhouse Conference Room; Women's Residence Council, 6:30-9 p.m., Woodhouse Conference Room; Women's Orientation Council, 7-11 p.m., Council Room; A.P.O., 7-9 p.m., Rendezvous Room.

Carrier Current Radio Set Up In Five Dorms

By WAYNE CHESTER

Never underestimate the usefulness of electricity, for it seems to be unlimited.

In Winston, Conner, Alexander, Joyner and parts of Cobb the students are currently receiving radio programs over their electric lines.

It's all part of an experiment being carried on by the Radio-Television and Motion Pictures Department at Swain Hall.

The experiment is called Carrier Current Radio, and transmission is carried by the electrical circuit which connects Winston, Conner, Alexander, and Joyner. Parts of Cobb dormitory receive the transmission through their steam lines which are connected with the other dorms.

This method of broadcasting involves no sound waves and its coverage is limited. However it would be possible to cover the entire campus with such a system.

This experiment is being carried out at 1645 kilocycles. It is operated by a transmitter located in the basement of Joyner Dormitory.

It has been operating on a test period for one week, and it is uncertain just how long the operations will continue. It is a technical experiment only.

The station has been playing music continuously from 7-11 p.m. The music is interrupted only by a tape recorded voice identifying the station.

Response from the students who live in the dorms which receive the Carrier Current Station has been good, and Swain Hall officials would like to hear from more of these students.

Well, by that time, I was in that sort of mood where you're ready to

ated by a transmitter located in the basement of Joyner Dormitory. It has been operating on a test period for one week, and it is uncertain just how long the operations will continue. It is a technical experiment only.

with proper facilities for sewage disposal and, as a result, have had to use septic tanks in an area where the soil is unable to absorb any excesses of liquid. When an outdated pump, which controlled the disposal, broke down, open sewage was literally floating around the neighborhood.

This posed a particular hardship for the student-parents, whose youngsters were prone to wander in and about the contaminated material.

Last week an extensive investigation of sanitation conditions in the area was begun. It was revealed, upon discussion with the residents, that the problem has existed for quite a while, with little or no relief. Open sewage was found resting at the bottom of several large ditches and many other swampy and polluted regions.

Women were found who cannot hang clothes in their backyards and who have to maintain constant vigilance to prevent their children from wandering more than a few feet away from the house.

They discovered that an unidentified woman had, on April 19, 1958, fallen into one of these open ditches and emerged covered with toilet paper and various other remnants of open sewage. Her identity remains a secret due to the fact that she does not wish any publicity to evolve from her mishap. The ditch was unlighted and was not roped off.

The unfortunate victim had no warning of her impending danger. Further investigation disclosed that a local construction company had dug the ditch and left it in that precarious condition.

Families have moved out in protest. Some, whose sewage was not affected, left because of the stench and the obvious health obstructions. Those who have stayed on have fought for correction or relief.

Since then several property owners, who rent in the area, have agreed to tie on to a sewer line which is being run through the neighborhood. The aforementioned ditch has supposedly been "landscaped." The "landscaping" consists of several layers of good, old Carolina mud. Geological tests, provided by a local geologist revealed that substances resembling human fecal matter and other questionable materials were still present, even in the top soil.

Interviews have been held with realtors, health inspectors, building officials, residents, etc., in an attempt to discover the causes and

locate the blame for this dilemma. They have come away with a variety of answers.

The problem remains obviously and emphatically unsolved, despite several claims to the contrary. Residents are willing and anxious to discuss the problem in hopes that the remaining offenders would tie onto the line and correct the other deficiencies.

In the next three days, The Daily Tar Heel will present statements from many of those involved.

In a statement given to The Daily Tar Heel, Young said, "I would like to express my sincere thanks to Mary Alys Vorhees, Curtis Gans, and Doug Eisele for the confidence they have expressed in me by urging me to seek this position."

"Along with the Summer School Student Body President, this is the most important and challenging job

on campus during the summer. I know that I will learn much from sitting in the editor's chair.

"To the students who will be here in the summer, I promise a lively and provocative paper. I would like to encourage all of you to apply for positions on it as soon as possible as there are a lot of good jobs left."

Senior Day will be held Wednesday, May 7, at The Patio from 3:30 to 12 p.m.

Festivities for the afternoon include a beer baseball game, a chipping contest, a casino with "gambling" tables, a show including the campus' best talent, and the annual Ugly Man Contest.

Following a barbecue supper, there will be dancing to the music of Nick Kearn's Combo.

In case of rain the party will be postponed until Thursday, May 8.
