

Quigg Returns To Carolina

By RUSTY HAMMOND
Joe Quigg, the handsome cager who gave Carolina its first National Basketball Championship, will return to the scene of his many triumphs today when he comes back to Chapel Hill to aid Frank McGuire and Dean Smith with the 1958 version of Tar Heel basketball.

JOE QUIGG ... returns to UNC

to pace Carolina to a 54-53 win over Kansas and the NCAA Basketball Championship.
Last year hard luck dogged the hustling Yankee in King McGuire's court when he suffered a broken right leg in an intra-squad game before the beginning of the season. The injury forced Quigg out for the entire season.

The other blow came to Quigg when the conference ruled that he would be eligible only for the first semester of this year if he chose to play. The ruling was a fair one, as Quigg had played 5 semesters before and had only one left.

At this point Joe signed with the professional New York Knickerbockers, deciding not to play ball with the Tar Heels this year and to sign a pro contract while he had a chance to do so. Teammate Pete Brennan joined Quigg on the Knicks while another former Tar Heel, Tommy Kearns, signed with neighboring Syracuse.

But this fall lady luck again failed to come through with a favoring smile. Quigg's leg was removed from the cast last March, but continued workouts and treatments failed to bring it around. The knee didn't respond, and Quigg found himself unable to make the necessary turns and rebounds.

After three weeks in the Knicks' training camp at Stamford, Conn., New York finally was forced to put big Joe on the disabled list for an indefinite period.

"Losing Quigg for possibly" the entire season is a tough break for

us," said coach Fuzzy LeVane of the Knicks. "He was one of the best pro prospects I have seen in college basketball in recent years."

Then when coach Frank McGuire was in New York for the World Series and business matters, he got together with some of the Knicks officials and came up with the solution. Why not let Quigg return to Carolina; for two purposes. First, to help out with the coaching of the frosh and varsity squads, and second, to try to get his knee back into top shape.

So, although Quigg is still the property of the New York club, coach McGuire and athletic director Chuck Erickson have invited him back to Chapel Hill, scene of many former successes. Quigg arrives today from New York, and Carolina fans can look forward to seeing him on the bench with McGuire and Smith during the basketball games.

Once again the name of Joe Quigg will be associated with Carolina basketball. It couldn't happen to a nicer guy.

Maryland Game On TV

GREENSBORO (AP) — The first of four regional telecasts of Atlantic Coast Conference football games is scheduled Saturday.

ACC Commissioner Jim Weaver announced the Maryland-North Carolina contest at Chapel Hill will be the TV feature.

The regional game will be carried in Maryland, the Carolinas and parts of Tennessee and Georgia.

Weaver said dates of the other three games for the regional hook-up will be announced early in the week before the Saturday games. Proceeds from telecasts are divided among the league's eight members.

Jaywalking was costly in the U.S. last year—2,600 were killed.

Wade Smith Is Athlete Of Week

Wade Smith, a 5-10, 170-pound junior from Albemarle, who both set up and score Carolina's winning touchdowns Saturday is The Daily Tar Heel's Athlete of the Week.

Smith, who had been running well all season, really poured on the steam Saturday to turn in one of the finest performances of his career.

After South Carolina had punted the ball out to its own 44 Saturday, Smith carried on the first play for four yards. After a Cummings to Goldstein completion had given the Tar Heels a first down on the SC 27, Ed Lipski ran for three yards to the 24.

Scores Only To

The Tar Heels broke out of the huddle into a split-T with an unbalanced line to the right on a 2nd and 7 situation. The ball went to Smith who shot off the left side (the weak side) and scooted to the one yard line before being pulled down from behind. On the very next play Smith cracked across left tackle for the touchdown, the only one scored in the contest.

In the last quarter, near the end of the game, Carolina gained the ball deep in its own territory. Once again it was Smith who broke loose for two long gains, one on a pass and one on a run, to cinch two first downs and the ball game.

Morehead Scholar

Smith got into nearly every game as a sophomore last year and built up a fine 2.3 rushing average. He is known on the team for his spirit and hustle. He is a Morehead Scholar and a member of Pi Kappa Alpha social fraternity.

Speeding was blamed for 13,209 deaths on U. S. highways in 1957.

ATHLETE OF THE WEEK—Wade Smith, a 5-10, 170-pound junior halfback from Albemarle is Daily Tar Heel Athlete of the Week. Smith scored the winning touchdown against South Carolina.

MILTON'S TRADITIONAL TROUSERS

Our new extra short rise model has created a new dimension in finer fitting trousers. If you've had trouble with stock trousers being baggy in the seat, our new model is for you. Many new interesting tones and fabrics—worsted shellands, India whipcords, and ultra fine worsted flannels. Worsted flannels at lowest price ever \$13.95

Milton's Clothing Cupboard

ABOUT OUR 97¢ TREASURES

Perhaps the most neglected treasure in our Old Book Corner is the 97c shelf.

It is here that the really nice books go when you fellows, in your buying wisdom, decide that they aren't worth the market price. It is here that overlooked first editions, and really hard-to-get books first come within range of the canny sharp-shooter.

For example, as we write this, the 97c shelf contains a very good copy of Stuart Chase's MEXICO, a wonderful old period piece, called AMERICAN FEMALE POETS, and a nice copy of Markham's biography of Sir John Franklin, the Arctic explorer.

Perhaps there's real treasure for you there. Come in and check up, anyway.

LOW TEMPERATURE SOLID STATE MASER RESEARCH

WITH YOUR MASTER OR DOCTORATE...

You, too, can PIONEER on such new frontiers

AT TEXAS INSTRUMENTS, YOU CAN APPLY YOUR graduate specialty under conditions of substantial freedom. Explore scientific horizons with outstanding associates... using facilities that permit work of highest technical caliber. Expand your professional potential in free exchange of ideas... in an atmosphere where you and your work are recognized as vital.

Favorable research climate is a major factor in the swift growth of this 28-year-old company whose sales rate has increased 20-fold over the last decade. Recognition of individual talent and achievement has helped Texas Instruments grow to be one of the 500 largest industrial companies in the country. To pace TI's leadership, the Central Research Laboratory will soon move its expanding scientific community into a new building designed to establish an even finer creative environment.

Avail yourself of this opportunity for self-expression in creative research. In addition, enjoy TI's generous personnel benefits as well as encouragement and assistance in personal development. TI labs are in the city yet away from downtown traffic... within minutes of fine residential areas, cultural activities, churches, highly rated schools and, of course, year-round outdoor recreation in the pleasant climate of the Southwest.

*While commercial application in the low temperature field is only a possibility, it is so closely related to TI's activities that we are engaged in a broad, basic approach to the problems involved. This activity is only one of some 20 subjects now under study at Texas Instruments — covering basic and applied research in data systems and earth sciences, solid state physics, materials, and devices; concentrating on semiconductors, electroluminescence, ferromagnetics, magnetic resonance, superconductivity, dielectrics, infrared, geophysics, computers, memories, and transistors plus physico-chemical studies of diffusion, alloying, crystal growth, and crystalline perfection.

choose your future

BASIC AND APPLIED RESEARCH — CENTRAL RESEARCH LABORATORY, MS and PhD level concentrating on semiconductors, electronic components and systems, military apparatus, data handling, geophysics.

RESEARCH AND ENGINEERING — SEMICONDUCTOR-COMPONENTS DIVISION. Transistors, diodes, rectifiers, capacitors, transistor circuit applications, test equipment, mechanization.

RESEARCH AND ENGINEERING — APPARATUS DIVISION. Radar, sonar, infrared, magnetic detection; computers, timers, telemetering, intercom, optics, microwave systems; transformers, lenses.

come and grow with us

A Texas Instruments representative will be on the campus in a few days to give you more details. Please contact your placement office before — October 30.
