

Men Report Health Affairs

Eight members of the University Division of Health Affairs are in Atlantic City for the American Medical Assn. meeting where they will present reports on recent medical findings here.

Dr. Wardfield Garson, research professor of experimental medicine in the UNC School of Public Health, will present a paper on "The Reiter Protein Complement Fixation Test as a Diagnostic Aid in Syphilis," along with Drs. William L. Bunch Jr., Atlanta, Ga.,

and Ad Haris, Chamblee, Ga. This will be in the section of the convention on dermatology.

Dr. Charles H. Burnett, in the section on experimental medicine and therapeutics, will make an address, "Changing Trends in Clinical Investigation." He is chairman of the Department of Medicine of the UNC School of Medicine.

In the section on military medicine, Dr. Pat Unger, assistant resident in surgery at UNC, will present a paper on "General Medical Problems of Cold Weather Practice and Chronic Cold Exposure."

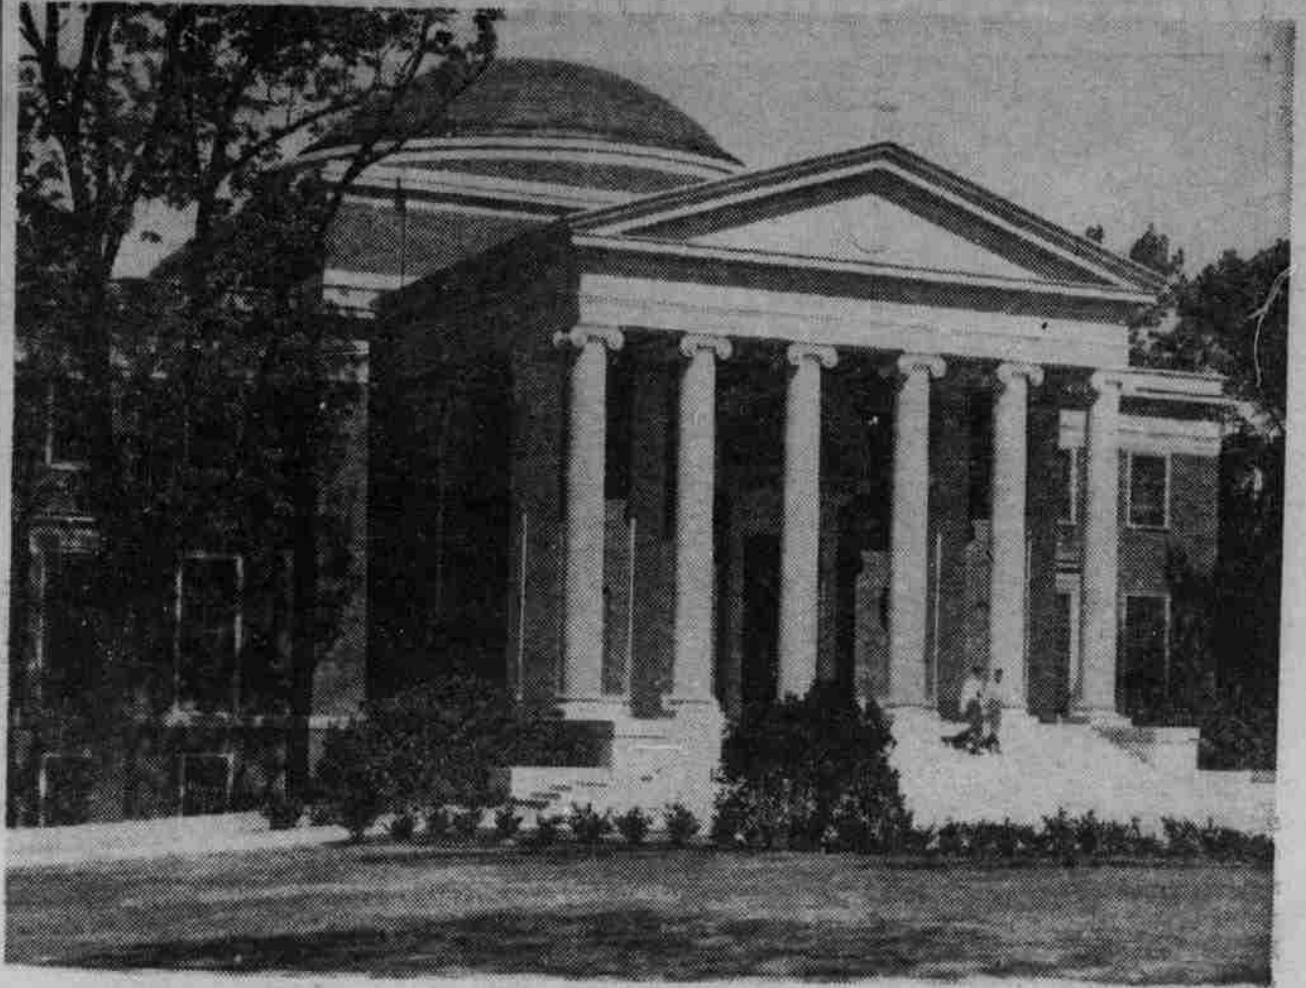

Dr. Samuel D. McPherson, clinical professor of surgery (ophthalmology) at UNC, will be a discussant on the subject, "Results of Iridencleisis in Negro and White Races."

Drs. Virgil C. Daniels Jr., UNC resident in radiology, and Ernest H. Wood, chairman of the UNC Department of Radiology and professor of radiology, will present a paper, "Radiological Findings in Diverticulitis of Cecum and Ascending Colon." This will be given Thursday, June 11, in the section on radiology.

Two other members of the School of Medicine faculty will present a paper titled, "Primary Oxalate Urinary Stones: Studies on Formation." The professors are Drs. Jach Hughes, clinical instructor in surgery (urology), and L. C. Roberts, clinical instructor in surgery. Along with them will be Dr. W. M. Coppridge, an alumnus of Carolina and former member of the medical faculty.

"Let truth and falsehood grapple."

Morehead Building And Planetarium

THE MOREHEAD BUILDING which houses the Zeiss Planatarium, one of the planetaria in the world, has shows continuously during the summer, illustrating the wonders of the stars and

heavens. The building was given to the University by John Motley Morehead and cost over \$3,000,000.

For Research And Education:

Univac: Large Digital Computer To Be Installed Here Soon

One of the largest digital computers being used for research and education at any university is scheduled to begin operations here August 13.

This is a Univac Scientific ERA-1105 digital computer to be installed in the addition to Phillips Hall now nearing completion.

On May 25, the Remington Rand division of Sperry-Rand Corp. started accumulating the plenum and fan bay parts. The machine was released for a quality control test the first of this month.

The quality control tests take more than two weeks to complete. Then the computer is to be shipped to Chapel Hill. About eight large vans will transport the computer from St. Paul, Minn. to Chapel Hill. Accompanying the vans will be company crews to install the machine here.

The first shipment is slated to leave St. Paul June 18; the last leaves June 26. After the Uni-

vac's installation, it must go through another series of tests. The last tests are scheduled for completion August 13.

Retail cost of the computer is two and a half million dollars, but the manufacturers, Remington Rand Corp., gave the University a fifty per cent educational discount.

The Census Bureau donated \$700,000 and the National Science Foundation donated \$500,000, the rest being appropriated by the State.

The Univac 1105 can perform fifty thousand additions per second. The input is four hundred characters per second. The high speed printer will print six hundred lines per minute.

The Univac ERA-1105 computer has floating-point operations, over 8,000 words of magnetic storage, over 32,000 words of directly operable magnetic drum storage, 17 Uniservo magnetic tape units, and a punched card and paper tape input-output.

A number of new courses in high-speed computation, both credit and non-credit, for graduates and undergraduates, are to be given or are under consideration with the addition of the new computer. Three courses are to be given August 17 through 28 on introduction to the use of digital computers.

A number of experts in the field have been scheduled to lecture in the series of courses.

The following lectures are among those who have been or will be invited: Professor John W. Carr III, research computation center, UNC; Dr. R. W. Hamming,

Bell Telephone Laboratories, and present President of the Association for Computing Machinery; and Dr. Heinz Rutishauser, Eidgenossische Technische Hochschule, Zurich.

MILTON'S BERMUDA HEAVEN

Over 2400 pairs in stock
Polished cotton in white, khaki or olive — \$3.95
White or khaki duck — \$4.95
Dacron/cotton pima poplin — \$8.95

Imported India Bleeding Madras in rich deep-toned plaids or hand-blocked prints—\$10.95
Also complete selections in bermudas in our Lady Milton Shop

Staffers To Meet

Current staff members of the UNC News and students interested in work with the weekly paper are asked to attend a planning session today at 5 p.m.

Beats will be assigned for the next issue this afternoon in the UNC News office, second floor of Graham Memorial Student Union.

The new deadline for news is Tuesday 11 a.m. for the Wednesday morning paper; however, people may send news to the office or call it in any afternoon except Saturday and Sunday.

The University at Chapel Hill is composed of 14 colleges, schools and more than 70 departments, institutes and other academic-affiliated agencies of higher education.

Chapel Hill is in approximately the geographic center of the state of North Carolina.
