Overthrow Of Castro Supported By Di-Phi

The Di-Phi Society passed its first resolution of the semester Tuesday night, having defeated 12 others since last September.

As originally stated, the resolution read "that the Government of Fidel Castro in Cuba should be overthrown."

An amended version was offered by Rep. Gary Greer, however, which condemned "the flagrant violations of justice by the Government of Cuba," but would oppose solving the Castro dilemma by "revolution or violence." The resolution, as amended, was passed overwhelmingly by votes of both representatives and visitors.

President Dave Matthews introduced the resolution, asserting that Castro had betrayed the Cuban revolution. Castro was not the revolution. He merely led it. The tens of thousands of people who fought in the revolution wanted freedom. In stead they had simply gotten an other dictator.

Matthews noted that elections have been postponed indefinitely, that Castro rules by decree, that military tribunals have been re-established in Cuba, and that for the first time in Cuba's history, revolution has been made a crime punishable by death.

Rep. Greer did not believe the Cuban people are capable of living without revolution or dictatorship.

Viceroy Jazz Album Is Still Available

For two empty Viceroy packs and \$1 you can still get a Viceroy Campus Jazz Festival album.

The offer expires March 31, 1960 not December 31 of last year as publicized.

Clement, Smith Chosen Sigma Chi Leaders

Charlie Clement is the new president of Sigma Chi fraternity.

He will be assisted by R. V. Smith, vice president; Doug Murray, secretary; James H. Miller, treasurer; social chairman, David Goode, and Marshal Basinger, corresponding secretary and rush chairman.

Cuba's historic base is different from that of the United States, and it cannot be expected that democracy will suddenly arise and assert itself.

If Castro were overthrown, there would be nothing to prevent another dictator from obtaining power, just as he did. Revolution is the only means of overthrowing Castro, and revolution would cause more blood to be shed in Cuba.

Rep. John Randall believed that Castro's economic and social reforms should be given a fair trial before we start advocating the overthrow of his Government.

The amendment to the resolution was passed when it seemed that the consensus was opposed to Castro's methods but would not favor his overthrow by violence.

Sunny Skies, A Warm Sun—Is Spring Here?

By SUSAN LEWIS

Spring is here.

And in the middle of January!

Despite the lack of cooperation by the calendar, the signs of spring are here: warm temperatures, sunny days, Bermuda shorts, short sleeve shirts, open-top convertibles, shades and open windows.

There is even evidence of spring fever, a disease known to have fatal consequences around or during exam time.

According to the U. S. Weather Bureau, Raleigh-Durham Airport, the last traces of winter were seen Jan. 7. Since then—and for the next few foreseeable days—the weather has been mild.

High temperatures today will range from the middle to upper 60's. Some cloudiness is forecast, but sunshine and warmth will prevail.

Highest temperature on record for this day was 76 in 1907. The lowest was 6 in 1895. A year ago today the thermometer registered 62.

Sophomores Form Cabinet Of 27 Members

The newly organized Sophomore Cabinet, a representative group composed of 27 dormitory and fraternity sophomores, held its first meeting in Graham Memorial, Monday.

Several projects were discussed and committees were set up to carry out the various ideas. Tim Burnett and Haywood Holderness were appointed to investigate future work on the scholarship fund begun by last year's sophomore class.

A committee headed by Kathy Fulewider will plan a class social. Serving on the cabinet are Dick Hendrickson, Johnny Clinnard, Max Wilkinson, Wade Hargrove, Pat Browder, Mike Sprinkle, Tim Burnett.

Bob Nobles, Jim Hynes, Frank Mansfield, Pete Gilchrist, Phil Phillips, Jay Deifell, Elizabeth Reed, Eddie Manning, Darden Eare, Bob Sevier, Allen Cronenberg, Haywood Holderness.

Nancy Liedeman, Phil Sowers, Wayne Foushee, Jim Gauden, Bill Farrell, Tim McGregor, John Laws and Tom Alexander.

Two Color Pages, New Cover To Be In Yack

The first part of this year's 448 page Yackety Yack will have a research triangle theme, according to Bob Austin, co-editor.

He says the Yack will come out in May, two weeks earlier than last year.

"We've had a good, sound staff this year," said Austin, "but now we're in a slack season waiting for proofs of the book."

The Yack will have a "very exciting cover," two color pages, and a new idea in the beauty section, each girl representing a month of the year.

It goes to press in March.

CORRECTION

The night courses in personal income tax returns will first meet Jan. 26, 7 p.m., not Jan. 19 as stated in Wednesday's The Daily Tar Heel.

Carolina Whips State, 62-51 To Stay Unbeaten In Early ACC Competition

Tar Heels' Pressing Defense Forces Wolfpack Into Mistakes

By ELLIOTT COOPER

Carolina added another defeat to State's rapidly expanding list last night in Woollen Gym by taming the Wolfpack 62-51 in a game that was featured by a slow, deliberate style of play.

For the Tar Heels the victory over their brothers from Raleigh marked their eighth win of the year and their third without a loss in conference play.

State remains at the bottom of the league with a 0-5 ACC slate.

Carolina took charge early in the ball game and controlled the action for the remainder of the contest. As expected the Wolfpack opened by holding the ball in the backcourt and slowing down the pace.

Carolina Moves Out

The Tar Heels answered this challenge by going out after the ball with a pressing man-to-man defense. This mode of attack proved to be quite successful as it forced State into numerous passing errors which were quickly converted into a Carolina lead.

The winners were once again paced in the scoring column by senior Lee Shaffer who was the game's high scorer with 20 points. Seven points behind was Ray Stanley who got into double figures for the first time in eight games. The Tar Heels' other double-digit man was York Larese with 11.

One of the outstanding performances of the battle was turned in by center Grey Poole who came off the bench in the second half and sparked the defense in addition to making several impressive assists. After the contest Coach Frank McGuire said, "Poole played a wonderful game."

McGuire Comments

As to whether or not the Tar Heels actually looked good in winning, the coach stated, "It was one of our better games, mainly because you have to have poise to play against a delayed defense."

State jumped to a quick 3-0 lead at the start of the game on a three-point play by Ken Clark after less than two minutes of play had gone by. Shortly thereafter Denny Luiz hit on a layup and the Wolfpack was in front 5-1.

Here the Tar Heels took charge, however, and grabbed off a 6-5 lead at the 13:34 mark on a jump by

First Half Lead

Carolina held its largest lead of the half at the very end when it was on top 30-17. Over the opening twenty minutes the Wolfpack made good on only three shots from the floor and all of these were layups. At the start of the second half State got hot and cut the Tar Heel margin to seven before Harvey Salz and Poole halted the advance with back-to-back field goals.

One of the most exciting plays of the half was staged by the Tar Heels who did everything right except make the shot. Poole pulled down a rebound under the Pack goal, passed to Salz who threw a behind the back pass to Larese. Unfortunately for York, he failed to make the layup.

17-Point Margin

The largest lead that the Tar Heels could muster was 17 point, and they did this three times with margins of 52-35, 5-41, and 60-43.

In the last five minutes Shaffer scored all the points for Carolina as he got two fouls and two field goals on layups after taking passes from Larese. State prevailed over this span, however, as Jon Ed Simbeck hit on three straight jumps to drop the winners final victory margin to eleven.

The freshman game went to State by a score of 62-58. Larry Brown was the high man for the Tar Heels as he tossed in 23 points.

University Has 2 New Teachers

Two appointments to the University faculty have been announced by Chancellor William B. Aycock following approval by President William C. Friday and the Board of Trustees.

Dr. Charles John Erasmus was named an associate professor in the Department of Sociology and Anthropology, and Dr. Ozro Luke Davis Jr. was appointed to the School of Education faculty. Both will begin new duties on Sept. 1, 1960.

Dr. Davis will be assistant director of the Fifth Year Program in Teacher Education, which is conducted by the School of Education and financed by the Ford Foundation's Fund for the Advancement of Education. He will also hold the rank of lecturer in the School of Education.

Dr. Erasmus is currently at Yale University as visiting assistant professor during the 1959-60 school year. He spent four years as a research associate at the University of Illinois, and two years earlier in Colombia as ethnologist and teacher for the Smithsonian Institution.

Dr. Davis has been with the National Education Association for two years as associate secretary of its Association for Supervision and Curriculum Development. Prior to that he held teaching and administrative positions in Texas public schools for several years.

Dr. Cleaveland Publishes Book

Recent studies into the federal government's scientific activities have all but neglected state government's role in the nation's science efforts.

"Science and State Government," recently released by the UNC Press, is the first major study attempting to distinguish the role of state government in scientific undertakings.

Written by Dr. Frederic N. Cleaveland, chairman of the Department of Political Science, the findings presented are based on studies in six states—California, Connecticut, New Mexico, New York, North Carolina and Wisconsin.

His book is an analysis of projects, expenditures and distribution of funds among four areas of governmental activity: agriculture, resources and public works, health and welfare, and higher education.

In the six states—chosen on the basis of diversity in size, population, economic environment, and geographic location—separate research teams investigated each state's scientific program. The six research teams were under the direction of a central planning committee.

IDC Lauds Administration; Says Dorm Courts Abolished

By HARVE HARRIS

The Inter-Dormitory Council last night praised the campus administration for helping to alleviate noise in upper and lower quads, and announced the abolition of separate dormitory courts.

IDC President Otto Funderburk commended the campus Buildings and Grounds Dept. for co-operating in removing soft drink machines from the first floors of dormitories in upper and lower quads and relocating the machines in the basements.

The action came following a petition by dormitory officers in upper quad in which they stated that the machines being used at night was not conducive to study.

Dormitory courts were announced abolished by action of the IDC at their last meeting before the Christmas recess. This leaves the Council with a single central court.

Clerk of the court James Kinney reported that 5 Parker dormitory residents were given official reprimands by the court after being found guilty on a charge of violating quiet hours recently.

An appeal to the central court was denied to 5 Cobb residents who were found guilty by the dormitory court and sentenced to removal from that dormitory. The

Playmakers Sponsor Student Productions

The Carolina Playmakers will sponsor their 189th series of student directed one-act plays Friday and Saturday night at the Playmaker Theatre.

Phillips IBM Machine Is One Of 8 In World

By JINNY von SCHILLING

The public eye is not often turned to the new addition of Phillips Hall which houses the unique Univac ERA-1105 computer. Preparations are now underway for this spring when the digital computer will play a leading role in the 1960 census.

There are only eight computers of its kind in existence and Carolina is one of two schools in the nation fortunate enough to have such a Univac on campus. It is also one of the largest digital computers being used for scientific and educational purposes.

The dedication of the Univac is slated for April. At this time it will be announced exactly how much work the computer will be doing in connection with the census which begins April 1. However, plans for tabulation of the North Carolina census here are definite. This program must be completed by

the following November as specified by constitutional requirement.

This two and a half million dollar wonder can perform fifty thousand additions per second, take in four hundred characters per second, and print six hundred line per minute.

Scheduled operations of the computer were begun last August after its installation earlier in the summer. In addition to the research project, Univac is becoming quite proficient in tic-tac-toe and checker games. Experimentation in music and language translation is well underway.

Courses in highspeed computation were initiated last August and continued during the fall. Next semester this special program will continue with courses in computer math to be offered both here and at N. C. State for senior graduate students.

Campus Chest Plans Drive: Hopes To Reach Goal Of \$3000

Goal: \$3,000.

This is the amount set by the Campus Chest planning committee as the aim for the 1960 drive, to be conducted the week of March 2 through 9.

Nancy Aubrey and Jim Crawford head the committee for this annual drive, which will solicit funds from students for three charitable projects, eliminating the necessity of

several smaller drives. Sponsored by the YM-YWCA and Student Government, funds collected will go this year to aid the World University Service and state, has not been chosen yet.

"Since this is the only big charity drive conducted on the campus each school year, we hope students will start planning now to give as freely as possible when they are

contacted by solicitors", Nancy Aubrey and Jim Crawford stated.

Working with Miss Aubrey and Crawford are Betty Green, secretary, and Frank Bullock, treasurer; Otto Funderburk, Jane Copeland and Walker Blanton, solicitations; Dee Daniels and Betty Mattern, publicity; Polly Wooten, posters, and Wade Smith and Kathy Duquesney, Special events.

SHOWN ABOVE are members of the 1960 Campus Chest Planning Committee. Seated from left to right are Betty Green, secretary; Jim Crawford and Nancy Aubrey, co-chairmen, and Frank Bullock, treasurer. Standing are Otto

Funderburk, Dee Daniels, Betty Mattern, Jane Copeland, Walker Blanton and Kathy Duquesney. Not shown are Polly Wooten and Wade Smith.
