## Fireworks Featured In Old Time Fourth

### Co-Chairmen YM-YWCA Are Named

Mary Hunter Kennedy and Pete Longnecker have been elected as co-chairmen of the YM-YWCA summer cabinet.

The two were elected at a joint meeting of the cabinet Monday night.

The purpose of the group is to organize a summer program patterned after the regular work carried on by the YM-YWCA during the fall and spring semesters.

The YM-YWCA will sponsor another square dance in Y Court Friday at 8 p.m.

In view of the success of the first square dance a second one will be held especially for the benefit of those who were unable to attend the previous occasion.

Miss Hunter, a senior, is a member of the Delta Delta Delta sorority and is from Charlotte.

Longnecker is a senior from Wilmington, Del. He is a member of Pi Kappa Alpha fraternity.

The cabinet also made plans for some campus activities and for (See YM-YWCA P. 7)

Fireworks, field events and a combo party at Kessing Pool will be featured in an "Ole Fashioned Fourth of July Celebration" Monday.

A little league baseball game in Emerson Field will kick off the day's activities at 3 p.m. The game should be over by 4:30 p.m. when the celebration will move to Fetzer Field where a series of field events will be held.

A box supper will be served about 6 p.m. at \$1.00 per plate for adults and 75 cents for children. A band concert directed by Ed Cottick will begin after supper.

Concessions will be available throughout the day.

A fireworks display will begin around 8 p.m. after which the celebration will move to Kessing Pool for a combo party with the Southern Gentlemen Jazz Combo, a five piece band. Hot dogs and cokes will be served.

The celebration is under joint sponsorship of the YM-YWCA and the Chapel Hill Chapter of the American Field Service Student Exchange Program.

The local chapter of the American Field Service Student Exchange Program was first adopted here in 1953 and is backed by various local civic clubs.

Pete Longnecker is the YM-YWCA chairman for the Fourth of July Program.

## 'New China' Shown As This Week's Free Flick

"The New China," this week's free flick, will be shown Thursday at 7:30 p.m. in Carroll Hall.

This documentary is the first full-length color film about the Chinese People's Republic to be shown in this country. Made in Moscow and Peking, it consists of five parts: "South China," "The Yangtze," "Hangchow," "New

Shanghai" and "New Peking."

The result is an integrated study of contrasts between the old and new China in regard to industry, agriculture and political and social changes.

Notable sequences show the ancient pagodas of Hangchow, the forbidden City in Peking and the

modern buildings of Shanghai; actual stage presentation of classics and modern plays; the folk festivals in Canton and Peking; crowds celebrating the first anniversary of the founding of the Republic and views of the most important personalities of the new government.

## Work Started On New Public Health Building

BY JOE MEDLIN

Work has begun on the new million dollar building for the UNC School of Public Health. The building is scheduled for completion in about two years.

The million dollars was provided by North Carolina voters in a bond issue last October.

The school has also been granted nearly three-quarters of a million dollars in federal funds for research and laboratory facilities.

The four-story building will be located on Pittsboro Road across from the School of Medicine.

"The new building will give us better working conditions and facilities than we now have," said Dean of the School of Public Health Edward G. McGavran.

"It will not give us sufficient space to notably increase our student body or faculty and staff.

"We are forced to give up some of the frills of a new building in order to obtain the space we badly need," Dean McGavran said.

"We hope for air conditioning, which we do not consider a frill, but a necessity since we have a large number of summer school students," he said.

About 150 regular students are enrolled in the School of Public Health each year. More than 700 students received instruction for one semester or less last year.

Over 600 students in various UNC schools and colleges take courses

in Public Health each year and over 300 students from other universities receive instruction at UNC's School of Public Health each year.

The school offers ten different degrees ranging from a Ph.D. to a Certificate in Public Health Nursing (C.P.H.N.).

The School of Public Health has nearly 300 graduates working in foreign countries in all parts of the world. It also has nearly 1,000 graduates working in the United States and over 500 graduates working in North Carolina.

"The main objective of the School of Public Health," Dean McGavran said, "is to train practitioners of Public Health who come from many backgrounds in the art and science of determining the health needs and health status of a community, and to help develop health progress to meet those needs."

The School of Public Health was founded in 1936 with a state appropriation of \$4,500 and a faculty of four professors.

Almost from the beginning, one of the major problems encountered by the school has been classrooms and laboratory space. As the school grew, the problem grew.

Today the school is housed in the basement of the School of Medicine and 13 other buildings scattered over a radius of three-fourths of a mile. The school presently maintains

a total staff of 153 members: 59 full-time faculty members, 29 part-time faculty members and 65 full-time personnel.

The UNC School of Public Health

is one of 10 such schools in the nation and one of two in the South. It is the only one in the South offering training in all fields of public health practice.

A tremendous amount of research is carried on by the school. Last year 76 scientific papers were published and 113 scientific papers (See Public Health P. 7)
