Khrushchev Predicts U. S. Defeat In Thailand Battle

Says It's Only Matter Of Time Until Rebellion

OBNOVA, Bulgaria (UPI) — Soviet Premier Nikita S. Khrushchev said Friday the U.S. troops sent into Thailand will be driven out and "blood will be shed there." He implied that the Thai people will compel American forces to leave and said "it is only a question of time." Regarding the dispatch of U.S. troops to Thailand by President Kennedy, Khrushchev said: "It is an unreasonable decision" and "does not bespeak a great mind." Khrushchev, in a far-ranging speech during a welcoming ceremony at this northern Bulgarian collective village, also said the Soviet Union will resume nuclear testing.

Describes Motive As Stupidity
He described as "stupidity" the President's dispatch of 1,800 U.S. Marines and 2,000 U.S. Army men to Thailand and said:

"The President has ordered American troops to land in Thailand. However, the Americans will be driven out of Thailand. It is only a question of time. They are afraid of not only losing Laos but also of losing Thailand. The best thing the United States could do is to give up playing the role of an international gendarme."

Khrushchev said Secretary of State Dean Rusk had signed an agreement with the Thai government on the stationing of American troops there.

Secretaries and ministers can sign, he said, but it is the people who make the final decisions.

Call Thai Rulers Feudal
"This agreement was signed with the feudal rulers of Thailand and the Americans are trying to keep these feudals in power," he said.

"Such agreements may be signed, but the people of Thailand will erase the SEATO pact."

"In Viet Nam," he said, "the French fought for seven years and the Americans may fight for 15 years. But they will get out of there."

"In Communist North Viet Nam where the people are in power, creative work is done. In South Viet Nam where the Americans are, blood is being shed." He turned to the subject of nuclear testing and said:

"We have exploded a certain number of nuclear weapons; a certain number has been exploded by America,

FOR NEXT YEAR

Housing Outlook Brighter

The outlook for next year's student housing is brighter than ever, according to Housing Director James E. Wadsworth, due to the construction of two new dorms, Craige and Ehringhaus.

The addition of these two dorms and the conversion of Cobb to coed housing means there will be about 1,000 more room spaces for men next fall and about 300 additional spaces for women. UNC dorms will now accommodate 4000 men and 1000 women.

There will, however, still be some three-man rooms next fall. About 17-20 rooms in Joyner, Winston, Aycock, Lewis, Manly and

Alexander will have three occupants.

According to figures from Dean of Student Affairs Charles Henderson, 52% of all students live in dorms, 10% in fraternities and sororities and 38% live off-campus.

The off-campus housing is broken down into three groups with the following percentages: 20% commute from home, 62% live in private homes or apartments and the remaining 18% have married students' accommodations supplied by the University.

At present there are 86 names on the waiting list for married students' housing. Dean Henderson said, "We expect about 105 vacancies during the summer months from June to September," so there will be rooms available for all people now on that waiting list.

Jet Flight Slated For Profs, Families

Students and faculty members and their immediate families may now make reservations for a special reduced rate round-trip flight to London this summer on a Pan American "Economy Jet" flight that is being arranged by the administration.

The flight will leave from New

York July 19 and return from London on August 30, giving travelers almost six weeks for touring Europe. The reduced fare is \$186 cheaper than the usual rate on Pan American economy flights.

One flight has already been filled, but another still has space available for faculty members and students who have been enrolled in the University for six months or more.

June 10 Deadline

Deposits of \$50 for each travel ticket must be made at the Cashier's Office, Room 1, South Building. Marvin Woodward, UNC cashier, stated that faculty and students may apply for the flight up to June 10. If the plane is filled prior to that time, however, no more reservations will be accepted. Children under the age of twelve and above the age of two pay half fare, or \$150 for the round trip.

For children under two years of age, the fare is 10 per cent of the full fare, or \$20 for the round trip.

Flights For Three Schools
Fred H. Weaver, secretary of the Consolidated University, is in charge of overall flights being arranged at all three institutions in the Consolidated University. Faculty and students at Woman's College in Greensboro and N.C. State College in Raleigh are making reservations for other flights.

Mr. Woodward has urged that those wishing to make reservations come by his office as soon as possible and make the deposit.

For trips to England, a passport is necessary—obtainable at the office of the Clerk of the Superior Court in Durham. Smallpox vaccinations are also required.

MAY ACQUITTED

Patrick May, recently charged with the theft of a tire from the yard of James A. Bowman of Chapel Hill, was tried Tuesday and acquitted of the charge.

Police officials and clerk of the court declined to comment on the case. May himself testified for the prosecution, he said, in order to clear himself of suspicion.

Mr. Bowman said he preferred to forget the entire matter, and expressed the view that a mistake had been made on his part.

Ronnie Anderson Wins Wall Street Journal Award

Ronnie Nelson Anderson, a senior in Business Administration, has been named 1962 recipient of the "Wall Street Journal Student Achievement Award." Anderson, a resident of Winston-Salem, was nominated for the UNC award by professors in the School of Business Administration.

The award was made on the basis of academic excellence in the area of Banking and Finance. A Student Achievement medal will be awarded the graduating student, in addition to which he will receive a year's subscription to The Wall Street Journal. The medal will be presented to him by the UNC faculty on or about May 15.

Anderson attended Davidson College before coming to the University. At Davidson he played freshman and varsity basketball and was a member of Sigma Chi Social Fraternity. He has received a Phi Beta Kappa invitation at UNC but has not yet been initiated.

He has also accepted an invitation for membership in Beta Gamma Sigma honorary business fraternity.

UNC 'Architecturally Rich' —Planning Director Tuttle

By JOE HODGES

If you were planning to build a new building on this campus, what type of architecture would you use, Georgian Colonial, Greek, Roman, Gothic, Moorish, or Contemporary?

This question is one of vital concern to Mr. Arthur N. Tuttle, Jr., Director of Planning for the University. A registered architect holding a Masters degree in architecture from Princeton, Mr. Tuttle is also a graduate of the University of North Carolina's Department of City and Regional Planning.

"Our campus is architecturally rich," he said. "From Old East to Burton-Craige dormitory now under construction it reflects the architectural thinking of a number of periods. Some buildings such as the Playmakers' Theatre show great architectural skill and are representative of the best of their period."

Style Must Change

"As Duke University is now realizing, it becomes impractical and often impossible to perpetuate an architectural style indefinitely. Technological, economic, and social changes produce changes in architectural practice. Changing requirements make it wise to take advantage of advances in construction materials and techniques. Our basic goal is to add required new structures to the existing campus in an orderly and

harmonious manner." Discussing the architectural future here, Mr. Tuttle said, "We will try to preserve and restore the architecturally and historically valuable structures while adding new structures of the best possible design."

Modern, But No Boxes

He indicated that future buildings will reflect the architectural trends of today. "We do not plan

to build aluminum and glass boxes, but proposed buildings such as the student union will be in contemporary styling."

When asked about the new addition to Hill Hall which contrasts red brick to the existing yellow brick, he said, "That is a solution that we will have to live with for a long time. It is an instance where it was impossible to perpetuate the original style."

Campus Briefs

YACK CHECKS

Checks for the following Yack staff members may be picked up at the Graham Memorial information desk: Annette Glaukopf, Jim Harris, Gene Templeton and Malcolm Kilpatrick.

STUDENT AID SCHOLARSHIPS

Students holding Student Aid scholarships must apply for renewal of the scholarships in order to receive them next year. Renewal applications may be obtained at the Student Aid office.

WOOLEN GYM BASKETS

All persons having equipment in baskets in Woolen Gym have been asked to remove the equipment and turn in the basket before the end of school. All baskets will

be cleaned out at the end of summer school and new baskets issued at the beginning of fall semester.

WUNC-FM SUSPENDS FOR SUMMER

WUNC-FM will leave the air on Sunday, May 20, for the duration of the summer.

WUNC-FM will resume broadcasting activities next fall. At that time, the frequency-modulated station, located at 91.5 on the dial, will continue its expanded 50,000 watt coverage.

The station has been broadcasting quality music and discussion programs of several domestic and foreign networks since December (with some interruptions) when its power was increased from 15,000 to 50,000 watts.

Hell Hath No Fury Like Steam Tunnels, DTH Learns

By HUBERT HAWKINS
The campus steam tunnels are for official use only, DTH reporters learned this week.

Gathering information for a feature story on the utilities plant,

they were seen entering a tunnel near Venable Hall. Worried campus police began a search through the passages in 180-degree heat.

Meanwhile the explorers had emerged out of the heat to cool

off at the Pine Room. Returning to a tunnel entrance in front of Joyner for pictures, they were found by the sweating policemen.

Dangers of such exploration were described by the Office of Student

Affairs. The intense heat, steam under pressure, and gas formation are possible hazards.

"We only send men down there about once a month for maintenance," said Edward W. McKnight,

superintendent of the central utilities plant, "and then we send them two at a time in case one passes out."

The tunnels originate from the central utilities plant, marked by

a 200-foot smokestack west of the campus. They run to the medical center and the new dorms, and beneath the campus as far as Cobb. University-owned buildings in town are also heated by system.

A Bit Of Deep Reading . . .

But Soon We Must Emerge . . .

. . . Who Really Doesn't Think Living In A Steam Pipe Is A Gas.
