

League Urges Voting

In an effort to remind local citizens of their civic responsibility to vote, the Chapel Hill chapter of the League of Women Voters is currently engaged in a voter-registration campaign entitled, "Your Vote Makes a Difference."

The League notes that if just one more eligible voter in each precinct in the country had voted in the 1960 election, the outcome of the entire election would have been changed.

The campaign centers around three Saturdays, Oct. 10, 17, and 24 which have been named as registration days in Orange County.

The League estimates that an estimated 40 million eligible voters will not use their right to vote in November.

"The country's poor voting record can be attributed to the number of non-voters who are eligible, but do not make the effort to register and vote," said Mrs. H. Stuart Willis, president of the organization. "Of this number, the great majority are women," she said.

The central theme of the registration drive, the importance of the single vote, was selected in conjunction with the Library USA exhibit at the New York World's Fair.

Other women's organizations are cooperating with the league in the local campaign.

Welcome Wanderers!

While you chaps were out carrying culture to the boondocks, the crew at the Intimate has not been idle. Here is a report:

IN THE NEW BOOK WORLD—Perhaps the most exciting of the new books was published while you were having final exams last June. In the event that you missed it then, we can tell you that **THE LIGHT THAT SHINES**, by U. N. C.'s own Chancellor Emeritus Robert B. House has been selling and selling all summer long. It's a wonderful picture of the University back in the days of Horace Williams, Kemp Plummer Battle and a dozen other's whom you probably think of as Dormitories. Five bucks will get you an autographed copy. Charles Schulz has had a sort of one-man opulation explosion, and now has half a dozen new books on the shelf, including a new PEANUTS number.

IN THE OLD BOOK CORNER—The old book stock has had its prices trimmed twice since you left, so that the old familiar faces ought to be sold, or at least cheaper, by now. Come in and check up.

On the other hand, there has never been a summer when we had so many libraries of old books come in. It will take time to get them all processed, but it should be a lively Fall for scholars! Ask us to boast about it.

The Intimate Bookshop

119 E. Franklin St.
Open Till 10 P.M.

Around The Campus

SG INTERVIEWS

Interviews for appointment to Student Government committees will be held from 2-5 p.m. Monday-Friday in the Student Government offices in Graham Memorial. Interested students should call 933-1257 for information and appointments.

COUNSELORS

Orientation Counselors who have not already turned in their orientation manuals at the GM Information Desk should do so today. Counselors are reminded to include a slip of paper with their name inside the manual.

GRANT RECEIVED

UNC's Memorial Hospital will receive \$987,375 in additional federal funds, according to an announcement by the State Medical Care Commission Friday in Raleigh.

AUTO CHECKS

Campus Police will setup several checkpoints on Chapel Hill

streets and the University campus tomorrow to check student auto registration. Student registrations will be cancelled if the required stickers do not appear on the windshield.

RECEPTION TODAY

The Cosmopolitan Club will hold a reception for foreign students, their host families in Chapel Hill and prospective club members this afternoon in the lobby of GM. The reception, scheduled for 4 o'clock, is open to all club members. John Cloward is Cosmopolitan Club president.

GMAB INTERVIEWS

Interviews for positions on six Graham Memorial Activities Board committees will be held should sign up for interviews at this week. Interested students the GM Information Desk. Positions are open on the Drama, Current Affairs, Publicity, Petite Musicale, and Free Flicks Committees.

Gregory, Chandler Appear In Durham Benefit Monday

Comedian Dick Gregory will bring his biting satire to Durham Civic Center Monday as a part of a program sponsored by Durham-Chapel Hill CORE.

Gregory will share billing with well-known folksinger Lee Chandler in the performance slated for 8 p.m.

Gregory, known as an ardent civil rights worker as well as a satirist, shot to national fame several years ago after he became an overnight success in a Chicago night club. His dry humor can be heard in picket

lines in Greenwood, Miss., as well as supper clubs in New York City.

Chandler, just back from a summer of civil rights work in Mississippi, holds a master's degree in music from Columbia University. He is perhaps best known for his recording of Stagger Lee.

Tickets are on sale here at Kemp's and the Record Bar. Cost is \$1.25.

Durham Civic Center is at the corner of Foster and Morgan Streets, one block north of the Jack Tar Hotel.

THE National Security Agency is a totally unique organization

... and offers creative research opportunities in the art and science of sophisticated communications

There is absolutely no other organization like it... no other organization doing the same important work, or offering the same wealth of opportunity for imaginative thinkers in the Liberal Arts, as well as the Physical and Engineering Sciences.

The National Security Agency is a major research arm of the Department of Defense, but its influence and responsibilities are far broader. It works closely with many industrial and research institutions; it has special access to scientific information at universities and other Government laboratories; and it enjoys close consulting arrangements with scientists of commanding stature. NSA staff members enjoy all the benefits of Federal employment without the requirements imposed by the Civil Service system.

What does NSA do that warrants this unique stature?

NSA approaches the subject of sophisticated communications from these original standpoints:

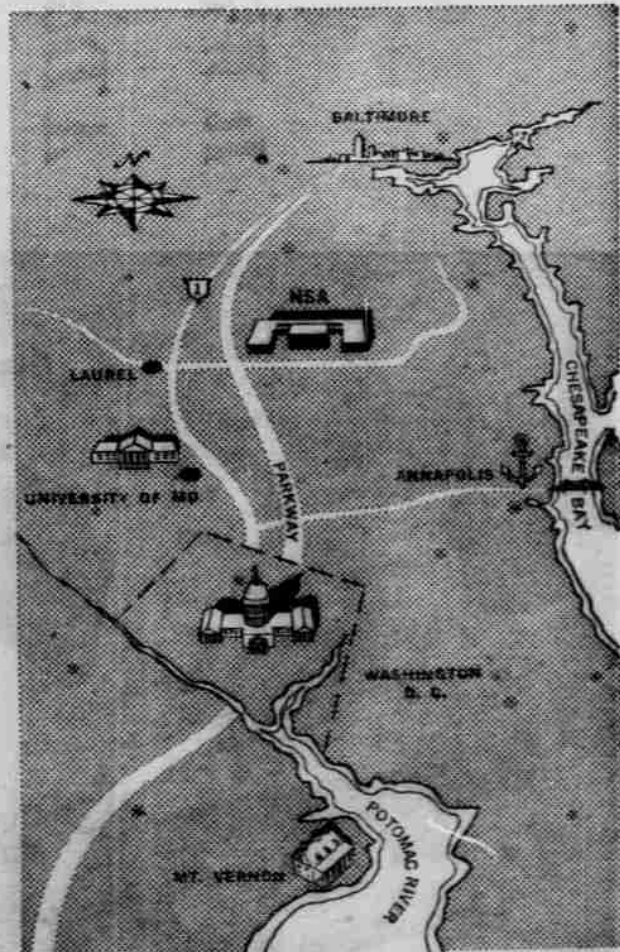

1. Creating secure communications systems and equipments unknown anywhere else, and devising special refinements for computers & edp systems that will increase our handling capabilities. This means that Communications Engineers, Computer Design Specialists, Mathematicians, Programmers, and Systems Analysts, all contribute to the design of antennas, transmitters, receivers, and terminal equipment... to experiments using new semiconductors, magnetic film, superconductive devices, etc., resulting in new logic circuits and memory units, better high-gain arrays for UHF radio systems, higher-capacity data han-

dling terminal equipment, more effective speech band-width compression... and scores of similar advances.

2. By the very nature of "secure" communications, assuring the continuing invulnerability of U.S. communications through cryptologic procedures and techniques. Because cryptology and its cryptographic counterpart are not taught elsewhere, mathematicians, scientists—and all others with appropriate intellectual curiosity—will be taught this challenging new discipline right at NSA. Work in this field may involve specially-designed computers, television, computer-to-computer data links, and edp programming. (Even music, philosophy, or the classics may be useful prerequisites for cryptology!)

3. Translating written data, and presenting the crux of the material in meaningful form. This is the home of the linguistics expert and the languages graduate—enabling the talented graduate to make the most of his or her particular gift, and quickly expand familiarity with other tongues. In all that NSA does, there is seldom any existing precedent. Only NSA pioneers in secure communications on this broad a scale, so only NSA offers the college graduate the best chance to make immediate use of his disciplined thinking... without years of post-graduate experience. All these features—along with its well-instrumented laboratories, libraries, and professional staff of specialists in amazingly varied fields—provide a stimulating academic atmosphere for individual accomplishment.

On-Campus Interviews for Mathematicians and Engineers will be held later. Consult your Placement Office for dates.

NSA is located in expanding facilities at Fort George G. Meade, Maryland—halfway between Washington and Baltimore. It is handy to transportation facilities, the University of Maryland and Johns Hopkins, suburban or rural living (in-town living, too, now that the new circumferential highways are completed)... and the Chesapeake Bay resort region.

LIBERAL ARTS SENIORS: Your PQT Application must be mailed before October 14th

This is most important: To apply for an NSA position, all students EXCEPT Mathematicians, Engineers, and Physicists must take the PROFESSIONAL QUALIFICATION TEST scheduled for Saturday, October 24th. Stop in at your Placement Office and ask for the NSA Professional Qualification Test brochure... fill out and mail in the application card enclosed inside... and bring to the test the ticket you will receive by mail.

Even if you are not sure of your career interests yet, get the facts on NSA opportunities now.
