PROGRAM HIGHLIGHTS

8:00 P.M. U.S.A. ARTISTS—NET "Jim Dine" This is the first of five programs on the coming-of-age of American art in the past generation—featuring contemporary American painters and sculptors—examining each artist individually. Thirty-year-old Jim Dine, not classifying himself among the Pop Artists, yet working concurrently with them, discusses his life and work. Produced against a background of Dine's home and what he describes as a bourgeois, middle-class life, the program portrays the artist's interest in "Happenings"—which Dine describes as having developed out of the artist's need to speak more directly with the viewer—and one of these "Happenings" is included in the film.

9:00 p.m. PERFORMANCE—UNC-CH "Italian Art Songs" John Hanks, tenor; Ruth Friedberg, pianist; and Adriana Ciampi, guest reader; all from Duke University, perform a song by Caccini, a number of songs by Respighi, and three of Boccaccio's poems set to music by Respighi. The program, performed in Italian, is accompanied by English subtitles.

Dental Assisting

Program Extended:

Deadline Is Friday

A new 10-month program in dental assisting will replace a popular three-month summer program at the University of North Carolina School of Dentistry.

The extended program will be offered for the first time beginning July 7. Twenty students will be selected.

The deadline for requesting an application is Friday, April 15. Any woman who is a graduate of an accredited high school and has a knowledge of typing is eligible to apply.

Applicants accepted for the course will be notified no later than June 10.

The new, more comprehensive course conforms to the requirements of the American Dental Association's Council on Dental Education. Graduates here will be eligible for certification as dental assistants.

Dental assisting students will be housed in the new private, contemporary residence for women students, Granville Hall.

Students will live under UNC rules and regulations governing freshmen women students.

Report Given On Siamese Twins

A roundup of mild events and minor operations at the University Health Center which you may not have read about yet:

TWINS — The Siamese twins — Althea and Dorothea Allen of High Point — had a combined weight of six pounds and 14 ounces when they arrived at N. C. Memorial Hospital here last April 7. When discharged from the hospital last weekend to return home, Althea was a healthy 17 pounds and Dorothea was a hefty 18 pounds and 11 ounces. The twins were surgically separated here last Nov. 8.

NO BREAKTHROUGH — the story of a potential scientific breakthrough which ended in disappointment was related by Dr. Erle E. Peacock Jr., UNC surgeon, during a television interview on "Science & Nature."

A young woman with a hand damaged beyond repair refused an arm transplant from an identical twin sister who was dying. The story was told to emphasize that even when medical problems in transplants are solved, some non-medical problems may remain. Who's to say who is to have whose arm?

OBSOLETE? — The use of new methods of treating broken bones ("Internal fixation") may not be nearly as dramatic as some of the medical literature would lead you to believe. Dr. R. Beverly Raney, UNC orthopedic surgeon, says that plaster casts are in no danger of becoming obsolete in the foreseeable future even though "inside methods" of holding fractures in good position continue to improve with more inert metals and better surgical techniques.

ABORTIONS — The ethical problems facing physicians were dramatically illustrated by Dr. N. J. Eastman of Baltimore in the first Merrimon Lecture here. Suppose you're the doctor and you know that women attacked by German measles during the first eight weeks of pregnancy have about one chance in four of giving birth to gravely deformed babies (often blind). Is it right or wrong to order therapeutic abortions, knowing that, on the average, three of the four destroyed embryos would be entirely normal, each a potential human being with a life expectancy of some 70 years?

FEMALE MOTORBIKISTS — Do coeds have motorbike accidents? Occasionally. In a four-month study of motorbike accidents on the UNC campus by the School of Public Health, three of 58 injured students were coeds — two of them were passengers and the other was riding a borrowed vehicle. With more than 600 two-wheel-

ed motor vehicles on the campus now, probably less than a dozen are registered to female operators.

DEAF CHILDREN — Parents of hard-of-hearing preschool children who met at Memorial Hospital to form a Statewide organization were told how to help their youngsters learn to speak. But they were cautioned "not to expect overnight miracles. It takes love, affection, patience and time."

PROLIFERATION — Although nothing has been done scientifically yet to prove that automatic toothbrushes are superior to hand-operated toothbrushes, manufacturers now have 90 different electric toothbrushes on the market. Dr. Don L. Allen of the UNC dental school told pharmacists that a good good job of caring for the teeth and gums can be done with either manual or electric brushes, if used properly. He added a word of advice: "Don't scrub your teeth. Brush your gums."

POPULATION PROBLEM — Who is responsible for the excess births creating a severe population problem in the U.S.? Dr. Lincoln H. Day, Yale sociologist, told the UNC Seminar on Population Policy that almost every segment of the population is contributing to the excess, some more than

others, of course. The only groups that seem not to be contributing to the excess are the foreign-born, the Jews and the college-educated Negroes. Urban whites, for instance produce a proportionately smaller share of the total excess births, yet more than a third of all excess births originate with them.

DANGER — The public hasn't been properly educated to the damage which can be done with home reliner and denture repair kits, says Dr. David P. Dobson, head of the dental school's Department of Prosthodontics. Do-it-yourself dentistry with drugstore products can cause facial muscles to be pushed beyond their physiological limits. The results: fatigue, soreness and pain.

CONCERT MONDAY — Allied Arts will present the Durham Civic Choral Society singing Vivaldi's "Chamber Mass" and Norman Dello Joio's "To St. Cecilia" on Monday.

The Society will be accompanied by the Triangle Symphony Orchestra under the direction of Robert Barstow. The public is invited to attend this free concert at 8:15 p.m. in Baldwin Auditorium on the East Campus of Duke University.

What is an adequate and honest sex ethic for the unmarried, especially as it involves the use of birth control methods?

In particular, what should university health services do when birth control help is requested by unmarried university men and women?

Dr. Joseph Fletcher will address himself to these and other social questions in the final Seminar on Population Policy at the University here this week.

He is the Robert Treat Paine Professor of Social Ethics at the Episcopal Theological School in Cambridge, Mass. His topic will be "Sex and the Unmarried: Morals Re-examined."

The lecture will be at Carroll Hall at 8 p.m. on Thursday, under the sponsorship of the UNC Population Program. The public is invited.

Professor Fletcher has a varied social experience as a coal miner, an auditor's assistant, rope factory worker, resident worker in a New York settlement house, and social research director for the National Council of the Episcopal Church.

He was ordained in America, served as a curate in a slum parish in London, was chaplain in a Southern woman's college and then dean of the Cathedral in Cincinnati.

For nine years he was dean of the Graduate School in Applied Religion at the University of Cincinnati.

He has preached and lectured in more than 30 universities in the U. S., Canada, Latin America, Australia, Japan and Southeast Asia.

Dr. Fletcher is president of the Human Betterment Association of America and a director of the Euthanasia Society of America and the Planned Parenthood League of Massachusetts.

A new book, "Situation Ethics: The New Morality," will be published this month.

color-framed stripes on clipper cool batiste oxford...exclusively GANT

Bold Stroke—Gant creates a handsome new expression in stripes by framing their edges with a second color. This luxuriant cotton oxford button-down comes in color-framed stripings of dark blue on sea-blue ground; loden stripings on bamboo ground; or rust stripings on maize ground. Hugger body. About \$7.50 at discerning stores.
