lected, the Chancellor said.

The University's Chancellor stated that his action reflects his conviction that:

1. It is the responsibility of the University to provide nec-

essary housing for students. 2. There is an obigation to provide the best facilities possible within the limitations imposed by the state ceiling on cost of construction (\$3,000 per occupant regardles of the source of funds.) An increase in this figure now seems most desirable.

3. The location of the building adjacent to Kenan Stadium would detract from the natural beauty of the surroundings, and all other possible locations must be considered instead.

The federal government has loaned \$3,000,000 to build the structure. Chancellor sitterson's action in ordering a new look at plans does not affect this allocation.

Student Government Given To All By UNC Trustees, Administration

Second In A Series

By JIM APLIN

Special to the DTH There has been much talk about judicial reform this year. Earlier in the fall an ed of the most well-informed student leaders, submitted to the faculty an elaborate proposal for re-organization of the judiciary and a re - definition of student conduct rules. This proposal was studied by the Faculty Committee on Student Discipline and certain recommendations were made to the judicial leaders concerning it.

These recommendations were not all that we had hoped for, and many students have expressed their disappointment at the faculty's view on judicial reform. How-

the alleged controvery we They have, however, the powfacts of life.

First, there is no such thing as "student autonomy." We Ad Hoc Committee, compos- are not an isolated community, and we cannot expect to be treated as such. Our student government is a "gift" from the trustees and the administration, not an inalienable right. Second, we exercise the po-

must recognize several basic er to enforce their definition of what responsibility is. And this is the crux of the matter. The administration and the Faculty Committee on Student Discipline do not feel that some of our proposed judicial reforms are responsible reforms. In other words, there is a divergence in moral standards and philosophy between the students and the administration in the area of the campus code, women's rules, etc. Now, our position may be correct, and we think it is, but we cannot enforce our own standards of conduct without the consent of the administra-
