4th Celebration Planned Tuesday

Since it just so happens classes will be held next Tuesday, which is July 4th, by the way, and since students like to enjoy themselves, they should be aware of how the Town of Chapel Hill celebrates the holiday.

More than two dozen local civic groups will cooperate in staging this year's traditional old fashioned Fourth of July celebration, sponsored by the local American Field Service chapter.

The 14th annual event will be staged as a combined family picnic dinner and festival on the University Fetzer Field.

High point of the program will be the half-hour free fireworks display, to be staged at dusk under sponsorship of the Kiwanis Club and under supervision of the Chapel Hill Fire Department.

Coordinator for the entire event this year, Roland Giduz, said that all representatives of the cooperating groups that would participate in the celebration are to meet for a planning luncheon at 12:30 p.m. Thursday in Chase Cafeteria.

He said plans were being made for at least 1,000 persons at the picnic dinner and at least 4,000 persons at the fireworks display.

Profits from the affair will pay the costs of Chapel Hill Senior High School pupils going to other countries as American Field Service students. This is the 14th year Chapel Hill has participated in this world-wide exchange program. About \$1,000 profit is hoped for from the "Fourth" celebration to continue sponsoring the project here, Giduz said.

To date, he noted, the Altrusa Club, with the help of the Carr-

boro Women's Civic Club has agreed to serve the fried chicken dinner. A number of civic clubs, including Rotary, Kiwanis, Sertoma and Jaycees, have agreed to attend the picnic dinner en masse in the place of their regular meeting.

The Chapel Hill Boy Scouts, under the direction of Dean Hale, will stage a formal flag-raising ceremony, and the Junior Service League will again conduct its popular pet show.

Graham Memorial will sponsor the 6 and 7-8 String Band tonight at 8 p.m. in the Rendezvous Room.

The 6 and 7-8 String Band combines Boston's Jim Field, formerly with the New York City Ramblers and the Charles River Valley Boys with the Watauga County Squirrel Shooters who won the statewide Campus Talent '67 competition which was sponsored by WGHP-TV in High Point.

The members of the band include Jim Field, lead singer and rhythm guitar, who is a Harvard graduate in English; Ray Blackwell, the leader who plays banjo and guitar, is a psychology major at State; Bill Peacock, playing rhythm and lead guitar and sometimes even sings, is a Product Design major at State; Frank Greenhouse, mandolin player for the band, is majoring in Architecture at State; Al McCanless, band violinist, is a Pharmacy major here at Carolina; and Tom Smith, bassist, is an Industrial Arts graduate student at N.C. State.

UNC Gets \$3.5 Million Dental Grant

The UNC Dental Research Center received a \$3.5 million grant Friday.

The grant, to be awarded for a five year research program, is part of a new federal program for the support of the development of dental research centers in university settings.

UNC's center will receive \$444,000 during the first year of the program.

Dr. Andrew D. Dixon, assistant dean for research at the UNC School of Dentistry and program director, said the

federal funds will permit expansion of the nucleus of highly qualified research personnel already here.

The School of Dentistry is one of five institutions selected for participation in the new program which encourages institutions to develop research and training centers on a broad interdisciplinary base designed to bring total University resources of clinical, basic and life sciences together.

The proposed dental research program here will bring together scientists with diverse backgrounds to work toward a better understanding of some of the problems of growth, development and function of areas of the face and head.

Activities of the Dental Research Center will encompass not only dental but also medical, biological, physical and the related sciences.

Research teams will concentrate initially on three areas: (1) the nervous system, (2) mineral metabolism and (3) blood clotting.

Research on "neural mechanisms" will involve the use of experimental techniques designed to study the role of the higher nervous system in the coordination of movements of the face and head, as well as its part in the functions of taste and smell and the control of saliva.

Studies of mineral metabolism will attempt to chart the

Frisbee Tourney Set For Thursday

"There are just so many things you can do with a frisbee," GM activities Chairman Mary Ann Fulton lamented a few days ago. She turned a frisbee's limitations into fun by innovation. This Thursday at 3:30 p.m. in front of Silent Sam, GM will sponsor a Frisbee Golf Tournament.

For golfers who get hung up on the hazards, this is the sport for you. And for frisbee players who are bored with just tossing the saucer, this is something new. Mary Ann said, "Maps will be given to girl caddies who will also keep score. The tournament will involve hitting various trees, statues, signs which are found on campus.

"The Golden Frisbee Award" will go to the low scorer.

Bring your own frisbee" Mary Ann advised. That's all it will take for this event to get out of hand.

Mary Ann put the event on the summer calendar because "we wanted something different."

Competition is open to girls and guys. While people are tossing the frisbee around, GM also plans to throw a watermelon feast.
